Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10220. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in §§ 560.602 and/or 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: 224-200531.

Title: Port of Seattle/Samson Tug and Barge Company, Inc. Terminal Agreement.

Parties:

Port of Seattle

Samson Tug and Barge Company, Inc.

Filing Party: Mr. Michael LaTorre, Director, Marine Services, Port of Seattle, P.O. Box 1209, Seattle, WA 98111.

Synopsis: The Agreement, filed June 14, 1991, provides a month to month agreement for the use of approximately 43,560 square feet of open storage yard area at the southwest corner of Terminal 115.

Dated: June 18, 1991.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

[Petition No. P3-91]

Trailer Marine Transport Corp. Application for Section 35 Exemption Puerto Rico and Virgin Island Trades

Notice is hereby given that Trailer Marine Transport Corporation ("TMT") has applied for an exemption pursuant to section 35 of the Shipping Act, 1916, 46 U.S.C. app. 833a. Specifically, TMT seeks an order from the Federal Maritime Commission to enlarge existing rate reduction exemptions from section 2 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 844, in the Puerto Rico and Virgin Islands trade, to allow publication on one day's notice of all individual carrier actions resulting in cost reductions to shippers.

In order for the Commission to make a thorough evaluation of the application for exemption, interested persons are requested to submit views or arguments on the application no later than July 22, 1991. Responses shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573-0001 in an original and 15 copies. Responses shall also be served on William H. Fort, Esq., Fort & Schlefer, 1401 New York Avenue, NW., Suite 1200, Washington, DC 20005.

VOL
56

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Alpha Financial Group, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than July 15, 1991.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Alpha Financial Group, Inc., Minonk, Illinois; to acquire 67.9 percent of the voting shares of Washburn Bancshares, Inc., Washburn, Illinois, and thereby indirectly acquire The Washburn Bank, Washburn, Illinois.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. The Merchants Holding Company, Winona, Minnesota; to acquire 28.72 percent of the voting shares of Bank of Melrose, Melrose, Wisconsin.

C. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Lawrence Financial Corporation, Lawrence, Kansas; to become a bank holding company by acquiring University National Bank, Lawrence, Kansas, successor to The Savings Bank of Lawrence F.S.B., Lawrence, Kansas.

Board of Governors of the Federal Reserve System, June 18, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Jan Schultz, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than July 15, 1991.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Jan Schultz, Margaret Schultz and John DiGiovanni of La Grange Park, Illinois; Frederick Brooks of St. Charles, Illinois; Michael Colbert of Schaumburg, Illinois; Anthony Kesman, Jr. of Lake Forest, Illinois; Jeannie Schultz of Olathe, Kansas; and William Handley of Bradenton, Florida; to acquire at least 26.6 percent of the voting shares of 1st Brookfield, Inc., Brookfield, Illinois, for a total of 31.0 percent, and thereby indirectly acquire First National Bank of Brookfield, Brookfield, Illinois.

Board of Governors of the Federal Reserve System, June 18, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

United Security Bancorporation; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 15, 1991.

A. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. United Security Bancorporation, Chewelah, Washington; to retain ownership of the assets of JLM Insurance Agency, Colville, Washington, and Ron Lee Insurance Agency, Chewelah, Washington, and thereby engage in insurance agency activities pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in Colville, Washington, and Chewelah, Washington.

Board of Governors of the Federal Reserve System, June 18, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[ATSDR-36]

Quarterly Health Assessments Completed and Health Assessments to be Conducted in Response to Requests From the Public

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR), Pubic Health Service (PHS), Department of Health and Human Services (DHHS).

ACTION: Notice.

SUMMARY: This notice contains the following: (1) A list of sites for which ATSDR has completed a health assessment, or issued an addendum to a previously completed health assessment, during the period January–March 1991. This list includes sites that are on, or proposed for inclusion on, the National Priorities List (NPL). (2) A list of sites for which ATSDR, during the same period, has accepted a request from the public to conduct a health assessment (petitioned health assessment). Acceptance of a request for the conduct of a health assessment is based on a determination by the Agency that there is a reasonable basis for conducting a health assessment at the site.

FOR FURTHER INFORMATION CONTACT: Robert C. Williams, P.E., Director, Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road, NE., Atlanta, Georgia 30333, telephone (404) 639-0610, FTS 238-0610.

SUPPLEMENTARY INFORMATION: A list of completed health assessments, health assessments with addenda, and petitioned health assessments which were accepted by ATSDR during October–December 1990 was published in the Federal Register on Friday, March 22, 1991 (56 FR 12204). The quarterly announcement is the responsibility of ATSDR under the regulation, Health Assessments and Health Effects Studies of Hazardous Substances Releases and Facilities (42 CFR part 90). The rule sets forth ATSDR's procedures for the conduct of health assessments under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) [42 U.S.C. 9604(i)] and appeared in the Federal Register on February 13, 1990 (55 FR 5136).

Availability

The completed health assessments are available for public inspection at the Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, Building 31, Executive Park Drive, Atlanta, Georgia (not a mailing address), between 8 a.m. and 4:30 p.m., Monday through Friday except legal holidays. The completed health assessments are now available by mail through the U.S. Department of Commerce, National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161, or by telephone at (703) 487-4650. There is a charge determined by NTIS for these health assessments. The NTIS order numbers are listed in parentheses after the site name.

1. Health Assessments or Addenda Completed or Issued for NPL Sites

Between January 1, 1991, and March 31, 1991, health assessments or addenda to health assessments were issued for the NPL sites listed below:

California

CTS Printex, Inc.—Mountain View (PB91-173534)

Connecticut

Gallup's Quarry Site—Plainfield (PB91-173492)

Idaho

Bunker Hill Mining and Metallurgical Complex—Kellogg (PB91-173104)

Iowa

Chemplex Company—Clinton (PB91-173153)

E.I. DuPont (County Road X-23), James Baier Farm Site and McCarl Farm Site—West Point (PB91-173526)

Kentucky

Green River Disposal, Inc.—Maceo (PB91-173146)

Massachusetts

Sullivan's Ledge—New Bedford (PB91-173500)

New Hampshire

Kearsarge Metallurgical Corporation—Conway (PB91-176545)

New York

Action Anodizing, Plating, and Polishing Corporation—Coplaque (PB91-173757)

C&J Disposal Leasing Company Dump—Eaton (PB91-173138)

Circuitron Corporation—Farmingdale (PB91-173112)

Niagara Mohawk Power Corporation (Saratoga Springs Plant)—Saratoga Springs (PB91-173096)

North Dakota

Old Minot Landfill—Minot (PB91-173120)

Pennsylvania

AMP, Inc. (Glen Rock Facility)—Glen Rock (PB91-173518)

East Mount Zion—Springettsbury Township (PB91-173633)

Vermont

Tansitor Electronics, Inc.—Bennington (PB91-173658)

Virginia

Arrowhead Associates, Inc./Scoville Corporation—Montross (PB91-173880)

Suffolk City Landfill—Suffolk (PB91-173666)

2. Petitions for Health Assessments Accepted

Between January 1, 1991, and March 31, 1991, ATSDR determined that there was a reasonable basis to conduct a health assessment for the sites or facilities listed below in response to requests from the public. As of March 31, 1991, ATSDR has initiated a health assessment at these sites.

Kentucky

National Coil Electric—Dayhoit

Mississippi

Country Club Lakes Estates—Hattiesburg

Dated: June 17, 1991.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

[FR Doc. 91-14918 Filed 6-21-91; 8:45 am]

BILLING CODE 4160-70-M

Centers for Disease Control

Hanford Thyroid Morbidity Study Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control (CDC) announces the following committee meeting.

Name: Hanford Thyroid Morbidity Study Advisory Committee.

Time and Date: 8:30 a.m.–5:15 p.m., July 9, 1991, 7:30 p.m.–9 p.m., July 9, 1991, 8:30 a.m.–2 p.m., July 10, 1991.

Place: Fred Hutchinson Cancer Research Center, 9th Floor Conference Room, 1124 Columbia Street, Seattle, Washington 98104.

VOL 56 ISS 121 JE 24 1991 UMI

Status: Open to the public, limited only by the space available.

Purpose: This committee is charged with providing advice and guidance to the Director, CDC, regarding the scientific merit and direction of the Hanford Thyroid Morbidity Study.

Matters to be Discussed: This is the second meeting of the Hanford Thyroid Morbidity Study Advisory Committee and the first to be held in the northwest. The Committee will listen to presentations by a number of interest groups and will comment on the status of various components of the Hanford Thyroid Morbidity Study. Specifically, the discussions will focus on scientific rationale, tribal activities and plans, and clinical detection of thyroid disease. On July 9 at 7:30 p.m., the meeting will continue in order to allow more time for public input and comment not addressed during the morning and afternoon sessions.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Mike Sage, Committee Manager, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, Center for Environmental Health and Injury Control, CDC, 1600 Clifton Road, NE., (F-28), Atlanta, Georgia 30333, telephone 404/488-4613 or FTS 236-4613.

Dated: June 18, 1991.

Robert L. Foster,

Assistant Director, Office of Program Support, Centers for Disease Control.

[FR Doc. 91-14919 Filed 6-21-91; 8:45 am]

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 91E-0106]

Determination of Regulatory Review Period for Purposes of Patent Extension; Bepadin® and Vascor®

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Bepadin® and Vascor® and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims these human drug products.

ADDRESSES: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20657.

FOR FURTHER INFORMATION CONTACT: Richard Klein, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently simultaneously approved for marketing the human drug products Bepadin® and Vascor®. Both Bepadin® and Vascor® (bepridil hydrochloride) are indicated in chronic stable angina. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for Bepadin® and Vascor® (U.S. Patent No. RE. 30,577) from Riom Laboratories C.E.R.M., and requested FDA's assistance in determining the patent's eligibility for patent term restoration. FDA, in a letter dated April 12, 1991, advised the Patent and Trademark Office that these human drug products had undergone a regulatory review period and that the approval of the active ingredient, bepridil hydrochloride, represented the first permitted commercial marketing or use of the product. Shortly thereafter, the Patent and Trademark Office requested that the FDA determine these products' regulatory review period.

FDA has determined that the applicable regulatory review period for Bepadin® is 4,658 days. Of this time, 2,108 days occurred during the testing phase of the regulatory review period, while 2,550 days occurred during the approval phase. These periods of time were derived from the following dates:

1. The Date an Exemption Under Section 505(i) of the Federal Food, Drug, and Cosmetic Act Became Effective

March 30, 1978. The applicant claims March 24, 1977, as the date the investigational new drug (IND) application for Bepadin® became effective. However, FDA records indicate that IND became effective on March 30, 1978.

2. The Date the Application Was Initially Submitted With Respect to the Human Drug Product Under Section 505(b) of the Federal Food, Drug, and Cosmetic Act

January 5, 1984. The applicant claims December 28, 1983, as the date the new drug application (NDA) for Bepadin® (NDA 19-001) was initially submitted. However, FDA records indicate that the application was received on January 5, 1984.

3. The Date the Application was Approved

December 28, 1990. FDA has verified the applicant's claim that NDA 19-001 was approved on December 28, 1990.

FDA has determined that the applicable regulatory review period for Vascor® is 3,207 days. Of this time, 649 days occurred during the testing phase of the regulatory review period, while 2,558 days occurred during the approval phase. These periods of time were derived from the following dates:

1. The Date an Exemption Under Section 505(i) of the Federal Food, Drug, and Cosmetic Act Became Effective

March 20, 1982. The applicant claims March 17, 1982, as the date the investigational new drug (IND) application for Vascor® became effective. However, FDA records indicate that the IND became effective on March 20, 1982.

2. The Date the Application was Initially Submitted With Respect to the Human Drug Product Under Section 505(b) of the Federal Food, Drug, and Cosmetic Act

FDA has verified the applicant's claim that NDA 19-002 was received on December 28, 1983.

3. The Date the Application was Approved

December 28, 1990. FDA has verified the applicant's claim that NDA 19-002 was approved on December 28, 1990.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 730 days of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before August 23, 1991, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before December 23, 1991, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: June 17, 1991.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

[FR Doc. 91-14934 Filed 6-21-91; 8:45 am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Privacy Act of 1974; Systems of Records

AGENCY: Department of Health and Human Services (HHS), Health Care Financing Administration (HCFA).

ACTION: Notice of proposed new routine use for two existing systems of records.

SUMMARY: HCFA is proposing to add a new routine use to two existing systems of records: the "Municipal Health Services Program," HHS/HCFA/ORD No. 09-70-0022, and the "Person-Level Medicaid Data System," HHS/HCFA/ORD No. 09-70-0033. In addition, we are taking this opportunity to make minor editorial changes to the "Municipal Health Services Program." We invite comments on these changes.

EFFECTIVE DATES: The proposed changes shall take effect July 24, 1991, unless comments received on or before that date would warrant modification to the notice.

ADDRESSES: The public should address comments to: Richard A. DeMeo, HCFA Privacy Act Officer, Office of Budget and Administration, Health Care Financing Administration, room 108 Security Office Park Building, 7006 Security Boulevard, Baltimore, Maryland 21207. Comments received will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Sydney P. Galloway, Office of Operations Support, Office of Research and Demonstrations, Health Care Financing Administration, room 2226 Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone (301) 966-6645.

SUPPLEMENTARY INFORMATION: The notice for the "Municipal Health Services Program," HHS/HCFA/ORD No. 09-70-0022, was most recently published in the Privacy Act Issuances, 1989 Compilation, Volume 1, Page 380. This system consists of bills and records submitted by clinics in the Municipal Health Services Program demonstrations to claim Federal reimbursement for services provided to Medicare beneficiaries.

The notice for the "Person-Level Medicaid Data System," HHS/HCFA/ORD No. 09-70-0033, was most recently published in the Privacy Act Issuances, 1989 Compilation, Volume I, Page 387. This system consists of unit record data files on all Medicaid enrollment, providers, and claims for hospital, physician, nursing home, prescription drug, and other Medicaid covered services in selected States beginning in 1980. This information contained in the records is obtained from existing State Medicaid Management Information Systems. The purpose of this system of records is to study Medicaid use and expenditures for basic research/information purposes and policy analysis.

HCFA's research routine use is normally included in all of HCFA's program system notices. We are proposing to add this routine use which was inadvertently left out of each of these systems of records. This will modify the system notice to permit HCFA to release data to research contractors and awardees and to contractors and awardees of other Federal agencies. These releases will be for research and evaluation projects that are determined by HCFA to be significant and which do not violate the agreements under which these data were voluntarily supplied by individual States and for which there is reasonable probability that the project will accomplish its objectives. Strict protection of the data by the requestor is required.

This routine use is similar in nature to the standard routine use that permits disclosure to a contractor for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in a system or for developing, modifying and/or manipulating ADP software.

To comply with the requirements of the Privacy Act, we are proposing to establish the routine use below, adding to previously published uses.

To an individual or organization for research or evaluation, if HCFA:

a. Determines that the proposed use does not violate the legal limitations under which the record was provided, collected, or obtained;

b. Determines that the proposed use does not violate the understandings with the States that voluntarily supplied the data;

c. Determines that the purpose for which the proposed use is to be made:

(i) Cannot be reasonably accomplished unless the record is provided in an individually identifiable form, and

(ii) Is of sufficient importance to warrant the effect on and/or risk to the privacy of the individual that additional exposure of the record might bring, and

(iii) There is a reasonable probability that the objective of the use would be accomplished;

d. Requires the recipient of the information to:

(i) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(ii) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and receives written authorization from HCFA that it is justified based on research objectives for retaining such information, and

(iii) Make no further use of the record except:

VOL 56 ISS 121 JE 24 1991 UMI

(a) Under emergency circumstances affecting the health or safety of any individual,

(b) For use in another research project, following written authorization of HCFA,

(c) For disclosure to an identified person approved by HCFA for the purpose of auditing the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(d) When required by law;

e. Secures a written statement by the recipient of the information attesting to the recipient's understanding of, and willingness to abide by, these provisions.

This new routine use is compatible with the purposes for which the information is collected because each system was established, in large part, to permit research (or evaluation) to be conducted. Addition of this new routine use can be accomplished with no reduction in Medicare beneficiary or Medicaid enrollee privacy because HCFA will impose requirements on the recipient of the data who must agree in writing to protect the data from unauthorized access and from being disclosed in a form that permits identification of individuals.

We are also taking this opportunity to make minor changes to the system notice for the "Municipal Health Services Program," HHS/HCFA/ORD No. 09-70-0022. These include extending the expiration date, changing the name of the evaluator and the location of the system, and updating the list of the clinics.

This action does not require a report of altered system under 5 U.S.C. 552a(o). For the convenience of the reader, the complete system notices are reprinted below.

Dated: June 18, 1991.

Gail R. Wilensky,

Administrator, Health Care Financing Administration.

09-70-0022

SYSTEM NAME:

Municipal Health Services Program.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Health Care Financing Administration (Primary Location), Office of Operations Support, Office of Research and Demonstrations (ORD), Division of Research and Demonstrations Systems Support, 6325 Security Boulevard, Baltimore, Maryland 21207; and Mathematica Policy Research, Inc., PO Box 2393, Princeton, New Jersey 08543-2393

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Medicare beneficiaries who obtain health care services at any of the clinics being funded under the Municipal Health Services Program (MHSP).

CATEGORIES OF RECORDS IN THE SYSTEM:

Bills and records submitted by MHSP clinics to claim Federal reimbursement for services provided to Medicare beneficiaries.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 402(a) of the Social Security Amendments of 1967, as amended by section 222(b)(1) of Public Law 92-603, and section 6135 of the Omnibus Budget Reconciliation Act of 1986, Public Law 101-239.

PURPOSE(S):

To provide billing data necessary to permit reimbursement and evaluation of the clinics participating in the MHSP.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made to:

1. A congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

2. The Department of Justice, to a court or other tribunal, or to another party before such tribunal, when

a. HHS, or any component thereof; or

b. Any HHS employee in his or her official capacity; or

c. Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

d. The United States or any agency thereof (when HHS determines that the litigation is likely to affect HHS or any of its components);

is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

3. To contractors for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in this system for developing, modifying and/or manipulating ADP software. Data would also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance for an ADP or telecommunications systems containing or supporting records in the system.

4. To an individual or organization for a research, demonstration, evaluation, or epidemiologic project related to the prevention of disease or disability or the restoration or maintenance of health if HCFA:

a. Determines that the use of disclosure does not violate legal limitations under which the record was provided, collected, or obtained;

b. Determines that the research purpose for which the disclosure is to be made:

(1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form, and

(2) Is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring, and

(3) There is reasonable probability that the objective for the use would be accomplished.

c. Requires the recipient to:

(1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(2) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the researching project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and

(3) Makes no further use or disclosure of the record except:

(a) In emergency circumstances affecting the health or safety of any individual, or

(b) For use in another research project, under these same conditions, and with the written authorization of HCFA, or

(c) For disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(d) When required by law;

d. Secures a written statement attesting to the recipient's understanding of a willingness to abide by these provisions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

ORD will store data of hardcopy billing forms and machine readable media in secure storage areas.

RETRIEVABILITY:

ORD retrieves the data by beneficiary name, date of service, and clinic name. ORD will use the data to determine the appropriate level of reimbursement to be made to MHSP clinics.

SAFEGUARDS:

ORD will maintain all records in secure storage areas accessible only to authorized employees and will notify all employees having access to records of criminal sanctions for unauthorized disclosure of information on individuals. ORD will store hardcopies of forms in the file cabinets in a locked office. For computerized records, HCFA will initiate ADP systems security procedures with reference to the guidelines contained in the HHS Information Resource Management Manual, Part 6, ADP System Security (e.g., HHS will store machine readable media in locked cabinets in a locked room accessible only to authorized personnel).

RETENTION AND DISPOSAL:

ORD will retain hardcopy bills and machine readable media tapes with identifiers in secure storage areas. HCFA waivers permitting reimbursement to MHSP clinics will be effective through December 1993. Therefore HCFA will retain all hardcopy and magnetic tape of disc data until December 1994. At that time, HCFA will destroy all hardcopy and strip all machine readable media of all identifying names and numbers by degaussing.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Research and Demonstrations, Health Care Financing Administration, Room 2230, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

NOTIFICATION PROCEDURE:

Individuals should address inquiries and requests concerning system records to the system manager, named above, specifying name, date of service, and clinic.

RECORD ACCESS PROCEDURE:

Any beneficiary who participates in the MHSP may request his or her data record in writing. Access procedure is the same as notification procedure. Requestor should also reasonably specify the record contents being sought. These procedures are in accordance with Department Regulations (45 CFR 5b.5(a)(2)).

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under notification procedure above, and reasonably identify the record and specify the information to be contested. State the corrective action sought and the reasons for the correction with supporting justification. (These procedures are in accordance with Department Regulations (45 CFR 5b.7).)

RECORD SOURCE CATEGORIES:

The information contained in this record system originates at MHSP clinics, specified in Appendix A to this notice, whenever a Medicare beneficiary obtains clinic services. Clinics in three of the cities, specified in Appendix B to this notice, will store hardcopies or machine readable media copies of the bills in their city health departments.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

SYSTEM NAME:

Person-Level Medicaid Data System, HHS/HCFA/ORD.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Office of Research, ORD, HCFA, 6325 Security Boulevard, Baltimore, Maryland 21207.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who are enrolled in the Medicaid program under either Federal or State provisions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Data from 5 State Medicaid agencies (California, Georgia, Michigan, New York, and Tennessee) showing the demographic characteristics of the enrolled population, claims submitted for covered medical services, and provider characteristics.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 1902(a)(6) of the Social Security Act (42 U.S.C. 1396(a)(6)).

PURPOSE(S):

To study Medicaid use and expenditures in order to increase HCFA's understanding of the Medicaid and Medicare programs and to improve HCFA's ability to conduct program evaluation, strengthen program management, evaluate policy alternatives, conduct and evaluate demonstration projects, and advise States in the area of Medicaid financing. The proposed system will be used for purposes of research and statistics only.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made.

(1) To a Congressional office from the records of an individual in response to

VOL 56 ISS 121 JE 24 1991 UMI

an inquiry from the Congressional office made at the request of that individual.

(2) To a contractor for the purpose of collating, analyzing, aggregating or otherwise refining or processing records in this system for developing, modifying and/or manipulating ADP software. Data would also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance for an ADP or telecommunications systems containing or supporting records in the system.

(3) To a State Medicaid agency of a State participating in the Person-Level Medicaid Data System project. Disclosure may be made to a State only of data on eligibles in that State and only for purposes of research and statistics.

(4) To the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when

(a) HHS, or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States of any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components,

is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

To an individual or organization for research or evaluation, if HCFA:

a. Determines that the proposed use does not violate the legal limitations under which the record was provided, collected, or obtained;

b. Determines tht the proposed use does not violate the understandings with the States that voluntarily supplied the data;

c. Determines that the purpose for which the proposed use is to be made:

(i) Cannot be reasonably accomplished unless the record is provided in an individually identifiable form, and,

(ii) Is of sufficient importance to warrant the effect on and/or risk to the privacy of the individual that additional exposure of the record might bring, and

(iii) There is a reasonable probability that the objective of the use would be accomplished;

d. Requires the recipient of the information to:

(i) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(ii) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and receives written authorization from HCFA that it is justified based on research objectives for retaining such information, and

(iii) Make no further use of the record except:

(a) Under emergency circumstances affecting the health or safety of any individual,

(b) For use in another research project, following written authorization of HCFA,

(c) For disclosure to an identified person approved by HCFA for the purpose of auditing the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(d) When required by law;

e. Secures a written statement by the recipient of the information attesting to the recipient's understanding of, and willingness to abide by, these provisions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are stored on magnetic tape and computer disk.

RETRIEVABILITY:

Enrollment records are retrieved by Medicaid and Medicare identification numbers. Provider records are retrieved by Medicaid and Medicare provider identification numbers. Claims records contain both enrollee and provider identification numbers.

SAFEGUARDS:

For computerized records, safeguards established in accordance with guidelines in the DHHS ADP Systems Manual, Part 6, "ADP Systems Security," (e.g., security codes, use of passwords) will be used, limiting access to authorized personnel.

RETENTION AND DISPOSAL:

Records are maintained in a secure storage area with identifiers as long as needed for program research. Records will be disposed 3 years after research is completed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Research and Demonstrations, Health Care Financing Administration, Room 2230, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

NOTIFICATION PROCEDURE:

To determine if a record exists, write to the System Manager at the address shown above and give: (1) Name of system, (2) Medicaid identification number, (3) person's name, (maiden name, if applicable), (4) social security number (provision of social security number is voluntary), (5) address, (6) date of birth, and (7) sex. To ascertain whether the individual had utilization, give date of service and type of Medicaid service (i.e., outpatient, physician, dental, prescription, long-term care, home health, inpatient acute care, etc.).

RECORD ACCESS PROCEDURE:

Same as notification procedures. Requesters should also reasonably specify the record contents.

CONTESTING RECORD PROCEDURES:

Contact the System Manager named above, and reasonably identify the record and specify the information being contested. State the reason for contesting the records procedure with supporting justification, (e.g., why it is inaccurate, irrelevant, incomplete or not current).

RECORD SOURCE CATEGORIES:

Medicaid and Medicare enrollment, claims, and provider records.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4120-03-M

Health Resources and Services Administration

Availability of Funds for Demonstration Grants to States for Community Scholarship Programs

AGENCY: Health Resources and Services Administration.

ACTION: Notice of availability of funds.

SUMMARY: The Health Resources and Services Administration (HRSA) announces that approximately $500,000 is available in fiscal year (FY) 1991 for demonstration grants to states for Community Scholarship Programs (CSP), as authorized under Section 338L of the Public Health Service Act.

Grants will be awarded to States for the purpose of increasing the availability of primary health care in urban and rural health professional shortage areas (HPSA) by assisting community organizations in rural and urban areas to provide scholarships for the education of individuals to serve as health professionals in these areas.

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. This grant program is related to the following priority area: To increase the availability of primary health care in urban and rural HPSAs by assisting community organizations located in HPSAs in providing scholarships for the education of individuals to serve as primary care health professionals in these areas. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-0325 (telephone number 202-783-3238).

DUE DATES: To receive consideration, grant applications must be received by the Grants Management Office indicated below by July 25, 1991. Applications shall be considered as meeting the deadline if they are either (1) received on or before the deadline date; or (2) postmarked on or before the deadline date and received in time for submission to the review committee. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted as proof of timely mailing. Applications received after the announced closing date will not be considered for funding and will be returned to the applicant.

ADDRESSES: An application kit (Form PHS 5161-1 as approved by the OMB under control number 0937-0189) may be requested by calling (301) 443-5887 or writing, to: Mrs. Harriet Green, Grants Management Branch (GMB), Bureau of Health Care Delivery and Assistance, 12100 Parklawn Drive, Rockville, Maryland 20857. Completed applications must be mailed to the same address. The GMB can also provide assistance on business management issues.

FOR FURTHER INFORMATION CONTACT: For further program information and technical assistance please contact Ms. Cheryl A. LaPointe, M.P.H., National Health Service Corps, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, 5600 Fishers Lane, room 7A-29, Rockville, Maryland 20857, (301) 443-1470.

SUPPLEMENTARY INFORMATION: Under this program, States will enter into agreements with public or private nonprofit community organizations located in HPSAs which will recruit qualified residents of their communities and provide scholarships to them to become physicians, certified nurse practitioners, certified nurse midwives, or physician assistants based on the needs of the communities.

This demonstration grant program is intended to be consistent with the efforts of the National Health Service Corps (NHSC) Scholarship and Loan Repayment Programs to meet the needs of underserved populations within HPSAs through the placement of primary care practitioners.

Grants averaging $45,000 will be made to up to 15 States, and only one grant will be made to each State annually. All awards will be for one year with project periods of up to three years. The number of grants will depend on the number of scholarships and types of practitioner training requested by the States. In an effort to assist the States and their communities in recruiting primary care practitioners, the Federal portion of the grant will provide for 40 percent of the costs of each scholarship. The States and local communities will be responsible for the remainder of the costs of the CSP. The Secretary is required by statute (Section 338L(1)(3) of the PHS Act) to ensure that, to the extent practicable, not less than 50 percent of the amount appropriated will be in the aggregate expended for making grants to community organizations that are located in rural HPSAs. In carrying out this requirement, however, the Secretary may not deny grants to States in which no rural HPSAs are located.

In order for a State to receive a grant under this program, the State must:

1. Have received funding for at least one grant, cooperative agreement, or contract under any provision of the Public Health Service Act other than section 338L, for the fiscal year for which the State is applying;

2. Agree that the grant program carried out by the State will be administered directly by a single State agency;

3. Agree to make grants to community organizations located in HPSAs in order to assist those community organizations in providing scholarships to individuals enrolled or accepted for enrollment as full-time students in health professions schools (see definition of "primary health care");

4. Agree that forty percent of the total costs of the scholarship will be paid from the Federal grant made to the State;

5. Agree that sixty percent of the total costs of the scholarship will be paid from non-Federal contributions made in cash by both the State and the community organization through which the scholarship is provided.

a. The State must make available through these cash contributions not less than 15 percent nor more than 25 percent of the scholarship costs.

b. The community organization must make available through these cash contributions not less than 35 percent nor more than 45 percent of the scholarship costs.

Non-Federal contributions provided in cash by the State and community organization (as in a and b above) may not include any amounts currently provided by the Federal Government to the State, or community organization involved, or to any other entity.

Non-Federal contributions required may be provided directly by the State and community organization involved, and may be provided through donations from public and private entities.

The Secretary will not award a grant unless the State involved agrees to carry out the purpose of the CSP grant program by operating a program through which the State makes grants to community organizations located in HPSAs in order to assist the organizations with the costs of entering into contracts under which—

1. Each community organization agrees to provide scholarships to individuals for attendance at health professional schools;

2. Each individual who is to receive a scholarship agrees to provide primary health care in a HPSA in which a community organization is located for:

a. A number of years equal to the number of years for which the scholarship is provided, or for a period of 2 years, whichever period is greater; or

b. Such greater period of time as the individual and the community organization may agree.

For purposes of this program, the term "primary health care" means health

VOL

121
JE
24
1991
UMI

services regarding family medicine, internal medicine, pediatrics, or obstetrics and gynecology, that are provided by physicians, certified nurse practitioners, certified nurse midwives, or physician assistants.

Scholarship Contracts

To receive a grant, the State must agree that it will award a grant to a community organization for scholarships only if:

1. The individual who is to receive the scholarship under a contract is a resident of the HPSA in which the community organization is located.

2. The individual is enrolled or accepted for enrollment as a full-time student in a health professions school that is accredited by a body or bodies recognized for accreditation purposes by the Secretary of Education.

3. The individual agrees to maintain a level of academic standing at the school at which a full-time student retains eligibility to continue in attendance in school under the school's standards and practices.

4. The individual and the community organization agree that the scholarship:

a. Will be expended only for tuition expenses, other reasonable educational expenses, reasonable living expenses incurred while in attendance at the school, and for payment to the individual of a monthly stipend not more than the amout authorized for NHSC scholarship recipients under section 338A(g)(1)(B) of the PHS Act; and

b. Will not, for any year of such attendance for which the scholarship is provided, be in an amount exceeding the total amount required for the year for the purposes indicated in paragraph (a) above.

5. The individual agrees to meet the educational, certification, and licensure requirements necessary to become a physician, nurse practitioner, midwife, or physician assistant in the State in which the individual is to practice under the contract.

6. The individual agrees that, in providing primary health care pursuant to the scholarship, the individual (a) will not, in the case of an individual seeking care, discriminate on the basis of the ability of the individual to pay for such care or on the basis that payment for such care will be made pursuant to the program established in title XVIII of the Social Security Act (Medicare) or pursuant to the program established in title XIX of such Act (Medicaid), and (b) will accept assignment under section 1842(b)(3)(B), 1842(b)(3)(B)(ii) of the Social Security Act for all services for which payment may be made under part B of title XVIII of such Act, and will enter into an appropriate agreement with the State agency that administers the State plan for medical assistance under title XIX of such Act to provide service to individuals entitled to medical assistance under the plan.

Evaluaton Criteria

Applications for grants will be reviewed and evaluated according to the following criteria

(a) The extent to which the application describes a mechanism to determine the appropriateness of a community organization's participation in the CSP;

(b) The strength of the applicant's plan to monitor and evaluate a CSP;

(c) The ability of the applicant to administer a CSP, i.e., the administrative and managerial capability and staff experience;

(d) The extent to which the application justifies and documents the number and type of primary care providers the State proposes to support through this program relative to the needs of the community;

(e) The level of community commitment and involvement with the program including coordination with other Federal, State, and community programs for meeting health professional needs;

(f) The extent to which the applicant's and community's recruitment plans are consistent with long-term plans for meeting the needs of the community's primary care system; and

(g) The extent to which the application provides estimates of the amounts of the grant funds that will be expended on primary care for rural HPSAs and a similar estimate for urban HPSAs.

Other Grant Information

The CSP demonstration grant program is subject to the provisions of Executive Order 12372, as implemented by 45 CFR part 100, which allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application package for this program will include a list of States with review systems and the single point of contact (SPOC) in each State for the review. Applicants (other than federally-recognized Indian tribal governments) should contact their State SPOCs as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the application deadline. The Bureau of Health Care Delivery and Assistance does not guarantee that it will accommodate or explain its response to State process recommendations received after that date.

Grants will be administered in accordance with HHS regulations in 45 CFR part 92.

The OMB Catalog of Federal Domestic Assistance number for this program is 93.

Dated: May 13, 1991.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-15-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV-010-01-4130-09-2519]

Availability of Final Environmental Impact Statement and Record of Decision on the Betze Mining Plan-of-Development in Northeastern Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of the final environmental impact statement and record of decision on the Betze Mining Plan-of-Development in Northeastern Nevada.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management, U.S. Department of the Interior has prepared, by a third party contractor, a final environmental inpact statement (EIS) on the Betze plan-of-development in Northeastern Nevada, and has made copies of the document available for public review.

In addition, the BLM has released simultaneously with the FEIS, the Record of Decision (ROD) for the Betze Project. This project cannot begin until at least the public has had at least thirty days to review the FEIS.

The final EIS analyzes the environmental impacts that would result from the expansion of an existing open pit mining operation and the alternatives to that project.

DATES: Written comments on the final EIS and ROD will be accepted until July 22, 1991.

ADDRESSES: A copy of the final EIS and ROD can be obtained from: District Manager, Bureau of Land Management, ATTN: Betze Coordinator, P.O. Box 831, Elko, NV 89801.

The final EIS is available for inspection at the following locations: BLM State Office (Reno), Carson City, Ely, and Elko County Libraries, and the University of Nevada libraries in Reno and Las Vegas.

Written responses may be sent to the above address on or before close of business on July 22, 1991.

FOR FURTHER INFORMATION CONTACT: For additional information, write to the above address or call Nick Rieger at (702) 753-0200.

Dated: June 11, 1991.

Rodney Harris,

District Manager.

Craig Colorado Advisory Council; Meeting

Time and date: July 10, 1991 10 a.m.

Place: BLM—Craig District Office, 455 Emerson Street, Craig, Colorado 81625.

Status: Open to public; interested persons may make oral statements at 10:30 a.m. Summary minutes of the meeting will be maintained in the Craig District Office.

Matters to be Considered

1. Status Report on Resolutions.
2. Status of Occidental C-b.
3. Colorado Division of Wildlife's Harvest Statistics.
4. Colorado Division of Wildlife's Deer, Elk, and Antelope Program Issues.
5. Habitat Partnership Program Update.
6. Recreation 2000.
7. Election of Officers.

Contact Person for More Information: Mary Pressley, Craig District Office, 455 Emerson Street, Craig, Colorado 81625-1129, phone (303) 824-8261.

Dated: June 14, 1991.

[UT-060-01-4320-02]

Moab District Grazing Advisory Board Meeting

June 14, 1991.

AGENCY: Bureau of Land Management, Moab, Interior.

ACTION: Moab District Grazing Advisory Board Meeting.

SUMMARY: Notice is hereby given in accordance with Public Law 92-463 that a meeting of the Moab District Grazing Advisory Board will be held on July 23, 1991. The meeting will be conducted during a field tour of the Comb Wash Coordinated Resource Management (CRMP) Planning Area west of Blanding, Utah. Participants in the tour will meet at the San Juan Resources Area office, 435 North Main, Monticello, Utah at 10 a.m. on July 23, 1991. The public will need to provide their own transportation for the tour, some of the roads which are on the tour route may require four-wheel drive. The tour site is approximately 50 miles southwest of Monticello, Utah.

Agenda items which will be discussed during the tour include:

1. Description/briefing on the Comb Wash CRMP;
2. Update on Range Valley Mountain CRMP/Habitat Management Plan;
3. Update on San Rafael and San Juan Final Resource Management Plans;
4. Update on Drought problems and concerns;
5. Briefing on Nature Conservancy's Acquisition of the Cunningham Ranch.

The meeting and tour is open to the public. Interested persons may make oral statements to the Board or file written statements for the Board's consideration. Anyone wishing to make an oral statement must submit a written summary of their statement to the District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532 by July 19, 1991. Written statements submitted for the Board's consideration must be received at the above address on or before July 19, 1991. Summary minutes of the Board meeting will be maintained in the District office and will be available within thirty (30) days following the meeting.

Gene Nodine,

District Manager.

Roswell District Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Roswell District Grazing Advisory Board, Meeting.

SUMMARY: This notice sets forth the schedule and agenda of a forthcoming meeting of the Roswell District Grazing Advisory Board.

DATES: Tuesday, July 23, 1991, beginning at 10 a.m. A public comment period will be held following conclusion of the agenda.

LOCATION: BLM Roswell District Office, 1717 West Second St., Roswell, New Mexico 88201.

FOR FURTHER INFORMATION CONTACT: David L. Mari, Associate District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, NM 88202-1397.

SUPPLEMENTARY INFORMATION: The agenda will consist of review and discussion of FY 92 Range Improvement Projects, and as time permits, updates on land exchanges, Resource Management Plans, Archeological Studies-land exchanges, quarterly billings, monitoring studies, and GAO visit to Carslbad Resource Area. The meeting is open to the public. Interested persons may make oral statements to the Board during the public comment period or may file written statements. Anyone wishing to make an oral statement should notify the Associate District Manager by July 16, 1991. Summary minutes will be maintained in the District Office and will be available for public inspection during regular business hours, within 30 days following the meeting. Copies will be available for the cost of duplication.

Dated: June 14, 1991.

BILLING CODE 4310-FB-M

Bureau of Reclamation

Fish and Wildlife Service

Truckee River Operating Agreement, California and Nevada

AGENCY: Bureau of Reclamation (Interior) and U.S. Fish and Wildlife Service (Interior).

ACTION: Notice of intent to prepare a draft environmental impact statement/draft environmental impact report and notice of public scoping meetings.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, and section 21002 of the California Environmental Quality Act, the Bureau of Reclamation (Reclamation), the U.S. Fish and Wildlife Service, and the California Department of Water Resources will prepare a joint draft environmental impact statement/draft environmental impact reprot (DEIS/DEIR) for an operating agreement for the Truckee River reservoirs in California and Nevada. The purpose of this project is to

VOL 56 ISS 121 JE 24 1991 UMI

modify the current method of river regulation and coordinate the operation of the Truckee River reservoirs to improve the management of instream flows in the Truckee River basin, provide a municipal water supply during drought periods for the Reno-Sparks area, and enhance spawning flows for the endangered cui-ui and threatened Lahontan cutthroat trout in the lower Truckee River.

DATES/ADDRESSES: Five public meetings have been scheduled to solicit public input to determine alternatives to the proposed action and the scope of the DEIS/DEIR and to identify significant issues related to the proposed action:

- July 22, 1991, 7 p.m., Tahoe-Truckee Sanitation Agency, Joerger Drive, Truckee, California (Highway 267 to Joerger Drive, next to Teichert Aggregate);
- July 23, 1991, 7 p.m., City of South Lake Tahoe Council Chambers, 1900 Lake Tahoe Boulevard, South Lake Tahoe, California;
- July 24, 1991, 1 p.m., City of Reno Council Chambers, 400 South Center, Reno, Nevada;
- July 24, 1991, 7 p.m., Pyramid Lake Paiute Indian Tribal Council Chambers, Nixon, Nevada; and
- July 25, 1991, 7 p.m., Fallon Community Center, 100 Campus Way, Fallon, Nevada.

FOR FURTHER INFORMATION CONTACT: Mr. Alan Olson, Bureau of Reclamation, Lahontan Basin Projects Office, 705 N. Plaza St., P.O. Box 640, Carson City, Nevada 89702, Telephone: (702) 882-3436; Mr. Tom Strekal, U.S. Fish and Wildlife Service, 4600 Kietzke Lane, Building C, Reno, Nevada 89502, Telephone: (702) 784-5227; or Ms. Sandra Maxwell, California Department of Water Resources, Central District, 3251 "S" Street, Sacramento, California 95816, Telephone: (916) 445-2592.

SUPPLEMENTARY INFORMATION: The Truckee River Operating Agreement is authorized in section 205 of title II (known as the "Truckee-Carson-Pyramid Lake Water Rights Settlement Act") of Public Law 101-618 (Pub. L. 101-618). The major purposes of title II are to ratify and implement a settlement involving the Pyramid Lake Paiute Tribe, the Sierra Pacific Power Company, the States of California and Nevada, the Federal Government, and other parties regarding apportioning Truckee River, Carson River, and Lake Tahoe waters, enhancing threatened and endangered species, and preserving wetlands.

Certain provisions of Pub. L. 101-618 will not take effect until several agreements, including the Truckee River Operating Agreement, are signed. The lakes and reservoirs affected by the operating agreement include both Federal (Lake Tahoe and Prosser Creek, Stampede, and Boca Reservoirs) and private facilities (Donner and Independence Lakes). The operating agreement does not require constructing any new water supply facilities. However, mitigation measures implemented as part of the agreement could include modifying existing facilities, such as installing stream gauges.

Alternatives being considered involve various changes to the existing streamflow requirements (known as Floriston rates or reduced Floriston rates, as established by Federal District Court decree) for the Truckee River at certain times of the year. Other alternatives may include altering some current procedures regarding reservoir storage and release for the affected reservoirs. These changes would be accomplished by negotiations among the settlement parties and related water rights holders; no third-party water rights would be affected. Other existing requirements, such as flood control criteria of the U.S. Army Corps of Engineers, would also remain unchanged. A no-action alternative will be included in the DEIS/DEIR.

The DEIS/DEIR will be completed and available for review and comment in 1994. Impacts that will be evaluated in the document include the effects of changes in reservoir levels and instream flows on littoral and riparian plants and fish and wildlife resources, water supply and water quality, recreation, and urban development. Other impacts discussed in the document will include those identified in the upcoming scoping process.

Anyone may participate in the scoping process by attending any of the scheduled public meetings. Interested parties may also submit written comments to Reclamation, the Fish and Wildlife Service, or the State of California postmarked no later than Tuesday, September 3, 1991. Anyone interested in more information concerning the propsoed project or who has other significant environmental issues should contact Messrs. Olson or Strekal or Ms. Maxwell at the addresses shown above.

Acting Regional Director,
U.S. Fish and Wildlife Service.

Dated: June 13, 1991.

Terry P. Lynott,

Director, Program Services Division, U.S. Bureau of Reclamation.

BILLING CODE 4310-09-M

Fish and Wildlife Service

Availability of a Draft Recovery Plan for the Speckled Pocketbook (Lampsilis streckeri) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for the speckled pocketbook mussel (*Lampsilis streckeri*). This species occurs in the Middle Fork of the Little Red River, Arkansas. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before August 23, 1991, to receive consideration by the Service .

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Jackson Field Office, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Jackson, Mississippi 39213. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Jim Stewart at the above address (601/965-4900).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, criteria for recognizing the recovery levels for downlisting or delisting them, and initial estimates of times and costs to implement the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The primary species considered in this draft recovery plan is the speckled pocketbook mussel, *Lampsilis streckeri*. The area of emphasis for recovery actions is the headwater streams of the Little Red River, Arkansas. The historic range within this system has been adversely impacted by impoundment, water pollution and channel modification. Habitat restoration and protection, reestablishing populations and management are major objectives of this recovery plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: June 12, 1991.

Robert Bowker,

Complex Field Supervisor.

BILLING CODE 4310-55-M

Minerals Management Service

Outer Continental Shelf Advisory Board Gulf of Mexico Regional Technical Working Group; Meeting

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Gulf of Mexico Regional Working Group (RTWG) Meeting.

SUMMARY: Notice of this meeting is issued in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463). The Gulf of Mexico RTWG meeting will be held July 23-24, 1991, 9 a.m. to 4 p.m., at the Holiday Inn Beachfront, Highway 90, Gulfport, Mississippi

The RTWG business meeting will be held July 24, 1991, and tentative agenda items are as follows:

- Roundtable Discussion
- Update on the MIRG Model
- Information Base Review
- Coordination of Coastal Natural Resources Information

FOR FURTHER INFORMATION: This meeting is open to the public. Individuals wishing to make oral presentations to the committee concerning agenda items should contact Ann Hanks of the Gulf of Mexico OCS Regional Office at (504) 736-2589 by July 10, 1991. Written statements should be submitted by the same date to the Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123.

A transcript and complete summary minutes of the meeting will be available for public inspection in the Office of the Regional Director at the above address not later than 60 days after the meeting.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico RTWG is one of six such Committees that advises the Director of the Minerals Management Service on technical matters of regional concern regarding offshore prelease and postlease sale activities. The RTWG membership consists of representatives from Federal Agencies, the coastal States of Alabama, Florida, Louisiana, Mississippi, and Texas, the petroleum industry, the environmental community, and other private interests.

Dated: June 13, 1991.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

DEPARTMENT OF JUSTICE

Federal Prison Industries, Inc.

UNICOR Independent Market Study Briefing

AGENCY: Federal Prison Industries, Inc., Bureau of Prisons, Justice.

ACTION: Notice.

SUMMARY: Efforts are underway to complete an independent market study of UNICOR, based on the objectives set forth in Public Law 101-515 and the statement of work included in the contract awarded to conduct the study (contract # 1PI-C-0009-91). A final public briefing, conducted by Deloitte & Touche, has been scheduled to highlight study findings, conclusions and recommendations. The final study report is due to Congress on August 5, 1991.

DATES: The briefing is scheduled for Thursday, July 25, 1991, from 10 a.m. to 12 noon.

ADDRESSES: The briefing will be held in the Rayburn House Office Building, room 2359A, Independence Avenue, Washington, DC.

FOR FURTHER INFORMATION CONTACT: John Foreman, (202) 955-4194.

Dated: June 18, 1991.

BILLING CODE 4410-05-M

Office of Special Counsel for Immigration Related Unfair Employment Practices

Immigration Related Employment Discrimination Public Education Grants

AGENCY: Office of Special Counsel for Immigration Related Unfair Employment Practices, Department of Justice.

ACTION: Notice of availability of funds and solicitation for grant applications.

SUMMARY: The Office of Special Counsel for Immigration Related Unfair Employment Practices ("OSC") announces the availability of funds for grants to conduct public education programs about the rights afforded potential victims of employment discrimination and the responsibilities of employers under the antidiscrimination provision of the Immigration Reform and Control Act of 1986, 8 U.S.C. 1324b.

It is anticipated that a number of grants will be competitively awarded to applicants who can demonstrate a capacity to design and successfully implement public education campaigns to combat immigration-related employment discrimination. Grants will range in size from $40,000 to $150,000.

OSC will accept proposals from applicants who have access to potential victims of discrimination or whose experience qualifies them to educate employers about the antidiscrimination provision of IRCA. Accordingly, OSC will accept proposals from diverse sources, such as not-for-profit community-based organizations, qualified designated entities (QDEs), and local ethnic and immigrants' rights advocacy organizations which serve potential victims of discrimination. OSC also welcomes proposals from trade associations, industry groups, professional organizations, and other not-for-profit entities providing information services to employers.

APPLICATION DEADLINE DATE: August 8,1991.

FOR FURTHER INFORMATION CONTACT: Juan Maldonado, Senior Trial Attorney

VOL 56 ISS 121 JE 24 1991 UMI

or Pattie McEvoy, Public Affairs Specialist, Office of Special Counsel for Immigration Related Unfair Employment Practices, 1100 Connecticut Ave., NW., suite 800, P.O. Box 65490, Washington, DC 20035-5490. Tels. (202) 653-8121, 1-800-255-7688 (toll-free), (202) 298-0168 (TDD for the hearing impaired), or 1-800-237-2515 [toll-free TDD for the hearing impaired.

SUPPLEMENTARY INFORMATION: The Office of Special Counsel for Immigration Related Unfair Employment Practices of the Department of Justice ("DOJ") announces the availability of funds to conduct public education programs concerning the antidiscrimination provision of the Immigration Reform and Control Act of 1986 ("IRCA"), 8 U.S.C. 1324b. Funds will be awarded to selected applicants who propose innovative and effective ways of disseminating information to employers and members of the protected class or to those who can fill a particular need not currently being met.

Background

On November 6, 1986, President Reagan signed into law the Immigration Reform and Control Act of 1986, Public Law No. 99-603. IRCA makes hiring aliens without work authorization unlawful, and it requires that employers verify the identity and work authorization of all new employees. Employers who violate this law are subject to sanctions including fines and criminal prosecution.

During congressional debate of IRCA, Congress foresaw the possibility that employers, fearful of sanctions, would refuse employment to individuals simply because they looked or sounded foreign. Consequently, Congress enacted section 102 of IRCA, an antidiscrimination provision. Section 102 prohibits employers from discriminating against citizens and work authorized aliens who are protected individuals in hiring, firing, recruitment or referral for a fee. Protected non-citizens include permanent residents, temporary residents under the amnesty, the Special Agricultural Workers (SAWs) or the Replenishment Agricultural Workers (RAWs), refugees and asylees who apply for naturalization within six months of being eligible to do so. National origin discrimination against *any* work authorized individual is also prohibited. This prohibition applies to employers with four to fourteen employees. National origin discrimination complaints against employers with fifteen or more employees remain under the jurisdiction of the Equal Employment Opportunity Commission under Title VII of the Civil Rights Act of 1964.

Congress created the OSC to enforce section 102. OSC is responsible for receiving and investigating discrimination charges and, when appropriate, filing complaints with a specially designated administrative tribunal. OSC also initiates independent investigations of possible section 102 violations.

While OSC has established a record of vigorous enforcement, studies by the U.S. General Accounting Office and others have shown that there is an extensive lack of knowledge on the part of protected individuals and employers about the antidiscrimination provision. Enforcement cannot be effective if potential victims of discrimination are not aware of their rights. Moreover, discrimination can never be eradicated so long as employers are not aware of their responsibilities.

Purpose

OSC seeks to educate both potential victims of discrimination about their rights and employers about their responsibilities under the antidiscrimination provision of IRCA.

Program Description

The program is designed to develop and implement innovative and cost effective approaches to disseminating information regarding IRCA's antidiscrimination provision. The campaign should focus on educating potential victims of employment discrimination about their rights and educating employers about their responsibilities under IRCA. Applications may propose to educate potential victims only, employers only, or both in a single campaign. Proposals should outline the following key elements of the program:

Part I: Targeted Population

The educational efforts under the grant should be directed to (1) work authorized aliens who are protected individuals, since this group is especially vulnerable to employment discrimination, and/or to (2) employers. The proposals should define the characteristics of the work authorized alien population or the employer group(s) targeted for the educational campaign.

The proposals should also detail the reasons for targeting each group of protected individuals or employers by describing particular needs or other factors to support the selection. In defining the campaign targets and supporting the reasons for the selection, applicants may use studies or surveys conducted in the area, or any other sources of information of generally accepted reliability.

Part II: Campaign Strategy

We encourage applicants to devise innovative, creative and effective means of public education and information dissemination that are specifically designed to reach the campaign targets. Those applicants proposing educational campaigns addressing potential victims of discrimination should keep in mind that some of the traditional methods of public communication may be less than optimal for disseminating information to members of national or linguistic groups that have limited community-based support and communication networks.

Proposals should discuss the components of the campaign strategy, detail the reasons supporting the choice of each component, and explain how each component will effectively contribute to the overall objective of innovative and cost effective dissemination of correct information to protected individuals or employers. Discussions of the campaign strategies and supporting rationale should be clear, concise, and based on sound evidence and reasoning.

A key element of the campaign is the accuracy of information disseminated about the OSC and its mission. Accordingly, any outreach and educational materials developed by a grantee must be reviewed by OSC for legal accuracy and proper emphasis prior to production. All information distributed should also include mention of the OSC as a source of assistance, information and action and the correct address and telephone numbers of the OSC (including the toll-free and TDD toll-free numbers for the hearing impaired)

Part III: Evaluation of the Strategy

One of the central goals of this program is determining what public education strategies are most effective in dispersing information about the antidiscrimination provision. To be effective in planning future public education efforts, OSC needs to know what works and what does not. Measuring the effectiveness of the campaign, therefore, is crucial, and the methods of measurement and their results must be detailed.

Full evaluation of a project's effectiveness should be performed at the midpoint and conclusion of the campaign. The midpoint report, due thirty days after the end of the second quarter of implementation, is intended to encourage productive alternations to

a campaign, when necessary, based on experience and knowledge gained in the first half of the project. Applicants are encouraged to discuss in their proposal the means they will use to devise alternate campaign strategies, if needed.

Selection Criteria

The final selection of grantees for award will be made by the Special Counsel for Immigration Related Unfair Employment Practices after careful evaluation of each proposal by a panel of specialists within DOJ. The panel's results are advisory in nature and not binding on the Special Counsel. Each panelist will evaluate the proposals for effectiveness and efficiency with emphasis on the various factors enumerated below. Letters of support, endorsement, or recommendation will not be accepted or considered.

OSC anticipates seeking assistance from sources with specialized knowledge in evaluating proposals, including the agencies that are members of the IRCA Antidiscrimination Outreach Task Force: The Department of Labor, the Equal Employment Opportunity Commission, the Small Business Administration and the Immigration and Naturalization Service.

Applicants should be aware that some states are currently conducting IRCA antidiscrimination outreach and education programs with funds made available under the Immigrant Nurses Relief Act of 1989, Public Law 101-238. Unnecessary duplication of specific efforts under those programs should be avoided. OSC will take steps to coordinate these efforts but expects that, to the extent practicable, grantees will do so as well.

In determining which applications to fund, OSC will consider the following (based on a one-hundred and ten point scale):

1. Program Design (80 points)

Sound program design and innovative, cost effective strategies for dissemination of information to the targeted population are imperative. Consequently, areas that will be closely examined include the following:

a. Evidence of in-depth knowledge of the goals and objectives of the project. (10 points)

b. The applicant's selection and definition of the target population(s) for the campaign, and the factors, including special needs, that support the selection. (15 points)

c. An innovative, cost effective campaign strategy for disseminating information to employers and/or members of the protected class, and justification for the choice of strategy. (20 points)

d. The methods proposed by the applicant to measure the effectiveness of the campaign and their precision in indicating to what degree the campaign succeeds in meeting its goals. (15 points)

2. Administrative Capability (15 points)

Proposals will be rated in terms of the capability of the applicant to implement the targeting, public education and evaluation components of the campaign:

a. Evidence of proven ability to provide high quality results. (10 points)

b. Evidence that the applicant can implement the campaign, and complete the evaluation component within the time lines provided. (5 points)

3. Staff Capability (15 points)

Applications will be evaluated in terms of the degree to which:

a. The duties outlined for grant-funded positions appear appropriate to the work that will be conducted under the award. (5 points)

b. The qualifications of the grant-funded positions appear to match the requirements of these positions. (10 points)

4. Previous Experience (20 points)

The applications will be evaluated on the degree to which the applicant demonstrates that it has successfully carried out programs or work of a similar nature in the past.

Eligible Applicants

This grant competition is open to not-for-profit community-based organizations, qualified designated entities (QDEs), local ethnic and immigrants' rights advocacy organizations which serve potential victims of discrimination, trade associations, industry groups, professional organizations, and other entities providing information services to employers.

Grant Period and Award Amount

It is anticipated that several grants will be awarded and will range in size from $40,000 to $150,000. Publication of this announcement does not require the Office of Special Counsel to award any specific number of grants, to obligate the entire amount of funds available, or to obligate any part thereof. The period of performance will be twelve months from the date of the grant award. Those grantees who successfully achieve their goals may be considered for supplementary funding for a second year based on the availability of funds.

Application Deadline

All applications must be received by the close of business (5 p.m. e.d.t.) on Thursday, August 8, 1991, at the Office of Special Counsel for Immigration Related Unfair Employment Practices, 1100 Connecticut Ave., NW.—suite 800, P.O. Box 65490, Washington, DC 20035-5490.

Application Requirements

Applicants should submit an original and two (2) copies of their completed proposal by the deadline established above. All submissions must contain the following items in the order listed below:

1. A completed and signed Application for Federal Assistance (Standard Form 424) and Budget Information (Standard Form 424A).

2. OJP Form 4061/6 (Certification Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements).

3. An abstract of the full proposal, not to exceed one page.

4. A program narrative of not more than twenty (20) double-spaced typed pages which include the following:

a. A clear statement which describes the approach and strategy to be utilized to complete the tasks identified in the program description;

b. A clear statement of the proposed goals and objectives, including a listing of the major events, activities, products and timetables for completion;

c. The proposed staffing plan;

d. Description of the proposed program design; and

e. Description of how the project will be evaluated.

5. A proposed budget outlining all direct and indirect costs for personnel, fringe benefits, travel, equipment, supplies, subcontracts, and a short narrative justification of each budgeted line item cost. If an indirect cost rate is used in the budget, then a copy of a current fully executed agreement between the applicant and the Federal cognizant agency must accompany the budget.

6. Copies of resumes for the professional staff proposed in the budget.

Note: If the grant project manager is to be hired later as part of the grant, hiring is subject to review and approval by OSC at that time.

8. Detailed technical materials that support or supplement the description of the proposed effort should be included in the appendix.

VOL 56 ISS 121 JE 24 1991 UMI

In order to facilitate handling, please do not use covers, binders or tabs.

Application forms may be obtained by writing or telephoning: Office of Special Counsel for Immigration Related Unfair Employment Practices, 1100 Connecticut Ave., NW.,—suite 800, P.O. Box 65490, Washington, DC 20035–5490. Tels. (202) 653–8121, 1–800–255–7688 (toll-free), (202) 296–0168 (TDD for the hearing impaired), or 1–800–237–2515 (toll-free TDD for the hearing impaired.

Dated: June 20, 1991.

Approved.

Andrew M. Strojny,

Acting Special Counsel, Office of Special Counsel for Immigration Related Unfair Employment Practices.

BILLING CODE [illegible]

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Application No. D–7870, et al.]

Proposed Exemptions; Equitable Life Assurance Society of the United States

AGENCY: Pension and Welfare Benefits Administration.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restriction of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or request for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this Federal Register Notice. Comments and request for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, room N–5649, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, room N–5507, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of proposed exemption as published in the Federal Register and a shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemption were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Equitable Life Assurance Society of the United States (Equitable) Located in New York, NY

[Application No. D–7870]

Proposed Exemption

Section I. Covered Transactions

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code shall not apply to the sale, on December 16, 1988, of a 60 percent joint venture interest (the Joint Venture Interest) in the D/E Hawaii Joint Venture (the Joint Venture) by Equitable's General Account (the General Account) to Equitable-managed Separate Account No. 10–IV (the Separate Account) in which two pension plans covered by the Act invest pursuant to the terms of a group annuity contract (the Group Annuity Contract).

In addition, the restrictions of section 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(E) of the Code, shall not apply to the payment of a one-time performance fee (the Performance Fee) and a one-time disposition fee (the Disposition Fee) to Equitable by the Separate Account in connection with certain investment management services rendered by Equitable to the Separate Account if the conditions set forth in section II are met.

Section II. General Conditions

(1) The investment of plan assets in the Separate Account, including the terms of the Performance Fee and the Disposition Fee, was approved by a plan fiduciary independent of Equitable.

(2) Each participating plan (the Plan) investing in the Separate Account had total assets that were in excess of $50 million and no such Plan invested more than 10 percent of its assets in the Separate Account.

(3) At the time the transactions were entered into, the terms of the transactions were at least as favorable to the Separate Account as those obtainable in arm's length transactions between unrelated parties.

(4) Prior to making an investment in the Separate Account, each plan fiduciary received offering materials which disclosed all material facts concerning the purpose, structure and operation of the Separate Account and the investment in the Joint Venture.

(5) The total fees paid to Equitable constitute no more than reasonable compensation.

(6) The Performance Fee shall be payable only after achievement of the pre-established average annual returns set forth in the Group Annuity Contract. Two-thirds of the Disposition Fee should be payable only after the Plans receive a 100 percent return of capital plus a preferred return of 10 percent.

(7) Each Plan shall receive the following from Equitable with respect to its participation in the Separate Account:

(a) Audited financial statements, prepared by independent qualified public accountants, of the Separate Account and the Joint Venture, on an annual basis.

(b) Quarterly reports relating to the overall financial position and operating results of the Separate Account, which include all fees paid by the Separate Account and by the Joint Venture in which the Separate Account participates as well as dollar-weighted and time-weighted rates of return.

(c) Property updates and outlook reports for Separate Account-held properties.

(8) Except in the case of an enforced disposition under the terms of the Joint Venture Agreement (the Joint Venture Agreement), Equitable is precluded from recommending the disposition of the Separate Account during the first eight years of the Separate Account's initial term.

(9) No disposition of the Separate Account shall occur during years eight to ten of the Separate Account's initial term unless Equitable gives advance notice of such disposition to each participating Plan and it receives approval from those Plans holding a majority of interests in the Separate Account.

(10) Each extension of the Separate Account term shall be approved by those participating Plans holding a majority of interests in the Separate Account. In the event of such extension, the Performance Fee shall be payable during the tenth year of the Separate Account based upon an independent appraisal of the Joint Venture Interest as of the date of the vote to extend.

(11) Equitable shall maintain, for a period of six years, the records necessary to enable the persons described in paragraph (12) of this section to determine whether the conditions of this exemption have been met, except that (a) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of Equitable and/or its affiliates, the records are lost or destroyed prior to the end of the six year period, and (b) no party in interest other than Equitable shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975 (a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (12) below.

(12)(a) Except as provided in section (b) of this paragraph and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (11) of this section shall be unconditionally available at their customary location during normal business hours by:

(1) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(2) Any fiduciary of a participating Plan or any duly authorized representative of such fiduciary;

(3) Any contributing employer to any participating Plan or any duly authorized employee representative of such employer; and

(4) Any participant or beneficiary of any participating Plan, or any duly authorized representative of such participant or beneficiary.

(b) None of the persons described above in subparagraphs (2)–(4) of this paragraph (12) shall be authorized to examine the trade secrets of Equitable or commercial or financial information which is privileged or confidential.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material fact which are the subject of this exemption.

Effective Date: This proposed exemption, if granted, will be effective December 16, 1988.

Summary of Facts and Representations

1. Equitable is a mutual life insurance company organized under the laws of the State of New York and subject to the supervision and examination by the Superintendent of Insurance of the State of New York. The firm is one of the largest life insurance companies in the United States. Among the wide variety of insurance products and services it offers, Equitable provides funding, asset management and other services for several thousand employee benefit plans subject to the provisions of Title I of the Act.

Equitable maintains several pooled separate accounts in which pension, profit sharing the thrift plans participate. Equitable also has several single customer accounts and investment management accounts pursuant to which it manages all or a portion of the assets of a number of large plans. Equitable's real estate investment management subsidiary, Equitable Real Estate Investment Management, Inc. provides real estate investment advisory services to Equitable and other clients and property management services with respect to certain properties owned by Equitable accounts.

Equitable has substantial experience in managing real estate investments. Of the $50,388,388,984 in total assets held by Equitable at year-end 1990, Equitable's General Account held $10,822,148,586 in real estate mortgage loans and $2,944,225,898 in equity investments in real property. Additionally, the total assets that Equitable has allocated to real estate investments in its real estate separate accounts were $4,289,685,000.

2. In 1982, Equitable and Deici Hawaii Investments, Inc. (DHI), an unrelated party, formed a real estate joint venture in Honolulu, Hawaii for the purposes of acquiring, owning, developing, constructing, leasing, operating and managing certain commercial real property referred to herein as "the Ala Moana Complex" (the Ala Moana Complex). The Ala Moana Complex is the sole asset of the Joint Venture. At the time of formation, DHI, a subsidiary of The Deici, Inc., a Japanese corporation, held (and continues to hold) a 60 percent interest in the Joint Venture. Equitable's General Account held a 40 percent interest in the Joint Venture.

3. Under the provisions of the Joint Venture Agreement, Equitable is the managing co-venturer responsible for conducting the business of the Joint Venture. Overall control of the Joint Venture is, however, shared by the co-ventures through equal representation of both co-venturers on a management committee (the Management Committee) comprised of one representative of Equitable and one representative of DHI. The Management Committee is authorized to make major decisions on behalf of the Joint Venture as specifically enumerated in the Joint Venture Agreement. For example, the Management Committee must approve the selection of a property manager as well as any sale involving the Ala Moana Complex. The decisions of the Management Committee must be unanimous.

4. The Ala Moana Complex consists of a 1.5 million square foot shopping mall, a shopping plaza, two adjacent office buildings and three adjoining parcels of commercially-zoned land suitable for future development. Located in the Kapiolani Business District of Honolulu, Hawaii, the Ala Moana Complex is bounded by Ala Moana Boulevard, Kapiolani Boulevard, Piikoi Street and Atkinson Drive. The Joint Venture acquired the properties

VOL 56 ISS 121 JE 24 1991 UMI

comprising the Ala Moana Complex from unrelated parties between 1962 and 1965 for an aggregate purchase price of approximately $270 million and it subsequently expanded and improved such properties.[1]

The Ala Moana Complex was appraised in April 1988 by John Child and Company, Inc. and by Hastings, Martin, Conboy, Braig and Associates, Ltd. (the Appraisers), independent real estate appraisal firms also located in Honolulu, Hawaii. The Appraisers determined that the aggregate fair market value of a fee simple interest in the Ala Moana Complex would be $702,850,000 as of January 1, 1989.[2]

5. On December 16, 1988, Equitable formed the Separate Account which is also known as the "Hawaii Properties Fund." The Separate Account is a closed-end, pooled real estate separate account maintained by Equitable in accordance with the laws of the State of New York. The Separate Account has three investment objectives: (a) To provide current income of at least 6.25 percent for its duration; (b) to increase income through the use of successful asset management strategies, including remerchandising (i.e., bringing in more successful tenants) and expansion of the Ala Moana Complex; and (c) to increase the value of the entire Ala Moana Complex through expansion and development. These objectives are consistent with those of the Joint Venture. Seven pension plans participate in the Separate Account. No one Plan may hold more than a 40 percent interest in the Separate Account nor may a Plan's participation in the Separate Account represent more than 10 percent of that Plan's total assets. The minimum investment for each subscribing Plan was $20 million. The decision by each of the Plans to invest in the Separate Account was made by a Plan fiduciary who was independent of Equitable.

6. Of the seven Plans participating in the Separate Account, five Plans are state governmental plans which have invested a total of $220 million in the Separate Account. These Plans and the amount of their investments are as follows: The California State Teachers Retirement System ($100 million); the Colorado Public Employees Retirement Association ($40 million); the Illionis Municipal Retirement Fund ($40 million); the School Employees Retirement System of Ohio ($20 million); and the Utah State Retirement System ($20 million).

The two remaining Plans investing in the Separate Account are corporate pension plans covered by the Act. These Plans are the Ameritech Information Technologies Corporation Pension Trust (the Ameritech Trust) sponsored by the Ameritech Information Technologies Corporation and the Chevron Corporation Master Trust (the Chevron Trust) which is sponsored by the Chevron Corporation.[3] The Ameritech Trust and the Chevron Trust have invested $30 million and $40 million, respectively, in the Separate Account. Equitable represents that both of these Plans are substantial, sophisticated investors with in-house pension staffs that thoroughly assess this type of investment opportunity. In addition, Equitable states that both Plans have engaged their own counsel to represent them in these negotiations and on an ongoing basis with respect to investment in the Separate Account. As noted above, Equitable did not provide investment advice to these Plans in connection with the decision to invest in the Separate Account.

7. It is anticipated that the Separate Account will have a duration of ten years from the date of its inception on December 16, 1988. Prior to the eighth anniversary of the closing date, Equitable is generally precluded from recommending the liquidation of the Separate Account's interests. The one exception is in the case of an enforced disposition resulting from either the activation of a buy/sell mechanism of the Joint Venture by the co-venturer, DHI, or due to circumstances beyond the control of Equitable, such as a default by DHI under the Joint Venture Agreement. During years eight to ten of the Separate Account's initial term, Equitable can recommend a disposition of the Separate Account's assets. However, such a disposition can only occur upon notice to the Plans and if approval of such disposition is received from the holders of a majority of the interests in the Separate Account. In the absence of such approval, Equitable may not unilaterally dispose of the Separate Account's Joint Venture Interest.

By a similar majority vote, the Plans may decide to continue the Separate Account beyond its initial term for a maximum of five, five year extension periods. At any time during an extension period, Equitable can recommend the disposition of the Separate Account's assets. However, no disposition can occur without a vote of the majority of the holders of interests in the Separate Account.

Even if the holders of a majority of the interests in the Separate Account approve liquidation, Equitable is still not free to conclude the disposition unilaterally. Instead, Equitable represents that the Joint Venture Agreement accords DHI a significant role which will vary depending upon the type of disposition being considered by Equitable. For example, if Equitable were to offer the Separate Account's Joint Venture Interest to a third party who accepted this offer, no disposition could occur without the written consent of DHI regardless of the fact that the holders of a majority of interests in the Separate Account had approved liquidation. Or, where Equitable receives a bona fide offer from a third party for the Joint Venture Interest and it wishes to accept that offer, the Joint Venture Agreement provides DHI with a right of first refusal to purchase the Joint Venture Interest for the amount that the Separate Account would have received had the third party offer been accepted. DHI has 45 days from the receipt of the third party offer in which to exercise the right of first refusal.[4]

8. Concurrent with the establishment of the Separate Account, on December 16, 1988, Equitable transferred the 40 percent Joint Venture Interest held by its General Account to the Separate Account. Equitable also notified DHI of the contemplated transaction and in the absence of receiving any objection, Equitable and the Plans consummated the sale. On the date of closing, each participating Plan entered into an Investment Allocation Agreement and a Group Annuity Contract with Equitable. The Group Annuity Contract provided that of the $260 million invested, $231.2 million would serve as the consideration for the sale of the Joint Venture Interest (the exact value of such interest having been based upon the third party appraisals) and $8.88 million would reflect consideration paid to Equitable for providing funding up to a cap of $12,580,000 during the first three years of the Separate Account in order to guarantee a 6.25 percent cash yield on the Plans' investment. After this consideration was paid to Equitable, $3 million was retained by the Separate Account for expenses associated with the development of the Ala Moana Complex. No real estate fees or commissions were paid by the Plans in connection with the sale.[5]

9. Equitable believes that the sale of the Joint Venture Interest by the General Account to the Separate Account may have resulted in the commission of a prohibited transaction in violation of the Act. In this regard, Equitable is requesting exemptive relief from the Department in connection with the sale transaction. Equitable represents that it is a party in interest with respect to the Ameritech Trust and the Chevron Trust because independent investment managers for these Plans have occasionally used an Equitable affiliate, Donaldson, Lufkin and Jenrette, Inc. (DLJ) to execute securities brokerage transactions and to conduct research on behalf of these Plans.[6] Moreover, Equitable notes that the Ameritech Trust and the Chevron Trust have confirmed that they have had no direct dealings with DLJ and they have not entered into directed brokerage arrangements with DLJ. Rather, Equitable explains that the appointed investment managers for these Plans, which are independent of the Plan sponsors, appear to have utilized DLJ no more than they have used any broker. According to Equitable, the Ameritech Trust and the Chevron Trust have assured Equitable that their investment managers were unaware of the sale transaction discussed herein.

10. After the sale of the Joint Venture Interest, Equitable began serving as the investment manager for the Separate Account. For services rendered to the Separate Account, Equitable is entitled to receive certain fees from the participating Plans based upon a multi-part fee structure that has been established for the Separate Account and approved by the investing Plans. Equitable represents that the payment of fees by the participating Plans, with the exception of the two fees described below, conforms to the requirements of section 408(b)(2) of the Act.[7]

a. *The Performance Fee* is a one-time fee payable to Equitable that is calculated based upon the following formula: "10 percent of the amount by which the cumulative average annual return * exceeds 12.5 percent up to and including 14 percent, plus 20 percent of any amount by which the average annual return exceeds 14 percent". The Performance Fee is payable at the time of the disposition of the Separate Account, or earlier, if the Joint Venture Interest is sold prior to the end to the initial ten year term of the Separate Account. Should Equitable recommend the disposition of the Separate Account during the eighth or ninth years that the Separate Account is in effect, the investing Plans, by majority vote, and DHI must approve such disposition and, in doing so, the payment of the Performance Fee. In addition, if a majority of the holders of interests in the Separate Account vote to extend the life of the Separate Account beyond its initial ten year term, the Performance Fee is payable at the end of the ten year term. In this situation, a three member appraisal panel (comprised of independent appraisers selected by Equitable, the Plans (as a group) and jointly by the two Equitable/Plans' designees) will value the Joint Venture Interest as of the date of the vote to extend and the Performance Fee will be calculated as if the Joint Venture Interest had been sold. At least two of the three appraisers on the panel must concur with the valuation determined. In the event of a deadlock (i.e., if each of the three appraisers is unable to agree with any of the other appraisers), the appraisers will settle their dispute through binding arbitration.

b. *The Disposition Fee* payable to Equitable is equal to .75 percent of the Separate Account's interest in the gross disposition price of the real estate assets of the Joint Venture, or the Joint Venture Interest. One-third of the fee is payable at the time of disposition and the remaining two-thirds portion of the Disposition Fee is payable only after the participating Plans receive a 100 percent return of capital plus a 10 percent average annual return as defined in the above footnote. If Equitable recommends a disposition of the Separate Account during its eighth or ninth year, once again, a majority of the interests held by the Plans in the Separate Account and DHI must approve the disposition.

Equitable believes that an exemption is appropriate in connection with its receipt of the Performance and the Disposition Fees. In this regard, Equitable represents that it, Institutional Property Consultants, Inc. (IPC), an independent real estate advisory firm, and other representatives of the Plans have negotiated the fees at arm's length and that such fees have been approved by the Plans. Equitable represents that the following extensive safeguards are present and inherent to the arrangement itself: (a) A system of internal checks and balances that are contained in the multi-part fee structure which are designed to prevent the possibility of abuse [8], (b) a fee structure that reflects

---

[1] In this regard, the Joint Venture implemented a remerchandising strategy shortly after its acquisition of the shopping mall portion of the Ala Moana Complex. This resulted in a reorganization and consolidation of existing stores in the mall, the addition of new specialty shops and a food court, and the renovation of the mall's center court. In addition, the Joint Venture had a convenience center constructed on the site of the shopping plaza and an office building on the site of previously vacant land.

[2] Equitable attributes the increase in fair market value of the Ala Moana Complex to economic and market forces existing in Hawaii in the mid-1980's as well as to the successful management of the Joint Venture.

[3] The Ameritech Trust holds the assets of the Ameritech Pension Plan and the Ameritech Management Pension Plan. As of December 31, 1990, the Ameritech Trust had 80,180 participants and total assets of $12 billion of which 10 percent was allocated to various real estate investments. The Chevron Trust holds the commingled assets of several small pension plans and the Chevron Retirement Plan. As of December 31, 1990, the Chevron Trust had 78,000 participants and total assets of $8.7 billion of which 11.5 percent was allocated to real estate investments.

[4] In contrast, it should be noted that DHI's approval is not required for each extension of the Separate Account beyond its initial term. Equitable explains that for insurance purposes, it is treated as the legal owner of the Joint Venture regardless of the fact that the Joint Venture Interest has been allocated to the Separate Account.

[5] Equitable represents that the Joint Venture will function as a "real estate operating company" [REOC] within the meaning of 29 CFR 2510.3-101(e). Accordingly, Equitable explains that transactions involving the assets of the Joint Venture will not be deemed to involve plan assets and will not be subject to the prohibited transaction provisions of the Act. In this regard, the Department is providing no opinion or exemptive relief herein with respect to the provision of services and any fees that are received by Equitable as managing venturer of the Joint Venture. Further, the Department notes that in making the decision to invest in a REOC, plan fiduciaries should consider, among other factors, that the fiduciary responsibility provisions of the Act do not apply to the operation of the REOC.

[6] To the best of its knowledge, Equitable asserts that it has no other ongoing dealings with the Ameritech Trust. In the case of the Chevron Trust, Equitable represents that it has issued a group annuity contract valued at $6,694,262 to a plan participating in the Chevron Trust.

[7] The other components of the fee structure include a quarterly asset management fee, an investment fee on any additional contributions (above the $260 million aggregate initial investment made by the participating Plans in the Separate Account) to acquire additional assets and a development fee on any new contributions that are made to expand or improve the Joint Venture properties. In this regard, the Department notes that the relief provided by this proposed exemption, if granted, is limited solely to the Performance and Disposition Fees described herein.

[8] In this regard, Equitable notes that the mechanism of internal checks and balances contained in the fee structure for the Separate Account permits decreases in certain component fees to be offset by corresponding decreases in other fees. Equitable believes that such a mechanism is designed to ensure that it does not receive more than reasonable compensation from the Separate Account.

In addition, the mechanism of internal checks and balances is demonstrated by the performance benchmarks that the Separate Account must achieve in order for Equitable to be paid the Performance Fee as well as by the return of capital and the preferred return provisions of the Disposition Fee. Equitable explains that these

Continued

* Equitable represents that the "average annual return" as used herein is defined as the sum of (a) total income payments to a participating Plan (less all fees payable by such Plan) plus (b) the net proceeds of any disposition distributable to the Plan (after deduction of the Disposition Fee), less the Plan's total contributed capital, divided by the Plan's contributed capital adjusted to reflect the amount of time the Plan's contributions have been invested in the Separate Account, divided by the actual term of the Separate Account expressed as a number of full and partial years.

VOL 56 ISS 121 JE 24 1991 UMI

the product of arm's length negotiation and which has been approved by IPC, an independent fiduciary acting on behalf of the participating Plans; (c) the absence of unilateral authority on the part of Equitable to cause the payment of such fees and Equitable's limited ability to recommend the liquidation of the Separate Account; (d) a level of investor sophistication in the Ameritech and Chevron Trusts which enables each Plan to engage in on-going and independent monitoring of Equitable; (e) continued monitoring of the exempted transactions on behalf of the public Plans participating in the Separate Account by IPC; and (f) the reporting and disclosure of financial and other information to the Plans with respect to their participation in the Separate Account and Joint Venture as detailed in paragraph 11 below. Equitable believes that these safeguards will prevent the possibility of any abuse. However, Equitable also recognizes that, as part of its management of the Separate Account, it has the discretionary authority to affect the timing and/or amount of the Performance and Disposition Fees. Therefore, Equitable has requested exemptive relief from sections 406(b)(1) and (b)(2) of the Act with respect to these fees.

11. Equitable represents that it is providing various oral and written reports to the participating Plans on a quarterly, semi-annual and annual basis. In this regard, Equitable states that it is required under the Group Annuity Contract to provide all participating Plans with audited financial statements of both the Separate Account and the Joint Venture. In addition, Equitable represents that it provides each investing Plan with quarterly financial reports of such Plan's investment in the Separate Account, including dollar-weighted and time-weighted rates of return. Moreover, Equitable explains that it periodically provices that portfolio manager for the Separate Account with written property updates and outlook reports for each of the properties in the Ala Moana Complex as of the current reporting period. Further, Equitale states that at the inception of the Separate Account, it established a committee of representatives of the participating plans. Equitable explains that it meets with this committee at least annually to review the activity and performance of the Separate Account.

12. For purposes of participating in the Separate Account as well as evaluating the terms of the sale and the receipt of fees by Equitable for its services as investment manager to the Separate Account, the Chevron Trust, the Ameritech Trust and the five public Plans decided to retain IPC, an independent real estate advisory firm which is principally located in Atlanta, Georgia and San Diego, California. IPC has substantial experience in providing consulting advice and valuations to U.S.-domiciled tax-exempt institutional clients having assets exceeding $200 billion. Clients of IPC include large public and corporate pension plans. The firm is also the largest real estate pension consultant in the United States and has capital allocated to real estate of approximately $20 billion. IPC is totally unaffiliated with Equitable and Equitable had no part in negotiating the tems of IPC's fee arrangements with each Plan participating in the Separate Account. The investing Plans appointed IPC as real estate advisor and consultant for purposes of analyzing the transaction described herein.

The five public Plans are retainer clients of IPC. These Plans compensate IPC on a flat fee basis. The Chevron Trust and the Ameritech Trust, which are not on-going retainer clients of IPC, appointed IPC to provide an analysis of the transactions similar to that provided to the public Plan investors. The Chevron and Ameritech Plans have also compensated IPC on a flat fee basis.

Pursuant to their respective arrangements, IPC furnished each Plan with a report evaluating the Ala Moana Complex, reviewing the price and other terms of Equitable's proposal, identifying certain conditions to be fulfilled before closing and recommending whether and on what basis each Plan should proceed with the investment. Prior to the date of closing, IPC issued a letter to each Plan discussing certain conditions precedent to the sale and recommending that the Plans move forward with the funding of the Separate Account. In turn, the Plans relied upon IPC's recommendation by investing in the Separate Account.

In examining all aspects of the sale transaction, IPC conducted its own financial analysis which included reviews of ten year cash flow pro forma statements developed by Equitable Real Estate Investment Management, Inc. (EREIM), a wholly owned subsidiary of Equitable that acts as investment advisor to Equitable for the Separate Account, as well as the appraisal reports that had been prepared of the Ala Moana Complex by the Appraisers. IPC represents that it agreed with the assumptions and valuation methodologies utilized by EREIM and the Appraisers in their reports. IPC also states that although it reviewed information regarding the Ala Moana Complex that had been furnished to it by Equitale and EREIM, it conducted an independent analysis of such data and drew its own conclusions with regard to the investment independently of any Equitable influence. IPC further asserts that it performed on site inspections of the Ala Moana Complex and found such properties to be well-managed and in good condition. With regard to the position of the Ala Moana Complex in its surrounding market, IPC represents that it analyzed competing shopping centers and office complexes and it concluded that the Ala Moana Complex would continue to dominate the regional shopping market in terms of location, merchandising selection and probable revenues. IPC also concluded that the two office buildings which from part of the Ala Moana Complex are Class "A" office buildings that hold a visual as well as an economic command of the market area and, as such, are positioned for long-term profitability. In addition to these analyses and investigations, IPC indicated that it would develop guidelines for a long-term asset management program established for the Separate Account. IPC said that such guidelines would addres asset and portfolio management matters as well as considerations that were germane to the Ala Moana Complex.

IPC represents that it also reviewed the fees that were to be paid by the Separate Account and it determined such fees to be reasonable and competitive both in specific part and as a whole. In this regard, IPC recommended that certain changes be made to the Performance Fee in order to provide the Plans with a preferred return of capital. These changes were subsequently incorporated into the Group Annuity Contract that was provided by Equitable to each investing Plan.

As a result of its independent analysis, IPC recommended that the Plans make their respective investments in the Separate Account. Each Plan then executed a Group Annuity Contract with Equitable on December 18, 1988 and the sale was entered into in the manner described above.

13. Since the date of closing, IPC has monitored the economic performance and general operations of the Separate Account and it has provided quarterly performance reports to each of its retainer clients. Such reports contain the following information: (a) The current investment value of individual assets and the value of the portfolio; (b) the economic performance of individual assets and the portfolio in terms of yields and returns; (c) reporting variances; (d) a portfolio composition characteristics summary and a comparison of IPC benchmark indices; and (e) a summary information sheet on individual assets. Although not required to do so, IPC represents that it has advised representatives for the Ameritech and Chevron Trusts on a periodic, but informal basis regarding said operations for no compensation.

In the event of a discrepancy between the kinds of information that is supplied to the participating Plans by IPC and by Equitable, Equitable states that it will confer with IPC at the annual meeting of participating Plans to ensure that any misinformation is corrected. Also, Equitable represents that it will afford IPC and all participating Plans the right to inspect Equitable's books and records to verify the accuracy of information that has been disseminated.

14. In summary, it is represented that the transactions satisfy the statutory criteria for an exemption under section 406(a) of the Act, among other things, because: (a) The decision by each of the Plans to invest in the Separate Account was made by Plan fiduciaries who are totally unrelated to Equitable; (b) each Plan investing in the Separate Account is a large, well-funded plan with substantial real estate assets and experienced in-house investment staff who are familiar with real estate investments and the types of incentive fees paid with respect to these investments; (c) the participating Plans retained an independent consultant, IPC, to review, negotiate and approve each Plan's investment in the Separate Account as well as the sale of the Joint Venture Interest by the General Account to the Separate Account and the multi-part fee structure; (d) the participating Plans will receive periodic reporting and disclosure regarding the Separate Account and the Joint Venture; (e) IPC will continue to monitor the interests of the public Plans investing in the Separate Account while independent Plan fiduciaries for the Ameritech Trust and the Chevron Trust will monitor their respective Plan's investments; and (f) the sale of the Joint Venture Interest by the General Account to the Separate Account involved a lump sum cash payment that was based upon the independently appraised value of the Joint Venture Interest and it did not involve the payment of any real estate fees or commissions by any of the investing Plans.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 406(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be the subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 18th day of June, 1991.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

internal checks and balances essentially guarantee that it will receive such fees only after the participating Plans have realized an adequate return on their investment in the Separate Account.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: Office of Records Administration, National Archives and Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as requred by 44 USC 3303a(a).

DATES: Request for copies must be received in writing on or before August 8, 1991. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESSES: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or

VOL
56
ISS
121
JE

1991
UMI

a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of the Air Force (N1-AFU-91-27). Career information and counseling records.

2. Department of the Air Force (N1-AFU-91-28). Equipment receipt lists.

3. Department of the Air Force (N1-AFU-91-30). Fixed communications-computer systems supply records.

4. Department of the Air Force (N1-AFU-91-32). Reports of payments to individuals required by IRS.

5. Department of the Air Force (N1-AFU-91-33). Records authorizing on-base day care providers.

6. Department of the Air Force (N1-AFU-91-34). Routine training materials.

7. Department of the Air Force (N1-AFU-91-35). Applications for Thrift Savings Plan participation.

8. Defense Logistics Agency (N1-361-91-10). Routine and facilitative records relating to distribution.

9. Defense Logistics Agency (N1-361-91-11). Routine and facilitative records relating to small business programs.

10. ACTION, Office of Management and Budget (N1-362-91-2). Routine administrative records relating to recruitment and finance.

11. ACTION, Office of Management and Budget (N1-362-91-3). Working files related to grant projects and records relating to the deferment of student loans for VISTA volunteers.

12. ACTION, Office of Management and Budget (N1-362-91-4). Agreements made with other agencies for routine administrative and housekeeping functions.

13. Department of Agriculture, Forest Service (N1-95-91-1). Administrative, local and unreadable electronic records that will not be converted to a new system.

14. Department of Agriculture, Forest Service (N1-95-91-2). Routine records concerning the administration of telecommunication activities.

15. Department of Agriculture, World Agricultural Outlook Board (N1-355-91-1). Routine administrative records concerning emergency preparedness, the distribution of information and inquiries from other federal agencies.

BILLING CODE 7515-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on July 11-13, 1991, in room P-110, 7920 Norfolk Avenue, Bethesda, Maryland. Notice of this meeting was published in the Federal Register on May 23, 1991.

Thursday, July 11, 1991

8:30 a.m.-8:45 a.m.: Opening Remarks by ACRS Chairman (Open)—The ACRS Chairman will make opening remarks and comment briefly regarding items of current interest.

8:45 a.m.-10:15 a.m.: Proposed Schedule for Review of Evolutionary and Advanced Nuclear Power Plant Designs (Open)—The Committee will review the schedule proposed by the NRC staff for review of evolutionary and advanced nuclear power plant designs, the EPRI Advanced LWR Requirements Document, and the effort to revise regulatory guidance and the NRC standard review plan (SECY-91-161). Representatives of the NRC staff and DOE will participate in this session, and representatives of the nuclear industry may participate, as appropriate.

10:30 a.m.-11:a.m.: Proposed Actions for Improving Guidance for Performing Regulatory Analyses (Open)—The Committee will hear a briefing by and hold discussions with members of the NRC staff regarding proposed actions to improve guidance for the performance of regulatory analyses (SECY-91-114).

11:30 a.m.-12:15 p.m.: Activities of ACRS Subcommittees and Members (Open)—The Committee will hear reports and hold discussions regarding recent ACRS subcommittee meetings and related members' activities, including the May 30, 1991 Advanced BWRs Subcommittee meeting, June 18-19, 1991 Regional Programs Subcommittee meeting, a visit to the Vermont Yankee nuclear plant, and an NRC staff seminar on nuclear power plant aging.

1:15 p.m.-3:15 p.m.: NUMARC/EPRI Fire Vulnerabilities Evaluation Methodology (Open/Closed)—The Committee will hear a briefing by and hold discussions with representatives of NUMARC/EPRI and the NRC staff regarding the NUMARC/EPRI fire vulnerabilities evaluation (FIVE) methodology and the draft NRC staff position on this matter.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this matter.

3:30 p.m.-5:30 p.m.: Meeting with Director, NRC Officew for Analysis and Evaluation of Operational Data (Open)—The Committee will hear a briefing and hold discussions regarding items of mutual interest, including the status and general use of the NRC performance indicator program, the role/impact of AEOD activities on the regulatory process, and the use of PRA by the Committee to Review Generic Requirements in its decisionmaking process.

5:30 p.m.-6:30 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss the proposed report to NRC regarding the use of PRA in the regulatory process.

Friday, July 12, 1991

8:30 a.m.-12 noon: General Electric Company SBWR (Open/Closed)—The Committee will hear a briefing by and hold discussions with representatives of the General Electric Company and the NRC staff, as appropriate, regarding the standard BWR nuclear powr plant design.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this project.

1 p.m.-2:30 p.m.: Fitness for Duty (Open/Closed)—The Committee will hear a briefing by and hold discussions with representatives of the NRC staff regarding incidents at nuclear power plants that have involved fitness for duty considerations. Representatives of the nuclear industry may participate, as appropriate, in those limited portions of this session where they have specific information to contribute.

Portions of this session will be closed as necessary to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

2:45 p.m.-4:15 p.m.: Reactor Operating Experience (Open)—The Committee will hear briefings by and hold discussions with members of the NRC staff regarding recent incidents and events at nuclear power plants, including a loss of off-site power event at the Vermont Yankee nuclear station and a transformer failure/generator fire at the Maine Yankee nuclear plant.

4:15 p.m.-5 p.m.—Future ACRS Activities (Open)—The members will discuss anticipated subcommittee activities and items proposed for consideration by the full Committee.

5 p.m.-6:30 p.m.: Preparation of ARS Reports to the NRC (Open)—The Committee will discuss proposed ACRS reports to the NRC regarding items that were not completed at previous meetings, various technical issues, and matters considered during this meeting, including use of PRA in the regulatory process; proposed resolution of GI-130, Essential Service Water System Failures at Multi-Unit Sites; the scope and nature of the General Electric ABWR review; and the NRC staff assessment of risk during low power and shutdown operations at nuclear power plants.

Saturday, July 13, 1991

8:30 a.m.-11:30 a.m.: Preparation of ACRS Reports to NRC (Open/Closed)—The Committee will discuss proposed ACRS reports to the NRC regarding items noted above and items considered during this meeting.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to the matter being considered and information the release of which would represent a clearly unwarranted invasion of personal privacy.

11:30 a.m.-12:30 p.m.: NRC Safety Research Program (Open)—The Committee will discuss the scope and nature of the proposed ACRS report to the NRC regarding the NRC safety research program.

1:30 p.m.-2:30 p.m.: Key Technical Issues for Future Nuclear Plants (Open)—The Committee will discuss a proposed list of key technical issues in need of early resolution for evolutionary and advanced nuclear power plants.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on October 2, 1990 (55 FR 40249). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those open portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and staff. Persons desiring to make oral statments should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Exective Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetins may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such re-scheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Public Law 92-463 that it is necessary to close portions of this meeting noted above to discuss information the release of which would represent an unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)) and to discuss Proprietary Information applicable to the matter being considered (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492-8049), between 8 a.m. and 4:30 p.m.

VOL 56 ISS 121 JE 24 1991 UMI

Dated: June 18, 1991.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Cost Accounting Standards Board; Thresholds for Cost Accounting Standards Coverage

ACTION: Notice.

SUMMARY: The Office of Federal Procurement Policy, Cost Accounting Standards Board (CASB), invites public comment concerning a Staff Discussion Paper on the topic of revised thresholds for Cost Accounting Standards coverage, and Disclosure Statement requirements.

DATES: Requests for copies of the Staff Discussion Paper, and any comments upon its contents, should be received by August 23, 1991.

ADDRESSES: Requests for a copy of the Staff Discussion Paper, or comments upon its contents, should be addressed to Mr. Richard C. Loeb, Executive Secretary, Cost Accounting Standards Board, Office of Federal Procurement Policy, 725 17th Street, NW., room 9001, Washington, DC 20503. Attn: CASB Docket 91-01.

FOR FURTHER INFORMATION CONTACT: Richard C. Loeb, Executive Secretary, Cost Accounting Standards Board (telephone: 202-395-3254).

SUPPLEMENTARY INFORMATION: The Office of Federal Procurement Policy, Cost Accounting Standards Board, is releasing a Staff Discussion Paper concerning revised thresholds for application of the Cost Accounting Standards (CAS) to negotiated Government contracts. Section 26(g)(1) of the Office of Federal Procurement Policy Act, 41 U.S.C. 422(g)(1), requires that the Board, prior to the promulgation of any new or revised Cost Accounting Standard, to consult with interested persons concerning the advantages, disadvantages and improvements anticipated in the pricing and administration of Government contracts as a result of the adoption of a proposed Standard. The Board is considering action on this topic in order to adjust CAS applicability thresholds to levels reflecting experience with price inflation since the last quarter of 1977. In the intervening fourteen years, CAS applicability thresholds, last promulgated by the previous Board on September 12, 1977, under the authority of Public Law 91-379, have not been adjusted to reflect this inflation experience.

For the purpose of the Discussion Paper, the staff is proposing a modified CAS coverage threshold of $20 million (actual inflation experience rounded to the nearest five million dollar increment). This represents a doubling of the present threshold, and is consistent with inflation experience as measured by the consumer price index from the last quarter of calendar year 1977 through the first quarter of 1991.

The Board is also considering an adjustment in the so-called "trigger contract" threshold. This is the dollar threshold associated with the initiation of CAS coverage, in a segment or business unit, based on the award of a single negotiated Government contract. The present trigger contract threshold is a single negotiated national defense contract exceeding $500,000. Once awarded a negotiated national defense contract of at least this dollar amount in a single cost accounting period, government contractors are subject to some form of CAS coverage (either full or modified) for all subsequently awarded negotiated national defense contracts exceeding $100,000. Public Law 100-679 raised the threshold for individual CAS contract coverage to $500,000 (see proposed CAS recodification, 56 FR 20668), but did not address the issue of an increased threshold for the initial CAS trigger contract. Without such an adjustment, the minimum individual CAS contract threshold, and the initiating CAS "trigger contract" threshold will be one and the same. In light of the Board's consideration of the extension of CAS coverage to many of the negotiated contracts of the civilian procuring agencies (see 56 FR 12571), the staff believes that an adjustment in the trigger contract threshold for the initiation of CAS coverage may be appropriate. The staff proposal is for a doubling of the "trigger contract" dollar threshold applicable to initiation of CAS coverage from $500,000 to $1 million.

The purpose of the Staff Discussion Paper is to solicit public comment with respect to the Board's consideration of the topic of various thresholds applicable to CAS coverage. It reflects research accomplished to date by the staff in the respective subject area, and as such has not been formally approved by the Board.

Dated: June 18, 1991.
Allan V. Burman,
Administrator for Federal Procurement Policy and Chairman, Cost Accounting Standards Board.

BILLING CODE 3110-01-M

POSTAL RATE COMMISSION

[Order No. 888]

Order Granting Motion for Extension and Explaining Procedural Matters

Issued June 18, 1991.

Before Commissioners: George W. Haley, Chairman; Henry R. Folsom, Vice-Chairman; John W. Crutcher; W. H. "Trey" LeBlanc, III; Patti Birge Tyson.

In the Matter of San Francisco Main Post Office, California 94101 (Paul A. Lovinger, et al., Petitioners).

On June 17, 1991, the Commission received a motion for an extension of time in which to respond to the Postal Service's motion to dismiss this appeal. The Petitioners request one-week extensions for the filing of their response to the motion and for the filing of their Participant Statement or Initial Brief. We are granting that motion, as well as adjusting the other procedural dates. We believe we can provide this additional time to the Petitioners without jeopardizing our ability to issue a decision by the procedural deadline of September 18, 1991. The revised Procedural Schedule is attached to this order.

The Commission has received a number of intervention notices in this appeal. As is the Commission's practice, these interventions will be consolidated into the docket established for the consideration of this appeal, Docket No. A91-4. A number of intervenors have requested that a hearing be held in San Francisco, California. The only "hearing" that could be held is a post office closing appeal case is an oral argument. As explained at 39 CFR 3001.116, oral argument will only be held on those unusual cases where it is a necessary addition to the written arguments presented by the parties. The Commission's experience is that written presentations are adequate. That section of our rules of practice and procedure also points out that oral arguments will be held in Washington, DC.

The Commission orders:

(A) The Petitioners' motion for an extension of time is granted.

(B) The Procedural Schedule attached to this order is adopted in Docket No. A91-1.

Charles L. Clapp,
Secretary.

San Francisco Main Post Office, California 94101

May 21, 1991	Filing of Petition
May 30, 1991	Notice and Order of Filing of Appeal
June 17, 1991	Last day of filing of petitions to intervene (see 39 CFR 3001.111(b)).
July 2, 1991	Petitioners' Participant Statement or Initial Brief (see 39 CFR 3001.115(a) and (b)).
July 23, 1991	Postal Service Answering Brief (see 39 CFR 3001.115(c)).
August 7, 1991	Petitioners' Reply Brief should Petitioners choose to file one (see 39 CFR 3001.115(d)).
August 4, 1991	Deadline for motions by any party requesting oral argument. The Commission will schedule oral argument only when it is a necessary addition to the written filings (see 39 CFR 3001.116).
September 18, 1991.	Expiration of 120-day decisional schedule (see 39 U.S.C. 404(b)(5)).

Extension

File No. 270-48, Form 10-K
File No. 270-81, Form 10
File No. 270-84, Form S-11
File No. 270-55, Form S-8
File No. 270-61, Form S-3

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for OMB approval extension of the following: Form 10-K; Form 10; Form S-11; Form S-8; Form S-3. The forms and rule provide a basis for the Commission to fulfill its statutory responsibility to ensure that issuers of publicly traded securities provide investors and the marketplace with adequate information. Form 10-K affects 9,486 filers for a total of 18,195,857 burden hours; Form 10 affects 170 filers for a total of 12,240 burden hours; Form S-11 affects 350 filers for a total of 308,740 burden hours; Form S-8 effects 59 filers for a total of 472 burden hours; and Form S-3 affects 1,730 filers for a total of 724,870 burden hours. The estimated burden hours are made solely for purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even a representative survey of the cost of the Commission's rules and forms. Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with the Securities and Exchange Commission rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549 and Gary Waxman, Clearance Officer, Office of Management and Budget (Paperwork Reduction Project 3235-0063, 0064, 0067, 0068, 0070), Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: June 1, 1991.
Margaret H. McFarland,
Deputy Secretary.

Rescission

File No. 270-303—Rule 8c-9 and Form N-8C9

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the "Commission") has submitted for OMB approval the rescission of Rule 8c-9 and Form N-8C9 under the Investment Company Act of 1940 (the "Act"). The rule permits a foreign bank or the bank's finance subsidiary to offer or sell its debt securities or non-voting preferred stock in the United States without registering as an investment company under the Act. The form is filed by foreign entities seeking to rely on the rule. The Commission's adoption of Rule 3a-6 and related rule changes, which except foreign banks and foreign insurance companies from the Act's definition of "investment company," has made the exemption provided by the rule unnecessary.

Each of the estimated one hundred respondents annually has incurred an average estimated one burden hour to comply with the requirement to file the form, which will now no longer be incurred. This estimate of average burden hours is made solely for the purposes of the Paperwork Reduction Act and is not derived from a comprehensive or even representative survey or study of the cost of SEC rules and forms.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and Gary Waxman, Clearance Officer, Office of Management and Budget, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: June 3, 1991.
Margaret H. McFarland,
Deputy Secretary.
[FR Doc. 91-14887 Filed 6-21-91; 8:45 am]
BILLING CODE 3010-01-M

Forms Under Review by Office of Management and Budget

Agency Clearance Officer: Kenneth Fogash, (202) 272-2142.
Upon written request copy available from: Securities and Exchange Commission Office of Filings, Information and Consumer Services Washington, DC 20549.

New, Form F-1, File No. 270-283
New, Form F-12, File No. 270-284
New, Form 13E4H, File No. 270-285
New, 14D1C, File No. 270-286

Notice is hereby given pursuant to the Paperwork Reduction Act of 1980 (44

VOL 56 ISS 121 JE 24 1991 UMI

U.S.C. 3501 *et seq.*), that the Securities and Exchange Commission ("Commission") has submitted for OMB approval new forms under the Securities Act of 1933 (1933 Act), and the Securities Exchange Act of 1934 (1934 Act) to be adopted pursuant to the Commission's rulemaking authority. The proposed forms are as follows:

Form F-11, registration pertaining to equity rights offerings by foreign issuers, (1933 Act),
Form F-12, registration of securities to be issued in an exchange offer, (1933 Act),
Form 14D1C, third party tender offer form (1934 Act), and
Form 13E4H, issuer tender offer form, (1934 Act).

The staff estimates that up to approximately 107 foreign companies may avail themselves of the new forms per year at an estimated average burden of two hours per response per form. The estimated average burden hours are made solely for purposes of the Paperwork Reduction Act and not derived from a comprehensive or even a representative survey or study of the costs of Commission rules and forms.

General comments regarding the estimated burden hours should be directed to Gary Waxman at the address below. Any comments concerning the accuracy of the estimated average burden hours for compliance with Commission rules and forms should be directed to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549 and Gary Waxman, Clearance Officer, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: June 12, 1991.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

June 18, 1991.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder for unlisted trading privileges in the following security:

Societe National Elf Aquitane
American Depository Shares each representing ½ and ordinary share, FF 50 Nominal Value (File No. 7-6998)

This security is listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before July 10, 1991, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before July 10, 1991, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-29311; File No. SR-PTC-91-08]

Self-Regulatory Organizations; Participants Trust Company; Filing and Order Granting Accelerated Approval of Proposed Rule Change Relating to Elimination of Prorated Charges to Participants for Principal and Interest Advances

June 14, 1991.

I. Introduction

On June 4, 1991, the Participants Trust Company ("PTC") filed a proposed rule change (File No. SR-PTC-91-08)[1] with the Securities and Exchange Commission ("Commission") pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[2] The Commission is publishing this notice to solicit comments from interested persons. As discussed below, this order also approves the proposal on an accelerated basis.

[1] The proposed rule change was filed originally on October 23, 1990 (File No. SR-PTC-90-07) and was approved temporarily through April 30, 1991. See Securities Exchange Act Release No. 28720 (January 18, 1991), 56 FR 2787. On April 4, 1991, the proposed rule change was refiled (File No. SR-PTC-91-05) and approved temporarily through June 14, 1991. See Securities Exchange Act Release No. 29073 (April 22, 1991), 56 FR 19225.

[2] 15 U.S.C. 78s(b)(1).

II. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Article III, rule 2, section 2(f) of the rules of PTC, providing for the proration among benefited participants of the cost of financing principal and interest ("P&I") advances, is deleted and current section 2(g) is renumbered 2(f).

III. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

In its filing with the Commission, PTC included statements concerning the purpose of, and statutory basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item V below. PTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

PTC has determined that the cost of financing principal and interest advances can be adequately covered by investing collected principal and interest payments upon receipt; the purpose of the proposed rule change to reduce fees and costs to participants.

The basis for this proposed rule change under the Act is the requirement under section 17A(b)(3)(D) that the rules of a clearing agency provide for the equitable allocation of reasonable dues, fees and other charges among its participants.

(B) Self-Regulatory Organization's Statement on Burden on Competition

PTC does not perceive that the proposed rule change imposes any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

PTC has not solicited, and does not intend to solicit, comments on this proposed rule change. PTC has not received any unsolicited written comments from members or other interested parties.

IV. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

PTC has requested accelerated effectiveness. PTC believes that there is good cause to approve the proposal prior to the thirtieth day after publication in the Federal Register because it will allow PTC to continue covering the cost of borrowing P&I advances with interest from investing P&I receipts and because there will, accordingly, not be a lapse in effectiveness when the temporary approval for SR-PTC-91-05 expires on June 14, 1991. In addition the Commission has noticed the proposal and approved it on a temporary basis. No comments were received.

V. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of PTC. All submissions should refer to File No. SR-PTC-91-08 and should be submitted by July 15, 1991.

VI. Discussion

Section 17A(b)(3)(D) of the Act[3] requires that the rules of a clearing agency provide for the equitable allocation of reasonable dues, fees and other charges among its participants.[4] The proposal would eliminate the pro rata charge to participants for the borrowing cost relating to P&I advances. As discussed below, the Commission believes that the proposal is consistent with the Act and in particular section 17A(b)(3)(D).

Because of delays in collecting P&I and the lack of historical data concerning borrowing cost and interest income from investing P&I, PTC has

[3] 15 U.S.C. 78q-1(b)(3)(D).

[4] This proposal is not intended to have any effect on the Commission's directive in PTC's temporary registration order that requires PTC to modify its P&I collection and payment procedures to allow for voluntary instead of mandatory advances of P&I. See Securities Exchange Act Release No. 28671 (March 28, 1991), 54 FR 13288.

VOL 56 ISS 121 JE 24 1991 UMI

charged participants who receive P&I advances pro rata for PTC's external borrowing costs, while at the same time earning interest income by investing P&I received prior to Distribution Date (the day after payment date). In effect, prior to the current temporary approval of this proposal, PTC was duplicating revenue associated with its P&I payment service by not offsetting borrowing costs with earned interest income. Due to PTC's efforts to encourage paying agents to make P&I payments available to PTC by payment date, PTC now believes that income from investing P&I received prior to Distribution Date is more than sufficient to satisfy anticipated borrowing cost. Thus, the proposal eliminates this inefficiency by applying P&I interest income towards the cost of financing P&I and eliminating the existing pro rata charge to participants for such cost.

Since PTC's inception as a clearing agency, the Commission has expressed concern that PTC retain sufficient funds and credit sources to adequately meet its payment obligations. The Commission is particularly concerned about the possible effects of the proposal on operating income and credit sources in the event interest earned on P&I receipts does not meet the cost of financing P&I advances. Because of this concern, the Commission requested that PTC monitor, on a monthly basis, the amount of funds borrowed for P&I advances, the cost of financing P&I advances, and the amount of interest earned on the investment of P&I receipts.[6] PTC's consequent monitoring of P&I receipts and disbursements disclosed that the income that the income generated from investing P&I receipts exceeded the cost of financing for P&I advances by 2:1 on an annualized basis.[6] Additionally, during the period of January, 1991, through March, 1991, the excess earnings from invested P&I receipts was over $2 million, substantially greater than the 2:1 ratio.

Because of the substantial income derived from the investment of P&I receipts, the Commission is concerned that PTC's Board of Directors establish policies concerning the use of P&I investment proceeds and that PTC's accounting controls adequately track P&I investment income and the use of that income. Accordingly, PTC has agreed to identify and track separately interest earned from P&I receipts and the cost of financing P&I advances and report to its Board of Directors ("Board") the amount of gross income earned on P&I payments invested, the cost of borrowing to meet P&I advances, and the net income earned from investing P&I receipts after offsetting the cost of borrowing for P&I advances on a monthly basis. PTC's management also has agreed to seek a policy statement from the Board within six months of the release of this order addressing the use of excess earnings from invested P&I receipts.[7]

The Commission believes that there is good cause for approving the proposal prior to the thirtieth day after publication in the **Federal Register**. The Commission has noticed for comment in the **Federal Register** and approved, on a temporary basis though June 14, 1991, two prior rule filings identical to the present filing. No comments regarding the proposal were received.[8] By accelerating the effective date of this filing, PTC can continue to cover the cost of borrowing for P&I advances with interest earned on investing P&I receipts, instead of reverting back to its previous policy of charging participants the cost of borrowing.

VII. Conclusion

For the reasons stated above, the Commission finds that PTC's proposal is consistent with Section 17A of the Act. The Commission also finds good cause for approving the proposal prior to the thirtieth day after publication in the **Federal Register**.[9]

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[10] that PTC's proposed rule change (SR–PTC–91–08) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Incorporated

June 18, 1991.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following securities:

Sbarro Incorporated
Common Stock, $0.01 Par Value (File No. 7–6995)

Sensormatic Electronics Corporation
Common Stock, $.01 Par Value (File No. 7–6996)

Transatlantic Holdings, Inc.
Common Stock, $1 Par Value (File No. 7–6997)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before July 10, 1991, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–18202; 812–7622]

Equitable Life Funding Corporation; Application

June 17, 1991.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANT: Equitable Life Funding Corporation.

RELEVANT ACT SECTIONS: Order requested under section 6(c) that would exempt applicant from all provisions of the Act.

SUMMARY OF APPLICATION: Applicant requests an order that would permit it to sell certain debt instruments and use the proceeds to finance the business activities of its parent company, Equitable Life Assurance Society of the United States ("Equitable"), and certain companies controlled by Equitable.

FILING DATE: The application was filed on November 7, 1990, and amended on February 20, 1991 and May 28, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on July 15, 1991, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, 787 Seventh Avenue, New York, NY 10019.

FOR FURTHER INFORMATION CONTACT: Nicholas D. Thomas, Staff Attorney, at (202) 504–2263, or Jeremy N. Rubenstein, Branch Chief, at (202) 272–3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant was incorporated in Delaware in November of 1990. All of applicant's outstanding shares are owned either by The Equitable Life Assurance Society of the United States ("Equitable"), a New York mutual life insurance company, or by a holding company subsidiary of Equitable formed for the purpose of holding the stock of various Equitable subsidiaries. Equitable, directly and through its subsidiaries, issues a variety of life insurance and investment products, provides investment advisory services to individuals, businesses, and institutional investors, and manages its own portfolio of investments that support its obligations.

2. Applicant was organized to engage in financing activities to provide funds for use in the business operations of Equitable and its subsidiaries. Applicant proposes to borrow funds through the sale of debt securities in the United States and in overseas markets, and to lend the proceeds to Equitable and Equitable's direct and indirect subsidiaries.

3. Due to the nature of the debt markets, applicant may, from time to time, borrow amounts in excess of the amounts immediately required by Equitable and its subsidiaries. However, at least 85% of the cash or cash equivalents raised by applicant through the sale of debt securities will be loaned to Equitable or its subsidiaries as soon as practicable, but in no event later than six months after applicant's receipt of such cash or cash equivalents. Any cash that is not loaned to Equitable or its subsidiaries will be invested in government securities, securities of Equitable or a company controlled by Equitable (or in the case of a partnership or joint venture, the securities of the partners or participants in the joint venture), or debt securities which are exempted from the provisions of the Securities Act of 1933 by section 3(a)(3) of that Act.

4. Before applicant begins issuing debt securities, Equitable will enter into a master guarantee agreement (the "Guarantee Agreement") with applicant under which Equitable will unconditionally guarantee the payment of principal, interest, and premium, if any, on debt securities issued by applicant. The Guaranty Agreement will give each holder of debt securities issued by applicant a direct right of action against Equitable to enforce Equitable's obligations under the Guaranty Agreement without first proceeding against applicant.

Applicant's Legal Analysis

1. Rule 3a–5 under the Act provides an exemption from the definition of investment company for certain companies organized primarily to finance the business operations of their parent companies or companies controlled by their parents companies. The rationale underlying the rule is expressed in the SEC release in which the rule was adopted.[1] The release stated that a finance subsidiary of a non-investment company parent, through technically an investment companies itself, is essentially a conduit for its parent. Therefore, the release reasoned, if the parent can issue debt securities directly, there is no reason to impose the requirements of the Act on the subsidiary.

2. Rule 3a–5(b)(2)(i) defines "parent company" to be a corporation, partnership or joint venture that, *inter alia*, is not considered an investment company under section 3(a) or that is excepted or exempted by order from the definition of investment company by section 3(b) or by the rules or regulations under section 3(a). Equitable is not technically a "parent company" within the meaning of rule 3a–5(b)(2)(i) because it meets the definition of investment company in section 3(a) of the Act and is excepted from such definition by section 3(c)(3) of the Act.

3. The release adopting rule 3a–5 stated that relief similar to that granted under rule 3a–5 may be appropriate for a finance subsidiary of a parent company that derives its non-investment company status from section 3(c) of the Act. The release stated, however, that such requests should be examined on a case by case basis. According to the adopting release, the concern was that a company could be considered a non-investment company for the purposes of the Act under section 3(c) of the Act and still be engaged primarily investment company activities. To illustrate the concern, the release pointed to section 3(c)(1) of the Act, which provides an exemption from the Act for investment companies whose shares are beneficially owned by not more than one hundred persons which is not making and does not propose to make a public offering of its securities. Applicant argues that such concerns do not apply to Equitable because Equitable, unlike a section 3(c)(1) investment company, does not engage primarily in investment company activities. Instead, Equitable is an insurance company and is excluded from the definition of investment company under section 3(c)(3) of the Act.

4. Rule 3a–5(b)(3)(i) defines a "company controlled by the parent company" to be a corporation, partnership or joint venture that, *inter*

1991
UMI

alia, is not considered an investment company under section 3(a) or that is excepted or exempted by order from the definition of investment company by section 3(b) or by the rules or regulations under section 3(a). Certain of Equitable's subsidiaries do not fit within the technical definition of "companies controlled by the parent company." These subsidiaries, like Equitable, derive their non-investment company status from section 3(c) of the Act. Also like Equitable, non of the subsidiaries derives its non-investment company status from section 3(c)(2) of the Act and none is primarily engaged investment company activities. Instead, the subsidiaries derive their non-investment status 3(c)(2), 3(c)(3), 3(c)(4), and 3(c)(8) of the Act, except that is a subsidiary is exempted under section 3(c)(8) of the Act, it will not be primarily engaged, directly or through majority owned subsidiaries, in one or more of the businesses described in section 3(c)(5) of the Act.

5. Section 6(c) of the Act empowers the SEC to grant an exemption from the provisions of the Act when such exemption is necessary to appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. On the basis of the forgoing, applicant submits that its request for exemptive relief meets the standards set out in section 6(c) of the Act and therefore should be granted.

Applicant's Condition

Applicant will comply with all of the provisions of rule 3a-5 under the Act except: (a) Equitable will not meet the portion of the definition of "parent company" in rule 3A-5(b)(2)(i) solely because it is excluded from the definition of investment company under section 3(c)(3) of the Act; and (b) applicant will be permitted to invest in or make loans to corporations, partnerships, and joint ventures that do not meet the portion of the definition of "company controlled by the parent company" in rule 3a-5(b)(3)(i) solely because they are excluded from the definition of investment company by sections 3(c)(2), 3(c)(3), 3(e)(4), or 3(c)(8) of the Act; provided that any such entity excluded from the definition of investment company under section 3(c)(6) of the Act will not be engaged primarily, directly or through majority-owned subsidiaries, in one or more of the businesses described in section 3(c)(5) of the Act.

For the commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25832]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

June 14, 1991.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by July 9, 1991, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant application(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Lehigh Utilities, Inc. (37-855)

Lehigh Utilities Inc. ("Lehigh"), 500 Construction Lane, Lehigh Acres, Florida, 33936-4848, a Florida corporation, has filed an application for an order under section 2(a)(4) of the Act declaring that it is not a "gas utility company" because it is primarily engaged in businesses other than that of a gas utility company, and it distributes at retail only small amounts of liquified petroleum ("LP") gas.

Lehigh is a wholly owned subsidiary of Lehigh Corporation, a real estate development company which originally developed the community in Lehigh Acres, Florida that Lehigh serves. Lehigh Corporation is primarily engaged, directly and through its subsidiaries, in the marketing and sale of homesites, timeshare units and residential dwelling units, as well as the operation of a motel and two golf courses, in Lee County, Florida. Lehigh Corporation is a wholly-owned subsidiary of Land Resources Corporation ("Land Resources"), a real estate holding company which is, in turn, a wholly owned subsidiary of Security Savings and Loan Association ("Security"), Scottsdale, Arizona, an institution under the receivership of the Resolution Trust Corporation ("RTC").

The RTC is pursuing the sale of all or part of Land Resources and its subsidiaries. As receiver for Security, the RTC has approved the sale of all of the common stock of Lehigh to Seminole Utility Company ("Seminole"), an indirect nonutility subsidiary, presently inactive, of Minnesota Power & Light Company, a holding company exempt from registration under section 3(a)(2) of the Act pursuant to rule 2.

Lehigh provides water, sewer, gas and garbage collection services to the town of Lehigh Acres. Lehigh's gas system is comprised of 100 buried 1,000 gallon tanks located throughout its service area. Distribution lines run from the tanks throughout portions of Lehigh Acres, and gas is piped to approximately 1,700 customers within Lehigh Acres, substantially all of which are residential customers. Lehigh's LP gas operations do not constitute a utility service under Florida law, and its rates for LP gas service are not subject to regulation by the Florida Public Service Commission.

Lehigh's operating revenues derived from sales of LP gas for the fiscal year ended September 30, 1990, were $463,698; approximately 9.1% of Lehigh's total fiscal 1990 operating revenues of $5,086,030. At September 30, 1990, Lehigh had total assets of $15,031,981, of which approximately $800,000, or 5%, constituted LP gas system properties.

Lehigh states that it is primarily engaged in businesses other than the business of a gas utility company, with revenues from such other businesses constituting approximately 91% of its total fiscal 1990 revenues. Lehigh further notes that its $463,698 revenues from retail sales of LP gas in fiscal year 1990 are small, both in absolute terms and as a percentage of Lehigh's total revenues. Lehigh thus asserts that it is not necessary in the public interest or for the protection of investors or consumers that it be considered a "gas utility company" under the Act.

Enerop Corporation (70-7301)

Enerop Corporation ("Enerop"), 10 Lafayette Square, Buffalo, New York 14203, a wholly owned subsidiary of National Fuel Gas Company ("National"), a registered holding company, has filed a post-effective amendment under sections 9(a) and 10 of the Act to the application-declaration which was filed under sections 6(a), 7, 9(a), 10 and 12(b) of the Act and rule 45.

By orders dated May 1, 1986, and March 18, 1988 (HCAR Nos. 24061 and 24604, respectively), the Commission authorized, in relevant part: (1) National to loan $200,000 to Metscan, Inc. ("Metscan"), a New York corporation that has developed an electronic meter reading system ("Metscan System"), and to receive an option to convert the note ("Note") evidencing the loan into 80,000 shares of Metscan's preferred stock, at a price of $2.50 per share; (2) National to assign the Note and option from Metscan to Enerop; (3) National to provide Enerop $442,500 as a contribution to capital, which funds Enerop was authorized to invest, together with third parties, in Metscan Technology Partners ("Partnership"), a New York partnership formed by Metscan, after which Enerop would own approximately 9.96% of the Partnership; and (4) the Partnership and Metscan to be reorganized as a corporation before the end of 1989, and Enerop to acquire approximately 7.23% of the common stock of the new corporation.

The March 18, 1988 order contained a reservation of jurisdiction over this reorganization which was released by order dated April 27, 1989 (HCAR No. 24874). The reorganization occurred on May 17, 1989, and the new corporation was called Metscan Acquisition Corporation ("MAC"). Pursuant to the reorganization, the Note and Enerop's Partnership interest attributable to the $442,500 investment were converted into 80,000 shares and 177,00 shares of MAC common stock, respectively, at a conversion rate of $2.50 per share. MAC subsequently changed its name to Metscan, Inc., and the 257,000 shares that Enerop then owned represented 6.0% of the total shares of Metscan common stock outstanding, and 5.1% of that total if shares subject to outstanding warrants and employees' options were included.

By order dated September 7, 1990 (HCAR No. 25143), the Commission authorized Enerop to acquire an additional 143,000 shares of Metscan common stock for $357,500 ($2.50 per share), and 39,500 shares of Metscan preferred stock for $158,000 ($4 per share). The preferred stock pays a cumulative annual 7% dividend, and is convertible by the stockholders to Metscan common stock on a 1:1 basis, through July of 1995. Enerop now owns 9.4% of Metscan's common stock and 7.1% of Metscan's preferred stock, or 7.9% of such common stock if the preferred stock is converted into common stock, and if all warrants and other rights are exercised.

Enerop now proposes to purchase 17,000 additional shares of Metscan preferred stock for $68,000 ($4 per share). Once the proposed acquisition has been consummated, Enerop will own 9.8% of Metscan's preferred stock and 9.4% of Metscan's common stock, or about 8.2% of the actual and potential equity investment in Metscan. Enerop's total investment in Metscan will then total $1,226,000.

OLS Energy-Chino, et al. (70-7725)

OLS Energy-Chino ("Chino"), OLS Energy-Berkeley ("Berkeley") and OLS Energy-Camarillo ("Camarillo"), all located at One Gatehall Drive, 3rd Floor, Parsippany, New Jersey 07054, indirect subsidiary companies of General Public Utilities Corporation ("GPU"), a registered holding company, have filed a post-effective amendment to their declaration under sections 6(a) and 7 of the Act.

By orders dated May 10, 1989 and August 1, 1989 (HCAR Nos. 24885 and 24931, respectively), the Commission, among other things, authorized Energy Initiatives, Incorporated, a wholly owned indirect subsidiary company of GPU, to acquire through a newly formed, wholly owned subsidiary, Camchino Energy Corporation, general and limited partnership interests, aggregating a 50% interest, in OLS Power Limited Partnership ("Partnership"). The Partnership was authorized to acquire, directly or indirectly, all of the outstanding common stock of Chino, Berkeley and Camarillo.

Each of Chino, Berkeley and Camarillo is the lessee (collectively, "Lessees") of a qualifying cogeneration facility ("Facility") located in California. Prior to the acquisition, each of the Lessees had entered into a revolving credit agreement ("Credit Agreement") with General Electric Capital Corporation ("GECC"), the owner of the Facilities, to provide for the short-term working capital requirements of its Facility.

By orders dated February 9, 1990 and December 26, 1990 (HCAR Nos. 25038 and 25230, respectively), the Commission authorized Chino, Berkeley and Camarillo to enter into amendments to their Credit Agreements to, among other things: (a) Increase the aggregate amount of the notes which may be outstanding thereunder at any time from $1,000,000 to $1,250,000; (b) extend the time during which notes may be outstanding thereunder to June 30, 1991; and (c) reduce the rate of interest payable on any notes outstanding to 3% from 5% over the Prime Rate, as defined therein. In addition, Chino and Camarillo were authorized to arrange for the issuance of letters of credit ("LOCs") by GECC in favor of Southern California Gas Company as security for their respective obligations to pay for natural gas supplied to their Facilities. GECC has issued LOCs in the amount of $800,000 for Camarillo and $700,000 for Chino, and the maximum amounts of borrowings which Chino and Camarillo may make under their Credit Agreements have been reduced by the respective face amount of the LOCs.

Camarillo, Chino and Berkeley now seek authorization to borrow under their respective Credit Agreements to December 31, 1991. In addition, Chino and Camarillo propose that their respective LOCs be outstanding to December 31, 1991. All borrowings and LOC arrangements will not exceed the aggregate principal amount under each Credit Agreement of $1.25 million.

The Lessees would use the proceeds from such borrowings for working capital and general corporate purposes or, in the case of Chino and Camarillo, to repay GECC any amounts paid by GECC under the LOCs.

The Southern Company, et al. (70-7846)

The Southern Company ("Southern"), 64 Perimeter Center East, Atlanta, Georgia 30346, a registered holding company, and Southern Nuclear Operating Company, Inc. ("SONOPCO"), 40 Inverness Center Parkway, Birmingham, Alabama 35204, its wholly owned subsidiary company, have filed an application-declaration under section 6(a), 7, 9(a), 10 and 12(b) of the Act and rule 45 thereunder.

SONOPCO proposes through March 31, 1993 to borrow from Southern or lenders other than Southern in an aggregate principal amount not to exceed $10 million (such $10 million includes the $5 million currently outstanding in open account advances from Southern previously authorized by order dated December 14, 1990 (HCAR No. 25212) ("December 1990 Order")). Borrowings from Southern will accrue interest at a rate not to exceed the prime rate in effect at a bank to be designated by Southern. Loans obtained from lenders other than Southern will have maturities not to exceed 10 years and will accrue interest at a rate not to

VOL 56 ISS 121 JE 24 1991 UMI

exceed the prime rate plus 2% for variable rate loans and the prime rate at the time of borrowing plus 2% for fixed rate loans. Such loans may be secured or unsecured and may be guaranteed by Southern.

Southern proposes through March 31, 1993 to make up to $5 million in open account advances to SONOPCO from time to time which, at the option of Southern, may be converted into capital contributions or additional shares of common stock of SONOPCO. Such advances would be in addition to the $5 million currently outstanding under the December 1990 Order. To the extent any such advances are converted to equity, the borrowing authority sought herein shall be reduced by the amount of the advances so converted, so that the total capitalization of SONOPCO does not exceed $11 million (including its present $1 million common equity) without further authorization from the Commission. The rate of return on SONOPCO's common equity capital will not exceed the average of the most recent rates of return allowed by the Alabama Public Service Commission and the Georgia Public Service Commission.

New England Power Company (70-7853)

New England Power Company ("NEP"), 25 Research Drive, Westborough, Massachusetts, a subsidiary of New England Electric System, a registered holding company, has filed a declaration under sections 6(a)(2), 7(e), and 12(e) of the Act and rules 62 and 65 thereunder.

The preference provisions of NEP's Dividend Series Preferred Stock and Preferred Stock—Cumulative (collectively, the "Cumulative Preferred Stock"), as set forth in NEP's Articles of Organization and By-Laws, provide that, except as voted by the holders of a majority of the Cumulative Preferred Stock, the short-term unsecured indebtedness of NEP shall not exceed 10% of the sum of (i) the principal amount of all outstanding bonds and other secured indebtedness and (ii) the capital, premium, and retained earnings of NEP, and that all unsecured indebtedness of NEP shall not exceed 20% of such sum. As used in NEP's Articles of Organization and By-Laws, short-term unsecured indebtedness means unsecured indebtedness having an original maturity of less than ten years. In recent years, NEP's unsecured indebtedness has been all short-term.

By a majority vote of the holders of the Cumulative Preferred Stock during a special meeting of stockholders held on December 6, 1984, and by order of the Commission (HCAR No. 23460, October 23, 1984), NEP was authorized to issue short-term unsecured indebtedness in excess of the 10% limitation thereon, provided that all unsecured indebtedness not exceed 20% of the sum of the principal amount of all outstanding bonds and other secured indebtedness and the capital, premium, and retained earnings of NEP and that any such unsecured indebtedness in excess of the 10% limitation be issued not later than November 1, 1991, and mature not later than November 1, 1992.

NEP now proposes to seek the affirmative vote of the holders of a majority of NEP's cumulative Preferred Stock, authorizing the continued issuance by NEP of short-term unsecured indebtedness in excess of the 10% limitation, provided (i) that any such excess indebtedness be issued not later than November 1, 1996, (ii) such excess indebtedness shall have a maturity not later than November 1, 1998 and (iii) the 20% limitation on all unsecured indebtedness of NEP shall remain in effect.

The continuation of the previously granted authorization requires the favorable vote, at a meeting called for that purpose, of a majority of the Cumulative Preferred Stock of all series now outstanding, voting as a single class. The Board of Directors intends to submit the proposal to the Cumulative Preferred Stockholders for approval, and to solicit proxies to obtain the required vote.

Consolidated Natural Gas Co. (70-7884)

Consolidated Natural Gas Co. ("consolidated"), CNG Tower, 625 Liberty Avenue, Pittsburgh, Pennsylvania 15222-3199, a registered holding company, and Virginia Natural Gas, Inc. ("VNG"), 5100 East Virginia Beach Boulevard, Norfolk, Virginia 23502-3488, its wholly owned gas public-utility subsidiary company, have filed a declaration under section 12(h) of the Act and rule 45 thereunder.

In 1989, prior to its acquisition by Consolidated, authorized by order dated February 14, 1990 (HCAR No. 25040), VNG issued $20 million principal amount of 9.94% senior notes, series A, due January 1, 1999 ("Notes") to the Aid Association of Lutherans ("Association"), pursuant to a note purchase agreement dated January 1, 1989 ("Note Agreement"). The Note Agreement provides that interest on the unpaid principal is payable semi-annually on the first day of January and July of each year, commencing on July 1, 1989. The Note Agreement requires VNG to prepay $4 million principal amount of the Notes on January 1, 1995, and on each January 1 thereafter to and including January 1, 1998. The last $4 million installment would be paid at maturity on January 1, 1999. In addition, the Note Agreement requires VNG to provide to the Association copies of its financial statements accompanied by a report thereon of independent public accountants.

Consolidated proposes to enter into a guarantee agreement ("Guarantee") with the Association pursuant to which Consolidated would absolutely and unconditionally guarantee all of VNG's obligations under the Note Agreement in accordance with the terms thereof. In consolidation of the Guarantee, the Association would release VNG from having to provide reports of independent public accountants on its financial statements otherwise required by the Note Agreement. It is stated that the waiver of such requirement would result in an estimated savings to VNG of approximately $50,000 per year.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements filed during the Week Ended June 14, 1991

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 412 and 414. Answers may be filed within 21 days of date of filing.

Docket Number: 47583.
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC12 Reso/C 0901 dated May 8, 1991; Europe To USA/US Territories, R-1 To R-7.
Proposed Effective Date: October 1, 1991.

Docket Number: 47584
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC23 Reso/C 0201 dated May 27, 1991; TC23 Expedited (Except To/From US Territories), R-1 To R-3.
Proposed Effective Date: August 1, 1991.

Docket Number: 47585
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.

Subject: TC23 Reso/C 0220 dated May 27, 1991; TC23 Expedited (To/From US Territories), R-2; intended effective date: August 1, 1991; TC23 Reso/C0203 dated May 27, 1991; TC23 (To/From US Territories); intended effective date: October 1, 1991.

Docket Number: 47586
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC12 Resp/C 0004 dated May 1, 1991; North Atlantic Areawide (Except USA), R-1 to R-2; TC12 Reso/C 0006 dated May 1, 1991; Canada-Africa Reso, R-3 To R-6; TC12 Rates 0466 dated May 22, 1991—Tables; TC12 Reso/C 0000 dated May 1, 1991; Canada-Africa Resos, R-7 To R-12; TC12 Rate 0470 dated May 22, 1991—Tables.
Proposed Effective Date: October 1, 1991.

Docket Number: 47587
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC31 Reso/C 0219 dated April 22, 1991; South Pacific (To/From USA/US Terr.), R- To R-4; TC31 Rates 0146 Dated May 15, 1991—Rates Tables; TC31 Reso/C 0221 dated April 22, 1991; Japan-USA/US Terr., R-5 To R-9; TC31 Reso/C 0223 dated April 22, 1991; Korea-USA/US Terr., R-10 To R-21; TC31 Rates 0144 dated May 3, 1991—Rates Tables; TC31 Reso/C 0224 dated April 22, 1991; Southeast Asia-USA/US Terr., R-22.
Proposed Effective Date: October 1, 1991.

Docket Number: 47588
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC3 Reso/C 0071 dated May 21, 1991; TC3 (Except To/From US Territories), R-1 To R-13; TC3 Rates 0078 dated May 16, 1991—Rates Tables.
Proposed Effective Date: October 1, 1991.

Docket Number: 47589
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC123 Reso/C0025 dated April 22, 1991; TC1-South Asian Subcontinent Via The Atlantic; (Except To/From US Terriroties), R-1 To R-6.
Proposed Effective Date: October 1, 1991.

Docket Number: 47590
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC123 Reso/C 0026 dated April 22, 1991; TC1-South Asian Subcontinent Via The Atlantic; (To/From US Territories); TC31 Meet/C 0071/TC123 Meet/C0007 dated May 27, 1991—Minutes; TC123 Rates 0013 dated May 27, 1991—Rates Tables.
Proposed Effective Date: October 1, 1991.

Docket Number: 47591.
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC3 Reso/C 0070 dated May 21, 1991; TC3 (To/From US Territories), R-1 To R-4; TC3 Meet/C 0021 dated May 27, 1991—Minutes; TC3 Rates 0077 dated May 16, 1991—Rates Tables.
Proposed Effective Date: October 1, 1991.

Docket Number: 47592.
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC31 Reso/P dated May 27, 1991; Expedited North America-Southwest Pacific; (To/From US Territories) Reso 002d, R-1; intended effective date: July 1, 1991; TC31 Reso/P 0673 dated May 29, 1991; Expedited South Pacific (To/From US Territories); R-2 to R-5; intended effective date: August 1, 1991.

Docket Number: 47594.
Date filed: June 10, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC31 Reso/C 0216 dated April 22, 1991; South Pacific (Except To/From USA/US Terr.), R-1 to R-4; TC31 Rates 0147 dated May 15, 1991—Rates Tables; TC31 Reso/C 0220 dated April 22, 1991; Japan-TC1 (Except USA/US Terr.), R-5 To R-6; TC31 Rates) 143 dated May 3, 1991—Rates Tables; TC31 Reso/C 0222 dated April 22, 1991; SE Asia/Korea—(Except USA/US Terr.), R-10 To R-17.
Proposed Effective Date: October 1, 1991.

Docket Number: 47596.
Date filed: June 13, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 500 (Within Africa).
Proposed Effective Date: July 1, 1991.

Docket Number: 47599.
Date filed: June 13, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 499 (Diplomatic bags).
Proposed Effective Date: July 1, 1991.

Docket Number: 47600.
Date filed: June 13, 1991.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 497 (Fare Reduction from Italy).
Proposed Effective Date: July 1, 1991.

BILLING CODE 4910-62-M

[Docket 37554]

Order Adjusting the Standard Foreign Fare Level Index

The International Air Transportation Competition Act (IATCA), Public Law 96-192, requires that the Department, as successor to the Civil Aeronautics Board, establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage changes in actual operating costs per available seat-mile (ASM). Order 80-2-69 established the first interim SFFL, and Order 91-4-27 established the currently effective two-month SFFL applicable through May 31, 1991.

In establishing the SFFL for the two-month period beginning June 1, 1991, we have projected non-fuel costs based on the year ended December 31, 1990 data, and have determined fuel prices on the basis of the latest available experienced monthly fuel cost levels as reported to the Department.

These projections reflect sizeable decreases in fuel prices.

By Order 91-6-17 fares may be increased by the following adjustment factors over the October 1979 level:

Atlantic—1.4503
Latin America—1.4051
Pacific—1.8898
Canada—1.3809

For further information contact: Keith A. Shangraw (202) 366-2439.

Dated: June 17, 1991.

By the Department of Transportation.

Jeffrey N. Shane,
Assistant Secretary for Policy and International Affairs.

24
1991
UMI

below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 47595.
Date filed: June 10, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 8, 1991.
Description: Application of Ground Air Transfer, Inc., pursuant to section 401 of the Act and Subpart Q of the Regulations, applies for a determination of fitness to provide, on a code-sharing basis, interstate and overseas transportation of persons, property, and mail.

Docket Number: 44992.
Date filed: June 10, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 8, 1991.
Description: Application of Compania de Aviacion "Faucett," S.A., pursuant to section 402 of the Act and Subpart Q of the Regulations, applies for renewal of its foreign air carrier permit between the United States and Peru.

Docket Number: 44689.
Date filed: June 11, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 9, 1991.
Description: Application of Aeroperu, pursuant to section 402 of the Act and Subpart Q of the Regulations, applies for renewal of its foreign air carrier permit, to engage in scheduled foreign air transportation of persons, property, and mail between the United States and Peru.

Docket Number: 44944.
Date filed: June 11, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: July 9, 1991.
Description: Application of Aeronaves Del Peru, pursuant to section 402 of the Act and Subpart Q of the Regulations, applies for renewal of its foreign air carrier permit for an additional indefinite period authorizing it to engage in scheduled foreign air transportation of property and mail twice weekly between Lima, Peru; via the intermediate points Panama City, Panama; Guayaquil, Ecuador (blind sector); Bogata and Cali, Colombia (blind sectors); and the terminal point Miami, Flordia.

BILLING CODE 4910-62-M

Federal Aviation Administration

Air Traffic Procedures Advisory Committee; Meetings

AGENCY: Federal Aviation Administration (FAA), DOT.
ACTION: Notice of Air Traffic Procedures Advisory Committee meeting.

SUMMARY: The FAA is issuing this notice to advise the public that a meeting of the Federal Aviation Administration Air Traffic Procedures Advisory Committee (ATPAC) will be held to review present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures.

DATES: The meeting will be held from July 22, at 8 a.m., through July 25, 1991, at 4:30 p.m.

ADDRESSES: The meeting will be held at the Experimental Aircraft Association Aviation Center, 3000 Poberezny Road, Oshkosh, WI.

FOR FURTHER INFORMATION CONTACT: Mr. Theodore H. Davies, Executive Director, ATPAC, Air Traffic Rules and Procedures Service, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-3725.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. 1), notice is hereby given of a meeting of the ATPAC to be held from July 22, at 8 a.m., through July 25, 1991, at 4:30 p.m., at the Experimental Aircraft Association Aviation Center, 3000 Poberezny Road, Oshkosh, WI. The agenda for this meeting is as follows: A continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures. It will also include:

1. Approval of minutes.
2. Discussion of agenda items.
3. Discussion of urgent priority items.
4. Report from Executive Director.
5. Old Business.
6. New Business.
7. Discussion and agreement of location and dates for subsequent meetings.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Persons desiring to attend and persons desiring to present oral statements should notify the person listed above not later than July 19, 1991. The next quarterly meeting of the FAA ATPAC is planned to be held from October 21-24, 1991, in Washington, DC. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on June 17, 1991.

Theodore H. Davies,
Executive Director, Air Traffic Procedures Advisory Committee.

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

[Docket 91-05-IP-No. 2]

General Motors Corporation; Denial of Petition for Determination of Inconsequential Noncompliance

This notice denies the petition by General Motors Corporation of Warren, Michigan, to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for apparent noncompliances with 49 CFR 571.101, Federal Motor Vehicle Safety Standard No. 101, "Controls and Displays," and with 49 CFR 571.105, Federal Motor Vehicle Safety Standard No. 105, "Hydraulic Brake Systems." The company had petitioned for a determination that these noncompliances were inconsequential as they relate to motor vehicle safety.

Notice of receipt of the petition was published on February 4, 1991, and an opportunity afforded to comment (56 FR 4315).

Paragraph S5.3.1(d) of Standard No. 105 specifies that an indicator lamp shall be activated when the ignition (start) switch is in the "on" (run) position and whenever there is application of the parking brake. Paragraph S5.3.3 requires that the brake indicator lamp shall remain activated as long as the parking brake is applied and the ignition (start) switch is in the "on" position.

Paragraph S5.3.4(a) of Standard No. 101 specifies that means be provided which are capable of making telltales and their identification visible to the driver under all driving conditions. Paragraph S5.4(b) states that telltales shall be displayed at the initiation of any underlying condition. "Telltales" means a display that indicates the actuation of a device, a correct or defective functioning or condition, or a failure to function.

GM produced 14,400 Buick Rivieras and 4,200 Reattas of the 1990 model year which do not comply with the requirements of Standard No. 105 and Standard No. 101 mentioned above. The indicator lamp in these vehicles is not activated when the ignition is "on" and the transmission is in "Park" or "Neutral." GM supported its petition with the following arguments:

"First, the brake indicator light is displayed as soon as the vehicle is capable of being driven, *i.e.*, as soon as the transmission lever is shifted into reverse or any forward gear. This should have the effect of informing drivers if the parking brake has not been fully released before they proceed. If the parking brake has been firmly applied drivers will also experience obvious drag in both drive and reverse when attempting to move the vehicle.

"Second, the vehicles are equipped with 'pump-to-set' foot pedal parking brake systems. 'Pump-to-set' systems are applied with several strokes, *i.e.*, full application of the park brake system is achieved with approximately two and one half full strokes of the pedal. If the brake indicator lamp does not light when parking brake application has begun and after the transmission selector is placed in 'PARK' or 'NEUTRAL' drivers might be inclined to pump the pedal an additional time, which would have the desirable effect of assuring that the brake is more fully set.

"Third, GM has reviewed its files and had found no owner complaints regarding parking brake telltale operation on the subject Rivieras and Reattas.

"Finally, all 1990 Buick Rivieras and Reattas are equipped with automatic transmissions with parking mechanisms which must be engaged before the ignition key can be removed. The vehicles also meet the requirements of FMVSS 105, Section 5.2.2.3, *viz*, that without the parking brake engaged, the transmission parking mechanism will not disengage or fracture in a manner permitting vehicle movement in a prescribed barrier test. This transmission parking mechanism provides sufficient gradeability so that even if drivers do not fully set the parking brake, the parking mechanism is capable of holding the vehicles on a steep grade.

In summary, GM believes that drivers will be sufficiently alerted to release their parking brake, despite the noncompliance, by the activation of the brake indicator lamp when the vehicle is shifted into gear and by apparent drag when attempting to move the vehicle. Failure of the lamp to activate while drivers are applying the parking brake may prompt them to take additional precautions to assure the parking brake and transmission parking mechanism are engaged."

Two comments were received on the petition. Robert F. Schlegel, Jr., a professional engineer, supported GM, and J.P. Nenries, Captain, Virginia State Police, opposed the Petitioner.

Mr. Schlegel believes the petition should be granted, principally because the key interlock prevents the transmission from being in any position other than PARK when the key is removed (GM's final argument), and recommended that the petitioner compare the actual operation of the parking brake telltale with the description in the owner's manual, and provide corrective pages if required. Captain Henries would deny the petition on the basis that the brake system checks of Standard No. 105 are in the proper sequence to allow the driver's examination of the instrument panel upon activation of the ignition, and before his or her attention is diverted by the task of actually operating the vehicle. "To allow other manners of activation of brake system indicator lamps would send ambiguous messages to drivers." He also points out that failure to disengage the parking brake could result in a failure of the brake system.

The agency has carefully reviewed the arguments of the Petitioner, and the comments received in response to the notice. It has decided to deny the petition.

GM's first argument has two components. The first component is that the activation of the brake indicator lamp with the transmission lever in a position other than PARK or NEUTRAL will inform the driver if the parking brake has not been fully released. Second, drivers will also experience obvious drag in attempting to move the vehicle when the brake is wholly or partially engaged. The agency views these arguments as irrelevant. The safety issue is the indication of parking brake application, not its release. The safety importance of parking brake application is underscored by GM's own concern, as expressed in this warning in vehicle operator manuals: "It can be dangerous to get out of your car if the shift lever is not fully in "PARK" with the parking brake firmly applied. Your car can roll." Without the brake lamp indicator illuminating, a driver parking or exiting the vehicle will not be aware as to whether the parking brake is actually applied. In the nonconforming Rivieras, even partial application of the parking brake won't be indicated.

GM's second argument is that if the brake indicator lamp does not light, drivers might be inclined to pump the pedal that sets the parking brake an additional time. In NHTSA's views, this is a speculative argument, and the agency offers one of its own and that offered by Capt. Henries: that a driver not seeing the indicator light illuminate after pumping the pedal only once, would believe that the indicator lamp had failed, and respond in an inappropriate and unsafe manner. (S)he might not pump the pedal again, resulting in an insufficient application of the parking brake. Or, (s)he might release the brake entirely, to forestall the possibility of brake damage by inadvertently operating the vehicle with the parking brake engaged.

The third argument advanced by GM is that it has reviewed its files and has found no owner complaints regarding parking brake telltale operation. The agency notes that this is an argument frequently made by inconsequentiality petitioners, to which it has given little weight. In the absence of an actual malfunction affecting the systems under which a vehicle operates, it is unlikely that the average owner will even be aware that the informational safety check system of a vehicle is noncompliant. Nevertheless, the full benefit of safety systems should be available to a vehicle owner.

Finally, GM argued that the parking mechanism must be engaged before the key can be removed, which commenter Schlegel found persuasive. GM further argued that if a driver does not fully set the parking brake, the strength of the parking mechanism is sufficient to hold the vehicle on a steep grade. Standard No. 105 requires a vehicle to remain stationary on a 30 percent grade for 5 minutes, in either direction, with both the parking mechanism and parking brake engaged. GM does not specify that the "steep grade" is one of 30 percent, nor did it argue that it could meet the requirement using the parking pawl alone. Thus, NHTSA has found GM's final argument unpersuasive.

For the foregoing reasons, it is hereby found that petitioner has failed to meet its burden of persuasion that the noncompliances herein described are inconsequential, and its petition is denied.

Authority: 15 U.S.C. 1417; delegation of authority at 49 CFR 1.50 and 49 CFR 501.8.

Issued: June 18, 1991.

Barry Felrice,
Associate Administrator for Rulemaking.

RESOLUTION TRUST MEETING

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:29 p.m. on Tuesday, June 18, 1991, the Board of Directors of the Resolution Trust Corporation met in closed session to consider matters relating to (1) the resolution of failed thrift institutions, and (2) the proposed contracting with the Small Business Administration for developing an RTC legal information system.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Vice Chairman Andrew C. Hove, Jr., and concurred in by Chairman L. William Seidman, Jonathan L. Fiechter acting in the place and stead of Director T. Timothy Ryan, Jr. (Director of the Office of Thrift Supervision), and Dean S. Marriott acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency) that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(5), (c)(6), (c)(7)(A), (c)(7)(C), (c)(8), (c)(9)(A)(ii), (c)(9)(B) and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b).

The meeting was held in the Board Room of the Federal Deposit Insurance Corporation Building located at 550—17th Street, NW., Washington, DC.

Dated: June 19, 1991.

Resolution Trust Corporation.

John M. Buckley Jr.,

Executive Secretary.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL-3966-5]

National Oil and Hazardous Substances Pollution Contingency Plan; Lender Liability under CERCLA

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule and request for comment.

SUMMARY: The Environmental Protection Agency is proposing this rule to define the meaning of certain statutory elements in the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), which pertain to the liability of both privately-owned financial institutions and governmental receivers, conservators, loan guarantors, lending or other governmental entities that hold or maintain indicia of ownership as protection for a security interest in contaminated facilities. CERCLA section 101(20)(A) exempts persons whose indicia of ownership in a facility are held primarily to protect a security interest, provided that they do not participate in the management of the facility. In this proposed rule, EPA is interpreting the CERCLA section 101(20)(A) "security interest exemption" to clarify the range of activities that may be undertaken by a private or governmental lending institution or other entity that holds a security interest in a facility in the course of protecting the security interest, without being considered to be participating in the facility's management and thereby voiding the exemption.

In addition, EPA is proposing this rule to define the meaning of certain statutory elements in CERCLA that pertain to the liability of governmental entities that involuntarily acquire ownership or possession of contaminated facilities. Under CERCLA, a governmental lending entity, receiver, or conservator involuntarily acquiring a contaminated facility may be entitled to assert the so-called "innocent landowner defense" under sections 101(35)(A)(ii) and 107(b)(3), provided that the other elements of the defense are met. In this rule, EPA is interpreting CERCLA section 101(35)(A)(ii), which affects the ownership status under CERCLA of government entities that acquire contaminated facilities through escheat, eminent domain, involuntary transfer or acquisition, and other means, to include within its scope the acquisition of facilities by governmental entities through an involuntary transfer under statutes requiring the acquisition of property in which the governmental entity holds a security interest or has acted as a loan guarantor, conservator, or receiver, provided that the other elements of the defense are met. Governmental entities may also acquire property through other mechanisms, such as through civil and criminal seizures and asset forfeitures, and EPA is also seeking comment on regulatory language which would specify such other types of acquisitions by governmental entities that may be considered "involuntary" within the meaning of the statute.

DATES: Comments on this proposed rule must be submitted by July 24, 1991.

ADDRESSES: Commenters must send an original and two copies of their comments to: John Fogarty, Office of Enforcement, Superfund Division, Mail Code LE-134S, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments should include the docket number NCP-LL/DSB. The public docket is located at EPA Headquarters at the above address in room 2427 and is available for viewing from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: John Fogarty at (202) 382-3050.

SUPPLEMENTARY INFORMATION:

I. Background

The Agency is proposing this rule to interpret the provisions of sections 101(20) and 101(35) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, 42 U.S.C. 9601 *et seq.*, as they affect private lending institutions and governmental entities that hold a security interest in or that guarantee loans secured by a facility contaminated by or containing hazardous substances, or that acquire ownership of contaminated property in the course of acting as a conservator or receiver or protecting a secured interest.

Section 107(a) of CERCLA, 42 U.S.C. 9607(a), identifies four broad classes of responsible parties that are liable for the costs of cleaning up hazardous substances when the federal government, state government, or a private party brings suit. The first two classes include certain owners and operators of facilities contaminated by or containing hazardous substances, 42 U.S.C. 9607 (a)(1)–(a)(2). The third class consists of certain persons who arranged for disposal or treatment of hazardous substances. *Id.* section 9607(a)(3). Finally, the fourth class includes persons who accepted for transportation hazardous substances and selected the disposal facility. *Id.* section 9607(a)(4).

It is well-settled that each of the four groups of responsible parties is strictly liable under section 107(a). See, e.g., *United States* v. *Monsanto Co.*, 858 F.2d 160, 167 & n.11 (4th Cir. 1988), *cert. denied*, 109 S.Ct. 3156 (1989); *Tanglewood East Homeowners* v. *Charles-Thomas, Inc.*, 849 F.2d 1568, 1572 (5th Cir. 1988). In addition, it is also settled that such parties are jointly and severally liable when the environmental harm is indivisible. *United States* v. *Monsanto Co.*, 858 F.2d at 171; *United States* v. *Chem-Dyne Corp.*, 572 F. Supp. 802, 810–11 (S.D. Ohio 1983).

This proposed rule concerns only the first two of these categories of potentially liable parties—specifically "owners or operators" of facilities subject to CERCLA—which are defined in Section 101(20). Section 101(20)(A) exempts those persons who, without participating in the management of a facility, hold indicia of ownership in the facility [1] primarily to protect a security interest. 42 U.S.C. 9601(20)(A). Interpretation of this "security interest" exemption under CERCLA has generated uncertainty within the financial and lending communities, particularly with regard to the extent to which a secured creditor may undertake activities to oversee the affairs of a person whose facility is encumbered by a security interest (hereinafter the "borrower," "debtor," or "obligor") for the purposes of protecting the security interest, without incurring CERCLA liability. Specifically, there is concern over whether certain actions commonly taken by the holder of a security interest—such as monitoring facility operations, requiring compliance activities, refinancing or undertaking loan workouts, providing financial advice, and similar actions that may affect the financial, management, and operational aspects of a business—can be considered to be evidence that the security holder is "participating in the management of a facility."

Under section 101(20)(A), participation in management by the holder of a security interest will void the exemption. However, the extent to which a security holder may become involved in a facility without being considered to be participating in the management is not defined by the statute. Judicial interpretations of the exemption have varied in their articulations of the meaning of this term, without clearly defining a precise standard. See e.g., *United States* v. *Maryland Bank & Trust Co.*, 632 F. Supp. 573 (D. Md. 1986); *United States* v. *Mirabile*, 15 Envtl. L. Rep. (Envtl. L. Inst.) 20994 (E.D. Pa. 1985); *United States* v. *Fleet Factors Corp.*, 901 F.2d 1550 (11th Cir. 1990), *cert. denied*, No. 90-960 (U.S. Jan. 28, 1991) (cases suggesting that the exemption is abrogated once a security interest holder has divested the borrower or debtor of its management authority, such as when the holder becomes involved in the facility's day-to-day operations, where it becomes "overly entangled" in the affairs of the facility, or where its involvement otherwise affects a facility's hazardous waste practices). However, the few cases construing the exemption have uniformly indicated that a security holder's involvement in financially related matters, such as periodic monitoring or inspections of secured property, loan refinancing and restructuring, financial advice and similar activities will not necessarily void the exemption. See, e.g., *Guidice* v. *BFG Electroplating and Manufacturing Co.*, 732 F. Supp. 556 (W.D. Pa. 1989); *United States* v. *Nicolet*, 25 Env't Rep. Cas. (BNA) 1958 (E.D. Pa. 1987). Beyond these few judicial holdings, however, it is uncertain what activities are considered participation in the management of a facility, and which are not.

This uncertainty was heightened by *dicta* in the opinion of the Eleventh Circuit Court of Appeals in *United States* v. *Fleet Factors Corp.*, *supra*. In this opinion, the court suggested that a secured creditor may be liable, without being an operator, if it participates in the management of a facility "to a degree indicating a capacity to influence the corporation's treatment of hazardous wastes." 901 F.2d at 1557. While the court held that some level of actual participation by a security holder is required to abrogate the exemption, the court's opinion did not discuss what level of participation would be sufficient to support the inference that a security holder's involvement could influence operational decisions concerning a facility's treatment of hazardous waste. A subsequent decision by the Ninth Circuit Court of Appeals confirmed that the mere capacity or unexercised right to control facility operations is insufficient to void the exemption, and held that "there must be some actual management of the facility before a secured creditor will fall outside the exception." *In re Bergsoe Metal Corp.*, 910 F.2d 668, 672 (9th Cir. 1990) ("What is critical is not what rights the [creditor] took, but what it did. * * * [A creditor] cannot have participated in management if it never exercised [its rights].") See also *In re T.P. Long Chemical Inc.*, 45 Bankr. 270 (S.D. Ohio 1985) (bank that was not involved in facility's operations cannot be held to have voided security interest exemption). However, because the security holder in *Bergsoe Metals* was not in any way involved in the facility's operations, the court did not address the issue of the extent to which a security holder may act to protect its interest without being considered to be participating in the facility's management.

The scant legislative history of the security interest exemption sheds little light on this issue. The history of the exemption indicates only that it was added to the definitions of "owner or operator" out of a concern that the definition as initially drafted "inadvertently" included a person who held title or other ownership interest as security for a loan or other obligation, even though the security holder was not otherwise affiliated with or involved in the management of the facility. See House Debate on H.R. 85, 96th Cong., 1st Sess. (1979) (Sept. 19, 1980), reprinted in 2 A Legislative History of the CERCLA, Senate Comm. on Environment and Public Works, 97th Cong., 2d Sess. 998, 948 (Comm. Print 1983). The legislative history does not, however, provide any guidance or other indications of the types of activities that would be considered impermissible participation or involvement in the facility's management, or of the sorts of activities that were considered to be consistent with the exemption.

Uncertainty in this area has assumed particular importance for the Federal Deposit Insurance Corporation ("FDIC") and the Resolution Trust Corporation ("RTC"), both of which act as conservators and receivers of failing or failed insured depository institutions under the Federal Deposit Insurance Act ("FDI Act"), as amended by the Financial Institutions Reform, Recovery, and Enforcement Act ("FIRREA"), Public Law No. 101-73, 103 Stat. 183 (Aug. 9, 1989), due to their potential liability under CERCLA for the properties and assets owned by the failed lending institutions. Under this statutory mechanism, and because of the recent high failure rate of the country's lending institutions, these government entities are likely to own, possess, or have security interests in potentially contaminated properties as a consequence of their appointment as the conservator or receiver of failed and insolvent lending institutions. Additionally, other governmental entities that provide lending and credit services are also likely, through a variety of statutory mechanisms, to acquire or to have transferred to them an interest in or possession of diverse businesses, properties, and other assets which may be contaminated by hazardous substances. The governmental takeover of assets formerly held by private entities in this manner has raised pressing questions regarding the potential for CERCLA liability as an owner or operator as the result of such acquisitions, and the availability of the "innocent landowner" defense of sections 101(35)(A) and 107(b)(3) to these governmental entities.

To reduce these uncertainties, EPA is issuing this proposed rule to specify the range of permissible actions that may be undertaken by holders of a security interest within the bounds of the section 101(20)(A) security interest exemption. This rule will also specify the circumstances in which governmental entities that acquire possession or control of contaminated facilities as conservators or receivers will be considered "involuntary" owners for purposes of the section 101(35)(A)(ii) "innocent landowner" defense. Governmental entities may also acquire property through other mechanisms, such as through civil and criminal seizures and asset forfeitures. The Agency is also seeking comment on regulatory language which would specify such other types of acquisitions by governmental entities that may be considered "involuntary" within the meaning of the statute.

EPA is proposing this rule as a revision to the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), codified at 40 CFR part 300 *et seq.*, under the authority of CERCLA sections 105 and 115. EPA recognizes that this revision to the NCP raises a number of important issues and is accepting public comment for a thirty-day period. Upon consideration and review of the comments, EPA may revise this proposed rule and will formally codify the provisions as subpart L in 40 CFR part 300. Prior to its promulgation as a final rule, this rule represents EPA's interpretations of sections 101(20)(A) and 101(35)(A)(ii), and EPA will utilize it as guidance for implementing these sections.

Judicial review of this proposed rule, when promulgated, will be governed by

[1] The CERCLA definition of "facility" includes real property as well as any equipment or other articles contaminated by hazardous substances. See CERCLA 101(9).

VOL 56 ISS 121 JE 24 1991 UMI

the provisions of CERCLA section 113(a). These provisions mandate that any review of a regulation promulgated under CERCLA is confined to the United States Court of Appeals for the District of Columbia Circuit and that any application for such review must be made within ninety days of the rule's date of promulgation. By enacting these provisions, Congress intended that the District of Columbia Circuit Court would have "exclusive" jurisdiction to review regulations and that any petitions for review that were filed after the ninety day period would be barred. S. Rep. No. 848, 96th Cong., 2d Sess. 95 (1980); see *Lubrizol Corp.* v. *Train*, 547 F.2d 310, 314–16 (6th Cir. 1976) (by centralizing appeals in the D.C. Circuit under the Clean Air Act, Congress hoped to avoid needless delays in the implementation of important national programs caused by incessant litigation and inconsistent decisions).

II. Summary

A. Security Interest Exemption

This proposed rule interprets the section 101(20)(A) "security interest" exemption to permit the holder of a security interest to undertake a broad range of activity in the course of protecting a security interest in a facility that is subject to CERCLA, without being considered to be participating in the management of the facility. The activities specified in this rule are not mandatory or required to be undertaken as a condition of maintaining the exemption. Instead, this proposed rule identifies a range of permissible activities that a security holder may take to protect the security interest. The specific activities actually undertaken with respect to a particular facility in which a person holds a security interest may vary from case to case; the purpose of this rule is to specify, by illustration and example, the activities that a security holder may undertake without losing the exemption. The rule accomplishes this by defining the key terms of CERCLA section 101(20)(A): (1) "indicia of ownership," (2) "primarily to protect a security interest," and (3) "participating in the management of a . . . facility." This proposed rule does not define all possible activities that may be undertaken by a security holder without voiding the exemption: other permissible activities may be undertaken, even though not specifically identified in this rule.

With respect to a governmental lending entity that may assume ownership, conservatorship, or receivership of a lending institution or business, or that may acquire or have transferred to it property or other assets, through a variety of statutory mechanisms and thereby assume possession and control of a contaminated facility, this rule specifies circumstances in which the governmental lending entity may have a defense available under section 101(35)(A)(ii) of CERCLA.

While section 101(20)(A) provides persons who hold a security interest with a potential exemption from CERCLA liability when the real or personal property serving as the security is contaminated, this statutory provision does not otherwise provide protection from the ordinary risk assumed by the security holder that the facility's market value may not be sufficient to cover the borrower's debt. The CERCLA security interest exemption is not a loan guarantee for lending institutions and does not shift to the Superfund the cost of poor loan decisions, see *United States* v. *Maryland Bank & Trust, supra*, 632 F. Supp. at 580, but serves only as a shield from CERCLA liability where a person's ownership indicia are held as protection for a security interest.

From an environmental perspective, EPA must concern itself first with protection of public health, welfare, and the environment. Following expenditure of public funds to clean up contaminated property, EPA's mandate under CERCLA is to seek to recover the costs incurred by the Fund from those liable under CERCLA. Accordingly, where there is a release or threat of release of hazardous substances, CERCLA clearly imposes liability on owners of real property for the consequences of that release. However, security holders (commonly lending institutions) that possess an ownership interest in a facility may need to undertake certain activities in the course of protecting their security interest to manage properly their loan portfolios; such activities may include inspections or monitoring of the borrower's business and collateral, providing financial or other assistance, engaging in "loan workout" activities, and foreclosing on secured property.

This proposed rule seeks to reconcile a security holder's need to manage, oversee, or to otherwise act to protect a security interest, with EPA's duty to clean up waste sites and recover public funds spent in remediating these sites from those responsible or otherwise involved in the facility's operations, either through their participation in management (i.e., under section 107(a)(1)–(a)(2)) or through their own activities at the facility (i.e., under section 107(a)(3)–(a)(4)). EPA's interpretation of the security interest exemption both acknowledges and accommodates these competing interests within the current statutory scheme by specifying the permissible range of activities that may be undertaken by a security holder without voiding the exemption.

Specifically, the proposed rule provides that a security holder may, at its option, conduct or require an environmental inspection of a facility and may require cleanup of a facility prior to or during the life of the loan; may require from the facility owner or operator assurances of compliance with applicable federal, state, and local environmental and other laws, rules and regulations during the life of the loan; may periodically or regularly monitor or inspect both the facility (including site inspections) and the facility owner or operator's business or financial condition; may provide periodic financial or other advice to a financially distressed debtor; or may take other actions that are necessary for the security holder to adequately police the debt or other obligation or to comply with applicable legal requirements.

A security holder may also undertake so-called "loan workout" activities, such as restructuring or renegotiating the terms of the obligation, requiring payment of additional interest, extending the payment period, exercising forbearance, or providing advice or taking other actions that are necessary to protect the security interest. A security holder may also foreclose on the security (whether by formal means such as through the use of the judicial process, or by informal means such as by taking a deed in lieu of foreclosure), may wind-up operations, may liquidate or sell off assets, or may otherwise act to recover the value of the security interest in a manner consistent with good commercial practice. These activities are considered to be consistent with the CERCLA security interest exemption, and are not considered to be evidence of participation in management by a security holder. Note, however, that while a security holder may not be liable as an "owner" or "operator" under CERCLA section 107(a)(1) by virtue of the exemption, liability may nevertheless attach under section 107(a)(3) or section 107(a)(4) as the result of a security holder's own actions in connection with a facility.

It has become a customary or common practice for holders of security interests to undertake or require environmental inspections to minimize the risk that their loans will be secured by

contaminated property, and EPA considers such inspections to be consistent with this exemption from CERCLA liability. An inspection of a facility provides environmental advantages by identifying properties in need of cleanup or other environmentally beneficial response, and by helping to minimize environmental liability. Under this proposed rule, a security holder that undertakes or requires a borrower to undertake an environmental inspection or investigation of a facility securing the obligation is not considered to be participating in management. However, neither the statute nor this proposed rule requires a security holder to undertake an inspection to qualify for the exemption, and the liability of a security holder seeking to avail itself of the exemption cannot be based on or affected by the failure to conduct or require such an inspection.

This rule also proposes to define a security interest holder's obligations following foreclosure in cases where the security holder has not otherwise participated in the facility's management. Specifically, the proposal provides that a security holder may avail itself of the security interest exemption post-foreclosure unless it fails to take reasonable actions to sell the property, or it rejects or fails to act upon a written, *bona fide* offer for a value equal to or exceeding the outstanding loan obligation.

Under this proposal, a security holder, who did not prior to foreclosure participate in management, may foreclose, sell, liquidate, wind up operations, or retain and continue functioning the enterprise in order to protect the value of the secured asset prior to sale as a means to realize the debtor's unpaid obligation pending sale, liquidation, or other disposition of the property, without incurring liability under CERCLA section 1207(a)(1), unless (1) the security holder fails within twelve months following foreclosure to take the following actions to sell the property: (i) List the property with a broker, dealer or agent who deals with the type of property in question, and (ii) begin advertising the property as being for sale or disposition on at least a monthly basis in either a real estate publication, or a trade or other publication suitable for the property in question, or a newspaper of general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable federal, state, or local rules of court for publication required by court order or rules of civil procedure) covering the area where the property is located; or (2) at any time after six months following foreclosure the security holder rejects, or does not act upon within 90 days of receipt of a written, *bona fide*, firm offer of fair consideration for the property. For purposes of this proposal: (a) a "written, *bona fide*, firm offer" is a legally enforceable offer, including all material terms of the transaction, from a ready, willing, and able purchaser who demonstrates to the security holder's satisfaction the ability to perform; and (b) "fair consideration" is an amount equal to or in excess of the sum of the outstanding principal owed to the holder, plus any unpaid interest and penalties (whether arising before or after foreclosure), plus all reasonable and necessary costs, fees or other charges incurred by the holder incident to foreclosure, retention, continued functioning of the enterprise, and sale of the property, less any amounts received by the holder in connection with any partial disposition of the property or net revenues received as a result of continued functioning of the facility.

Unless otherwise provided by this proposal, during the applicability of the exemption, the security holder's CERCLA liability is only as provided for under CERCLA section 107(a)(3) or 107(a)(4), 42 U.S.C. 9607(a)(3)–(a)(4). In addition, where a defendant claims the section 101(20)(A) exemption from liability under section 107(a)(1), the burden is on the plaintiff to prove that the defendant is an owner or operator, as provided in this rule.

B. Involuntary Governmental Acquisition of Facilities

CERCLA section 101(20)(D) excludes from the definition of "owner or operator" a unit of state or local government which acquires ownership or control over a facility involuntarily by virtue of its function as sovereign. 42 U.S.C. 9601(20)(D). There is no comparable provision for Federal government entities. Section 101(35)(A)(ii), however, specifies that acquisition by any governmental entity is "involuntary" if the facility is acquired through "escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation." 42 U.S.C. 9601(35)(A)(ii).

An "involuntary transfer or acquisition" of a facility is an element of the "innocent landowner" or third-party defense for a government entity: Section 101(35)(A)(ii) works in conjunction with section 107(b)(3), which requires for the defense the absence of a "contractual relationship" concerning the manner in which the contaminated facility was acquired. Section 101(35) defines "contractual relationship" to exclude such involuntary transfers.[2] The chief difference is that a state or local government that involuntarily acquires a contaminated property is exempted from the definition of an owner or operator of the facility, whereas federal entities are not specifically accorded such treatment, but may be able to assert a defense to liability.

Government entities have become increasingly likely to own or possess properties as a consequence of bank and savings and loan failures, through statutory mechanisms that result in governmental takeover of the failed or insolvent lending institutions. Under the FDI Act, as amended by FIRREA, the Office of Thrift Supervision or the Office of the Comptroller of the Currency will direct the FDIC or RTC to acquire the property and assets of failed or insolvent banks, credit unions, savings institutions, and thrifts. The range of assets acquired by these governmental entities may include, among others, simple security interests, property for which the depository or thrift institution held record title or other form of title through foreclosure, or property that had been purchased or acquired as an investment by the failed institution or its subsidiary. Pursuant to these authorities, the FDIC and RTC succeed to such assets and act as the conservator or receiver of the insolvent lending institutions. For the purposes of CERCLA, there is no "contractual relationship" between the FDIC or RTC and the assets so acquired because this manner of acquisition by a government entity is an "involuntary transfer or acquisition" within the meaning of section 101(35)(A)(ii).

Other government financial regulatory or lending entities [3] that act in a similar

---

[2] Section 101(35) specifies two other circumstances in which no "contractual relationship" exists with respect to the transfer of a facility for purposes of asserting the innocent landowner-third party defense: where the party acquiring the property did not and had no reason to know that hazardous substances had been released or disposed of on the property, after having undertaken "all appropriate inquiry" (CERCLA 101(35)(A)(i), 101(35)(B)); and where the property is acquired by inheritance or bequest (CERCLA 101(35)(A)(iii)).

[3] As used throughout this rule, the term "governmental lending entities" refers to governmental lending and credit institutions, loan guarantors, and financial regulatory entities which acquire security interests or properties of failed private lending and depository institutions as conservators or receivers.

capacity under a statutory mandate are also considered to be similarly situated: "involuntary acquisitions" by such entities are discussed in greater detail in section IV. While this rule discusses generally the manner in which governmental lending entities involuntarily acquire property, it is not intended to preclude other similarly situated government entities that involuntarily acquire contaminated property from asserting the defense, nor are other means of involuntary acquisition by government entities intended to be excluded.

Governmental entities that acquire assets involuntarily in their capacity as a conservator or receiver may acquire some assets to which the security interest provisions of this rule will apply. Such assets include security interests securing performing loans, loans in workout, those in default or non-performing and are unforeclosed-upon, and foreclosed-upon assets not yet sold by the prior security holder, as examples. The involuntary governmental acquirer of such assets generally stands in the shoes of the prior security holder, and may exercise the same rights under the security interest provisions of this rule with respect to such assets. Where the governmental lending entity involuntarily acquires assets to which the security interest provisions would not apply—i.e., those which the predecessor did not hold as protection for a security interest—the "involuntary transfer or acquisition" provisions of this rule apply.

III. CERCLA Provisions Protecting the Holder of a Security Interest

The section 101(20)(A) security interest exemption is the principal means of avoiding CERCLA liability for the holder of a security interest in a facility.

Section101(20)(A) provides, in part:

> Such term [owner or operator] does not include a person who, without participating in the management of a vessel or facility, holds indicia of ownership primarily to protect his security interest in the vessel or facility.

There are three key terms found in the exemption that are not otherwise defined in CERCLA: (1) "indicia of ownership" (2) the requirement that the ownership indicia be held "primarily to protect [the] security interest" in the facility, and (3) the prohibition of the security holder from "participating in the management" of the facility.

1. Indicia of Ownership

Ownership indicia within the meaning of section 101(20)(A) include evidence of interests in real or personal property held as security for a loan or other obligation, including title to the real or personal property acquired incident to foreclosure and its equivalents. The nature of the ownership interest may vary under the laws of different states and by the type of secured loan transaction. Examples of such indicia may include, but are not limited to, a mortgage, deed of trust, or legal title obtained pursuant to foreclosure or its equivalents, or an assignment, lien, pledge, or other right to or form of encumbrance against property that is legally recognized as establishing a *bona fide* security interest.

2. Primarily To Protect the Security Interest

Whether a person's ownership indicia bring it within or outside of the definition of "owner or operator" under CERCLA is determined by whether the indicia are held "primarily to protect [the] security interest." The use of this phrase requires that the ownership interest must be a legally recognized security interest, and not an interest in property held for some other reason. A *bona fide* security interest may arise pursuant to a variety of statutory or common law mechanisms. While a security interest is ordinarily created by mutual consent, such as a secured transaction within the scope of Article 9 of the Uniform Commercial Code, there are other means by which a legally recognized security interest may be created, some of which may or may not be the result of a consensual arrangement between the parties to the transaction. In general, a transaction that gives rise to a security interest is one that provides the security holder with recourse against real or personal property of the person pledging the security; the purpose of the interest is to secure the repayment of money, the performance of a duty, or of some other obligation. See generally J. White & R. Summers, Handbook on the Uniform Commercial Code section 22 (2d Ed. 1980); Restatement of Security [1941].

Recognized forms of security interests include mortgages, certain types of liens, forms of conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements or accounts receivable financing arrangements, and some forms of leases or consignments, among others.[6] In all cases, the salient question is whether a security interest arises under applicable law, regardless of the label given to the particular transaction.[7] A holder of a security interest may include the initial holder (such as the loan originator, for example), and any successor-in-interest, subsequent purchaser on the secondary market, loan guarantor, or other person who holds a security interest under the applicable law governing the transaction.

In contrast, under section 101(20)(A), "indicia of ownership" held "primarily to protect [a] security interest" do not include evidence of interests in the nature of an investment in the facility, or an ownership interest held for any reason other than as protection for a security interest. See, e.g., *United States* v. *Maryland Bank & Trust*, supra (actions taken by lending institution after foreclosure indicate property held as an investment rather than as security for a loan). EPA recognizes that lending institutions typically have revenue interests in the loan transactions that create security interests; such transactions are not considered to be investment interests, but are generally considered *bona fide* secured transactions falling within the exemption. *See In re Bergsoe Metal Corp.*, supra, 910 F.2d at 672 n.2. However, when a person holds indicia of ownership in a facility primarily for investment purposes, as opposed to assuring repayment of a loan or as security for some other obligation, the exemption will not apply.

Lending institutions, which typically hold a large number of security interests, may also act in some fiduciary or other capacity with respect to a facility. However, this proposed rule does not address circumstances in which a lending institution or any person acts in a non-lending capacity or has any interest in a facility other than a *bona fide* security interest in real or personal property. Because the exemption in section 101(20)(A) covers only security interests, any discussion of other interests or involvement in a facility is beyond the scope of this rule.

3. Participating in the Management of a Facility

Whether the holder of a security interest has participated in management sufficiently to void the exemption is a fact-sensitive inquiry. Participation in

[6] Whether a sale-and-leaseback, conditional sale, installment sales contract, or any other transaction creates a security interest and is within the security interest exemption under CERCLA is determined by the facts of each case.

[7] See, e.g., U.C.C. 1-201(37) ("'Security interest' means an interest in personal property or fixtures which secures payment or performance of an obligation. . . . Whether a lease [or other transaction] is intended as security is to be determined by the facts of each case. . . .")

the management of a facility means actual participation in the management or operational affairs by the holder of the security interest, and does not include the mere capacity, ability, or unexercised right to influence facility operations. In all cases, the determination of whether a security holder is participating in management depends on the holder's actions with respect to the facility. A security holder is not considered to be participating in management within the meaning of section 101(20)(A) unless, while the borrower is still in possession, either: (1) The security holder is exercising decisionmaking control over the borrower's environmental compliance, such that the security holder has undertaken responsibility for the borrower's waste disposal or hazardous substance handling practices which results in a release or threatened release, or (2) the security holder is exercising control at a management level encompassing the borrower's environmental compliance responsibilities, comparable to that of a manager of the borrower's enterprise, such that the security holder has assumed or manifested responsibility for the management of the enterprise by establishing, implementing, or maintaining the policies and procedures encompassing the day to day environmental compliance decisionmaking of the enterprise. A security holder will not be considered to be participating in management when it undertakes certain actions to protect the security interest, as discussed in the following sections.

Consistent with the exemption, a security holder may act to protect the interest by, for example, policing the loan, undertaking financial workout with a borrower where the obligation is in threat of default, or by foreclosing and preparing the facility for sale or liquidation. Such actions are not considered to be participation in the management of a facility provided that the actions taken are reasonably necessary to protect the security interest.

Accordingly, the holder of a security interest is not considered to be acting outside the scope of the exemption when the holder regularly or periodically monitors the borrower's business, or requires or conducts on-site inspections and audits of the environmental condition of the facility or the borrower's financial condition, or monitors other aspects of the facility considered relevant for adequate protection of the security interest, or requires certification of financial information or compliance with applicable duties, laws or regulations, or requires other similar actions, provided that the borrower remains in possession and control of the operations of the facility (except as provided incident to foreclosure, discussed below). Such oversight and obligations of compliance imposed by the holder of a security interest are considered to be undertaken to protect the security interest and are not considered part of the management and operation of a facility. Although such requirements and oversight may inform the borrower's management of a facility, the security holder is not considered to be participating in management where the borrower continues to make operational decisions at the facility.

Cases addressing the issue of a security holder's involvement with a borrower have routinely held that financial, administrative, and similar general advice is not ordinarily considered to rise to the level of management participation. See, e.g., *United States* v. *Fleet Factors Corp.*, *supra*, 901 F. 2d at 1556–57 (facility monitoring and involvement in financial decisions permissible); *United States* v. *Mirabile*, *supra*, 15 Envtl. L. Rep. at 20996–97 (facility monitoring, involvement in financial decisions, restrictions on financial decisions contained in loan documents, and general financial advice permissible); *In re Bergsoe Metals Corp.*, *supra*, 910 F.2d at 672 (input at planning stages of project, inspection and entry rights permissible); *Guidice* v. *BFG Electroplating and Manufacturing Co.*, *supra*, 732 F. Supp. at 562 (monitoring of accounts and of business and personnel matters, site inspections, assistance in loan negotiations, loan restructuring, and procurement of purchaser for facility permissible).

This proposed rule describes a range of activities that a security holder may undertake in the course of protecting its security interest; these activities are not considered to be evidence of management participation. Certain activities—such as undertaking or requiring an environmental inspection at the creation of the security interest, policing the loan, engaging in so-called "loan workout," and foreclosure and liquidation of assets—are considered permissible and within the scope of the exemption. However, merely labeling a certain activity as part of a "workout," for example, is not by itself conclusive; what matters is what the security holder actually does. Permissible "loan workout" activities include financial and other advice, renegotiation of loan terms, and similar financially related activities, but do not include exercising decisionmaking control over the operational affairs of the facility. In this context, the statute does not permit a security holder to act as the operator of a facility (an independent basis of liability) under the mantle of holding a security interest. The range of permissible activities are discussed in greater detail in the following sections. This proposed rule does not define the only activities that may be undertaken by a security holder without voiding the exemption, and no inferences should be drawn about the impermissibility of activities not specifically mentioned in this rule—those will be addressed on a case-by-case basis. As discussed in detail in this rule, a security holder may monitor and police its security interest consistent with ordinary and customary loan management practices, without voiding the exemption. A security holder voids the exemption when it exercises decisionmaking control over facility operations, particularly with respect to the hazardous substances present at the facility.

Actions at the Inception of the Loan or Other Transaction Giving Rise to a Security Interest

Actions undertaken by a security holder prior to or at the inception of a security interest are not considered evidence of participation in management that would void the exemption. For example, consultation and negotiation concerning the structure and terms of the loan or other obligation, the payment of interest, the payment period, and specific or general financial advice, suggestions, counseling, guidance, or other actions incident or prior to creation of the security interest are not considered evidence of participation in management.

In addition to such involvement, a security holder may determine for risk management or other business purposes, to undertake or require an environmental inspection of a facility securing a loan or other obligation giving rise to a security interest. Such environmental inspections may be undertaken by the security holder, for example, or the security holder may require one to be conducted by another party (such as the borrower) as a condition of the loan or other transaction. The statute does not require that such an inspection be undertaken to qualify for the exemption, and the liability of a security holder seeking to avail itself of the exemption cannot be based on or affected by the omission or

VOL 56 ISS 121 JE 24 1991 UMI

failure to undertake or require an inspection in connection with the security interest. In addition, neither can liability be premised on a security holder's having undertaken or required an inspection, and nothing in this rule should be understood to discourage a security holder from undertaking or requiring such an inspection in circumstances deemed appropriate by the security holder.

In the event that an environmental inspection of a facility reveals contamination, the security holder may undertake a variety of responses that it deems appropriate: for example, the holder may refuse to extend credit or to follow through with the transaction creating the security interest, or instead take a security interest in non-contaminated property. Alternatively, a security holder may determine that the risk of default is sufficiently slight (or that the extent of contamination is minimal and does not significantly affect the value of the facility) and proceed to take a security interest in the contaminated property. Additionally, the security holder may require the borrower to clean up the facility as a condition of the loan or other obligation. Such activities are not considered management participation, and knowingly taking a security interest in a contaminated facility will not subject a *bona fide* security holder to CERCLA liability.

Policing the Security Interest or Loan

Actions which are consistent with protecting a security interest include, but are not limited to, a requirement that the borrower clean up the facility prior to or during the life of the loan or security interest; a requirement of assurance of the borrower's compliance with applicable federal, state, and local environmental and other rules and regulations during the life of the loan or security interest; securing authority or permission for the security holder to periodically or regularly monitor or inspect both the facility in which the security holder possesses indicia of ownership (including site inspections) or the borrower's business or financial condition; or other requirements or conditions reasonably necessary for the security holder to police adequately the loan or security interest, or to comply with legal requirements.

Such requirements may be contained in contractual (e.g., loan) documents or other relevant documents specifying requirements for financial, environmental, and other warranties, covenants, and representations or promises from the borrower, as conditions for the loan or other obligation. While the exemption requires that the actions undertaken by a security holder be consistent with protecting a security interest, a security holder is not expected to be an insurer or guarantor of environmental safety at a facility in which it has a security interest. The inclusion of environmental warranties and covenants are not considered to be evidence of a security holder acting as an insurer or guarantor, and liability cannot be premised on the existence of such terms, or upon the security holder's actions that ensure that the facility is managed in an environmentally sound manner. Neither are these actions or requirements considered to be evidence of participation in management. See, *e.g., United States* v. *Fleet Factors Corp., supra*, 901 F.2d at 1558 (secured creditors "encouraged" to closely monitor waste treatment practices and policies of debtors, and may insist upon compliance with acceptable treatment standards as a condition of financial support, and may adjust loan terms to reflect debtor's hazardous waste practices).

Loan Workout

The holder of a security interest may determine that it needs to take action with respect to the facility to secure or safeguard the security interest from loss. These actions may be necessary when, for example, a loan is in default or threat of default, and are commonly referred to as "loan workout" activities. These actions will not take a security holder outside of the section 101(20)(A) security interest exemption provided that the actions are taken in the course of protecting the security interest. To remain within the exemption from CERCLA liability, all such actions must be structured to protect and preserve the security interest; such measures are taken to protect the security interest when the security holder is assisting the borrower in an effort to prevent default of the loan or diminution of the value of the security.

When the holder of a security interest undertakes work-out activities, provides financial or other advice, and similar support to a distressed borrower, the security holder will remain within the exemption if the holder does not divest the borrower of its decisionmaking control over facility operations, particularly with respect to any hazardous substances present at the facility, such that the borrower remains the ultimate decisionmaker for operation of the facility. Where the evidence demonstrates that the security holder controls the decisionmaking of the borrower, EPA considers the security holder to be "participating in the management of the facility" and therefore to have voided the exemption.

Activities that EPA considers to be permissible actions taken in the course of protecting a security interest (and which are not evidence of "participation in management") during the work-out period include, but are not limited to, restructuring or renegotiation of the terms of the loan obligation, requiring payment of additional interest, extension of the payment period, specific financial or operational advice, suggestions, counseling, guidance, or any other action reasonably necessary to protect the security interest.

While a security holder does not "participat[e] in the management" of a facility within the meaning of Section 101(20)(A) merely because it causes or contributes to hazardous substance contamination, in general a security holder must be cautious that its own actions do not result in independent liability under CERCLA. See, e.g., CERCLA section 107(a)(3)-(4), 42 U.S.C. 9607(a)(3)-(4). This admonition is not a new requirement or an obligation imposed by the terms of section 101(20)(A): in general, any person that is itself responsible for a release may be liable under section 107(a) of CERCLA and held strictly, jointly, and severally liable.[8] Even a party owning a facility that may have a defense to liability for pre-existing contamination [9] or that is by definition exempt from status as an owner or operator [8] may be held to be responsible for the costs of cleanup if its actions contribute to contamination at a facility.[9] Accordingly, a security holder is cautioned to be aware of the hazardous substances present at a facility when providing financial or other advice, or when otherwise acting to protect the security interest, to ensure that its actions do not subject it to liability under other provisions of CERCLA.

[8] See, e.g., *Tanglewood East Homeowners* v. *Charles-Thomas, Inc., supra*; *United States* v. *Monsanto, supra*; *United States* v. *Chem-Dyne Corp., supra*.

[9] The traditional "third-party" defense under section 107(b)(3) is voided where the defendant has failed to exercise due care with respect to the hazardous substances present at a facility. See CERCLA 107(b)(a)-(b), 42 U.S.C. 9607(b)(3)(a)-(b). Similarly, the "innocent landowner" defense under Section 101(35) is voided where the defendant, "by act or omission, caused or contributed to the release or threatened release of a hazardous substance." See *id.* Section 101(35)(D), 42 U.S.C. 9601(35)(D).

[8] A state or local government entity that acquires a contaminated facility "by virtue of its function as sovereign" is not an "owner or operator" of the facility, unless it "has caused or contributed to the release or threatened release of a hazardous substance." See CERCLA 101(20)(D), 42 U.S.C. 9601(20)(D).

[9] For example, by having arranged for disposal or treatment of a hazardous substance, under section 107(a)(3), 42 U.S.C. 9607(a)(3).

Foreclosure and Liquidation

The process of foreclosure and sale may require or result in the security holder taking record title to the property under the laws of some states. For the purposes of this proposed rule, foreclosure, purchase at foreclosure sale, acquisition or assignment of title in lieu of foreclosure, acquisition of a right to title, or other agreement in settlement of the loan obligation, or any other formal or informal manner by which the security holder acquires, for subsequent disposition, possession of the borrower's collateral, are considered to be actions within the scope of the statutory exemption as necessary incidents to protection of the security interest. However, the temporary acquisition must be reasonably necessary to ensure satisfaction or performance of the obligation. A security holder's actions in outbidding or refusing bids from parties offering fair consideration for the property are evidence that the property is no longer being held primarily to protect the security interest.[10] In this regard, "fair consideration" refers to an amount, taking into consideration the terms and conditions of the offer, that represents a value equal to or greater than the outstanding obligation of the debtor.[11]

To remain within the exemption after foreclosure, the foreclosing entity must be acting to preserve the assets of the facility for its subsequent sale. This means that the security holder must undertake to sell or liquidate the secured all assets, wind up operations, or take other action as appropriate for maximizing the value of the secured asset prior to sale as a means to realize the debtor's unpaid obligation. "Winding up" is construed as including those actions necessary to properly and responsibly close down a facility's operations, secure the site, and otherwise protect the value of the foreclosed assets for subsequent liquidation. See, e.g., *United States* v. *Mirabile, supra*. In winding up a facility a security holder may undertake all necessary security measures or take other actions that protect and preserve a facility's assets. In addition, steps taken to prevent or minimize the risk of a release or threat of release of hazardous substances are not considered evidence of management participation.[12]

In addition, there may be circumstances in which a security holder may determine a need to undertake certain actions with respect to a facility's operations in order to preserve the value of the foreclosed-on assets or to prevent a future release (such as by the removal of drummed waste), or to prepare property for safe public access incident to sale or liquidation of assets. Precisely because a security holder in charge of a facility may need to take affirmative action with respect to the hazardous substances that are known to be present, such mitigative actions are not considered to be evidence of participation in management.

For purposes of this proposed rule, mitigative or preventative measures that are environmentally responsible are considered to be actions that preserve and protect the value of the facility and, hence, protect the security interest. Accordingly, such actions are not considered evidence of participation in management. Security holders that undertake environmentally mitigative actions should be aware that section 107(d), 42 U.S.C. 9607(d), provides that no person is liable for CERCLA costs or damages "as a result of rendering care, assistance, or advice" with respect to hazardous substances—even if such actions result in the release or threat of release of a hazardous substance—so long as the actions taken are consistent with the NCP, or at the direction of an On-Scene Coordinator. The NCP, promulgated under CERCLA section 105, 42 U.S.C. 9605, specifies the appropriate response actions for addressing the release or threat of release of hazardous substances at a facility. 40 CFR part 300, 55 FR 8666 (Mar. 8, 1990). In addition, a security holder—or any person—is not considered to be liable under CERCLA for the release or threatened release of a hazardous substance for which another party is solely responsible, as provided in section 107(b), 42 U.S.C. 9607(b).

Holding Property for Disposition

Foreclosure and possession of property incident to sale or liquidation is often the only remedy the holder of a security interest may have to secure performance of an obligation. Several courts construing section 101(20)(A) have accordingly indicated that the mere foreclosure and taking of title does not necessarily void the security holder exemption. *United States* v. *Mirabile, supra*; *United States* v. *Maryland Bank and Trust, supra*; *In re T.P. Long Chemical Inc., supra*; but see *Guidice* v. *BFG Electroplating and Manufacturing Co., supra*. While mere foreclosure is considered permissible, a security holder that does not endeavor to sell or otherwise divest itself of foreclosed-on property runs the risk that it will be considered to be possessing the property for some purpose other than to protect its security interest in the property, such as for investment. See, *United States* v. *Maryland Bank and Trust, supra*. Existing case law provides little precise guidance regarding the period of time that is considered reasonable for a security interest holder to maintain possession of foreclosed-on property. Four years was found too long in *United States* v. *Maryland Bank and Trust, supra*, while four months was found reasonable in *United States* v. *Mirabile, supra*. In addition, the circumstances facing foreclosing security holders may vary widely, depending on, among other things, the nature of the property securing the obligation and local and national economic conditions. Thus, the time required to dispose of security property may vary widely, notwithstanding a security holder's best efforts. Accordingly, EPA believes that it is proper to define the obligations of a security holder seeking to remain within the exemption following foreclosure (in cases where the security holder has not otherwise participated in the facility's management prior to foreclosure) without regard to specific time periods within which a sale or other disposition must occur. Specifically, this proposal provides that a security holder may avail itself of the security interest exemption unless the holder fails to take reasonable steps to sell the property, or rejects or fails to act upon a written *bona fide* offer for a value equal to or exceeding the outstanding loan obligation.

Under this proposal, a security holder (who did not prior to foreclosure participate in management) may foreclose, retain possession, and, where necessary to maintain the value of the secured property, may continue functioning the enterprise in order to protect the holder's security interest, without triggering liability under CERCLA section 107(a)(1), 42 U.S.C. 9607(a)(1) (pertaining to the liability of owner or operator of a vessel or facility), unless the holder fails promptly to take specific actions to attempt to dispose of the property, or has rejected

[10] To the extent that the foreclosing lender is acting "primarily to protect its security interest" and is within the secured creditor exemption, EPA considers that the ownership of the property remains with the borrower for purposes of the CERCLA lien provision. See 42 U.S.C. 9607(1).

[11] See infra "Holding Property for Disposition"; 40 CFR 300.1100(b)(1)(iii) (definition of "fair consideration").

[12] A security holder also may be under an obligation to protect collateral from loss or impairment, or to act in a commercially reasonable manner. See, e.g., U.C.C. 9-207.

VOL 56 ISS 121 JE 24 1991 UMI

or ignored a written *bona fide* firm offer of fair consideration for the property.[12]

Under this proposal, within twelve months following foreclosure the security holder must have taken at least the following actions to sell the property, in order to avoid triggering potential liability under section 107(a)(1): begin advertising the property on at least a monthly basis as being for sale in either a real estate publication, or a trade or other publication suitable for the property in question, or a newspaper or general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable Federal, State, or local rules of court for publication required by court order or rules of civil procedure) covering the area where the property is located; and at any time following six months after foreclosure, the security holder must not have rejected, or failed to act upon within 90 days of receipt of a written, *bona fide*, firm offer of fair consideration for the property. For purposes of this proposal, a "written, *bona fide*, firm offer" is a legally enforceable offer, containing all material terms of the transaction, from a ready, willing and able purchaser who demonstrates to the security holder's satisfaction the ability to perform. "Fair consideration" under this proposal is an amount equal to or in excess of the sum of the outstanding principal owed to the holder, plus any unpaid interest and penalties (whether arising before or after foreclosure), plus all reasonable and necessary costs, fees or other charges incurred by the holder incident to foreclosure, retention, continuing functioning of the enterprise, and sale of the property, less any amounts received by the holder in connection with any partial disposition of the property or net revenues received as a result of continued functioning of the facility.

Nothing in this proposal requires a security holder to hold secured property longer than it might otherwise do so in order to receive fair consideration, where business or other considerations would prompt a quicker disposition for a lesser amount. However, where a security holder rejects or fails to respond to a *bona fide* offer for an amount equal to or greater than the outstanding obligation at the time of the offer, it is reasonable to conclude that the security holder is holding the property for some reason other than to protect its security interest, and that the section 101(20)(A) exemption is voided.

Note: That during this period although a security holder may be exempt from liability as an owner or operator of a facility under section 107(a)(1) or section 107(a)(2), liability may still attach under section 107(a)(3) or section 107(a)(4).

Relationship to CERCLA Lien

In the event that EPA conducts a response action at a facility during the time that a security holder maintains indicia of ownership to protect a security interest, pursuant to CERCLA section 107(1), 42 U.S.C. 9607(1), a lien in favor of the United States may be imposed. See Adams, Guidance on Superfund Liens (EPA, Office of Enforcement and Compliance Monitoring, Sept. 22, 1987). In addition, should the EPA response action enhance the value of the facility and result in the security holder realizing an amount greater than that to which the security holder is entitled under rules of equity, the United States may seek equitable reimbursement under applicable principles of law, of the amount by which the security holder has been unjustly enriched or has benefited as a result of the EPA cleanup.

IV. Involuntary Transfer or Acquisition By A Government Entity

A government entity that involuntarily acquires a facility may be entitled to assert a defense to liability as an "innocent landowner" or, in the case of state and local government entities, it may be exempt from the definition of "owner or operator" under CERCLA.[14] The statute refers to "involuntary acquisitions" by government entities in two sections defining the terms used in CERCLA: section 101(20)(D) with respect to state and local governments, and section 101(35)(A)(ii) with respect to any governmental entity. Under the well-established principle of statutory interpretation that identical words used twice in a statute are presumed to have the same meaning, EPA interprets Congress' use of the same term in close proximity in the definitional section of CERCLA to refer to the same concept.[15]

Section 101(35)(A)(ii) was added by the Superfund Amendments and Reauthorization Act (SARA) of 1986, Public Law No. 99-499, 100 Stat. 1613 (Oct. 17, 1986). Where a government entity acquires property involuntarily within the meaning of this section, it may be able to assert a defense to liability as an "innocent landowner." The innocent landowner defense is part of the third-party defense contained in section 107(b)(3), which works in tandem with section 101(35).[16]

The relevant sections of the third-party/innocent landowner defense provide:

Section 107(b):

"There shall be no liability under [section 107(a)] for a person who can establish . . . that the release or threat of release of a hazardous substance and the damages resulting therefrom were caused solely by—

(3) an act or omission of a third party other than . . . one whose act or omission occurs in connection with a *contractual relationship, existing directly or indirectly with the defendant* . . ., if [the defendant] (a) [has] *exercised due care with respect to the hazardous substances* . . ., and (b) he took precautions against the foreseeable acts or omissions of any . . . third party . . .."

Section 101(35):

"(A) The term 'contractual relationship,' for the purpose of section 107(b)(3), includes, but is not limited to, land contracts, deeds, or other instruments transferring title or possession, unless the real property on which the facility concerned is located was acquired by the defendant after the disposal or placement of hazardous substances, and . . .:

(ii) The defendant is a government entity which *acquired the facility by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation*. . . .

In addition, . . . the defendant must . . . satisf[y] the requirements of section 107(b)(3)(a) and (b). (emphasis added.)

The defense is available for the government-as-owner where the harm

[12] Notwithstanding this exemption from liability as an owner or operator, a security holder in possession of secured property may face potential CERCLA liability as provided for under section 107(a)(3) (affecting persons who arrange for disposal or treatment of hazardous substances at a facility owned or operated by another party or entity and containing such hazardous substances) and section 107(a)(4) (affecting persons who accept for transportation hazardous substances and selected the disposal facility).

[14] In addition, section 101(20)(A)(iii), 42 U.S.C. 9601(20)(A)(iii), specifies that where title or control of a facility is "conveyed due to bankruptcy, foreclosure, tax delinquency, abandonment, or similar means to a unit of State or local government," the owner of the facility is the person "who owned, operated, or otherwise controlled activities at such facility immediately beforehand."

[15] See generally 2A Sutherland Statutory Construction section 46.06 (4th ed. 1984); *ICC Industries, Inc.* v. *United States*, 812 F.2d 694, 700 (Fed. Cir. 1987) (citing cases). Even though the language differs slightly between sections, this is not unusual in CERCLA and does not indicate that Congress intended different meanings in the absence of any legislative history to the contrary. See *Pennsylvania* v. *Union Gas Co.*, ___ U.S. ___, 109 S.Ct. 2273, ___ (1989) (similar language in different sections of CERCLA separately waiving State and Federal immunity held to have the same effect).

[16] See Guidance on Landowner Liability Under section 107(a)(1) of CERCLA, De Minimis Settlements Under section 122(g)(1)(B) of CERCLA, and Settlements With Prospective Purchasers of Contaminated Property, 54 Federal Regulation 34235 (Aug. 16, 1989).

was caused solely by the acts of third parties with which the government entity had no "contractual relationship," provided that certain additional elements specified in section 101(35)(A)–(B) are also established. Section 101(35)(A)(ii) lists those situations in which a government entity has no such "contractual relationship": acquisition through the exercise of eminent domain authority by purchase or condemnation, through escheat, or "through any other involuntary transfer or acquisition."

The legislative history of section 101(35)(A) does not discuss the issue of involuntary acquisitions or transfers to government entities, and with respect to this specific provision notes only that the cost of cleaning up a contaminated facility taken by eminent domain may be offset against the price paid to the owner of property as compensation. H. Conf. Rep. No. 962, *supra*, at 187. However, while it is clear that the clause is intended to shield a government entity from CERCLA liability in certain narrow and limited circumstances when a facility is involuntarily transferred to the government in its capacity as sovereign, it is also clear that it is not so broad as to serve as a defense in every instance in which the government owns contaminated property, however contaminated or acquired.

Section 101(20)(D) contains the statute's second use of the term "involuntary," and is substantially similar to section 101(35). The section, also added by the SARA of 1986, provides an exemption from the definition of "owner or operator" (and therefore liability under sections 107(a)(1) and (a)(2)) for state and local entities that acquire possession of property involuntarily. Section 101(20)(D) provides (in part):

> The term *'owner or operator' does not include* a unit of State or local government which acquired ownership or control involuntarily through bankruptcy, tax delinquency, abandonment, or other circumstances in which the government involuntarily acquires title by virtue of its function as sovereign.

The section's legislative history does not discuss the "other circumstances" in which acquisition of property by state or local governments may be involuntary; it only mentions that state and local governments will lose the exemption if they cause or contribute to the release or threat of release of hazardous substances at such involuntarily acquired properties. H. Conf. Rep. No. 962, 99th Cong., 2d Sess., at 185–86 (1986).

The examples of "involuntary" acquisition given in section 101(20)(D) may require some intentional or purposeful action on the part of the government to complete—abandonment, for example, requires government-initiated proceedings to determine that property has, in fact, been abandoned. See, e.g., *United States* v. *Sylvester*, 846 F.2d 520, 525 (9th Cir. 1988) (determination of abandonment a question of fact). However, once abandonment, tax delinquency, or bankruptcy has been determined, a state or local government acquiring the property that was the subject of such proceedings is not considered the "owner or operator" of the property because the transfer was "involuntary" for purposes of CERCLA. In addition, section 101(20)(D)'s use of the phrase "or other circumstances in which the government involuntarily acquires title or possession by virtue of its function as sovereign" indicates that the exemption includes other acquisitions in which the government has property involuntarily transferred to it—so long as the government's acquisition is by virtue of its function as sovereign.

Governmental ownership or control of property by involuntary transfer clearly includes acquisition that is involuntary to the government in its capacity as a sovereign. Involuntary acquisitions within the meaning of the statute includes acquisitions of property in which a governmental lending or credit institution or financial regulatory entity is assigned, required, appointed, or otherwise obligated to act as a conservator or receiver of a private lending institution, its assets and property, pursuant to specific enabling legislation. Acquisition under law as a conservator or receiver of property is not materially different from other forms of involuntary acquisitions listed in the statute, such as transfers to government entities pursuant to abandonment proceedings, or as the result of tax delinquency, or other circumstances in which the government obtains ownership of property by virtue of its function as sovereign.[17] Acquisition of property as a conservator or receiver is ordinarily pursuant to a clear and direct statutory mandate that provides little or no discretion with respect to fact and the manner of acquisition, and without regard to the condition of the property acquired. Such acquisitions are ordinarily for limited and non-proprietary purposes, and often occur because no entity other than a government entity is available to serve in this capacity with respect to the property so acquired.

Governmental entities that acquire assets involuntarily through their lending-related activities may acquire both security interests as well as properties wholly owned by the person from whom the government acquired the properties or assets. While all such assets may be involuntarily acquired within the meaning of this rule, with respect to security interests so acquired the acquiring governmental entity is permitted to exercise the same rights under the security interest provisions of this rule as the prior security holder. Where the security interest provisions are unavailable with regard to the assets so acquired, the "involuntary transfer or acquisition" provisions of this rule may apply.

In addition, all property acquired "involuntarily" within the meaning of this proposed rule by a governmental entity as a conservator or receiver, regardless of whether the property was formerly held as an investment property or for some other purpose by the prior owner, is defined to be property obtained through an "involuntary transfer or acquisition" under section 101(35)(A)(ii) of CERCLA. The manner or purpose for which the subject property was owned prior to its acquisition is irrelevant for determining whether the acquisition is "involuntary" for purposes of this rule, and accordingly this rule does not distinguish among former uses of property so acquired. Finally, where a governmental entity or its designee is acting as a conservator or receiver of an institution, the general rule that the liabilities against the institution's estate

[17] That property may be acquired by virtue of the government's function as sovereign is not necessarily dispositive, however; the clear terms of sections 101(20)(D) and 101(35)(A)(ii) require that the acquisition must be involuntary as well. Other sections of CERCLA indicate that government entities which acquire ownership or possession of facilities under circumstances different than those specified in sections 101(20)(D) and 101(35)(A)(ii), or where the government entity itself is responsible for contamination on property owned by it, are subject to CERCLA's liability provisions. See CERCLA 101(21), 42 U.S.C. 9601(21) (federal, state, and local governments included in definition of "person"); *id.* section 101(20)(D), 42 U.S.C. 9601(20)(D) (loss of exemption for involuntarily acquired property by state or local government where entity caused or contributed to release); *id.* section 107(d)(2), 42 U.S.C. 9607(d)(2) (government entity may be liable for gross misconduct in conducting cleanup action); *id.* section 120, 42 U.S.C. 9620 (federal government liable as *any* nongovernment entity under § 107). Reading the definition of "involuntary" to cover every instance of governmental ownership as ownership by virtue of its function as sovereign would render these other sections meaningless. *Pennsylvania* v. *Union Gas Co.*, ___ U.S. ___, 109 S. Ct. 2273, ___ (1989) (the narrow exclusion from liability provided for states in section 101(20)(D) is meaningful only because "Congress intended that States be liable along with everyone else for cleanup costs . . . .").

are limited to the estate's assets will apply, and such liabilities do not extend to the assets of the conservator or receiver.

As part of this proposal, EPA is also seeking comment on the following language concerning the United States' potential liability when it acquires property pursuant to federal criminal or civil seizure or forfeiture statutes. Specifically, the Justice Department has opined that federal governmental agencies that seize property under federal forfeiture and seizure laws are entitled to the CERCLA liability defense found in sections 107(b) and 101(35). With this understanding, EPA is considering the following language for possible inclusion in the final rule:

> Acquisition of property by any department, agency, and instrumentality of the executive, legislative, or judicial branch of the federal government pursuant to any forfeiture or seizure law or authority of the United States shall be deemed to be an involuntary transfer within the meaning of CERCLA Section 101(35)(A)(ii). This language is being repeated in the regulatory text of this proposed rule.

V. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this proposed rule is not a "major rule" because it will not have an annual effect on the economy of $100 million or more. By establishing criteria for determining which parties fall within the "secured creditor" exemption under CERCLA section 101(20)(A) and which governmental entities should be entitled to argue that they have involuntarily acquired a facility under CERCLA section 101(35)(A)(ii), this proposal could potentially result in costs savings to holders of security interests which may have previously been held liable under CERCLA sections 107(a)(1) or 107(a)(2). In addition, this proposed rule imposes no new requirements or reporting obligations upon a person who holds a security interest, or upon a person whose property is encumbered by a security interest. This proposal is not a major regulation; therefore, no Regulatory Impact Analysis is required.

B. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act of 1980, agencies must evaluate the effects of a regulation on small entities. If the rule is likely to have a "significant impact on a substantial number of small entities," then a Regulatory Flexibility Analysis must be performed. Because this proposal may result in cost savings for small entities that hold security interests in contaminated facilities, EPA certifies that today's proposed rule would not have a significant impact on a substantial number of small entities.

C. Paperwork Reduction Act

This proposed rule does not have any information collection requirements under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 40 CFR Part 300

Hazardous substances, Intergovernmental relations, Superfund.

For the reasons set out in the preamble, title 40, chapter I, part 300 is proposed to be amended as follows:

PART 300—NATIONAL OIL AND HAZARDOUS SUBSTANCES POLLUTION CONTINGENCY PLAN

1. The authority citation for part 300 continues to read as follows:

Authority: 42 U.S.C. 9601–9657; 33 U.S.C. 1321(c)(2); E.O. 11735, 38 FR 21243; E.O. 12580, 52 FR 2923.

2. Part 300 is proposed to be amended by adding subpart L to read as follows:

Subpart L—National Oil and Hazardous Substances Pollution Contingency Plan; Lender Liability Under CERCLA

Sec.
300.1100 Security interest exemption.
300.1105 Involuntary acquisition of property by the government.

Subpart L—National Oil and Hazardous Substances Pollution Contingency Plan; Lender Liability Under CERCLA

§ 300.1100 Security interest exemption.

(a) *Indicia of ownership* as used in section 101(20)(A) of CERCLA means evidence of interests in real or personal property held as security for a loan or other obligation, including full title to real or personal property acquired incident to foreclosure and its equivalents. Examples of such indicia may include, but are not limited to, a mortgage, deed of trust, or legal title obtained pursuant to foreclosure or its equivalents, or an assignment, lien, pledge, or other right to or other form of encumbrance against property that is recognized under applicable law as establishing a *bona fide* security interest. If a defendant claims the exemption the plaintiff has the burden of establishing that the defendant is the owner or operator as provided in this regulation.

(1) A holder of a security interest is a person who holds indicia of ownership in a vessel or facility to protect a security interest. A holder of a security interest includes the initial holder (such as the loan originator), and any successor-in-interest, including a subsequent purchaser on the secondary market, loan guarantor or insurer, or other person who holds a security interest under the applicable law governing the transaction.

(2) A borrower, debtor, or obligor is a person whose vessel or facility is encumbered by a security interest. These terms may be used interchangeably.

(b) *Primarily to protect a security interest* for the purposes of section 101(20)(A) of CERCLA means that the indicia of ownership in the vessel or facility are held for the purpose of securing payment or performance of an obligation. Recognized transactions that may create security interests include mortgages, certain types of liens, forms of conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements, or accounts receivable financing arrangements, and some forms of leases or consignments, among others. Whether a sale-and-leaseback, conditional sale, installment sales contract, or any other transaction creates a security interest within the meaning of the security interest exemption under CERCLA is determined by the facts of each case and whether a security interest is created under applicable law. The term "security interest" does not include an ownership interest in property held for investment purposes, nor ownership indicia held for purposes other than as protection for a security interest.

(1) *Foreclosure, Holding for Disposition and Liquidation*—(i) *Foreclosure.* Indicia of ownership that are held "primarily to protect [a] security interest" may include full legal title acquired through foreclosure, purchase at foreclosure sale, acquisition or assignment of title in lieu of foreclosure, acquisition of a right to title, or other agreement in settlement of the loan obligation, or any other formal or informal manner by which the security holder temporarily acquires, for subsequent disposition, possession of the borrower's collateral, and are necessary incidents to protection of the security interest. A security holder's actions in outbidding or refusing bids from parties offering fair consideration for the property are evidence that the property is not held primarily to protect the security interest. "Fair consideration" refers to an amount, taking into consideration the terms and conditions of the offer, that represents a value equal to or greater than the outstanding obligation of the debtor, as defined in 40 CFR 300.1100(b)(1)(ii).

(ii) *Holding Property for Disposition and Liquidation.* A security holder, who did not participate in management prior to foreclosure, may, without incurring liability under CERCLA section 101(20)(A), foreclosure, sell, liquidate, wind up operations, or retain and continue functioning the enterprise in order to protect the value of the secured asset prior to sale as a means to realize the debtor's unpaid obligation pending sale, liquidation, or other disposition of the property, without incurring liability under CERCLA section 107(a)(1). A security holder retains this exemption unless:

(A) The holder fails, within twelve months following foreclosure, to list the property with a broker, dealer, or agent who deals with the type of property in question, and begin advertising the property as being for sale or disposition on at least a monthly basis in either a real estate publication, or a trade or other publication suitable for the property in question, or a newspaper of general circulation (defined as one with a circulation over 10,000, or one suitable under any applicable federal, state, or local rules of court for publication required by court order or rules of civil procedure) covering the area where the property is located; or

(B) If at any time after six months following foreclosure the security holder rejects, or does not act upon within 90 days of receipt of a written, *bona fide,* firm offer of fair consideration for the property. A "written, *bona fide,* firm offer" is a legally enforceable offer, including all material terms of the transaction, from a ready, willing, and able purchaser who demonstates to the security holder's satisfaction the ability to perform. "Fair consideration" is an amount equal to or in excess of the sum of the outstanding principal owed to the holder, plus any unpaid interest and penalties (whether arising before or after foreclosure), plus all reasonable and necessary costs, fees or other charges incurred by the holder incident to foreclosure, retention, continuing functioning of the enterprise, and sale of the property, less any amounts received by the holder in connection with any partial disposition of the property or net revenues received as a result of continued functioning of the facility.

(2) [Reserved]

(c) *Participation in Management Defined*—

(1) *Actions That Are Participation in Management.* Participation in the management of a facility means, for the purpose of section 101(20)(A), actual participation in the management or operational affairs by the holder of the security interest, and does not include the mere capacity, or ability to influence, or the unexercised right to control facility operations. A security holder is considered to be participating in management if, while the borrower is still in possession, the security holder is either:

(i) exercising decisionmaking control over the borrower's environmental compliance, such that the security holder has undertaken responsibility for the borrower's waste disposal or hazardous substance handling practices which results in a release or threatened release; or

(ii) exercising control at a management level encompassing the borrower's environmental compliance responsibilities, comparable to that of a manager of the borrower's enterprise, such that the security holder has assumed or manifested responsibility for the management of the enterprise by establishing, implementing, or maintaining the policies and procedures encompassing the day-to-day environmental compliance decisionmaking of the enterprise.

(2) *Actions That Are Not Participation in Management.*—

(i) *Actions at the Inception of the Loan or Other Transaction Giving Rise to a Security Interest.* No act or omission prior to the creation of a security interest constitutes evidence of participation in management within the meaning of section 101(20)(A). The holder of a security interest who undertakes or requires an environmental inspection of the vessel or facility in which indicia of ownership are held is not by such action considered to be participating in the vessel or facility's management, nor is such ongoing involvement with the borrower that responds to the inspection by ensuring that the vessel or facility remains or is maintained in compliance with all applicable requirements considered to be evidence of management participation. Neither the statute nor this regulation require a holder of a security interest to conduct an inspection to qualify for the inspection, and the liability of a holder of a security interest cannot be based on or affected by a failure to conduct an inspection.

(ii) *Policing the Security Interest or Loan.* Actions that are consistent with protecting a security interest do not constitute participation in management for purposes of section 101(20)(A) of CERCLA. Such actions include, but are not limited to, a requirement that the borrower clean up the vessel or facility prior to or during the term of the security interest; a requirement of assurance of the borrower's compliance with applicable federal, state, and local environmental and other rules and regulations during the life of the loan or security interest; securing authority for the holder of the security interest to periodically or regularly monitor or inspect the vessel or facility in which the security holder possesses indicia of ownership (including site inspections) or the borrower's business or financial condition; or other requirements or conditions reasonably necessary for the security holder to adequately police the loan or security interest, or to comply with legal requirements. Such requirements may be contained in contractual documents or other relevant documents specifying requirements for financial, environmental, and other warranties, covenants, and representations or promises from the borrower.

(iii) *Work Out.* The holder of a security interest may act with respect to the vessel or facility to secure or safeguard the security interest from loss without being considered to have participated in management. "Work out" activities will not void the exemption provided that the actions are taken in the course of protecting the security interest. Work out activities must be structured to protect and preserve the security interest in an effort to prevent default of the obligation or the diminution in value of the security. When the holder of a security interest undertakes work-out activities, provides financial or other advice, or similar support to a distressed borrower, the security holder will remain within the exemption unless the holder participates in management, as specified in 40 CFR 300.1100(c)(1). Work out activities include, but are not limited to, restructuring or renegotiation of the terms of the loan or other obligation, payment of additional interest, extension of the payment period, specific or general financial advice, suggestions, counseling, guidance, or other actions reasonably necessary to protect the security interest.

§ 300.1105 Involuntary acquisition of property by the government.

Governmental ownership or control of property by involuntary transfer within the meaning of CERCLA section 101(35)(A)(ii) includes acquisition by the government in its capacity as a sovereign. An involuntary acquisition includes the transfer to a government entity pursuant to abandonment proceedings, as the result of tax delinquency, escheat, or other circumstances in which the government

VOL

involuntarily obtains ownership or control of property by virtue of its function as sovereign, including situations in which a government entity or its agent (which includes governmental lending and credit institutions, loan guarantors, and financial regulatory entities which acquire security interests or properties of failed private lending and depository institutions) is assigned or required to act as a conservator or receiver pursuant to a clear and direct statutory mandate. An involuntary acquisition also includes the acquisition of assets through foreclosure or other means by a federal, state, or local governmental entity in the course of administering a governmental loan or loan guarantee program. Additional language under consideration: "Acquisition of property by any department, agency, and instrumentality of the executive, legislative, or judicial branch of the federal government pursuant to any forfeiture or seizure law or authority of the United States shall be deemed to be an involuntary transfer within the meaning of CERCLA section 101(35)(A)(ii)."

50 CFR Part 20

RIN 1018-AB65

Migratory Bird Harvest Information Program

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent.

SUMMARY: This document announces the intention of the Fish and Wildlife Service (hereinafter the Service) to establish a National Migratory Bird Harvest Information Program. This notice provides the public with information about the need for such a program and the procedures that may be necessary to implement it. The notice will allow the Service to receive public comment and suggestions in advance of preparing a proposed rule, and therefore to develop proposals from a more complete information base.

DATES: Written comments pertaining to the intended establishment of a National Migratory Bird Harvest Information Program should be received on or before August 1, 1991.

ADDRESSES: Written comments should be sent to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Office of Migratory Bird Management, route 197 and Powder Mill Road, Laurel, Maryland 20708–6619. Comments received will be available for public inspection during normal business hours in room 228, Gabrielson Laboratory, Patuxent Wildlife Research Center, route 197 and Powder Mill Road, Laurel, Maryland.

FOR FURTHER INFORMATION CONTACT: Paul H. Geissler, Chief, Waterfowl Harvest Surveys Section, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Laurel, Maryland 20708–6619 (301) 498–0401, FAX (301) 498–0222.

SUPPLEMENTARY INFORMATION: Under the Migratory Bird Treaty Act (16 U.S.C. 703–711) the Secretary of Interior has responsibility for setting appropriate regulations for the hunting of migratory birds, with due regard for maintaining such populations at healthy levels. The Fish and Wildlife Service Act of 1956 (16 U.S.C. 742 a–d and e–j) more specifically authorizes collection of such information as is necessary to determine appropriate regulations.

Harvest estimates are one of the primary management tools. Waterfowl harvest is currently monitored by a national survey that has severe nonresponse problems; national surveys of the harvest of other migratory game birds are lacking. State harvest surveys provide some information but cannot produce coordinated national or regional estimates. To provide improved migratory bird harvest estimates, the Fish and Wildlife Service intends to revise the migratory bird hunting regulations to require all migratory bird hunters to have a Migratory Bird Harvest Information Program Card (Card) in their possession while they are hunting migratory birds. Some States may choose to combine this requirement with a State license requirement. Hunters would be required to supply their names and addresses as a condition for obtaining the Card. The names would provide a sampling frame for an expanded Migratory Bird Harvest Survey. All records of hunters' names and addresses would be deleted after each annual survey and no permanent records of names and addresses would be maintained by the Fish and Wildlife Service (Service). Cards would be distributed by State wildlife agencies through their hunting license vendors. The Service would provide the Cards to the State agencies without charge, but the State agencies may require a small handling fee to cover their administrative costs and to compensate their license vendors. The Program would be phased-in, starting with a few States in 1992. The Program would be expanded to other States at the rate of about 10-15 States per year starting in 1994 with the States that have the largest migratory bird harvest. All States would be required to comply by 1998.

Historical Review

Wildlife professionals have long recognized the need for reliable harvest data to guide management decisions. States have established surveys to meet their individual needs for resident game species, and a Federal waterfowl harvest survey has been conducted since 1952. During the past 25 years, several initiatives were begun to establish a basis for improving and expanding surveys to other nonwaterfowl species. Between 1957 and 1963, eight Congressional bills were drafted advocating a national permit for webless migratory shore and upland game birds to provide a sampling frame for generating harvest estimates and to provide modest income for funding needed research and management projects for these species. In 1969, a committee of the International Association of Fish and Wildlife Agencies (Association) proposed that a national woodcock harvest survey be established, and in its 1977 landmark book, Management of Shore and Upland Game Birds, the Association listed initiation of a national survey for nonwaterfowl migratory game birds, with a required permit or other sampling frame, as the number one priority among research and management needs.

In 1978, the National Program Planning Group was directed by the Association's Migratory Wildlife Committee to develop alternatives for addressing deficiencies in migratory bird harvest data. In 1979, this task force proposed establishment of a national permit required of all migratory bird hunters. A nominal fee to cover administrative costs and provide management program funding was suggested. The Migratory Wildlife Committee rejected the proposal and instructed the task force to consider an alternative whereby State surveys might be utilized to satisfy harvest data needs. A select committee of State, Federal and University employees with expertise in survey design was named to examine this option. In their 1980 report to the National Program Planning Group, this committee concluded that State surveys could not satisfy harvest data needs for migratory birds.

In 1980, the Service in cooperation with several States attempted to augment the sample of waterfowl hunters from the Federal Duck Stamps with a sample of other hunters from State license files. The attempt failed because of problems resolving differences between State surveys and obtaining hunter names in time for the survey.

In 1990, the Association unanimously recognized the deficiencies in harvest data for migratory birds and recommended that the Service publish a proposed rule in the Federal Register to establish a regulation that all migratory bird hunters annually obtain a national migratory bird hunting program card. Distribution and administration of this Card would be the responsibility of the individual States. The Service also acknowledges weaknesses in the methods now used to estimate harvest of migratory birds and intends to use this expansion of current survey methods to improve the extent and quality of information on all migratory bird harvest. The purpose of the proposed rule will be to implement the recommendations of the States expressed through the Association.

Description of Current Migratory Bird Harvest Surveys

The Federal Waterfowl Harvest Surveys provide some of the information that is used to set Federal hunting regulations. The estimates are provided in administrative reports prior to the July public hearings. There are two harvest surveys. The Hunter Survey estimates the duck harvest, goose harvest, coot harvest, and days of hunting. The harvest of mourning dove, woodcock, snipe, sora rail, other rails, gallinule, white-winged dove, band-tailed pigeon and sandhill crane by waterfowl hunters is also estimated. The Parts Survey estimates the species, age and sex composition of the harvest, and the distribution of harvest by date and county. There is also a separate sandhill crane harvest survey that uses names and addresses from sandhill crane permits.

Each year, a random sample of 3,400 post offices is selected from the 16,000 post offices that sell Federal Duck Stamps. Sample post offices are asked to distribute survey cards to Duck Stamp purchasers on a cost-reimbursable basis. Other Duck Stamp outlets such as stores, national wildlife refuges and conservation agencies are also sampled. About 64,000 survey cards are returned. Of these, 57,000 respondents who plan to hunt waterfowl are sent a questionnaire after the hunting season. Nonrespondents are sent a follow-up questionnaire. About 37,000 questionnaires are returned.

Successful waterfowl hunters who respond to the Hunter Survey are requested to contribute to the Parts Survey duck wings and goose tails from the birds they shoot. About 33,000 hunters contribute 64,000 duck wings and 21,000 goose tails each year. Hunters also report the date, time and county where each bird was taken. The parts are mailed to a central location in each flyway. State and Federal biologists meet at these locations in January and February to determine the species, age and sex of the birds.

Problems with the Current Migratory Bird Harvest Surveys

Of the five million migratory bird hunters, 2.3 million hunt only nonwaterfowl species, but they are not sampled to determine their hunting success.

Low response rates indicates that our waterfowl harvest estimates can have serious errors.

- 24% of people who buy Federal Duck Stamps at sample post offices are given survey cards by post office personnel.
- 54% of those who receive cards return them with their name and address.
- 65% of those who are sent questionnaires return them.
- [24%][54%][65%]=8% overall response rate of the inteaded sample.
- There is no legal requirement to return the cards.

Twenty-seven percent of duck stamps are sold by stores. Stores are not compensated for distributing name and address cards and have no obligation to cooperate. On the other hand, these vendors are usually compensated for selling State hunting licenses and State duck stamps. A system that also compensates vendors for obtaining the names and addresses of National Harvest Information Program Card purchasers would be a major improvement.

The primary purpose of duck stamps is to raise funds for wetland acquisition, and they are being aggressively marketed to both hunters and nonhunters. Stamps are sold through the Postal Service, National Wildlife Refuges, and directly to vendors, such as sporting goods stores. Sales through multiple outlets make it difficult to track the stamps and identify the purchasers who are hunters. This problem makes the estimation of the waterfowl harvest more complicated each year.

Hunters less than 16 years old are not required to purchase a duck stamp and are excluded from the current harvest survey and there is no direct estimate of their harvest.

State Harvest Surveys Cannot Provide Adequate National Estimates of Waterfowl and Other Migratory Bird Harvests

Some States do not conduct annual hunting surveys or maintain accessible lists of hunter names and addresses. The lists may be maintained at vendors or county seats and often are not available from a centralized location. Comparable information is not available from all States because each State has different licensing laws regulating who must buy a hunting license and different survey procedures. Some hunters can legally hunt without an annual State license. Hunters may buy more than one type of license in a single State and may buy licenses from more than one State, introducing duplication problems.

Many State license lists are not available in time for survey results to be useful for promulgating regulations for the following year. Harvest information for a given year must be ready at the time proposals are developed for the following year. Proposals are developed in late June for waterfowl seasons, but are developed in June for webless migratory birds seasons and for certain waterfowl seasons. For example, harvest information from the 1990–91 dove season must be available by June of 1991.

Use of State lists, where available, would not permit distribution of hunter records forms early in the hunting season. Budget constraints often prevent States from conducting harvest surveys during certain years or could cause some States to eliminate them completely. Previous attempts to use State information have not been successful because of the difficulty in reconciling State survey differences.

Advantages of Proposal

Requiring Survey Cards from all migratory bird hunters would provide a current list of names and addresses from which a sample could be drawn for a national Migratory Bird Harvest Survey. All migratory bird hunters would be included, not just waterfowl hunters, making precise estimates of dove, woodcock, snipe, rail and other migratory game bird harvests possible for the first time. Waterfowl harvest estimates would be improved and further deterioration of the present estimating system would be avoided.

An improved sampling frame would increase efficiency and reduce costs of State harvest surveys. The Service will cooperate with States in providing surveys to meet special management needs. Increased cooperation between Federal and State agencies would reduce duplication of survey efforts. Response rates would be increased by compensating vendors for distributing the permits.

Some hunting seasons have been threatened by legal action because of lack of adequate harvest estimates. Improved estimates of both population sizes and harvest are needed to assure that hunting does not threaten migratory bird population levels.

Survey Procedures

The National Migratory Bird Harvest Information Program (Program) would be phased-in, starting with a few States on January 1, 1992. All persons hunting migratory birds in specified States after July 1, 1992, would be required by Federal regulation to have in their possession a signed separate Program Card or a signed combination of Program Card and other State license requirement. A combination system must retain separate enough identities of the State and Federal requirement to allow the Federal part to be valid in any State regardless of the State in which it was purchased. Program Cards would be valid from July 1 until June 30 of the following year.

VOL 56 ISS 121 JE 24 1991 UMI

The Program Card would bear the text "Migratory Bird Harvest Information Program," year issued, "Void after June 30, 19____" and a serial number assigned by the Service. There would be a space for the hunter's signature. The Service would print and distribute Program Cards to the States without charge by December 1 of each year, maintaining a list of serial numbers sent to the State. A Survey Card would be attached to each Program Card. The Survey Card would have space for the hunter's name and address and for the other questions described later. States would distribute Program and Survey Cards to migratory bird hunters through its license vendors, maintaining a list of serial numbers sent to each vendor. The State would provide the Service with that list of serial numbers by April 1 each year. The State may charge hunters a small handling fee to cover the State's administrative costs and the vendor's distribution costs.

State hunting license vendors would distribute Program Cards only to hunters who complete a Survey Card giving their name and complete address. It would be the policy of the Service and the State to use the names and addresses only for conducting hunter surveys and for no other purpose. Vendors would mail completed Survey Cards first class to specified locations within 4 days after the Program Card is provided to the hunter.

Survey Cards would have a standard format that would allow machine processing and would have room for questions in addition to the hunter's name and address. The State and the Service would have equal areas for additional questions. The Service's questions would be:

- Is this the first Migratory Bird Harvest Information card you have obtained this hunting season? YES____ NO____ (This question would identify duplicate cards.)

Kind of bird	Number bagged last season in U.S.		
	None	1–10	11+
Ducks	___	___	___
Geese	___	___	___
Doves	___	___	___
Woodcock	___	___	___

Please mark if you hunted these birds last season. ____Band-tailed Pigeons, ____ Coots, ____ Cranes, ____ Crows, ____ Gallinules, ____ Rails, ____ Snipe

(This question would identify what groups of species the respondent has hunted and would identify those who harvest large numbers of birds. Those who are very successful and those who hunt less-commonly hunted species would be sampled at a higher rate to substantially increase the efficiency and reduce the cost of the hunter surveys. No bias would be introduced. A separate hunter survey would be conducted for duck, goose, and coot hunting, for dove, woodcock, and band-tailed pigeon hunting; and for snipe, rail, gallinule, and crane hunting to reduce the burden on individual respondents. No one would be asked to participate in more than one survey.)

If a combination Program Card/State license requirement is used, specific details will have to be worked out on a State-by-State basis. Combination systems would also have to meet similar criteria on format and accountability as a separate Program Card.

The Service would select a sample of hunters for the harvest surveys. Personal letters, enclosing hunting record forms, would be mailed to selected hunters within 2 weeks of receipt of the names and addresses. At the State's request, another sample of hunter names and addresses derived from the Survey Cards would be express-mailed to the State within 1 week of receipt of the Survey Cards. To protect hunters' privacy, Survey Cards not selected for a survey would be destroyed by the Service immediately after the sample is selected and no records of the names or addresses would be kept. As soon as a hunter responds to a survey, all records of his/her name and address would be deleted by the Service. Names and addresses of nonresponding hunters would be deleted by the Service at the end of each annual survey.

Vendors would return unused Program Cards to a designated location within 30 days after the end of migratory bird hunting seasons in their States. The Service would provide States with a monthly accounting of Program Cards and a final accounting by May 1 of each year. States would follow-up with vendors who have not accounted for all their cards.

The Service would conduct surveys and provide migratory bird harvest and waterfowl age ratio estimates prior to the annual hunting regulations meetings. Survey procedures would be the same as the existing Waterfowl Harvest Surveys except that the hunter names would come from the Survey Card instead of from Federal Duck Stamp purchasers.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Authority: The Migratory Bird Treaty Act of July 3, 1918, as amended (16 U.S.C. 701–711); the Fish and Wildlife Service Act of August 8, 1956, as amended, (16 U.S.C. 742 a–d and e–j); and the fish and wildlife improvement Act of November 8, 1978, as amended, (16 U.S.C. 712).

Dated June 14, 1991.

Richard N. Smith,

Acting Director, U.S. Fish and Wildlife Service.

LIST OF PUBLIC LAWS

Last List June 21, 1991

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–275–3030).

H.R. 671/Pub. L. 102–58

To designate the facility of the United States Postal Service located at 630 East 105th Street, Cleveland, Ohio, as the "Luke Easter Post Office". (June 18, 1991; 105 Stat. 299; 1 page) Price: $1.00

S. 483/Pub. L. 102–59

Entitled the "Taconic Mountains Protection Act of 1991". (June 18, 1991; 105 Stat. 300; 2 pages) Price: $1.00

S.J. Res. 111/Pub. L. 102–60

Marking the seventy-fifth anniversary of chartering by Act of Congress of the Boy Scouts of America. (June 18, 1991; 105 Stat. 302; 1 page) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1990. The CFR volume issued January 1, 1987, should be retained.

[3] No amendments to this volume were promulgated during the period Apr. 1, 1989 to Mar. 31, 1990. The CFR volume issued April 1, 1989, should be retained.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1991. The CFR volume issued April 1, 1990, should be retained.

[5] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1990. The CFR volume issued July 1, 1989, should be retained.

[6] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[7] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: July 2, at 9:00 am
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

NEW ORLEANS, LA

WHEN: July 23, at 9:00 am
WHERE: Federal Building, 501 Magazine St., Conference Room 1120, New Orleans, LA
RESERVATIONS: Federal Information Center 1-800-366-2998

Rules and Regulations

Federal Register
Vol. 56, No. 122
Tuesday, June 25, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-53-AD; Amdt. 39-7043; AD 91-14-01]

Airworthiness Directives; British Aerospace (BAe), Limited Jetstream HP 137 Mk1, Jetstream Series 200, and Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to BAe Jetstream HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes equipped with Dunlop wheel and brake assemblies and Models 3101 and 3201 airplanes equipped with B.F. Goodrich wheel and brake assemblies. This action requires an inspection of the main landing gear wheel bearings, and replacement if found damaged; and the installation of an improved flanged wheel retention nut on the main landing gear wheels. The wheel bearings on two of the affected airplanes failed and the main landing gear wheels separated from the axle. A check of several other of the affected airplanes shows that the torque values of the wheel retaining nut were out of tolerance. The actions specified by this action are intended to prevent separation of the landing gear wheel from the airplane, which could result in loss of control of the airplane during high-speed operations.

DATES: Effective July 22, 1991. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 22, 1991. Comments for inclusion in the Rules Docket must be received on or before August 26, 1991.

ADDRESSES: BAe Jetstream Alert Service Bulletin 32-A-JA 910140, dated May 17, 1991, and BAe Service Bulletin 32-46, dated April 9, 1991, that are discussed in this AD may be obtained from British Aerospace, Manager Customer Support, Commercial Aircraft Limited, Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44-292) 79888; Facsimile (44-292) 78703; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041; Telephone (703) 435-9100; Facsimile (703) 435-2628. This information may also be examined at the Rules Docket at the address below. Send comments on this AD in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 91-CE-53-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Project Manager, Brussels Aircraft Certification Office, Europe, Africa, Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium; Telephone 322.513.38.30 extension 2710; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Aircraft Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169.

SUPPLEMENTARY INFORMATION: The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on British Aerospace (BAe), Limited Jetstream HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes that are equipped with Dunlop wheel and brake assemblies. The CAA reports that the wheel bearings on two of the effected airplanes failed and the main landing gear wheels separated from the axle. A check of several other of the affected airplanes shows that the torque values of the wheel retaining nut were out of tolerance. This may lead to failure of the main wheel roller bearings, which may allow the outer race and main wheel to pass over the wheel nut and depart from the airplane.

British Aerospace (BAe) has issued BAe Jetstream Alert Service Bulletin (ASB) No. 32-A-JA 910140, dated May 17, 1991, which specifies inspection procedures for the main wheel bearings, and installation procedures for a flanged axle nut on BAe Limited Jetstream HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes. "Part 2—INSTALLATION OF FLANGED AXLE NUT" of the instructions in BAe ASB No. 32-A-JA 910140 references BAe Service Bulletin 32-46, dated April 9, 1991, which specifies procedures on refitting the wheel. The CAA classified these service bulletins as mandatory in order to assure the airworthiness of these airplanes in the United Kingdom. The airplanes are manufactured in the United Kingdom and are type certificated for operation in the United States. Pursuant to a bilateral airworthiness agreement, the CAA has kept the FAA totally informed of the above situation.

The FAA has examined the findings of the CAA, reviewed all available information and determined that AD action is necessary for products of this type design that are certificated for operation in the United States. The FAA has issued Supplemental Type Certificate (STC) SA 1332GL for the Model 3101 airplanes and STC SA 1412GL for the Model 3201 airplanes to allow B.F. Goodrich wheel and brake assemblies to be installed in place of Dunlop wheel and brake assemblies. The FAA has determined that since the affected airplanes equipped with B.F. Goodrich wheel and brake assemblies are of the same type design as those equipped with Dunlop wheel and brake assemblies, the following AD action should apply to BAe Jetstream HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes equipped with Dunlop wheel and brake assemblies and BAe Jetstream HP 137 Mk1, and Jetstream Models 3101 and 3201 airplanes equipped with B.F. Goodrich wheel and brake assemblies.

Since the BAe Limited Jetstream HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes of this type design are equipped with only one Dunlop or B.F. Goodrich wheel and brake assembly per main landing gear, an emergency AD is being issued to prevent separation of the landing gear wheel from the airplane, which could result in loss of control during high-speed ground operations. The action requires an inspection of the

VOL
56
ISS
122
JE
25
1991
UMI

main landing gear wheel bearings, and replacement if found damaged; and the installation of an improved flanged wheel retention nut on the main landing gear wheels. These actions shall be done in accordance with BAe Jetstream ASB No. 32–A–JA 910140, dated May 17, 1991 and BAe Service Bulletin 32–46, dated April 9, 1991.

Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and that good cause exists for making this amendment effective in less than 30 days. Although this action is in the form of a final rule that involves requirements affecting immediate flight safety and, thus, was not preceded by notice and public procedure, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket at the address given above. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

AD 91-14-91 British Aerospace (BAE), Limited: Amendment 39–7043; Docket No. 91–CE–53–AD.

Applicability: Jetstream HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes (all serial numbers) that are equipped with Dunlop wheel and brake assemblies; and Jetstream Models 3101 and 3201 airplanes (all serial numbers) that are equipped with B.F. Goodrich wheel and brake assemblies, certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To prevent separation of the landing gear wheel from the airplane, which could result in loss of control during high-speed ground operations, accomplish the following:

(a) Within the next 100 landings, inspect the main landing gear wheel bearings for damage in accordance with the instructions in "Part 1—Mainwheel Bearing Inspection" of BAe Jetstream Alert Service Bulletin (ASB) No. 32–A–JA 910140, dated May 17, 1991. If any damage is found, prior to further flight, replace the bearings in accordance with the instructions in the applicable maintenance manual.

Note: If no record of landings is maintained, hours time-in-service (TIS) may be used with one hour TIS equal to two landings. For example, 50 hours TIS is equal to 100 landings.

(b) Within the next 500 landings, install a flanged axle nut in accordance with the instructions in "Part 2—Installation of flanged axle nut" of BAe Jetstream ASB No. 32–A–JA 910140, dated May 17, 1991. The criteria of paragraph (10) of these instructions shall be accomplished in accordance with the instructions in BAe Service Bulletin 32–46, dated April 9, 1991. Perform whichever of the following is applicable:

(1) If the airplane is equipped with Dunlop wheel and brake assemblies, perform torque loading of the axle nuts in accordance with the instructions in the "Appendix Torque Loading Axle Nuts" of BAe Jetstream ASB No. 32–A–JA 910140, dated May 17, 1991; or

(2) If the airplane is equipped with B.F. Goodrich wheel and brake assemblies, accomplish the following:

(i) While rotating wheel, torque axle nut to 50 foot-pounds to properly set bearings.

(ii) Loosen nut to zero torque.

(iii) While rotating wheel, retighten to 25 foot-pounds in one continuous rotation of the axle nut. Check to ensure locking holes are aligned.

(iv) If locking holes are not aligned, rotate nut to closest locking hole, and secure the axle nut and recheck to ensure locking holes are aligned.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

(e) The inspection and installation required by this AD shall be done in accordance with BAe Jetstream ASB No. 32–A–JA 910140, dated May 17, 1991, and BAe Service Bulletin 32–46, dated April 9, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, Manager Customer Support, Commercial Aircraft Limited, Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44–292) 79888; Facsimile (44–292) 78703; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC, 20041; Telephone (703) 435–9100; Facsimile (703) 435–2628. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

This amendment becomes effective on July 22, 1991.

Issued in Kansas City, Missouri, on June 11, 1991.

Don C. Jacobsen,
Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1600

Employee Responsibilities and Conduct; Collection of Debts by Salary Offset

AGENCY: Equal Employment Opportunity Commission.

ACTION: Interim final rule.

SUMMARY: The Equal Employment Opportunity Commission (EEOC) is proposing to revise its regulations on Employee Responsibilities and Conduct to include a subpart on procedures for the collection of debts by salary offset. This rule outlines the procedures to be followed by EEOC for collection of debts owed to the United States by present or former Commission employees under the Debt Collection Act of 1982 (Pub. L. 97–365), 5 U.S.C. 5514. The rule, in conjunction with appendices B and C of EEOC Order 475, "Procedures for the Collection of Debts by Salary Offset," will reflect the changes made to Federal claims collection by the Debt Collection Act of 1982.

DATES: The interim final rule is effective on June 25, 1991. Comments must be received by August 26, 1991.

ADDRESSES: Written comments should be addressed to Frances Hart, Executive Officer, Office of Executive Secretariat, Equal Employment Opportunity Commission, room 10402, 1801 L Street, NW., Washington, DC 20507.

FOR FURTHER INFORMATION CONTACT: Nicholas M. Inzeo, Acting Associate Legal Counsel, Kathleen Oram, Senior Attorney, or Daniel T. Riordan, Staff Attorney, at (202) 663–4669.

Copies of this interim final rule are available in the following alternate formats: Large print, braille, electronic file on computer disk, and audio-tape. Copies may be obtained from the Office of Equal Employment Opportunity by calling (202) 663–4395 (voice) or (202) 663–4399 (TDD).

SUPPLEMENTARY INFORMATION: The Debt Collection Act of 1982 was designed to increase the efficiency of government-wide efforts to collect debts owed the United States and to provide additional procedures for the collection of such debts. Appendix B to EEOC Order 475, entitled "Procedures for the Collection of Debts by Salary Offset," describes the procedures for collection of debts owed to the United States by present or former Commission employees by salary offset under 5 U.S.C. 5514. Appendix C describes the procedures for requesting and providing oral hearings arising from salary and administrative offset actions. The Office of Personnel Management (OPM) approved the procedures in appendices B and C upon the condition that the Commission publish regulations implementing the Debt Collection Act of 1982. Proposed subpart E to 29 CFR part 1600, 29 CFR 1600.735–501 to 519, describes the EEOC procedures for the collection of debts by salary offset, and, inter alia, who may make a request for salary offset to another agency, the form of the request, and the procedure for submitting the request.

The Commission has determined that this rule does not constitute a major rule for the purposes of Executive Order 12291. It is a procedural rule relating to internal administration of Commission personnel matters. The Commission also certifies under 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that the proposed rule will not result in a significant impact on a substantial number of small employers. For this reason, a regulatory flexibility analysis is not required.

For the Commission,
Evan J. Kemp, Jr.,
Chairman.

Accordingly, it is proposed to amend 29 CFR part 1600 as follows:

PART 1600—[AMENDED]

1. It is proposed to revise the authority citation for 29 CFR part 1600 to read as follows:

Authority: E.O. 11122, 30 FR 6469, 3 CFR 1965 Supp.; 5 CFR 735.101 et seq.; U.S.C. 5514; 5 CFR 550.1101 et seq.

2. It is proposed to add subpart E to part 1600 to read as follows:

Subpart E—Procedures for the Collection of Debts by Salary Offset

Sec.
1600.735–501 Purpose.
1600.735–502 Scope.
1600.735–503 Definitions.
1600.735–504 Notice of salary offset.
1600.735–505 Request for reconsideration or request for consideration of waiver, compromise, or forgiveness.
1600.735–506 Reconsideration or consideration of waiver, compromise or forgiveness decision.
1600.735–507 Oral hearing.
1600.735–508 Method of collection.
1600.735–509 Source of deductions.
1600.735–510 Duration of deductions.
1600.735–511 Limitation on amount of deductions.
1600.735–512 When deductions may begin.
1600.735–513 Liquidation of final check.
1600.735–514 Recovery from other payments due a separated employee.
1600.735–515 Interest, penalties, and administrative costs.
1600.735–516 Non-waiver of rights by payments.
1600.735–517 Refunds.
1600.735–518 Salary offset requests by other agencies.
1600.735–519 Salary offset request by the Commission to another agency.

Subpart E—Procedures for the Collection of Debts by Salary Offset

§ 1600.735–501 Purpose.

This subpart sets forth the procedures to be followed in the collection of debts owed to the United States by present or former Commission employees by salary offset under 5 U.S.C. 5514.

§ 1600.735–502 Scope.

(a) *Applicability.* (1) The procedures in this subpart apply to the collection of debts owed to the Commission or another federal agency by present or former Commission employees by offset against their basic pay, special pay, incentive pay, retired pay, retainer pay, or, in the case of an individual not entitled to basic pay, other authorized pay from the Commission or other agency pursuant to the offset authority in 5 U.S.C. 5514.

(2) The procedures in this subpart apply to the collection by salary offset of the following types of debts owed to the United States: Interest, penalties, fees, direct loans, loans insured and guaranteed by the United States, leases, rents, royalties, services, sales of real or personal property, fines and forfeitures (except those arising under the Uniform Code of Military Justice), erroneous payments of pay and all other similar sources.

(b) *Non-applicability.* The procedures in this subpart do not apply where collection of a debt by salary offset is explicitly provided for or prohibited by another statute (e.g., travel advances in 5 U.S.C. 5705 and employee training expenses in 5 U.S.C. 4108). The procedures in this subpart also do not apply to debts or claims arising under the Internal Revenue Code of 1954 as amended, 25 U.S.C. 1 et seq., the Social Security Act, 42 U.S.C. 301 et seq., or the tariff laws of the United States.

(c) *Waiver requests and claims to the GAO.* The procedures in this subpart do not preclude an employee from

VOL

ISS
122
JE
25
1991
UMI

requesting waiver of a salary overpayment under 5 U.S.C. 5584, or any other similar provision of law, or in any way questioning the amount or validity of a debt by submitting a subsequent claim to the General Accounting Office.

(d) *Compromise, suspension, or termination under the Federal Claims Collection Standards.* Nothing in this subpart precludes the compromise, suspension, or termination of 5 U.S.C. 5514 salary offset collection actions, where appropriate, in accordance with the Federal Claims Collection Standards in 4 CFR chapter II.

§ 1600.735–503 Definitions.

For the purpose of this subpart, terms are defined as follows:

(a) *Agency* means:

(1) An Executive agency as defined in section 105 of title 5, United States Code, including the U.S. Postal Service and the U.S. Postal Rate Commission;

(2) A military department as defined in section 102 of title 5, United States Code;

(3) An agency or court in the judicial branch, including a court as defined in section 610 of title 28, United States Code, the District Court for the Northern Mariana Islands, and the Judicial Panel on Multidistrict Litigation;

(4) An agency of the legislative branch, including the U.S. Senate and the U.S. House of Representatives; and

(5) Other independent establishments that are entities of the Federal Government.

(b) *Creditor agency* means an agency to which a debt is owed.

(c) *Debt* means an amount owed to the United Stated from sources that include loans insured or guaranteed by the United States and all other amounts due the United States from fees, leases, rents, royalties, services, sales of real or personal property, overpayments, penalties, damages, interest, fines and forfeitures (except those arising under the Uniform Code of Military Justice), and all other similar sources.

(d) *Disposable pay* means that part of current basic pay, special pay, incentive pay, retired pay, retainer pay, or, in the case of an employee not entitled to basic pay, other authorized pay remaining after the deduction of any amount required by law to be withheld. Deductions described in 5 CFR 581.105(b) through (f) will not be used to determine disposable pay subject to salary offset.

(e) *Employee* means a current employee of an agency, including a current member of the Armed Forces or a Reserve of the Armed Forces (Reserves).

(f) *FCCS* means the Federal Claims Collection Standards jointly published by the Justice Department and the General Accounting Office at 4 CFR chapter II.

(g) *FRMS* means Financial and Resource Management Services, EEOC Office of Management.

(h) *Paying agency* means the agency employing the individual and authorizing the payment of his or her current pay.

(i) *Salary offset* means an administrative offset to collect a debt under 5 U.S.C. 5514 by deduction(s) at one or more officially established pay intervals from the current pay account of an employee without his or her consent.

(j) *Waiver* means the cancellation, remission, forgiveness, or non-recovery of a debt allegedly owed by an employee to an agency as permitted or required by 5 U.S.C. 5584, 10 U.S.C. 2774, 32 U.S.C. 716, 5 U.S.C. 6346(b), or any other applicable statute.

§ 1600.735–504 Notice of salary offset.

(a) Notice of the Commission's intent to collect a debt by salary offset shall be given at least 30 days in advance. The written notice shall include, inter alia, the following:

(1) The Commission's determination that a debt is owed, including origin, nature, and amount of the debt;

(2) The Commission's intention to collect the debt by means of deduction from the employee's current disposal pay account;

(3) The amount, frequency, proposed beginning date, and duration of the intended deduction(s);

(4) An explanation of the Commission's policy concerning interest, penalties, and administrative costs;

(5) The employee's right to inspect and copy the Commission's records relating to the debt;

(6) The opportunity to establish a schedule for voluntary repayment of the debt agreeable to the Commission in lieu of an offset;

(7) The employee's right to an oral hearing, the method and time period for petitioning for a hearing, and the oral hearing procedures;

(8) The employee's right to request reconsideration of the validity of the indebtedness; and

(9) The employee's right to request waiver, forgiveness, or compromise and the standards involved for each.

(b) *Exception to the advance notice requirement.* Where an adjustment to pay arises out of an employee's election of coverage or change in coverage under a Federal benefits program requiring periodic deductions from the employee's pay and the amount to be recovered was accumulated over four pay periods or less, the advance notice provision in paragraph (a) of this section is not required. In such cases, the Commission's servicing Payroll Office, General Services Administration's National Payroll Center, will notify the employee in writing that because of the employee's election his or her pay will be reduced to cover the period between the effective date of the election and the first regular withholding, and that the employee may dispute the amount collected or request waiver of the debt by filing a request in writing with the Director of Financial and Resource Management Services.

(c) *Acknowledgment of receipt of advance notice.* Notice will be acknowledged in writing. A copy of the notice with the acknowledgment containing the debtor's original signature will be returned to the sender.

§ 1600.735–505 Request for reconsideration or request for consideration of waiver, compromise, or forgiveness.

A request for reconsideration or a request for consideration of waiver, compromise, or forgiveness must be submitted to the Director of FRMS, or his or her designee, within 15 calendar days of the issuance of the demand for payment. The Director of FRMS may extend the time limit for filing when the employee shows he or she was notified of the time limit and was not otherwise aware of it, or that he or she was prevented by circumstances beyond his or her control from making the request within the limit. Any employee requesting reconsideration or consideration of waiver, compromise, or forgiveness will be given a full opportunity to present all pertinent documentation and written information supporting his or her request.

§ 1600.735–506 Reconsideration or consideration of waiver, compromise or forgiveness decision.

Decisions will be based upon the employee's written submissions supported by evidence of record and other pertinent available information. After consideration of all pertinent documented information, a written decision will be issued as to whether the debt is valid, and the amount demanded is correct, or whether it will be waived, compromised, or forgiven. The decision will also inform the employee of his or her right to an oral hearing; hearing procedures contained in § 1600.735–507(c) of this subpart shall be attached to the decision.

§ 1600.735–507 Oral hearing.

(a) *Right to an oral hearing.* After a decision is issued on an employee's request for reconsideration, or consideration of waiver, compromise, or forgiveness, the employee is entitled to an oral hearing upon request prior to salary or administrative offset, on any issue that raises a significant question as to the credibility or veracity of any individual(s) involved in his or her case. The decision whether such a genuine issue exists will rest solely with the Commission. Further, where a claim has been reduced to judgment, a hearing only on the payment schedule need be given. A hearing shall not be provided, however, where a payment schedule was established by written agreement between the employee and the Commission.

(b) *Request for hearing.* (1) A request for an oral hearing must be made within 30 calendar days from the date of the written decision on reconsideration or consideration of waiver, forgiveness, or compromise decision. Requests made after this time will be accepted where the employee can show that the delay was because of circumstances beyond his or her control or because of failure to receive notice of the time limit, unless the employee is otherwise aware of it.

(2) A debtor must file a petition for a hearing in writing. The petition must identify and explain with reasonable brevity the facts, evidence, and witnesses that the debtor believes support his or her petition, state the relief requested, and include the signature and address of the petitioner or authorized representative.

(3) The timely filing of a petition for an oral hearing shall automatically stay the commencement of collection action.

(c) *Hearing procedures.* (1) The hearing shall be conducted by a hearing official who is not an employee of EEOC or otherwise under the control or supervision of the Chairman.

(2) A debtor may represent himself or herself or may be represented by another person, including an attorney during any portion of the hearing.

(3) Where possible, the hearing will be held in a Commission office close to the debtor's home or place of work. Hearings may be scheduled so that several cases can be heard at one location. In such cases, the hearings will be scheduled in a location centrally located to all requesting parties.

(4) A record or transcript of the hearing shall not be made.

(5) At the hearing, the employee and the Commission may introduce evidence and may call witnesses. The hearing shall not be conducted in accordance with formal rules of evidence with regard to the admissibility of evidence or the use of evidence once admitted. The hearing official may only permit the introduction of evidence that is relevant to the issues being considered. Witnesses shall testify under oath and may be cross-examined. The Commission has the burden of first presenting evidence on the relevant issues. The debtor then has the burden of presenting evidence regarding those issues.

(6) The hearing official shall issue a written opinion stating his or her decision with the rationale supporting the decision as soon as practicable after the hearing, but not later than 60 days after the timely filing of the petition requesting the hearing.

§ 1600.735–508 Method of collection.

A debt will be collected in a lump sum or by installment deductions at officially established pay intervals from an employee's current pay account, unless the employee and the Commission agree in writing to alternate arrangements for repayment.

§ 1600.735–509 Source of deductions.

Except as provided in § 1600.735–513 and § 1600.735–514 of this subpart, deductions will be made only from basic pay, special pay, incentive pay, retired pay, retainer pay or in the case of an employee not entitled to basic pay, other authorized pay.

§ 1600.735–510 Duration of deductions.

Debts will be collected in one lump sum when possible. If the employee is financially unable to pay in one lump sum or the amount of debt exceeds 15 percent of the employee's disposable pay for an officially established pay interval, collection by offset will be made in installments. Such installment deductions will be made over a period not greater than the anticipated period of active duty or employment of the employee, as the case may be, except as provided in § 1600.735–513 and § 1600.735–514 of this subpart.

§ 1600.735–511 Limitation on amount of deductions.

The size and frequency of installment deductions will bear a reasonable relationship to the size of the debt and the employee's ability to pay. The amount deducted for any period, however, will not exceed 15 percent of the disposable pay from which the deduction is made, unless the employee has agreed in writing to the deduction of a greater amount. Installment payments of less than $25 will be accepted only in the most unusual circumstances.

§ 1600.735–512 When deductions may begin.

(a) Deductions to liquidate an employee's debt should be scheduled to begin by the date and in the amount stated in the demand for payment.

(b) If the employee files a timely request for reconsideration or consideration of waiver, compromise or forgiveness, deductions will begin after a final decision is issued on the request.

(c) If the employee fails to submit a timely request for reconsideration or consideration of waiver, compromise, or forgiveness, or request for a hearing, deductions will commence in the next bi-weekly check vouchered for payment after the time limit to make such a request expires.

§ 1600.735–513 Liquidation of final check.

When the employee retires or resigns or if his or her employment or period of active duty ends before the debt is collected in full, the employee's debt will be automatically deducted from the final payments (e.g., final salary payment, lump-sum leave, etc.) due the employee to the extent necessary to liquidate the debt. If the employee's final pay is not sufficient to permit all deductions to be made, the order of precedence for the deductions will be: retirement and FICA; Medicare; Federal income taxes; health benefits; group life insurance; indebtedness due to the United States; state income taxes; and voluntary deductions and allotments.

§ 1600.735–514 Recovery from other payments due a separated employee.

When the debt cannot be liquidated by offset from any final payment due to the employee on the date of separation, the Director of FRMS will attempt to liquidate the debt by administrative offset as authorized under 31 U.S.C. 3716 from later payments of any kind due the former employee from the United States. (See 4 CFR 102.3)

§ 1600.735–515 Interest, penalties, and administrative costs.

When a delinquent debt is collected by salary offset, interest, penalties, and administrative costs on the debt will be assessed, unless waived by the Management Director, or his or her designee, in accordance with 4 CFR 102.13.

§ 1600.735–516 Non-waiver of rights by payments.

An employee's payment of all or any portion of a debt collected by salary offset will not be construed as a waiver of any right the employee may have under 5 U.S.C. 5514 or any other provision of contract or law, unless

VOL 56 ISS 122 JE 25 1991 UMI

there are statutory or contractual provisions to the contrary.

§ 1000.726–617 Refunds.

Amounts paid, or deducted by salary offset, by an employee for a debt that is waived or otherwise not found owing to the United States will be promptly refunded to the employee. Refunds do not bear interest unless required or permitted by law or contract.

§ 1000.726–618 Salary offset requests by other agencies.

(a) *Statutory limitation.* Salary offset requests against Commission employees by other agencies may only be accepted within 10 years after the involved debt accrues. Whenever any request barred by this limitation is received in the Commission, the request shall be returned by FRMS to the requesting agency, with a copy of 4 CFR part 102, and this action shall be a complete response to the request.

(b) *Where salary requests should be filed.* Requests from other agencies for salary offset should be forwarded or addressed to:

Director, Financial and Grievance Management Services, Equal Employment Opportunity Commission, 1801 L Street, NW., room 9501, Washington, DC 20507.

(c) *Form of request.* (1) Requests shall be considered only when presented with a completed and certified appropriate debt claim.

(2) The requesting agency must certify in writing that the employee owes the debt, the amount and basis of the debt, the date on which payment(s) is/are due, the date the Government's right to collect the debt first accrued, and that the requesting agency's regulations for salary offset have been approved by OPM.

(3) If the collection must be made in installments, the requesting agency must also advise FRMS of the number of installments and the commencing date of the first installment, if a date other than the next officially established pay period is required.

(4) Unless the employee has consented to the salary offset in writing or signed a statement acknowledging receipt of the required procedures, and the writing or statement is attached to the debt claim form, the requesting agency must also indicate to FRMS the action(s) taken by it under its offset regulations and give the date(s) the action(s) was/were taken.

(d) *Submitting the Request for Offset*—(1) *Current Commission employees.* The requesting agency must submit a completed and certified debt claim, agreement, or other instruction on the payment schedule to FRMS.

(2) *Separating or separated Commission employees*—(i) *Separating employee.* If the employee is in the process of separating, the requesting agency must submit the debt claim to FRMS for collection as provided in § 1000.726–613 of this subpart. FRMS must certify the total amount of its collection and notify the requesting agency and the employee as provided in paragraph (d)(2)(ii) of this section. If FRMS is aware that the employee is entitled to payments from the Civil Service Retirement and Disability Fund, or other similar payments, it will send a copy of the debt claim and certification to the agency responsible for making such payments as notice that a debt is outstanding. The requesting agency, however, must submit a properly certified claim to the agency responsible for making such payments before collection can be made.

(ii) *Separated employee.* If the employee is already separated and all payments due the employee from the Commission have been paid, FRMS will return the request and notify the requesting agency in writing of the employee's separation, that all payments due the employee from the Commission have been paid, and that any monies due and payable to the employee from the Civil Service Retirement and Disability Fund, or other similar funds, may be administratively offset to collect the debt.

(iii) *Transferred employee.* If, after the requesting agency has submitted the debt claim to FRMS, the employee transfers to another agency before the debt is collected in full, FRMS shall certify the total amount of the collection made on the debt. FRMS shall furnish one copy of the certification to the employee and another to the requesting agency along with a notice of the employee's transfer. FRMS shall also provide the employee's personnel office at the new agency with the original debt claim form from the requesting agency to insert in the employee's Official Personnel Folder along with a copy of the certification of the amount which has been collected. It shall be the responsibility of the requesting agency to review the debt upon receiving from FRMS a notice of the employee's transfer to make sure the collection is resumed by the employee's new agency.

(e) *Processing the debt claim upon receipt by FRMS*—(1) *Complete claim.* If FRMS receives a properly certified debt claim from another agency on a current or separating Commission employee, FRMS shall schedule the requested deductions to begin prospectively at the next officially established pay interval. Before the deductions are made, FRMS shall provide the employee a copy of the debt claim form along with notice of the amount of the deductions, and of the date deductions will commence if different from that stated in the debt claim.

(2) *Incomplete claim.* If FRMS receives an improperly completed debt claim from another agency, FRMS shall return the request with a notice that procedures under 5 U.S.C. 5514 and 5 CFR Part 550, Subpart K must be followed and a properly certified debt claim received before action will be taken to collect the debt from the employee's pay.

(3) *Claims disputes.* The commission is not required or authorized to review the merits of the requesting agency's determination with respect to the amount or validity of the debt as stated in the debt claim.

§ 1000.726–619 Salary offset request by the Commission to another agency.

(a) *Statutory limitation.* Salary offset requests by the Commission to other agencies shall only be made within 10 years after the involved debt accrues, unless the right to collect the involved debt was unknown and could not reasonably have been known by the Commission employee responsible for the discovery and collection of the involved debt.

(b) *Who may make a request for salary offset to another agency.* Unless otherwise specifically provided, salary offset requests to other agencies to collect debts due to the Commission shall only be made by the Director of FRMS.

(c) *Form of request.* (1) FRMS shall make an offset request to another agency by presenting it with a completed and certified debt claim.

(2) FRMS shall certify in writing that the employee owes the debt, the amount and basis of the debt, the date on which payment(s) is/are due, the date the Government's right to collect the debt first accrued, and that the Commission's salary offset regulations have been approved by OPM and published in the Federal Register.

(3) Where the collection must be made in installments, FRMS shall advise the involved agency of the number of installments to be collected, the amount of each installment, and the commencing date of the first installment.

(4) Where the involved employee does not agree or consent to the offset, FRMS shall advise the other agency of this in writing and also indicate the action(s) taken by the Commission under its offset regulations and the date(s) the action(s) was/were taken.

(5) Where the employee agrees or consents to the offset, FRMS shall attach to the debt claim the employee's written agreement or consent.

(d) *Submitting the Request for Offset*—(1) *Current employees of other agencies.* FRMS shall submit a certified debt claim, agreement, or other instruction on the payment schedule to the employee's current employing agency.

(2) *Separating employees of other agencies.* If the employee is in the process of separating, FRMS shall submit a certified debt claim to the employee's employing agency for collection as provided in 5 CFR 550.1104(j).

[FR Doc. 91–14023 Filed 6–24–91 8:45 am]

BILLING CODE 6570–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 240

[DoD Instruction 1342.18]

Criteria and Procedures for Providing Assistance to Local Educational Agencies

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This rule implements the DoD Appropriations Act, 1991, title II (Pub. L. 101–511, 104 Stat. 1860). The rule is necessary to establish criteria for the Secretary of Defense to provide financial assistance to local educational agencies that are heavily impacted by the military presence. The FY 91 DoD Appropriations Act provides $10 million for this purpose.

EFFECTIVE DATE: June 3, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. Hector O. Nevarez or Mr. John B. Shaver, telephone (703) 325–8162 or 325–8164.

SUPPLEMENTARY INFORMATION:

Background

On Tuesday, March 26, 1991, the Office of the Secretary of Defense published a proposed rule (32 CFR part 240) that implements the DoD Appropriations Act, 1991, title II (Pub. L. 101–511, 104 Stat. 1860). The rule establishes criteria for the Secretary of Defense to provide financial assistance to local educational agencies (LEAs) that are heavily impacted by the military presence. Today's final action does not differ from that proposed on March 26, 1991, except that the application period has been extended. Applications for financial assistance must be received no later than June 30, 1991.

Comments

Three comments were received from the public on the proposed rule.

1. *Comment:* Military sections 3(b) students should be included in calculating the payment under the proposed rule.

Reply: While payment is based on the average daily attendance (ADA) of military section 3(a) students only, the ADA of military section 3(b) students is considered in establishing basic eligibility.

2. *Comment:* The criteria for providing assistance in the proposed rule does not adequately address the true financial need of a LEA.

Reply: The funding formula addresses severity of need by comparing the LEA's average per-pupil expenditures (PPE) against the average PPE in the State. A preliminary review of data indicates that LEAs whose average PPE is less than the average PPE in the State can expect per-pupil payments that are approximately three times greater than LEAs whose average PPE is equal to or greater than the average PPE in the State.

3. *Comment:* The commentor stipulates that unique variables affect each LEA's average PPE and for this reason funds should be allocated to all eligible LEAs equally, regardless of the LEA's average PPE compared to the average PPE for the State.

Reply: While there may be unique variables that affect a LEA's average PPE, average PPE is a significant determinate of comparability. Moreover, this comparison provides for differentiated payments that addresses the need of the LEA.

List of Subjects in 32 CFR Part 240

Elementary and secondary education, Federally affected areas, Grant programs—education.

Accordingly, title 32, chapter I, subchapter M is amended to add part 240 to read as follows:

PART 240—CRITERIA AND PROCEDURES FOR PROVIDING ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

Sec.

240.1 Purpose.
240.2 Applicability and scope.
240.3 Policy.
240.4 Definitions.
240.5 Responsibilities.
240.6 Procedures.

Appendix A to Part 240—Sample Letter of Application for Financial Assistance

Authority: Department of Defense Appropriations Act, 1991, Title II (Pub. L. 101–511, 104 Stat. 1860); 10 U.S.C. 113(d).

§ 240.1 Purpose.

This part establishes policy, assigns responsibilities, and prescribes procedures under Title II of Pub. L. 101–511 for the Department of Defense to provide financial assistance to the LEAs that are heavily impacted by the military presence.

§ 240.2 Applicability and scope.

This part applies to:

(a) The Office of the Secretary o Defense (OSD).

(b) The schools operated by the LEAs providing free public education to dependent children of Armed Forces members or DoD civilian personnel who reside on Federal property.

§ 240.3 Definitions.

(a) *Applicant.* Any LEA whose ADA military section 3(a) and section 3(b) students equals at least 35 percent of its total ADA and that submits a letter of application to the Department of Defense; files an application for financial assistance; has received, or shall receive funds under section 3 of the Impact Aid Program; and submits documents and forms required by Section 240.4(c)(5) (i) through (iii) of this part.

(b) *Current expenditures.* Expenditures for free public education, including expenditures for administration, instruction, attendance and health services, public transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities, but not including expenditures for community services, capital outlay, debt service, or any expenditures made from funds under Public Law No. 89–10, title I. See the amended definition of "current expenditures" in Public Law No. 100–297 (1988).

(c) *DoD Contribution.* The amount of financial assistance an applicant shall receive under Public Law No. 101–511, title II.

(d) *Federal property.* Real property that because of Federal law, agreement, or policy is exempt from taxation by a State or political subdivision of a State and that the United States owns in fee simple or leases from another party.

(e) *Local Education Agency (LEA).* A public organization (usually a school

VOL 56 ISS 122 JE 25 1991 UMI

district) that has the authority to operate public schools within the limits of the applicable State law.

(f) *Military sponsor.* A person who is an Armed Forces member serving on active duty.

(g) *Military 3(a) student.* A child who attends the school(s) of a LEA that provides free public education and who, while attending such school(s) of the LEA, resides on Federal property and has a parent who is on active duty in the Armed Forces (as defined in section 101 of 10 U.S.C.).

(h) *Military 3(b) student.* A child who attends the schools of a LEA that provides a free public education and who, while attending such school(s), has a parent who is on active duty in the Armed Forces (as defined in 10 U.S.C. 101) but does not reside on Federal property.

(i) *Parent.* The lawful father or mother of a person.

(j) *Per-Pupil Expenditure (PPE).* The average current expenditure for an individual student.

§ 240.4 Policy.

It is DoD policy that:

(a) During fiscal year (FY) 1991, the Department of Defense shall obligate 10 million dollars to assist the LEAs that meet criteria in paragraph (c) of this section. Of this 10 million dollars:

(1) Eight hundred and eighty-six thousand dollars shall be provided to the Killeen, Texas, Independent School District.

(2) One hundred and sixty-seven thousand dollars shall be provided to the Copperas Cove, Texas, Independent School District.

(b) The remaining 9,847,000 dollars shall be used only to assist the eligible LEAs operating schools that provide free public education to dependent children of Armed Forces members of DoD civilian personnel who:

(1) While attending these schools, reside on Federal property.

(ii) Without such additional assistance, are unable to provide a level of education for such dependents equal to the comparable level of education provided in the State where such dependents reside.

(b) The OSD shall consult with the Office of the Secretary of Education before providing financial assistance to the LEAs.

(c) To be eligible for financial assistance:

(1) The LEA must be unable, without such additional assistance, to provide a level of education for such students equal to the comparable level of education provided in the State where such students reside (as determined by comparable student data).

(2) The LEA has in school year (SY) 1990–1991 an average daily attendance (ADA) of military section 3(a) or 3(b) students (see § 240.3 (g) and (h)) or a combination of military section 3(a) and 3(b) students that is not less than 35 percent of the LEA's total ADA. At least two students attending the LEA must be the dependents of Armed Forces members or of DoD civilian personnel. (For the purposes of this section, the Department of Defense shall rely on ADA data from the U.S. Department of Education (DoED)).

(3) For the prior and current FYs, the LEA has applied for and received, or shall receive, financial assistance from all regular Federal and State educational aid programs available to it, including the Impact Aid Program (Pub. L. No. 81–874, Section 3).

(4) The eligibility of the LEA under State law for State aid for free public education, and the amount of that aid, is no different than the eligibility and amounts received by the LEAs without military dependent students.

(5) The LEA files the following with the Assistant Secretary of Defense (Force Management and Personnel (ASD (FM&P)):

(i) A letter of application (see appendix A to this part).

(ii) One original and two copies of Table 8–3 and Table 9, which are published by the DoED, from the following forms:

(A) ED Form 4019 (Revised 8/90 Page 8), "Fiscal Report For Sections 2, 3(d)(2)(B), and 3(d)(3)(B)(ii) Payment Purposes."

(B) ED Form 4019 (Revised 8/90 Page 9), "Financial Burden and Effort Data."

(iii) A copy of an independently audited financial report of the applicant LEA for the second preceding FY.

(d) The eligible LEAs shall receive financial assistance only for those students who are dependent children of military personnel residing on Federal property while attending a school of the applicant LEA.

(e) Applications for financial assistance, under paragraphs (a)(1) through (a)(5)(ii)(B) of this section must be received no later than June 30, 1991.

(f) The amount of assistance (the DoD contribution) for the eligible LEAs may not exceed the amount derived from the following formula:

(1) Of the 10-million dollars available:

(i) Eight hundred and eighty-six thousand dollars shall be provided to the Killeen, Texas, Independent School District.

(ii) One hundred and sixty-seven thousand dollars will be provided to the Copperas Cove, Texas, Independent School District.

(iii) Of the 9,847,000 dollars remaining:

(A) Amounts of 6,561,310 dollars shall be obligated to those eligible LEAs, whose per-pupil expenditure (PPE) for the second preceding FY was less than the average PPE in the State for the second preceding FY.

(B) Amounts of 2,415,690 dollars shall be obligated to those eligible LEAs, whose PPE for the second preceding FY was equal to, or greater than, the average PPE in the State for the second preceding FY. (For the purposes of this section, the Department of Defense will rely on PPE data from the DoED.)

(2) For those eligible LEAs, whose average PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY, the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military section 3(a) ADA for SY 1990–1991.

(ii) Multiplied by the quotient of the funds available to those LEAs, whose PPE for the second preceding FY was less than the average PPE in the State for the second preceding FY (6,561,310 dollars).

(iii) Divided by the sum of the ADAs for SY 1990–1991 of military section 3(a) students of those same eligible LEAs.

(3) For those eligible LEAs, whose average PPE for the second preceding FY was equal to, or greater than the average PPE in the State for the second preceding FY, the LEA shall receive an amount, as follows:

(i) Equal to the LEA's military section 3(a) ADA for SY 1990–1991.

(ii) Multiplied by the quotient of the funds available to those LEAs, whose PPE for the second preceding FY was equal to, or greater than, the average PPE in the State for the second preceding FY (2,415,690 dollars).

(iii) Divided by the sum of the ADAs for SY 1990–1991 of military section 3(a) students of those same eligible LEAs.

(4) The sum of the ADAs for SY 1990–1991 for the military section 3(a) students in Killeen, Texas, Independent School District, and the Copperas, Texas, Independent School District, shall:

(i) Be deducted from the sum of the ADAs for SY 1990–1991 for the military section 3(a) students of all the eligible LEAs.

(ii) Not be used in calculating the DoD contribution.

(g) The LEAs that have been identified in Public Law No. 101–511, Title II, shall receive the specified amount, but shall not be eligible for additional funding under paragraphs (f)(1)(i) through (iii) of this section.

(6) The ASD (FM&P) shall calculate the proposed contribution.

(g) The contribution may be used for all students in the LEA, at the discretion of the appropriate officials in the LEA.

§ 240.5 Responsibilities.

(a) The *Assistant Secretary of Defense (Force management and Personnel)* shall:

(1) Ensure the implementation of these policies and procedures.

(2) Provide assistance, as required, to the potentially eligible LEAs to meet the requirements in § 240.4(c)(5)(i) through (iii) of this part.

(b) The *General Counsel of the Department of Defense* shall provide legal advice for the implementation of this part.

§ 240.6 Procedures.

(a) An applicant requesting assistance under those criteria for FY 1991 in § 240.4(c) (1) through (4) of this part, shall submit the following:

(1) A letter of application (see sample in appendix A to this part).

(2) One original and two copies of Table 8–3 and Table 9, which are published by the DoED, from the following forms:

(i) ED Form 4019 (Revised 8/90 Page 8), "Fiscal Report For Sections 2, 3(d)(2)(B), and 3(d)(3)(B)(ii) Payment Purposes."

(ii) ED Form 4019 (Revised 8/90 Page 9), "Financial Burden and Effort Data."

(3) A copy of an independently audited financial report of the applicant LEA for the second preceding FY, requesting a contribution and ensuring the ASD(FM&P) that the LEA has applied for, has received, or shall receive all financial assistance from other sources for which it is qualified.

(4) The letter of application to the following address:

Assistant Secretary of Defense (Force Management and Personnel)
Washington, DC 20301–8000.

(b) The applicant shall file a copy of the letter of application for financial assistance and required supportive information with the State educational agency (SEA). The SEA may submit comments on the LEA's application to the Department of Defense (at the address in § 240.6(a) of this part), by July 15, 1991. Such comments shall be considered, when applications are reviewed by the OSD.

(c) The application and all required supporting information must reach the ASD(FM&P) no later than June 30, 1991.

Appendix A to Part 240—Sample Letter of Application for Financial Assistance

Assistant Secretary of Defense (Force Management Personnel), Washington, DC 20301–8000

Dear Mr. Assistant Secretary:

Pursuant to title II of Public Law 101–511, "Department of Defense Appropriations Act," November 5, 1991, the (name of the local educational agencies (LEA)) requests financial assistance for the LEA for school year 1990–1991.

We certify that the LEA has applied for financial assistance from all sources, including the State of (name). We understand that funds available for that purpose shall be paid on a per-pupil basis for military section 3(a) students only. Enclosed find an original, and two copies, of Tables 8–3 and 9 from the "Application For School Assistance in Federally Affected Areas," published by the U.S. Department of Education, and a copy of our independent audit "(title)" prepared by (name of firm or agency). We have submitted a complete and timely application for section 3 impact aid assistance to the Secretary of Education. A copy of this letter, with the above supporting information, is being submitted to the State educational agency.

Sincerely,
(Authorized LEA Official)

Dated: June 19, 1991.

L.M. Bynum,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

Section 306 and Old-Law Pension Protection

AGENCY: Department of Veterans Affairs.

ACTION: Technical amendment.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations on section 306 and old-law pension protection. The intended effect of the change is to correct cross-references in those regulations.

EFFECTIVE DATE: June 25, 1991.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3005.

SUPPLEMENTARY INFORMATION: In the *Federal Register* of September 18, 1987 (52 FR 34900–10), VA published an amendment to 38 CFR 3.26 which dealt with section 306 and old-law pension annual income computations. That rulemaking, however, failed to amend the cross-reference to § 3.26 in 38 CFR 3.960 concerning section 306 and old-law pension protection. This oversight has now been corrected.

VA is amending the provisions of 38 CFR 3.960(b)(5) and (c) in order to correct the cross-references to 38 CFR 3.26. Because this amendment does not constitute a substantive change, publication as a proposed for public comment is unnecessary. For these reasons, this amendment is effective on June 25, 1991.

Since a notice of proposed rulemaking is unnecessary and will not be published, this amendment is not a "rule" as defined in and made subject to the Regulatory Flexibility Act (RFA), 5 U.S.C. 601(2). In any case, this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the RFA, 5 U.S.C. 601–612. This amendment will not directly affect any small entity.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.104 and 64.105.

List of Subjects in 38 CFR Part 3

Administrative practices and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: May 31, 1991.

Edward J. Derwinski,
Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3, subpart A is amended as set forth below:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A, continues to read as follows:

VOL 56 ISS 122 JE 25 1991 UMI

Authority: 72 Stat. 1114; 38 U.S.C. 210, unless otherwise noted.

§ 3.960 [Amended]

2. In § 3.960(b)(5), remove the words "§ 3.26(b)" and add, in their place, the words "§ 3.26(c)".

3. In § 3.960(c), remove the words "§ 3.26(a) (1) or (2) or (b)(1)" and add, in their place, the words "§ 3.26(a), (b), or (c)".

[FR Doc. 91-15021 Filed 6-24-91; 8:45 am]

BILLING CODE 8320-01-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 301-4

[FTR Amdt. 18]

RIN 3090-AD87

Federal Travel Regulation; Automobile Mileage Reimbursement

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal Travel Regulation (FTR) to increase the mileage reimbursement rate from 24 cents to 25 cents per mile for use of privately owned automobiles when authorized as advantageous to the Government. This FTR amendment reflects the results of the General Services Administration's (GSA's) report to Congress on the investigation of the cost of operating privately owned vehicles.

EFFECTIVE DATE: This final rule is effective June 30, 1991 and applies for travel performed on or after June 30, 1991.

FOR FURTHER INFORMATION CONTACT: Paul Thompson, Travel Management Division (FBT), Washington, DC 20406, telephone FTS 557-1264 or commercial (703) 557-1264.

SUPPLEMENTARY INFORMATION: The law (5 U.S.C. 5707(b)(2)) authorizes the Administrator of General Services to issue regulations prescribing, within statutory limits, mileage allowance rates. GSA is required by law to periodically investigate the cost of operating privately owned vehicles (motorcycles, automobiles, and airplanes) to employees while on official travel and report the results of the investigations to the Congress. GSA reported the results of the December 1989 investigation and indicated that the governing regulation would be revised to incerase the mileage allowance for use of privately owned automobiles from 24 cents to 25 cents per mile, the current statutory maximum allowance. The rates per mile now in effect for the use of motorcycles and airplanes, 20 cents and 45 cents, respectively, are at the statutory maximum levels.

GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more, a major increase in costs to consumers or others, or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 301-4

Government employees, Travel, Travel allowances, Travel and transportation expenses.

For the reasons set out in the preamble, 41 CFR part 301-4 is amended as follows:

PART 301-4—REIMBURSEMENT FOR USE OF PRIVATELY OWNED CONVEYANCES

1. The authority citation for part 301-4 continues to read as follows:

Authority: 5 U.S.C. 5701-5709; E.O. 11609, July 22, 1971 (36 FR 13747).

2. Section 301-4.2 is amended by revising paragraphs (a)(2), (d)(1), and (d)(2) to read as follows:

§ 301-4.2 When use of a privately owned conveyance is advantageous to the Government.

(a) * * *

(2) For use of a privately owned automobile: 25 cents per mile.

* * * * *

(d) * * *

(1) *Round trip instead of taxicab to carrier terminals.* Instead of using a taxicab under § 301-2.3(c), payment on a mileage basis at the rate of 25 cents per mile and other allowable costs as set forth in § 301-4.1(c) shall be allowed for the round-trip mileage of a privately owned automobile used by an employee going from either the employee's home or place of business to a terminal or from a terminal to either the employee's home or place of business. However, the amount of reimbursement for the round trip shall not in either instance exceed the taxicab fare, including tip, allowable under § 301-2.3(c) for a one-way trip between the applicable points.

(2) *Round trip instead of taxicab between residence and office on day of travel.* Instead of using a taxicab under § 301-2.3(d) (in connection with official travel requiring at least one night's lodging), payment on a mileage basis at the rate of 25 cents per mile and other allowable costs as set forth in § 301-4.1(c) shall be allowed for round-trip mileage of a privately owned automobile used by an employee going from the employee's residence to the employee's place of business or returning from place of business to residence on a day travel is performed. However, the amount of reimbursement for the round trip shall not exceed the taxicab fare, including tip, allowable under § 301-2.3(d) for a one-way trip between the points involved.

* * * * *

Dated: May 23, 1991.

Richard G. Austin,

Administrator of General Services.

BILLING CODE 6820-24-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket Nos. 90-570 and 83-670; DA 91-686]

Broadcast and Cable Services; Children's Television Programming

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: The Commission, in its synopsis of the Report and Order in MM Docket Nos. 90-570 and 83-670 (FR Doc. No. 91-9736, 56 FR 19611, April 29, 1991) concerning children's television programming, inadvertently assigned erroneous section numbers to two new sections adopted in that decision. Those sections, 47 CFR 73.660 and 73.661 are now correctly designated as 47 CFR 73.670 and 73.671. Consequently, the reference to 47 CFR 73.660 found in the last sentence of § 73.3526(a)(8)(ii), also added in the Report and Order, is changed to 47 CFR 73.670.

FOR FURTHER INFORMATION CONTACT: Rita McDonald, Mass Media Bureau, Policy and Rules Division (202) 632-5414.

SUPPLEMENTARY INFORMATION:

Erratum

In the Matter of Policies and Rules Concerning Children's Television Programming; Revision of Programming and Commercialization Policies, Ascertainment Requirements, and Program Log Requirements for Commercial Television Stations

Released: June 14, 1991.

The Report and Order in this proceeding (6 FCC Rcd 2111, 1991) added two new rule sections to 47 CFR part 73, designated as §§ 73.660 and 73.661. These new sections should have been designated as 47 CFR 73.670 and 73.671 and are now corrected accordingly. Consequently, the reference to § 73.660 in the last sentence of 47 CFR 73.3526(a)(8)(ii), also added in the Report and Order, is changed to 47 CFR 73.670.

Further information on this revision may be obtained by contacting Rita McDonald, Mass Media Bureau, at (202) 632-5414.

Federal Communications Commission.

Roy J. Stewart,

Chief, Mass Media Bureau.

BILLING CODE 6712-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AD66

Endangered and Threatened Wildlife and Plants; Emergency Rule to List the Mitchell's Satyr as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Emergency rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) exercises its emergency authority to determine the Mitchell's satyr (*Neonympha mitchellii mitchellii*) to be an endangered species pursuant to the Endangered Species Act of 1973 (Act), as amended. Recent heavy collecting pressure on this butterfly has resulted in the loss of several populations, and collection is believed to imminently threaten the survival of several more populations. Due to the need to immediately decrease collection of the species by affording it the protection of the Act, the Service finds that good cause exists to make this emergency rule effective upon publication. The emergency rule will implement Federal protection for 240 days.

A proposed rule to list the Mitchell's satyr as endangered will be published within 90 days. The proposed rule will provide for public comment and hearings (if requested).

EFFECTIVE DATE: This emergency determination is effective on June 25, 1991 and expires on February 20, 1992.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Twin Cities Regional Office, U.S. Fish and Wildlife Service, Division of Endangered Species, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

FOR FURTHER INFORMATION CONTACT: William F. Harrison, Acting Chief, Division of Endangered Species, at the above address (telephone 612/725-3276 or FTS 725-3276).

SUPPLEMENTARY INFORMATION:

Background

N. m. mitchellii is the nominate subspecies of one of two North American species of *Neonympha*. It was described by French in 1889 from a series of ten specimens collected by J.N. Mitchell in Cass County, Michigan (French 1889). It is a member of the family Nymphalidae (over 6,000 species worldwide), subfamily Satyrinae (estimated 2,400 species).

[The Act defines "species" to include "any subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife * * *" (§ 4(15)). Therefore, although taxonomically recognized as a subspecies, *N. m. mitchellii* will be referred to as a "species" throughout the remainder of this emergency rule.]

Mitchell's satyr is a medium sized (36-44 millimeter wingspan) butterfly with an overall rich brown coloration. A distinctive series of submarginal yellow-ringed black circular eyespots (ocelli) with silvery centers are found on the lower surfaces of both pairs of wings. The number of the eyespots on the forewing varies between the sexes. The eyespots are accented by two orange bands along the posterior wing edges, as well as two fainter orange bands across the central portion of each wing. It is distinguished from its North American congener *N. areolata* by the latter's well-marked ocelli on the upper wing surfaces, as well as the lighter coloration, and stronger flight of *N. areolata* (French 1889; McAlpine et al 1960; Wilsmann and Schweitzer 1981).

N. m. mitchellii is one of the most geographically restricted butterflies in North America. Historical records exist for approximately 30 locations in four States, ranging from southern Michigan and adjacent counties of northeastern Indiana into Ohio, with several disjunct populations in New Jersey. The species has been documented from a total of 17 counties (Badger 1966; Martin 1967; Pallister 1977; Rutkowski 1982; Shuey et al 1987b; Wilsmann and Schweitzer 1981).

A second *Neonympha mitchellii* subspecies was discovered at Ft. Bragg, North Carolina in 1983 (Parshall and Kral 1985). This subspecies, *N. m. francisci*, is believed to have been collected to extinction since that time. Although additional suitable habitat probably exists on, and adjacent to Ft. Bragg, no additional populations have been discovered (Schweitzer 1989). This emergency listing action does not include *N. m. francisci*.

Although the species has been reported from Maryland, the lack of suitable habitat makes it more likely those 1940's specimens were misidentified members of a *Neonympha areolatus* subspecies. Apparently suitable habitat exists in New York, Connecticut, Massachusetts, and Pennsylvania. However, searches in these States have failed to locate any *N. m. mitchellii* populations (Schweitzer 1989; Wilsmann and Schweitzer 1981).

The habitat occupied by the species consist solely of wetlands known as fens. This is an uncommon habitat type that is characterized by calcareous soils which are fed by carbonate-rich water from seeps and springs. Fens are frequently components of larger wetland complexes. Due to the superficial resemblance of fens and bogs, the habitat of Mitchell's satyr has sometimes been erroneously described in the early literature as acid bogs (McAlpine et al 1960; Shuey et al 1987a; Wilsmann and Schweitzer 1981).

From 1985 through 1990 intensive searches were made of over 100 sites having suitable habitat for the species throughout its range. The sites visited were either known historical locations for the species, or were chosen because of the presence of a fen. All historical locations were checked if they could be relocated and the fen habitat still existed. Survey results indicated the species still occurred at only 15 sites, two of which were not historically known. Therefore, the species has disappeared from approximately one-half of its historical locations. No extant populations have been found in Ohio, and the sole extant 1985 populations in New Jersey is believed to have been extirpated by collectors subsequent to the survey. Thus, the species is currently believed to exist only in nine counties in Indiana and Michigan. Due to the extent of these and other recent surveys it is unlikely that many additional sites will be found where Mitchell's satyr

continues to survive (Wilsmann and Schweitzer 1991).

A letter from Charles L. Remington, dated November 19, 1974, requested the Service work on protecting Mitchell's satyr (letter from Charles L. Remington to Dr. Paul A. Opler, U.S. Fish and Wildlife Service, dated November 19, 1974). That letter was treated as a petition to list the species as threatened or endangered. The Service subsequently found (49 FR 2485, January 20, 1984) that insufficient data was available to support listing at that time. The Service's May, 1984, Animal Notice of Review (49 FR 21664–21675) listed *Neonympha mitchellii* as a category 3C species, indicating the at that time species was believed to be too abundant for consideration for addition to the endangered and threatened species lists. In a subsequent January 6, 1989, Animal Notice of Review (54 FR 554–579) the species was upgraded to a category 2 candidate for listing, indicating renewed concern for the species' welfare, and encouraging further studies into the status of the species. The most recent status survey (Wilsmann and Schweitzer 1991) indicates that the species should be listed as endangered due to over-collection. The Service analyzed the status survey and determined that the species should be listed as endangered due to over-collection.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Mitchell's satyr (*N. m. mitchellii*) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Fen habitat is being destroyed and degraded by human activities and by natural succession. Human induced loss of historical sites has been documented in at least three cases. One Michigan site has been destroyed by urban development. Sites in Michigan and Ohio have been lost by conversion to agriculture. Another extant population in Michigan has had a portion of its habitat destroyed by hog farming activities and all terrain vehicle use. These activities constitute ongoing threats to other sites with extant populations of *N. m. mitchellii* (Shuey, et al 1987; Schweitzer 1989; Martin 1987; Wilsmann and Schweitzer 1991).

One Michigan site is bisected by a highway which is scheduled for realignment. Mitchell's satyr habitat is likely to be destroyed or degraded by the project. Discussions are underway to have the plans modified to diminish the adverse impact on the species.

Although natural succession in fens is incompletely understood, it appears that adjacent human activities can speed succession and subsequent loss of Mitchell's satyr habitat. For example, nearby drainage ditches may alter the hydrologic regime in the fen, resulting in lowered water levels, more xeric soil conditions, and increased invasion of brush and trees into the fen. There is evidence that this is occurring at one Michigan site (Wilsmann, Michigan Natural Features Inventory, 1990, pers. comm.).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Mitchell's satyr has long been considered a prize by butterfly collectors, and there is evidence that collection of the species continues despite its endangered or threatened classifications under Michigan, Indiana, and New Jersey rare species laws. Subsequent to the 1985 survey of New Jersey fens it is believed that the State's last remaining *N. m. mitchellii* population was eliminated by collectors. A collector's glassine envelope was found at the site during one survey. Another New Jersey *N. m. mitchellii* site, well known to butterfly collectors, was extirpated in the 1970's by over-collection. The other subspecies of Mitchell's satyr, *Neonympha mitchellii francisci*, is believed to have been collected to extinction. (Wilsmann and Schweitzer 1991; Breden, New Jersey Natural Heritage Program, 1991, pers. comm.; Schweitzer, The Nature Conservancy, 1991, pers. comm.).

Well-worn human paths have been seen at the site of several extant populations in Michigan during recent surveys. These paths wind through *N. m. mitchellii* habitat in the manner that would be expected of knowledgeable collectors and are viewed as evidence that collections are continuing, despite the species being listed as endangered and protected by State statute. At least five Michigan sites are sufficiently well known to collectors and/or have sufficiently small Mitchell's satyr populations so as to be extremely vulnerable to local extinction from over-collection during a period of one to several days (Wilsmann, 1991, pers. comm.). All known *N. m. mitchellii* sites are believed vulnerable to local extinction by overcollection (Schweitzer, 1991, pers. comm.).

C. *Disease or predation.* Little is known about these factors, and there are no indications that they might be contributing to the decline of Mitchell's satyr.

D. *The inadequacy of existing regulatory mechanisms.* Mitchell's satyr is currently listed under State statutes as endangered in Indiana and New Jersey, threatened in Michigan, and extirpated in Ohio. The classification in Michigan has been proposed to be changed to endangered.

Either endangered or threatened status in Michigan prohibits the collection of the species without a Michigan scientific collection permit. However, the threat of State prosecution has not ended collectors' illegal activities. Michigan Department of Natural Resources officials believe the threat of Federal prosecution will be a more effective deterrent. (T. Weise, Michigan Department of Natural Resources, Endangered Species Program, 1991, pers. comm.; Wilsmann, 1991, pers. comm.).

The Indiana endangered classification provides official recognition of species rarity, but the State's endangered species regulations do not prohibit taking listed insects unless they are also on the Federal endangered and threatened species list. Thus, the classification provides no legal deterrent to continued collection. The ability to legally collect the species in Indiana renders those populations likely subjects for heavy collecting pressure and extirpation. (Bacone, Indiana Natural Features Inventory, 1991, pers. comm.).

New Jersey regulations provide total protection for any Mitchell's satyrs that may be rediscovered within the State. (Frier-Murza, New Jersey Endangered Species Program, 1991, pers. comm.). The Ohio classification of extirpated carries with it no legal protection. However, if the species is rediscovered in the State, an emergency order can be invoked to list it as endangered and grant full protection under State statutes (Case, Ohio Department of Natural Resources, Division of Wildlife, 1991, pers. comm.).

E. *Other natural or manmade factors affecting its continued existence.* Mitchell's satyr has only a single flight period annually, lasting perhaps a week for an individual, and for about three weeks for a population as a whole. It exhibits relatively sedentary behavior and slow, very low level flights. Due to these characteristics the species seems to have only limited ability to colonize new habitat patches, to recolonize historical sites, or to provide significant gene flow among extant populations. Therefore, the isolation of small populations has great potential for local extinction if habitat degradation and/or collection pressure are also occurring (Wilsmann and Schweitzer 1991).

Reasons for Emergency Determination

In developing this rule the Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species. Based on this evaluation, the preferred action is to list Mitchell's satyr as endangered on an emergency basis. The species has experienced a severe decrease in the number of extant populations over its historical range, as well as probable extirpation from two of the four States with historical populations. Due to its continuing appeal to a segment of butterfly collectors, as well as its well known and narrow habitat requirements, approximately one-third of the remaining populations are extremely vulnerable to over-collection and local extinction, and all populations are believed susceptible to collection-induced extirpation. The Service has concluded that conducting the normal listing process will delay protection of the species until after the 1991 Mitchell's satyr flight period, thus subjecting the species to an additional year of excessive collecting pressure. The resulting possible extirpations of one or more populations might severely reduce the probability of species survival. Therefore the Service is making this listing on an emergency basis to provide maximum protection to all known populations during the 1991 Mitchell's satyr flight period.

Critical Habitat

Section 4(a)(3) of the Act requires, to the maximum extent prudent and determinable, that the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. At this time the Service has made a preliminary finding that designation of critical habitat is not presently prudent for this species. As discussed under Factor B in the Summary of Factors Affecting the Species, *N. m. mitchellii* is primarily threatened by collecting pressure. Publication of critical habitat descriptions and maps would make Mitchell's satyr more vulnerable to collection, and increase enforcement problems, and the likelihood of extinction. Protection of this species' habitat will be addressed through the recovery process and through the section 7 jeopardy standard. Comments regarding the designation of critical habitat will be accepted and reviewed during the comment period established by the proposed rule which will be published within 90 days.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation of survival of the species, and/or for incidental take in connection with otherwise lawful activities.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulation Promulgation

PART 17—[AMENDED]

Accordingly, until February 20, 1992, part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. Amend § 17.11(h) by adding the following, in alphabetical order under "Insects" to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

Proposed Rules

Federal Register
Vol. 56, No. 122
Tuesday, June 25, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Small Business Size Standards; Petroleum Refining Industry

AGENCY: Small Business Administration.

ACTION: Notice of extension of comment period.

SUMMARY: On May 3, 1991 (56 FR 20382), the Small Business Administration (SBA) published a proposed rule to simplify the size standard for petroleum refining. Under the proposed rule, if adopted as final, SBA would eliminate the 50,000 barrel per day (BPD) capacity limit as a component of the size standard for petroleum refining. The current requirement that a small petroleum refiner, including all affiliates, have no more than 1,500 employees would remain. The reduction of the standard to a single size criteria is consistent with the single-size criteria used for all other industries. This notice extends the period to submit comments on the proposed rule.

DATES: Written comments on the proposed rule must be received on or before July 3, 1991.

ADDRESSES: Written comments should be submitted to Gary M. Jackson, Director, Size Standards Staff, U.S. Small Business Administration, 409 3rd Street, NW., 5th Floor, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Norman S. Salenger, Economist, Size Standards Staff, (202) 205–6618.

SUPPLEMENTARY INFORMATION: In 1955, SBA first established the size standard for the Petroleum Refining Industry, Standard Industrial Classification (SIC) code 2911, at 1,000 employees with refining capacity not to exceed 30,000 barrels per day (BPD). At that time, small refiners produced 7.8 percent of the refining industry's output. By 1975, however, the small refiners' share of output had declined to 5.1 percent. To restore the small business share of output, both components of the size standard were raised, to 1,500 employees and 50,000 BPD. SBA's analysis of industry factors and trends now indicates a further adjustment of the size standard is warranted to maintain the small business share of output. The proposed rule and a discussion of the industry analysis supporting an adjustment of the size standard appear at 56 FR 20382.

This notice will extend the comment period in order to allow the public sufficient time to fully address the appropriateness of the proposed rule and its impact on the industry and on small refiners. Given the level of interest that has been expressed, the longer comment period will afford an opportunity for the proposed rule to reach a broader cross-section of the target audience than otherwise possible, an may generate valuable input from small refiners potentially affected by a size standard change.

Therefore the comment period on the proposed rule is hereby extended. The Agency will accept comments on the proposed rule until July 3, 1991.

Dated: May 31, 1991.

Patricia Saiki,

Administrator, U.S. Small Business Administration.

BILLING CODE 8025–01–M

FEDERAL TRADE COMMISSION

16 CFR Part 453

Trade Regulation Rule: Funeral Industry Practices

AGENCY: Federal Trade Commission.

ACTION: Denial of petition by State of Texas for statewide exemption from trade regulation rule concerning funeral industry practices.

SUMMARY: On December 7, 1988, the State of Texas filed its second petition for exemption from the FTC Funeral Rule. A request for public comment on the petition was published in the **Federal Register** on May 22, 1989, and the 90-day comment period ended on August 21, 1989. After careful consideration of the petition and its attachments, public comments on the petition, FTC enforcement actions in Texas, and other information made available to the Commission and placed on the public record, the Commission has determined that: (1) The state law does not afford an overall level of protection to consumers which is as great as, or greater than, the protection afforded by the FTC Funeral Rule; and (2) the Commission cannot conclude that Texas law enforcement is sufficient to warrant the grant of an exemption at this time. Accordingly, the petition is denied.

DATES: This action is effective June 25, 1991.

FOR FURTHER INFORMATION CONTACT: Carol Jennings, Attorney, Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580, (202) 326–3010.

SUPPLEMENTARY INFORMATION:

I. The Funeral Rule

On September 24, 1982, the Federal Trade Commission ("FTC" or "Commission") promulgated the Trade Regulation Rule concerning Funeral Industry Practices ("Funeral Rule" or "Rule").[1] The Rule, which became fully effective on April 30, 1984, requires funeral providers to: (1) Provide consumers with a written, itemized general price list, casket price list and outer burial container price list; (2) make truthful representations regarding legal and other requirements concerning funeral arrangements; (3) permit consumers to select and purchase only those goods and services they desire; (4) obtain express permission before performing embalming; (5) refrain from misrepresenting the preservative and protective value of funeral goods and services; and (6) provide price information over the telephone.

II. The Exemption Process

Section 453.9 of the Funeral Rule permits states to apply for exemption from the rule. It provides:

> If, upon application to the Commission by an appropriate state agency, the Commission determines that:
>
> (a) There is a state requirement in effect which applies to any transaction to which this rule applies; and
>
> (b) That state requirement affords an overall level of protection to consumers which is as great as, or greater than, the protection afforded by this rule; then the

[1] 47 FR 42260 (September 24, 1982), 16 CFR part 453.

VOL 56 ISS 122 JE 25 1991 UMI

Commission's rule will not be in effect in that state to the extent specified by the Commission in its determination, for as long as the state administers and enforces effectively the state requirement.

In its Statement of Basis and Purpose for the Funeral Rule, the Commission stated that exemption requests would be considered on a case-by-case basis, and that exemption proceedings would be conducted pursuant to § 1.16 and subpart C, §§ 1.21–1.26 of the Commission's rules of practice.[3]

III. Commission Denial of Prior Texas Exemption Petition

The first Texas exemption petition was filed by the Texas State Board of Morticians on February 21, 1984, prior to the effective date of the Funeral Rule, and was supplemented by six additional filings that concluded on March 4, 1985.[4] Comments were received from 11 parties, including: The Consumer Protection Division of the Office of the Attorney General of Texas; Mr. T. Grady Baskin, Jr., a former member of the Texas State Board of Morticians; five memorial societies; Consumers Union; the Gray Panthers of Austin; and two individual consumers.[5] All of the commenting parties urged that the Commission deny the Texas petition.

The petition was denied because the Commission concluded that Texas law failed to provide an overall level of protection to consumers as great as that provided by the Funeral Rule. To illustrate its conclusion, the Commission cited the following three areas in which Texas law afforded consumers less protection than the Funeral Rule: [6]

A. Definition of "Prospective Customer"

Under Texas law, prospective customers were entitled to receive itemized written price information and disclosures. The term "prospective customer" was defined as "a consumer who enters a funeral establishment and inquires about the price of any funeral service or merchandise." Thus, consumers who entered a funeral establishment and inquired about funeral arrangements, but did not ask specifically about prices, might not be entitled to price disclosures as they would under the Funeral Rule. In addition, the definition, though including individual consumers, failed to include other entities that clearly are covered by the Funeral Rule, such as memorial associations.

B. Lack of Definition of "Services of Funeral Director and Staff"

Texas law did not define or limit the "services of funeral director and staff" that might be included in a non-declinable professional services fee. The Funeral Rule does define this term and makes clear that such a mandatory fee may not include other goods and services required to be separately itemized on the price list. The Commission concluded that Texas law, by this omission, did not prevent all tying arrangements that are prohibited under the Funeral Rule and that, as a result, consumers could be denied choice in the selection of funeral goods and services.

C. Timing of Providing Price Lists to Consumers

Texas law did not mandate the timing of the provision of required price lists and the itemized statement of goods and services selected to consumers. Thus, under Texas law consumers might not be provided with price disclosures early in the discussion of funeral arrangements as required by the Funeral Rule. Moreover, consumers might not receive the itemized statement, showing the cost of each item selected as well as the total cost of the funeral, at the conclusion of the arrangements discussion as mandated by the Funeral Rule.

The Commission stated that these aspects of Texas law differed from the Funeral Rule in important respects and that, taken together, they illustrated its conclusion that Texas law provided consumers less protection than the Funeral Rule. The Commission noted that several commenting parties had alleged inadequate enforcement of the state law. However, it determined that it need not address this issue since it had already decided to deny the petition. The Commission noted that before an exemption petition could be granted, however, it would have to find the state administered and enforced its law effectively.

IV. Second Texas Exemption Petition

On December 7, 1988, the State of Texas filed its second petition for exemption from the Funeral Rule.[7] The petition stated, in Exhibit E, that since the denial of its first exemption petition, "Texas has taken positive steps to correct any shortcomings in the state law and regulations." The petition cited the following changes:

A. Texas mortuary law has been changed to define "prospective customer" as "any consumer who enters a funeral establishment and inquires about any funeral service, cremation, or merchandise." Moreover, the law states that price information must be provided "regardless of any affiliation of the customer or whether the customer has a present need for the services or merchandise." [8]

B. The regulations of the Texas Funeral Service Commission (which has replaced the Texas State Board of Morticians) have been amended to define the term "other itemized services provided by the funeral home staff," which appears in the retail price list requirement in the Texas statute,[9] in a manner similar to the definition of "services of funeral director and staff" contained in the Funeral Rule, § 453.1(o).[9] Unlike the Funeral Rule, the Texas regulation adds the phrase "and any other services offered by the funeral establishment," after the list of suggested items that may be included in this fee. However, the Texas definition also provides that this fee should not include other items required to be separately itemized on the price lists.[10] In addition, the Texas rules contain an anti-tying provision that is virtually identical to § 453.4(b) of the Funeral Rule.[11]

C. The Texas Funeral Service Commission (hereafter "TFSC") has adopted a regulation requiring the presentation of the retail price list (which includes the general price list, casket price list, and outer burial container price list) "to any consumer who inquires in person about any funeral service, cremation or merchandise and prior to the consumer viewing or selecting any merchandise or service." The itemized statement of

[11] 22 TAC 203.11(h).

goods and services selected (called a "written memorandum" in Texas law) must be presented to the customer upon the conclusion of the arrangements discussion.[12]

The TFSC asserted, in Exhibit E of its petition, that as a result of these changes, which went into effect September 1, 1987, "Texas law now provides an overall level of protection to consumers as great as or greater than the Funeral Rule," and "that the only criterion that remains to be addressed is whether the state law is being administered and enforced effectively."

Other amendments to the Texas mortuary law were enacted by the legislature after the filing of the second Texas exemption petition and became effective September 1, 1989. These amendments were sent to the FTC staff by the TFSC, with a letter dated June 26, 1989, requesting that the exemption petition be amended accordingly.[13]

A request for public comment on the second Texas petition for exemption from the Funeral Rule was published in the Federal Register on May 22, 1989.[14] The notice described: (1) The Commission's basis for denial of the first Texas exemption petition; (2) the changes in Texas law since the denial;[15] (3) the remaining differences between Texas law and the Funeral Rule; and (4) the administration and enforcement of Texas law. Questions for public comment were posed with respect to items (2)–(4). The 90 day period for public comment ended on August 21, 1989.

V. Public Comments Concerning Texas Law

Comments on the second Texas exemption petition were filed by 14 parties.[16] The following seven parties supported the TFSC request for exemption from the Funeral Rule: Brown Claybar of Claybar Funeral Home and Legislative Chairman for the Texas Funeral Directors Association; Greg Kneibler and Ray Lunn of Lunn's Colonial Funeral Home; John W. Coker, Executive Director of the Texas Funeral Directors Association; Robert Lopez, Jr., of Allison Funeral Service; Scherry A. Allison of Allison Funeral Service; Dudley M. and Teresa Hughes of the Dudley M. Hughes Funeral Company; and John M. Kreidler of McAllen, Texas. The exemption request was opposed by the following seven individuals and organizations: Marvin A. Wilson of Houston, Texas (formerly employed in the funeral services industry); Antonia and Toby Robles of Dallas, Texas (consumers); American Association of Retired Persons (AARP) Texas State Legislative Committee; National Consumers League; Consumers Union, Southwest Regional Office; Texas Gray Panthers; and T. Grady Baskin, Jr. (former member of the Texas State Board of Morticians).

The commenters who supported granting Texas an exemption from the Funeral Rule made the following arguments: Texas law and regulations offer consumers protection that is equal to or greater than that provided by the FTC rule; the FTC rule is a duplication of regulatory effort that is confusing and unnecessary; consumers can resolve problems more quickly through the state agency than through the federal government; Texas funeral directors prefer state regulation over federal regulation; the TFSC is effectively enforcing state law; and the states are best equipped to regulate professions within their borders.

The commenters who opposed the exemption petition asserted that an exemption for the state of Texas from the Funeral Rule would result in less protection for Texas consumers. The consumer organizations and Mr. Baskin argued that the changes in Texas law since the FTC's denial of the first exemption petition were inadequate to correct the deficiencies found by the Commission. Most of the commenters also contended that enforcement of state law by the TFSC is inadequate. In addition, the consumer organizations suggested that it would be premature for the FTC to grant the Texas petition given its own ongoing mandatory review of the Funeral Rule,[17] and the fact that the Texas Sunset Advisory Commission was conducting an evaluation of the TFSC and its enabling statute and regulations.

Some of the commenters also addressed the specific questions concerning Texas law and its enforcement that were posed in the Federal Register notice of May 22, 1989.

A. Recent Changes in Texas Law and Regulations

1. Definition of "Prospective Customer"

The AARP, Consumers Union, and the National Consumers League commented on this change in Texas law. All of these organizations believe that the statute remains ambiguous on the issue of whether representatives of consumer groups or memorial societies, who are compiling information solely for comparative purposes, would be entitled to receive the retail price list. All three believe that the FTC's use of the word "person" [18] affords greater consumer protection by making clear that price information must be provided to anyone who inquires about prices or arrangements.

2. Definition of "Services of Funeral Director and Staff"

Consumers Union was the only party to comment on this amendment. It noted that the administrative regulation is described as a clarification of "other itemized services provided by the funeral establishment staff," which is listed under the statutory requirements for the retail price list.[19] Consumers Union objected to the fact that the TFSC regulation uses the term "other services" to define the statutory term "other * * * services." It stated: "The rule does nothing to clarify the statute—it in effect says that 'other services' are 'other services.'" [20]

3. Timing of Providing Price Lists to Consumers

The TFSC has adopted a regulation requiring that a price list be presented "prior to the consumer viewing or selecting any merchandise or service." [21] The AARP, Consumers Union, National Consumers League, and Mr. Baskin all concluded that the FTC Rule provides greater clarity and greater protection to consumers by requiring

---

[12] 22 TAC 203.10.

[13] The letter and accompanying documents have been placed on the public record as Document No. XXIII–21. Among other things, the amendments: (1) Give the TFSC authority to act with regard to instances of misappropriation of funds paid for pre-need funeral arrangements; (2) authorize the TFSC to issue a reprimand for violation of relevant laws and regulations; and (3) add to the list of punishable statutory offenses the failure to provide general price information by telephone within a reasonable time.

[14] 54 FR 21873 (May 22, 1989).

[15] The most recent amendments to the Texas law, noted above, were enacted subsequent to publication of the May 22 Federal Register notice and hence were not mentioned therein. However, these documents were placed on the public record early in July 1989 and were noted by at least one of the commenting parties.

[16] These comments have been placed on the public record as Document Nos. XXIV–40–54.

[17] The Funeral Rule provides for a mandatory review proceeding to begin no later than four years after its effective date. 16 CFR 453.10. This proceeding commenced with a Notice of Proposed Rulemaking published in the Federal Register on May 31, 1988, 53 FR 19804. The proceeding has not yet been concluded.

[18] "Person" is defined as "any individual, partnership, corporation, association, government or governmental subdivision or agency, or other entity." 16 CFR 453.1(n).

[19] VTCS, Article 4582b, section 1.S.

[20] Document No. XXIV–55, p.3.

[21] 22 TAC 203.18.

VOL 56 ISS 122 JE 25 1991 UMI

that a general price list be offered at the beginning of the arrangements discussion.[28] They believe that the Texas regulation is more ambiguous, appearing to allow the funeral provider to present the retail price list at any point prior to the actual selection of goods or services.

The comments of the AARP cited testimony by James P. Hunter III, Chairman of the TFSC, at Funeral Rule review hearings held in San Francisco in January 1989. Mr. Hunter expressed disagreement with the FTC requirement that a price list be offered at the beginning of the arrangements discussion. He further stated that the TFSC took the position that as long as the document was presented prior to the actual selection of goods, the public interest would be safeguarded.[29]

3. Remaining Differences Between the FTC Rule and Texas Law

Other differences between the Funeral Rule and Texas law were noted in the request for public comment on the first Texas exemption petition.[30] However, the Commission did not address these other differences in its denial of the first exemption petition. The Commission merely stated that the three items discussed therein "illustrate its conclusion that state law provides less protection than the Funeral Rule".[31] Therefore, the May 22, 1989, Federal Register notice requested public comment on whether remaining differences between the Funeral Rule and Texas law are significant and would afford Texas consumers less protection than they now enjoy if the exemption petition were granted. Some of the commenters addressed some of these remaining differences.

1. Transactions Covered by FTC Rule and Texas Law

The Funeral Rule covers all funeral providers, defined in § 453.1(j) as "any person, partnership, or corporation that sells or offers to sell funeral goods and funeral services to the public." Thus, the provisions of the Rule would extend to pre-need sellers who may not be licensed funeral directors.[32] The jurisdiction of the TFSC, however, is limited to licensed funeral establishments, licensed funeral directors, and licensed embalmers.[33] Comments filed by the Consumer Protection Division of the Texas Attorney General's Office with regard to the first Texas exemption petition made clear that the State Board of Morticians (now the TFCS) could not enforce state law against an unlicensed funeral provider.[34]

Both Consumers Union and Mr. Baskin state that there are sellers of pre-need funeral goods and services in Texas who would be covered by the FTC Federal Rule, but who are not subject to the jurisdiction of the TFSC.[35] The TFSC regulations, in fact, specifically exclude pre-need sellers from the requirement that only licensed funeral directors enter into contractual agreements for funeral services and merchandise.[36] Thus, it appears that there are sellers of funeral goods and services in Texas who are subject to the provisions of the FTC Funeral Rule, but who are not subject to the Texas laws and regulations that are the basis for this exemption petition.[37]

In addition, there appears to be a question as to the authority of the TFSC over pre-need transactions that are handled by licensed funeral directors and establishments. The TFFS asserts that the price information and disclosure requirements of Texas law apply to pre-need transactions and are enforceable by that agency.[38] However, the staff of the Texas Sunset Advisory Commission reached the conclusion that these disclosure requirements have not been applied to pre-need sales and that the TFSC lacks clear authority to enforce these regulations in pre-need transactions.[39]

2. Required Price Itemization

The Funeral Rule requires that consumers be provided with a general price list, showing prices for 17 specified items of service or merchandise, a casket price list, and an outer burial container price list.[40] Texas law requires a retail price list which includes the prices of caskets and outer burial containers, and various other charges for services, facilities, and automotive equipment.[41] The essential differences between the federal and state requirements are that Texas does not require any descriptive information about the caskets or outer containers listed on the price list and does not require itemized prices for other preparation of the body, other use of facilities, and other automotive equipment.[42] Consumers Union and the National Consumers League both commented on these differences as evidence that Texas law affords consumers less protection by providing them with less information that the FTC Rule.

3. Required Disclosures

(a) *selection of goods and services.* The FTC Funeral Rule has required disclosures for both the general price list and the itemized statement concerning the customer's right to choose and pay for only the items desired. Texas requires a dual set of disclosures for each document. The disclosures required by the TFSC rules track the language required by the FTC.[43] However, the Texas statute requires somewhat different wording, with a somewhat different meaning.[44] The TFSC states that both sets of disclosures are required on both documents.[45]—

Both Mr. Baskin and Consumers Union commented on these disclosures concerning the customer's right of choice.[46] Mr. Baskin states that the dual sets of disclosures "are confusing and seem to imply different standards." He and Consumers Union both note that the FTC disclosures allow the funeral provider to charge for items not selected only in very limited circumstances, such as to satisfy a legal requirement. They believe that the language required by the Texas statute, by contrast, implies broader discretion for the funeral provider to charge for items not selected even where the charge may not result from a legal requirement imposed by the cemetery or crematory.

(b) *Cash advance items.* The FTC Funeral Rule requires that the following disclosure appear in immediate conjunction with the itemized price information:

> This list does not include prices for certain items that you may ask us to buy for you, such as cemetery or crematory services, flowers, and newspaper notices. The prices for those items will be shown on your bill or the statement describing the funeral goods and services you selected.[47]

Texas law requires the following notice on the retail price list: "Please note that there may be charges for items such as cemetery fees, flowers, and newspaper notices."[48]

(c) *Mandatory professional services fee.* The Funeral Rule requires the following disclosure, if the fee for services of funeral director and staff is non-declinable:

> This fee for our services will be added to the total cost of the funeral arrangements you select. (This fee is already included in our charges for direct cremations, immediate burials, and forwarding or receiving remains.)[49]

Texas law has no comparable disclosure. Consumers Union commented that both the cash advance and professional services fee disclosures are intended "to forewarn the consumer of the possibility of final charges which might not have been contemplated, or which could be used to pad increases in the final billing." It concluded that Texas law provides less warning to consumers.[50]

(d) *Embalming.* The Funeral Rule and the Texas regulations require virtually identical disclosures regarding embalming to appear on the general price list.[51] However, the Funeral Rule also requires the following disclosure to appear on the funeral services contract:

> If you selected a funeral which requires embalming, such as a funeral with viewing, you may have to pay for embalming. You do not have to pay for embalming you did not approve if you selected arrangements such as a direct cremation or immediate burial. If we charged for embalming, we will explain why below.[52]

Texas law does not require any disclosure concerning embalming to appear on the itemized statement or contract, and does not require written explanation of the reasons for embalming. Mr. Baskin commented that he believed these written disclosures should be required in Texas because "[e]mbalming is the foundation of the expensive funeral."[53]

4. Prior Approval for Embalming

Like the Funeral Rule, Texas law requires prior approval for embalming, or a reasonable effort to obtain such approval.[54] However, the Funeral Rule also provides that the customer need not pay for embalming performed without prior authorization if the customer selects funeral arrangements where the procedure is not needed. Texas has no comparable provision that would enable the customer to decline payment under such circumstances.

Mr. Baskin was the only party to comment on this difference, asserting that the TFSC should adopt the same provision "in light of the importance the embalming process plays in the total cost of the funeral."[55]

5. Telephone Price Disclosure

The TFSC regulation contain a telephone price disclosure requirement that is nearly identical to that of the Funeral Rule.[56] Both require an affirmative disclosure that price information is available over the telephone, as well as the actual conveying of such information upon request. An amendment to the Texas statute, adopted subsequent to the filing of the second exemption petition, authorizes the TFSC to bring an enforcement action against any licensee for failure to "provide general price information by telephone within a reasonable time."[57] Consumers Union pointed out that the TFSC regulation and later statutory amendment must be read together to determine the required timing for provision of telephone price information.

C. Provisions of Texas Law Not Included in the FTC Rule

The Texas exemption petition lists several state requirements that have no counterpart in the Funeral Rule. Most of these were also part of Texas law when the previous petition was filed. The Commission concluded that although these features of Texas law offered "tangible benefits to consumers," on balance they did "not compensate for the essential protections contained in the Funeral Rule that are absent from state law."[58]

These additional features of Texas law are as follows:

1. Each written memorandum [or itemized statement] must include the name, mailing address, and telephone number of the TFSC and a statement indicating that complaints may be directed to the TFSC.[59]

2. Funeral establishments must display their least expensive casket in the same general manner as other caskets are displayed. In addition, they must display five or more adult caskets in order to permit reasonable selection.[60]

3. Funeral directors may not state or imply that a customer's concern with the cost of any funeral service or merchandise is improper or indicates a lack of respect for the deceased.[61]

4. Funeral directors may not take custody of a body without authorization or refuse to promptly release a body to a person authorized to make funeral arrangements.[56]

5. Casket display rooms must be designed and utilized to allow the pubic to make a private inspection and selection.[57]

6. Any person making funeral arrangements must explain to the customer or prospective customer that a contractual agreement for funeral services of merchandise may not be entered into before the presentation of the retail price list to that person.[58]

7. The TFSC is required to prepare and disseminate to the general public information explaining matters relating to funerals, describing the regulatory functions of the Commission, and describing the Commission's procedure for handling consumer complaints.[59] The TFSC has published such a brochure, attached to the exemption petition as Exhibit K,[60] and Texas funeral establishments are required to have three brochures prominently displayed.[61]

8. Funeral establishments must retain records, including price lists and the written memoranda, for a minimum of two years.[62]

The AARP contended that although these measures were "examples of fair business practices which should be emulated and encouraged," they were not adequate substitutes for specific requirements of the FTC Funeral Rule.[63] On the other hand, the Texas Funeral Directors Association, and others who commented on behalf of the industry, pointed to some of these provisions of law as evidence that Texas affords greater protection to consumers than the FTC Funeral Rule.[64]

VI. Administration and Enforcement of Law in Texas

A. The Texas Funeral Service Commission

The TFSC is composed of nine commissioners appointed by the Governor and confirmed by the Senate. The term of office is six years. Five of the nine commissioners must be licensed funeral directors and/or embalmers and must have five consecutive years of experience immediately preceding their appointment. The remaining four members of the commission represent the public interest and may not be subject to the regulatory authority of the commission. [65]

1. Staffing

The commission employs a full-time staff of eight, including an executive director, a deputy director/chief investigator, a director of licensing and administration, a staff attorney, two field inspectors, an administrative technician/secretary, and an administrative clerk. In addition, the commission contracts with outside legal counsel, a financial consultant, and a licensed private investigator who investigates a minimum of two consumer complaints each month.[66]

2. Funding

The commission is funded by the Texas legislature through general appropriations. Funding for the commission for the past three years has been as follows: FY 1987, $222,871; FY 1988, $321,565; and FY 1989, $321,004. The additional funding for FY 1988 and 1989 was requested for increased law enforcement positions and activities.[67]

3. Enforcement Procedures

The commission both initiates and receives complaints against licensees. The commission is required to inspect each licensed funeral establishment once each year.[68] According to the petition, establishments revealing serious deficiencies are usually reinspected within 30–90 days. Formal charges are filed against repeat offenders and the commission normally will assess an administrative penalty of $250 or more against the license of the establishment or the license of the funeral director in charge.[69]

[65] VTCS, Article 4582b, section 2.A.

[67] *Id.*

[68] VTCS, Article 4582b, section 4.G.

[69] Exhibit G of the Texas exemption petition.

According to the petition, all complaints are personally reviewed by the executive director. Those which allege a violation of the statute or rules are assigned either to the chief investigator or the contract investigator. Complaints are investigated through a combination of telephone inquiries; travel by the investigator to the location of the complaint; interviews with the complainant, funeral home employees, and other witnesses; and investigation of funeral home files.[70]

When an investigation has been completed, it is brought to the Complaint Review Committee, comprised of the commission chairman, the executive director, the outside legal counsel, and the chief investigator. This committee reviews the case and makes one of the following recommendations: (1) Request further investigation; (2) close the case for insufficient evidence; (3) recommend that an agreed order be negotiated; (4) recommend that an administrative penalty be assessed; or (5) recommend that formal charges be filed and a formal hearing scheduled. The commission may accept or reject any of these recommendations. Final action on complaints must be taken in an open meeting.[71]

The TFSC has authority to cancel, revoke, suspend, place on probation and/or assess an administrative penalty against any licensee subject to its regulatory authority.[72] Administrative penalties may be in an amount not less than $100 or more than $5,000 for each violation of the statute or regulations promulgated pursuant to the statute.[73] The TFSC is further authorized to sue a funeral director or funeral establishment for appropriate injunctive relief.[74]

B. Enforcement History in Texas

In September 1984, after the filing of the first Texas exemption petition, the Commission received from Mr. Grady Baskin, Jr., then a consumer member of the State Board of Morticians, the results of an investigation in which he had personally surveyed funeral homes in the Dallas and Houston areas to check for compliance with state law price disclosure requirements.[75] The

[75] This document was placed on the public record as Document No. XXIII–10. Mr. Baskin's comments,

Continued

survey had been conducted between June and August 1984, and was undertaken with the approval of the Texas Attorney General's office. Posing as a consumer who anticipated the need to make funeral arrangements for a family member in the near future, Mr. Baskin visited 24 funeral homes to request retail price lists and other price information. He was able to discuss funeral arrangements at 18 of these funeral homes. Only one funeral home was found by Mr. Baskin to be in full compliance with state law. No enforcement actions or investigations were brought by the State Board as a result of the Baskin survey.[76]

The FTC's Dallas Regional Office has brought six enforcement actions resulting from independent investigations of some of the funeral homes surveyed by Mr. Baskin. Five of these cases have resulted in consent agreements with civil penalties ranging from $10,000 to $30,000.[77] In the one litigated matter, the U.S. District Court for the Northern District of Texas, Dallas Division, granted the FTC's motion for summary judgment, awarding a permanent injunction and a civil penalty of $80,000.[78]

At the time the first Texas exemption petition was denied, the Texas State Board of Morticians did not have authority to assess civil penalties for violation of its regulations. However, the newly constituted Texas Funeral Service Commission was given this authority in September 1987.[79] This new authority is reflected in the enforcement summary appended to the exemption petition.

Exhibit H of the exemption petition is a statistical summary, for fiscal years 1986–88, of funeral establishment inspections, complaints received or initiated by the TFSC, and actions taken by the TFSC. Exhibit I summarizes the complaints received or initiated by the TFSC during fiscal years 1987 and 1988.

There were 60 complaint summaries for fiscal year 1987. Eighteen of the 60 appeared to involve allegations of conduct that would also constitute violations of the FTC Funeral Rule.[80] Three of these matters resulted in formal hearings, and in one case (the subject of two complaints) the license was revoked. The other two hearings resulted in dismissal.[81] One case was closed after an informal hearing.[82] One case was resolved by agency arbitration, and another by an agreed order with the funeral home imposing license suspension with probation. Two cases were closed with a warning letter to the funeral home. Five were closed because of insufficient evidence, witness refusal to testify, or lack of substantiation for the complaints.[83] One case was closed because the establishment was no longer in business. In the remaining cases, the allegations were disproved by the investigation.

There were 161 complaint summaries for 1988, the first full year in which the TFSC had civil penalty authority. Of these complaints, 21 contained allegations that appeared to involve violations of the Funeral Rule as well as of Texas law. Three of the complaints were the result of TFSC inspections; the remainder were consumer complaints. Seventeen of these case files were provided to FTC staff upon request.[84] Fines were assessed in eight cases (four for $250, three for $500, and one for $10,000); in addition there were agreed orders in four instances. Six matters were closed because of insufficient evidence of lack of substantiation, and in one instance the complaint was withdrawn by the complainant. In one case there was an agreed order and a 6-month license suspension with probation. In the last case, a formal hearing resulted in a license suspension. However, the case had been appealed to state district court, which had remanded the matter to the TFSC to dismiss or prepare revised findings of fact and conclusions of law. The court's remand letter stated that it was impossible to determine the basis for the agency's action, and concluded that the requirements of the Texas Administrative Procedures Act had not been met.[85]

In addition to TFSC enforcement, it appears that the Texas Attorney General's Office has authority to enforce the requirements of the FTC Funeral Rule as a state law action under section 17.46(c)(1) of the Texas Deceptive Trade Practices Act. At least three such actions have been filed by the Attorney Generals' Office.[86] In its comments on the first Texas petition, the Consumer Protection Division of the Texas Attorney General's Office stated that granting the exemption would raise an issue as to whether the Attorney General's Office could continue to enforce Funeral Rule requirements under state law.[87]

opposing the first Texas exemption petition, are on the public record as Document Nos. XXIV–35, 36, and 37. The Texas price disclosure requirements that were the subject of this compliance check had gone into effect September 1, 1983. Of course, the FTC Funeral Rule, effective April 30, 1984, was also in force at the time of Mr. Baskin's investigation.

[76] Document No. XXIV–35. See also, letter of January 25, 1989, from Larry A. Farrow, Executive Director, TFSC, Document No. XXIII–17.

Mr. Baskin stated that he was informed by the Attorney General's office that as a Board member, he could not testify in any Board proceeding. Document No. XXIV–36. However, there appears to be no reason why the Board could not have conducted an independent investigation of the funeral homes visited by Mr. Baskin.

[77] *U.S.* v. *Troy Suggs Funeral Home*, No. CA3–87–1258–G (N.D. Tex. May 20, 1987) (civil penalty of $20,000); *FTC* v. *Crane Rhoton Services Corporation*, No. CA3–87–1545–T (N.D. Tex. June 13, 1988) (civil penalty of $30,000); *U.S.* v. *Ware Crest, Inc., No. CA4–88–437–K* (N.D. Tex. July 11, 1988) (civil penalty of $10,000); *U.S.* v. *Funeral Corporation Texas*, No. CA4–8829 E (N.D. Tex. January 11, 1989) (civil penalty of $20,000); and *FTC* v. *Nitday Funeral Home, Inc.*, No. H–88–2808 (S.D. Tex. November 1, 1988) (civil penalty of $25,000).

[78] *FTC* v. *Dudley M. Hughes Funeral Co.*, 710 F. Supp. 1524 (N.D. Tex. 1989), *appeal dismissed*, 891 F.2d 889 (5th Cir. 1990). The TFSC also brought an action against the Dudley M. Hughes Funeral Company based upon a consumer complaint alleging that Hughes had caused the embalming of a deceased person against the wishes of the family. The Hughes funeral establishment license was suspended for two years, with the two year period fully "probated". Mr. Hughes' personal license was suspend for one year, with only the last six months "probated." (A licensee is able to continue working, under probation, for the "probated" period of time.) Administrative penalties totalling $10,000 were also imposed. Document No. XXIV–39. Subsequently, Mr. Hughes was found to be in violation of probation; his personal license was revoked and the establishment license suspended without probation. Both orders were stayed pending appeal. Mr. Hughes has since filed for bankruptcy.

[79] VTCS Article 4582b, sections 3.H, 4.D.2(c), and 6G.

[80] Sixteen of these case files were requested by FTC staff and have been placed on the public record. Document No. XXIII–17.

[81] Reasons for the dismissal were not given.

[82] Again, no reason for the action was given. In this case the funeral home admitted that it did not have or use a written general price list. The closing letter stated that the firm would be re-inspected within 60 days and that a financial penalty would be recommended if compliance with the law was not found at that time. Document No. XXIII–17, case number 87–51.

[83] In one of these cases, which involved a pre-need contract, there is a letter to the State Board of Morticians from the Texas Department of Banking which states "it appears that violations of both mortuary law and Federal Trade Commission rules have occurred" Document No. XXIII–17, case no. 87–27.

[84] These case files have been placed on the public record as Document Nos. XXIII–17 and 21(d).

[85] Document No. XXIII–21(d), case number 88–78.

[86] One action was filed in state court against a funeral director who was, at that time, a Commissioner of the TFSC. The Attorney General's Office requested and received FTC staff assistance in reviewing evidence in this case. (Document No. XXVIII–304.) The Texas court entered a directed verdict for the defendant, and the Attorney General's office did not appeal. *State of Texas* v. *Henry Thomas*, No. 86–133–C (197th Dist. Ct., Cameron County, Tex., Aug. 17, 1987.) Two actions were settled by consent agreements. *State of Texas* v. *Goldie Wilson, d/b/a Wilsons' Funeral Directors*, No. 400,074 (299th Dist. Ct., Travis County, Tex., July 3, 1986) (permanent injunction; $6,000 civil penalty and costs); *State of Texas* v. *Santos De Leon, d/b/a De Leon Funeral Home*, No. C–170–86–B (93rd Dist. Ct., Hidalgo County, Tex., May 13, 1987) (permanent injunction; $3,000 costs).

[87] The Chief of the Consumer Protection Division of the Attorney General's Office opposed the first

VOL 56 ISS 122 JE 25 1991 UMI

C. Public Comments on Enforcement of Texas Law

The AARP, Consumers Union, the Gray Panthers, and Mr. Baskin all commented upon this issue, asserting that enforcement of state law by the TFSC is inadequate. The AARP noted that the majority of administrative penalties assessed by the TFSC were levied for failure to disclose to customers the different colors in which the three least expensive caskets are available, failure to include the name, address and telephone number of the TFSC on the sales contract, and/or failure to display five or more adult caskets.[89] Consumers Union also believes that enforcement efforts have been concentrated too heavily on these technical violations.[89]

The AARP, Consumers Union, and the Gray Panthers contended that the enforcement record has been poor with regard to consumer generated complaints. Both AARP and Consumers Union noted that a majority of consumer initiated complaints in 1988 were dismissed with no action because of insufficient evidence, unsubstantiated charges, or similar reasons. They further noted that in many cases involving license suspension or revocation, and some cases involving a monetary penalty, all or most of the penalty was probated.[90]

Mr. Baskin, former member of the Texas State Board of Morticians, characterized administration and enforcement in Texas as "dismal." He referred to his own prior survey of Texas funeral homes, commenting that the FTC should not have had to conduct independent investigations and enforcement actions against funeral homes surveyed by a Texas board member.[91] Mr. Baskin acknowledged that State enforcement efforts have improved in recent years. However, he does not believe that they have improved sufficiently that Texas should be granted an exemption from the FTC Funeral Rule.

Among those who favor granting the exemption petition, two representatives of the Texas Funeral Directors Association stated that the TFSC and its staff "have a proven record of inspections, investigations and positive enforcement actions, when necessary." They further asserted that the consumer who registers a complaint "can get quicker resolution of any problem dealing with a smaller specialized state agency than with the Federal Trade Commission."[92] The other industry representatives who commented in favor of the exemption petition also asserted that state regulation is effective and preferable to federal regulation. Some also believe that having dual regulation by state and federal government creates confusion in the industry.[93]

D. Staff Report to the Texas Sunset Advisory Commission

The TFSC and its enabling legislation are subject to sunset as of September 1, 1991.[94] Therefore, the TFSC recently underwent review by the Texas Sunset Advisory Commission was published in December 1990.[95] The Sunset Advisory Commission staff recommended to the Sunset Advisory Commission that the TFSC statute be repealed and the agency abolished, based upon its conclusion that state licensure for funeral directing and embalming is no longer necessary or justified to protect the public health and safety. However, the Staff Report recommended that the consumer protection portions of the TFSC statute be retained and enforced through the courts, and that TFSC regulations patterned after the FTC Funeral Rule be incorporated into state law. (Presumably enforcement would be handled by the Attorney General's Office.)

The Staff Report noted that 47 percent of agency-initiated complaints in 1988 were "exclusively for the minor violation of failure to post information on each casket in the display room and/or failure to include the agency's address on forms used by the funeral establishment." Since the former requirement was rescinded by statute in 1989, the Staff Report concluded that the volume of agency-initiated complaints will be greatly reduced in the future, unless the TFSC changes its current approach to identifying violations. With regard to TFSC handling of consumer complaints, the Staff Report stated that the actions taken by the board to resolve the complaints it receives are "minimal and ineffective." It noted that only a small number of cases resulted in any enforcement action, and that fines were imposed in only a few cases. In other cases, probation was the only sanction.[96] In this connection, the Staff Report criticized the TFSC for failure to monitor licensees placed on probation to determine if the conditions of probation have been met.[97] With regard to TFSC funeral home inspections, the Staff Report noted numerous errors in inspection reports and a failure to make timely re-inspection of establishments cited for severe violations or multiple discrepancies.[98]

The Staff Report also cited the existence of the FTC Funeral Rule as a reason for abolishing the state agency. With regard to FTC enforcement actions against several Texas funeral homes, the Report stated: "This level of enforcement appears to serve as a significant deterrent against deceptive practices."[99]

As an alternative to abolishment of the TFSC, the Staff Report recommended transfer of its functions to the Texas Department of Health, where a centralized licensing structure is already in place for other professions. Other recommendations set forth in the Staff Report could be implemented whether the TFSC was continued in its present form or its functions transferred to another agency. The proposals most relevant to this petition included: Changing the composition of the board so that the majority of its members are public members; a requirement that the government designate the chair of the commission; statutory amendment to clarify that the TFSC has authority to take action against licensees for failure to make required disclosures in pre-need transactions; statutory amendment to require that the disclosures and information currently required to be given to consumers in at-need funeral transactions also be provided in all pre-need sales; replacement of annual funeral establishment inspection with biennial inspection and a requirement that rules be developed for reinspection of violators; development of a system for tracking violations uncovered during inspection, sending warning letters to violators and requiring that violators document corrective action within a certain time; and a requirement that the commission monitor licensees placed on probation during the probationary period.

On February 19 and 20, 1990, the Texas Sunset Advisory Commission met to vote on the recommendations contained in the Staff Report on the TFSC. The Sunset Advisory Commission did not adopt the recommendation that the TFSC be abolished or the recommendation that the functions of the agency be transferred to the Texas Department of Health. However, the Sunset Commission did adopt all of the Staff Report's alternative recommendations.[100] The Sunset Commission staff has incorporated these decisions into draft legislation to be offered at the 1991 session of the Texas legislature.

VII. Conclusions

A. Level of Protection

Texas has made a number of improvements to its laws and regulations since the denial of the last petition. These improvements make it a closer question whether Texas law provides the same overall protection as the Funeral Rule. However, there remain a number of areas where Texas law either fails to address transactions covered by the Rule or provides significantly less protection.[101] For this reason, as well as the enforcement concerns discussed below, the Commission concludes that the petition must be denied.

The threshold test for a state exemption petition is that there is a state requirement in effect which applies to any transaction to which the Federal Rule applies. That requirement has been met. There is a state requirement in effect in Texas which applies to some (although not all) transactions to which the Funeral Rule applies.[102] However, the petitioner must also demonstrate that its requirements afford "an overall level of protection to consumers which is *as great as, or greater than*, the protection afforded by (the FTC) Rule" (emphasis added).

The primary focus of the FTC Funeral Rule is the early disclosure of information to consumers. This includes information concerning the availability and prices of various funeral goods and services, and the presence or absence of legal or other requirements that might affect the consumer's selection of such goods and services. Other provisions of the Rule are designed to maximize consumer choice with regard to funeral arrangements by preventing funeral providers from bundling goods and services and otherwise requiring unnecessary purchases. A petition should be granted where state law provides its consumers the same (or greater) quantity and quality of information and choice as the FTC regulation, provided the state can demonstrate effective administration and enforcement of its laws.

Since the denial of the first Texas exemption petition, Texas has taken some steps to change those three aspects of its law that the Commission had discussed to illustrate its previous conclusion that state law provided less protection than the Funeral Rule. In two of those areas, the definition of "prospective customer" and the charge for services for funeral director and staff, Texas has made its laws and regulations more closely parallel to the requirements of the FTC Funeral Rule. Some of the commenting parties believe that the Texas requirements are still ambiguous and thus fail to offer protection comparable to that of the Funeral Rule. While the language of these amendments in fact may be less clear than comparable provisions of the Funeral Rule, the changes appear to meet the basic concerns expressed by the Commission in its denial of the first Texas petition.

With regard to the timing of presentation of the general price list, however, it is clear that the FTC requirement is more stringent than the Texas requirement. Under the Funeral Rule, the information must be presented at the beginning of the arrangements discussion. Under Texas regulations, the funeral provider need only offer the information at the conclusion of this discussion where the consumer is ready to select services and merchandise. This difference in timing can be critical.

The very premise of the Funeral Rule is that consumers are in an unequal bargaining position with the funeral provider. Consumers are generally unfamiliar with this transaction, and often must make their decisions under significant time pressure and emotional stress. The goods and services purchased also can be costly. It is for these reasons that the Commission concluded that the price lists and their disclosures should "be present for consultation while the consumers were considering what to purchase."[103] The general price list provides information concerning the range of options available in funeral services, legal requirements (or the absence thereof) that may affect consumer choice, and prices. This information obviously is not helpful to the consumer at the outset of the arrangements conference, when the consumer may have little idea of the options available, legal requirements, or the financial consequences of the choices to be made.[104]

Under the Texas requirement, this information need not be made available during the discussion and might be offered at the conclusion of the conference, where final decisions are about to be made and a contractual agreement completed. The testimony of the TFSC Chairman at the Funeral Rule review hearings suggests that the language differences between the two regulations are more than semantic, instead reflecting a fundamental policy difference between the TFSC and the FTC. The TFSC disagrees with the FTC requirement that the price list should be offered at the beginning of the arrangements discussion and wishes to place greater discretion with the funeral provider to determine when it should be introduced. Given the importance the Commission attaches to the provision of price information and disclosures early in the arrangements conference, it

---

Texas exemption petition for that reason, among others. He stated that "by granting the requested exemption, the FTC might deprive Texas consumers of significant local enforcement resources." (Document No. XXIV–34). He further stated that the Attorney General's Office could not enforce their state mortuary laws unless the laws were amended. The Texas Attorney General's Office did not submit comments on the second exemption petition. The only input of the Texas Attorney General's Office into this proceeding is found in Exhibit A of the exemption petition, wherein the Attorney General sets forth the TFSC's statutory authority as required by the exemption guidelines. (50 FR at 12328.) This letter, addressed to the Executive Director of the TFSC, states that the TFSC has the authority to enforce the state mortuary law, VTCS, Article 4582b, and to promulgate and enforce regulations pursuant to that statute. It further states that the requirements of these statutes are equal to or greater than federal requirements.

[89] Document No. XXIV–48, pp. 13–15. Of the 161 complaint summaries listed for 1988 in Exhibit I to the exemption petition, 65 involved one or more of these violations. Fifty-two color card violations were listed, and administrative penalties were assessed in most of those cases. However, this provision of the Texas statute subsequently was repealed in 1989. See footnote 54, above.

[90] Document No. XXIV–50, pp. 6–7.

[91] Document No. XXIV–48, pp. 13–14, and Document No. XXIV–50, pp. 6–7. AARP stated that it verified with the TFSC that probating a license suspension means that the licensee is able to continue working, under probation, for the "probated" period of time.

cannot conclude that Texas affords protection as great as that afforded by the Rule when it permits essential information to be provided in a less timely manner.

There remain other differences between the Funeral Rule and Texas requirements that have not been addressed or changed since the denial of the first exemption petition. One relates to the growing area of pre-need sales of funeral goods and services. Pre-need sellers who are not licensed funeral providers are covered by the FTC Funeral Rule but would not be subject to the jurisdiction of the TFSC.[105] These sellers are regulated by the Department of Banking, which does not impose requirements similar to those of the Funeral Rule. In addition, the Texas Sunset Advisory Commission has raised doubts about the legal authority of the TFSC to enforce price disclosure requirements even with respect to pre-need sales by licensed funeral directors.[106]

In addition, important disclosures concerning the charge for embalming and the mandatory professional services fee are missing from Texas requirements. The FTC Rule requires a disclosure on the itemized statement, contract, or final bill concerning the charge for embalming. This disclosure alerts the consumer that in some situations, if the embalming was performed without prior approval, he or she may decline to pay for it. Texas law lacks any comparable disclosure. In addition, Texas does not require a written explanation of the reason for embalming where a charge has been imposed. While the Texas disclosure regarding embalming that appears on the general price list informs consumers that the procedure generally is not legally required and that they may select funeral arrangements where it is not needed, it does not inform them that approval is needed before the procedure is performed. Nor does it state that they may be able to decline payment if approval was not obtained. The FTC has given consumers a right, as well as information about that right, that they are not given under Texas law. In this instance, the Commission cannot conclude that Texas law affords protection as great as that provided under the Funeral Rule.

Also missing from Texas law is the disclosure that must appear in conjunction with the non-declinable professional services fee on the general price list. This disclosure alerts the consumer that this fee is the one item on the general price list that is fixed, regardless of other selections. In addition, it informs the consumer that such a fee has already been included in the package services of direct cremation, immediate burial, and forwarding or receiving remains, and will not be added to the package price if one of these services is selected. The only information Texas would require concerning the non-declinable professional services fee is the sentence: "However, any funeral arrangements you select will include a charge for our services."[107] This sentence alone does not inform the consumer which fee on the price list is required or how this fee is handled if one of the package services is selected. Moreover, in Texas the ambiguity may be compounded by the fact that the non-declinable services fee is not specifically identified as such, but is contained under a somewhat amorphous category of "other itemized services provided by the funeral home staff."[108] The Commission considers it important that a general price list make a clear distinction between the items that are declinable and the fee that will be assessed in every transaction. Texas provides consumers with less information in this regard.

The above differences between state law and the Funeral Rule mean that under Texas law consumers would receive less information and less timely information than they are now provided under the Rule. The Commission recognizes there are additional provisions of Texas law that have no counterpart in the Funeral Rule and must be considered in determining whether Texas law provides the same "overall protection" as the Rule. However, these provisions, though offering tangible benefits to consumers, are tangential to the Rule's basic objectives or were rejected by the Commission in favor of a more effective remedial approach.[109] By contrast, the deficiencies in state law discussed above go to the heart of the Rule. Given these remaining differences, the Commission cannot conclude that Texas consumers would be provided with protection as great as they now enjoy, if the petition for exemption were granted.[110]

B. Administration and Enforcement of Texas Law

Section 453.9 of the Funeral Rule specifies that an exemption petition meeting the comparable-law test may be granted only "for as long as the state administers and enforces effectively the state requirement." In denying the first Texas petition, the Commission noted that there were criticisms of state enforcement, but it declined to reach that issue. The Commission acknowledged that it would have to make a finding of effective administration and enforcement of state law before an exemption petition could be granted.[111]

Since the denial of the first petition, Texas has made some commendable improvements in its enforcement efforts. For example, the TFSC's statutory authority to assess administrative penalties came into effect on September 1, 1987.[112] Nevertheless, it appears that

[105] This difference in coverage of the two bodies of law was one of the reasons cited by the Chief of the Consumer Protection Division of the Texas Attorney General's Office in his comments opposing the first Texas petition.

[106] The Commission recognizes that the pre-need issue, absent other deficiencies in state law, could be addressed by granting a partial exemption that would leave the FTC Rule in force as to pre-need sellers. However, the Commission's determination with regard to state enforcement, and other deficiencies in Texas law, precludes the partial-exemption approach.

Moreover, the Commission notes that during the mandatory rulemaking review proceeding (described in note 17, *supra*), the issue of whether the Funeral Rule should continue to cover pre-need arrangements has been addressed. (Final Staff Report to the Federal Trade Commission, June 1990, pp. 223–28.) Several of the Commission's Funeral Rule enforcement actions to date (including all of the Texas cases cited in notes 77 and 78, *supra*) have included evidence of violations that occurred during pre-need arrangements. However, if the Commission, at some future time, were to decide that the Rule's requirements should not extend to pre-need transactions, this area of difference between state law and the FTC regulation would cease to exist.

[107] Under both Texas regulations (22 TAC 203.11(b)(2)(A)(i)) and the FTC Rule (16 CFR 453.4(b)(2)(i)(A)) this sentence must be inserted into the general price list introductory disclosure which alerts consumers to their right to select only the items they desire.

[108] See section IV.B, *supra*. It is not clear how this aspect of the Texas regulation would be implemented in the absence of the FTC Rule. However, if this "other" services category were permitted to include both declinable and non-declinable items, the need for a disclosure specifically identifying the non-declinable fee would become even more important.

[109] Some of these additional provisions of Texas law were considered and rejected by the Commission when it adopted the Funeral Rule. An example is the requirement in Texas law that funeral providers display their least expensive caskets in the same general manner as other caskets are displayed. The Commission concluded that "reliance on rule provisions designed to stimulate information disclosure is the most effective way to ensure that consumers have a *bona fide* opportunity to purchase low-cost caskets and other merchandise if they so desire." 47 FR at 42260.

[110] The other remaining differences between the state law and the FTC Rule, such as the fact that Texas requires less itemization on its general price list and requires no descriptive information on the casket and outer burial container price lists, would not, in themselves, necessarily warrant denial of an exemption petition.

[111] 51 FR at 42747.

[112] Document No. XXIII-18, letter dated February 27, 1988, from Larry A. Farrow, Executive Director, TFSC, amending footnote 4 to Exhibit H of the exemption petition.

significant compliance problems remain. The present petition comes at the very time that the Texas Sunset Advisory Commission has recommended substantial changes to the current Texas enforcement scheme, based upon a staff report characterizing state enforcement as "minimal and ineffective." For this reason, and because there is insufficient evidence to the contrary, the Commission cannot conclude at this time that state enforcement is sufficient to warrant granting an exemption from the Funeral Rule.

In December 1989, the staff of the Texas Sunset Advisory Commission, the state agency responsible for evaluating the laws and regulations enforced by the TFSC and the TFSC's performance, issued a report that was highly critical of TFSC enforcement. The Sunset Advisory Commission Staff Report stated that TFSC enforcement efforts have been too heavily concentrated on minor and technical violations. It noted that in 1988, 47 percent of agency-initiated complaints involved only one or both of two minor violations. One of those requirements was subsequently repealed by statute and the report concluded that the volume of agency-initiated complaints would be greatly reduced in the future unless the TFSC changed its approach to identifying law violations. Agency efforts to resolve consumer complaints were characterized as "minimal and ineffective." In addition, the report criticized the TFSC for failure to track and monitor identified violators of its regulations. It recommended that the majority of TFSC commissioners be appointed from the general public rather than the funeral industry and made other recommendations to improve consumer protection in the funeral services area. In February 1990, the Sunset Commission, though not supporting staff's recommendations that the agency be abolished and its functions transferred to the Department of Health, adopted the staff's other recommendations for improving the TFSC's consumer protection enforcement.

The conclusions of the Sunset Advisory Commission Staff Report are not outweighed by any substantial evidence to the contrary. It is difficult to assess the effectiveness of any agency's enforcement record based on the number of inspections, complaints, and formal and informal proceedings. States, like the FTC, have limited resources and cannot be expected to demonstrate perfect industry compliance with its laws as a precondition of being granted an exemption. States also should be free to employ different means to achieve the same enforcement objectives.[113] At the same time, however there is reason to require clear evidence on the enforcement question, and to maintain a dual federal-state enforcement scheme where it appears that consumers would have less protection under state enforcement alone.

The FTC has brought six Funeral Rule enforcement actions in the state of Texas between 1987 and 1989 and has obtained total civil penalties of $185,000. In these six cases, the FTC alleged substantial Funeral Rule violations regarding significant Rule provisions. Investigation of Texas funeral homes for noncompliance with the Funeral Rule continues at the present time by the FTC's Dallas Regional Office. In light of the evidence indicating that Texas state enforcement may not be providing a level of protection equivalent to that of the FTC, particularly with regard to certain significant Funeral Rule provisions, the Commission is reluctant to deny consumers the benefit of its deterrent presence at this time.

C. Conclusion

The Commission concludes that despite changes in Texas law since denial of the first Texas exemption petition, Texas law does not afford consumers protection as great as, or greater than, that afforded by the FTC Funeral Rule. Moreover, the Commission cannot conclude that Texas law enforcement is sufficient to warrant the grant of an exemption at this time.

The Commission therefore concludes that the Texas petition for exemption from the Funeral Rule should be denied.

List of Subjects in 16 CFR Part 453

Funeral, Funeral homes, Price disclosures, Trade practices.

[113] What is revealed by examination of the case files submitted by the TFSC is a very different pattern of enforcement submitted by the TFSC is a very different pattern of enforcement from that undertaken by the FTC. TFSC investigations are focused only on the facts of the particular complaint that triggered the investigation. During a Federal Trade Commission investigation, on the other hand, FTC staff looks for a pattern of illegal conduct. This is done by examining funeral home records for a period of months or years and surveying past customers to determine whether they received a general price list and other documents in accordance with the Rule. In most cases there also has been a substantial difference in civil penalty amounts imposed as a result of FTC enforcement actions and state enforcement actions.

By direction of the Commission.

Donald S. Clark,

Secretary.

RIN 1545-AM63

Civil Cause of Action for Failure To Release a Lien

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations that provide guidance relating to the civil cause of action under section 7432 of the Internal Revenue Code of 1986 (the "Code") for the knowing or negligent failure to release a lien under section 6325 of the Code. The cause of action for the failure to release a lien was created by section 6240 of the Technical and Miscellaneous Revenue Act of 1988. The proposed regulations define certain key terms in the underlying statute, provide procedures for a taxpayer to notify the Internal Revenue Service of the failure to release a lien and create an administrative remedy that must be exhausted prior to the filing of a cause of action.

DATES: Written comments and requests for a public hearing must be received by August 9, 1991.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (GL-706-88), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Kevin B. Connelly, (202) 535-9682 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations amending the Procedure and Administration Regulations (26 CFR part 301) pursuant to section 7432 of the Internal Revenue Code. The proposed regulations reflect the amendment of section 7432 by section 6240 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100-647).

Explanation of Provisions

Section 6240 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100-647, 102 Stat. 3342) redesignated section 7432 of the Code as section 7433 and added a new section 7432. New section 7432 gives taxpayers the right to bring an action for damages in federal district court if any officer or employee of the Internal Revenue Service knowingly, or by reason of negligence, fails to release, in accordance with section 6325 of the Code, a federal tax lien on property of the taxpayer. The taxpayer has a duty to mitigate damages, and the total amount of damages recoverable under section 7432 is the sum of (i) the actual, direct economic damages sustained by the taxpayer which, but for the actions of the officer or the employee of the Internal Revenue Service, would not have been sustained, and (ii) costs of the action. No action for damages may be filed in federal district court until the taxpayer exhausts administrative remedies available within the Internal Revenue Service.

Section 6325 requires the Secretary to release a lien not later than 30 days after the day on which: (1) The Secretary finds that the underlying liability has been fully satisfied or has become legally unenforceable; or (2) the Secretary accepts a bond that is conditioned upon full payment of the underlying liability.

The proposed regulations provide that, for purposes of section 7432, a finding that the underlying liability has been fully satisfied or has become legally unenforceable is treated as made on the earlier of (1) the date the district director finds full satisfaction or legal unenforceability or (2) the date the district director receives a request for a certificate of release under § 401.6325-1(f) of the Income Tax Regulations, together with any information which is reasonably necessary for the district director to conclude that the lien has been fully satisfied or is legally unenforceable.

The proposed regulations define actual, direct economic damages as actual pecuniary damages sustained by the taxpayer that would not have sustained but for an officer's or employee's failure to release, in accordance with section 6325, a lien on property of the taxpayer. Injuries such as inconvenience, emotional distress and loss of reputation are compensable only to the extent that they result in actual, pecuniary damages. Litigation and administrative costs incurred in seeking relief, through litigation or administrative processes, from the failure to release a lien are not recoverable under this section as actual, direct economic damages.

The proposed regulations define costs of the action recoverable as damages under section 7432(b)(2) as: (1) Fees of the clerk and marshall; (2) fees of the court reported for all or any part of the stenographic transcript necessarily obtained for use in the case; (3) fees and disbursements for printing and witnesses; (4) fees for exemplification and copies of papers necessarily obtained for use in the case; (5) docket fees; and (6) compensation of court-appointed experts and interpreters. Costs of the action do not include any costs other than those costs specifically enumerated in the proposed regulations.

Reasonable litigation costs, including attorneys fees (generally limited to $75 per hour) not recoverable under this section may be recoverable under section 7430. If following the Internal Revenue Service's denial of an administrative claim on the grounds that the Internal Revenue Service did not violate section 7432(a), a taxpayer brings a civil action for damages in a district court of the United States, and establishes entitlement to damages under this section, substantially prevails with respect to the amount of damages in controversy, and meets the requirements of section 7430(c)(4)(A)(iii) (relating to notice and net worth requirements), the taxpayer will be considered a "prevailing party" for purposes of section 7430. Such taxpayer, therefore, will generally be entitled to attorneys fees and other reasonable litigation costs not recoverable under section 7432.

Administrative costs, including attorney's fees incurred pursuing an administrative claim for damages under section 7432, are not recoverable under section 7430. Section 7430(c)(2) provides that recoverable administrative costs include only those costs incurred on or after the earlier of (1) the date of the receipt by the taxpayer of the notice of a decision by the Internal Revenue Service Office of Appeals, and (2) the date of the notice of deficiency. The legislative history of the Technical and Miscellaneous Revenue Act of 1988 indicates that this limitation is intended to prevent recovery of administrative costs incurred in a collection action. H.R. Conf. Rep. No. 1104, 100th Cong., 2d Sess. 228 (1988). An action under section 7432 is a collection action for these purposes.

The proposed regulations provide that an action may not be maintained in federal district court under this section unless the taxpayer first files an administrative claim for damages with the Internal Revenue Service. The claim must be made in writing to the district director (marked for the attention of the Chief, Special Procedures Function) of the district in which the taxpayer currently resides or the district in which the notice of federal tax lien was filed. The claim must include: (1) The name, current address, current home and work telephone numbers and any convenient times to be contacted, and taxpayer identification number of the taxpayer making the claim; (2) a copy of the notice of lien affecting the taxpayer's property, if available; (3) a copy of the request for release of lien under section 401.6325-1(f), if applicable; (4) the grounds for the claim; (5) a description of the damages incurred by the taxpayer; (6) the dollar amount of the claim, including an estimate of damages that have not yet been incurred, but that are reasonably foreseeable; and (7) the signature of the taxpayer or duly authorized representative. A taxpayer is precluded from maintaining a civil action for an amount greater than the amount (already incurred and estimated) specified in the administrative claim, except where the increasd amount is based upon newly discovered evidence not reasonably discoverable at the time the administrative claim was filed, or upon allegation and proof of intervening facts relating to the amount of claim.

The proposed regulations provide that, after an administrative claim has been filed, an action may not be filed in federal district court until the earlier of (1) the time a decisions is rendered on the claim or (2) 30 days from the date the administrative claim is filed. A taxpayer, however, must file an action with the federal disteict court within two years after the cause of action accures. Thus, if an administrtative claim is filed in the last 30 days before the two-year limitation period expires, a taxpayer may file an action in federal district court any time after the administrative claim is filed and before the expiration of the two-year limitation period. A cause of action accrues under this section when the taxpayer has had a reasonable opportunity to discover all essential elements of a possible cause of action.

For purposes of the recovery of litigation costs under section 7430, if the Internal Revenue Service does not respond on the merits to an administrative claim for damages within 30 days after the claim is filed, the Internal Revenue Service's failure to respond will be considered a denial of the claim on the grounds that Internal Revenue Service did not violate section 7432(a).

Effective Date

These proposed regulations would be effective for actions filed after the date final regulations are published in the Federal Register.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is nor required. It also has been determind that section 553(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, thesefore, an initial Regulatory Flexibility Analysis is nor required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small businesses.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time, place and date for the hearing will be published in the Federal Register.

Drafting Information

The principal author of these proposed regulations is Kevin B. Connelly, Office of the Assistant Chief Counsel (General Litigation), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in their development.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental shelf, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

Adoption of Addition to the Regulations

Accordingly, title 26, part 301 of the Code of Federal Regulations is proposed to be as amended follow.

PART 301—[AMENDED]

Paragraph 1. The authority citation for part 301 continues to read in part:

Authority: 26 U.S.C. 7805 * * * § 301.7432 also issued under 26 U.S.C. 7432(e).

Par. 2. Section 301.7432-1 is added under the heading "Proceedings by Taxpayers and Third Parties" to read as follows:

§ 301.7432-1 Civil cause of action of failure to release a lien.

(a) *In general.* If any officer or employee of the Internal Revenue Service knowingly, or by reason of negligence, fails to release a lien on property of the taxpayer in accordance with section 6325 of the Internal Revenue Code, such taxpayer may bring a civil action for damages against the United States in federal district court. The total amount of damages recoverable is the sum of:

(1) The actual, direct economic damages sustained by the taxpayer which, but for the officer's or the employee's knowing or negligent failure to release the lien under section 6325, would not have been sustained; and

(2) Costs of the action.

The amount of actual, direct economic damages that are recoverable is reduced to the extent such damages reasonably could have been mitigated by the plaintiff. An action for damages filed in federal district court may not be maintained unless the taxpayer has filed an administrative claim pursuant to paragraph (f) of this section and has waited the period required under paragraph (e) of this section.

(b) *Finding of satisfaction or unenforceability.* For purposes of this section, a finding under section 6325(a)(1) that the liability for the amount assessed, together with all interest in respect thereof, has been fully satisfied or has become legally unenforceable is treated as made on the earlier of:

(1) The date on which the district director of the district in which the taxpayer currently resides or the district in which the lien was filed finds full satisfaction or legal unenforceability; or

(2) The date on which such district director receives a request for a certificate of release of lien in accordance with § 401.6325-1(f), together with any information which is reasonably necessary for the district director to conclude that the lien has been fully satisfied or is legally unenforceable.

(c) *Actual, direct economic damages*—(1) *Definition.* Actual, direct economic damages are actual pecuniary damages sustained by the taxpayer that would not have been sustained but for an officer's or an employee's failure to release a lien in accordance with section 6325 of the Internal Revenue Code. Injuries such as inconvenience, emotional distress and loss of reputation are compensable only to the extent that they result in actual pecuniary damages.

(2) *Litigation costs and administrative costs not recoverable.* Litigation costs and administrative costs described in this paragraph are not recoverable as actual, direct economic damages. Litigation costs may be recoverable under section 7430 (see paragraph (j) of this section) or, solely to the extent described in paragraph (d) of this section, as costs of the action.

(i) *Litigation costs.* For purposes of this paragraph, litigation costs are any costs incurred pursuing litigation for relief from the failure to release a lien, including costs incurred pursuing a civil action in federal district court under paragraph (a) of this section. Litigation costs include the following:

(A) Court costs;

(B) Expenses of expert witnesses in connection with a court proceeding;

(C) Cost of any study, analysis, engineering report, test, or project prepared for a court proceeding; and

(D) Fees paid or incurred for the service of attorneys, or other individuals authorized to practice before the court, in connection with a court proceeding.

(ii) *Administrative costs.* For purposes of this section, administrative costs are any costs incurred pursuing administrative relief from the failure to release a lien, including costs incurred pursuing an administrative claim for damages under paragraph (f) of this section. The term administrative costs includes:

(A) Any administrative fees or similar charges imposed by the Internal Revenue Service; and

(B) Expenses, costs, and fees described in paragraph (c)(2)(i) of this section incurred in pursuing administrative relief.

(d) *Costs of the action.* Costs of the action recoverable as damages under this section are limited to the following costs:

(1) Fees of the clerk and marshall;

(2) Fees of the court reporter for all or any part of the stenographic transcript necessarily obtained for use in the case;

(3) Fees and disbursements for printing and witnesses;

(4) Fees for exemplification and copies of paper necessarily obtained for use in the case;

(5) Docket fees; and

(6) Compensation of court appointed experts and interpreters.

(e) *No civil action in federal district court prior to filing an administrative claim*—(1) Except as provided in paragraph (e)(2) of this section, no action under paragraph (a) of this section shall be maintained in any federal district court before the earlier of the following dates:

(i) The date a decision is rendered on a claim filed in accordance with paragraph (f) of this section; or

(ii) The date 30 days after the date an administrative claim is filed in accordance with paragraph (f) of this section.

(2) If an administrative claim is filed in accordance with paragraph (f) of this section during the last 30 days of the period of limitations described in paragraph (i) of this section, the taxpayer may file an action in federal district court any time after the administrative claim is filed and before the expiration of the period of limitations, without waiting for 30 days to expire or for a decision to be rendered on the claim.

(f) *Procedures for an administrative claim*—(1) *Manner.* An administrative claim for actual, direct economic damages as defined in paragraph (c) of this section shall be sent in writing to the district director (marked for the attention of the Chief, Special Procedures Function) in the district in which the taxpayer currently resides or the district in which the notice of federal tax lien was filed.

(2) *Form.* The administrative claim shall include:

(i) The name, current address, current home and work telephone numbers and any convenient times to be contacted, and taxpayer identification number of the taxpayer making the claim;

(ii) A copy of the notice of federal tax lien affecting the taxpayer's property, if available;

(iii) A copy of the request for release of lien made in accordance with § 401.6325–1(f) of the Code of Federal Regulations, if applicable;

(iv) The grounds, in reasonable detail, for the claim (include copies of any available substantiating documentation or correspondence with the Internal Revenue Service);

(v) A description of the injuries incurred by the taxpayer filing the claim (include copies of any available substantiating documentation or evidence);

(vi) The dollar amount of the claim, including any damages that have not yet been incurred but that are reasonably foreseeable (include copies of any available substantiating documentation or evidence); and

(vii) The signature of the taxpayer or duly authorized representative.

For purposes of this paragraph, a duly authorized representative is any attorney, certified public accountant, enrolled actuary, or any other person permitted to represent the taxpayer before the Internal Revenue Service who is not disbarred or suspended from practice before the Internal Revenue Service and who has a written power of attorney executed by the taxpayer.

(g) *Notice of failure to release lien.* An administrative claim under paragraph (f) of this section shall be considered a notice of failure to release a lien.

(h) *No action in federal district court for any sum in excess of the dollar amount sought in the administrative claim.* No action for actual, direct economic damages under paragraph (a) of this section shall be instituted in federal district court for any sum in excess of the amount (already incurred and estimated) of the administrative claim filed under paragraph (f) of this section, except where the increased amount is based upon newly discovered evidence not reasonably discoverable at the time the administrative claim was filed, or upon allegation and proof of intervening facts relating to the amount of the claim.

(i) *Period of limitations*—(1) *Time of filing.* A civil action under paragraph (a) of this section must be brought in federal district court within 2 years after the date the cause of action accrues.

(2) *Cause of action accrues.* A cause of action accrues when the taxpayer has had a reasonable opportunity to discover all essential elements of a possible cause of action.

(j) *Recovery of costs under section 7430.* Reasonable litigation costs, including attorney's fees, not recoverable under this section may be recoverable under section 7430. If following the Internal Revenue Service's denial of an administrative claim on the grounds that the Internal Revenue Service did not violate section 7432(a), a taxpayer brings a civil action for damages in a district court of the United States, and establishes entitlement to damages under this section, substantially prevails with respect to the amount of damages in controversy, and meets the requirements of section 7430(c)(4)(A)(iii) (relating to notice and net worth requirements), the taxpayer will be considered a "prevailing party" for purposes of section 7430. Such taxpayer, therefore, will generally be entitled to attorney's fees and other reasonable litigation costs not recoverable under this section. For purposes of this paragraph, if the Internal Revenue Service does not respond on the merits to an administrative claim for damages within 30 days after the claim is filed, the Internal Revenue Service's failure to respond shall be considered a denial of the administrative claim on the grounds that the Internal Revenue Service did not violate section 7432(a). Administrative costs, including attorney's fees incurred pursuing an administrative claim under paragraph (f) of this section, are not recoverable under section 7430.

(k) *Effective date.* This section applies with respect to civil actions under section 7432 filed in federal district court after June 25, 1991.

RIN 1545–AM75

Civil Cause of Action for Unauthorized Collection Actions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations that provide guidance relating to the civil cause of action under section 7433 of the Internal Revenue Code of 1986 (the "Code") for certain unauthorized collection actions. The cause of action for unauthorized collection actions was created by section 6241 of the Technical and Miscellaneous Revenue Act of 1988. The proposed regulations define certain key terms in the underlying statute and create an administrative remedy that must be exhausted prior to the filing of a cause of action. The proposed regulations are needed to provide taxpayers with guidance and to create an administrative remedy in connection with this cause of action.

DATES: Written comments and requests for a public hearing must be received by August 9, 1991.

ADDRESSES: Send coments and requests for a public hearing to: Internal Revenue Service P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (GL–707–88), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Kevin B. Connelly, 202–535–9682 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations amending the Procedure and Administration Regulations (26 CFR part 301) pursuant to section 7433 of the Internal Revenue Code. The proposed regulations reflect the addition of section 7433 to the Internal Revenue Code by section 6241 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100–647).

Explanation of Provisions

Section 6241 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100–647, 102 Stat. 3342) added section 7433 to the Code. Section 7433 gives taxpayers the right to bring an action for damages in federal district court if, in connection with the collection of a federal tax, any officer or employee of the Internal Revenue Service recklessly or intentionally disregards any provision of the Internal Revenue Code or any regulation promulgated under the Internal Revenue Code. The taxpayer has a duty to mitigate damages, and the total amount of damages recoverable under section 7433 is the lesser of $100,000, or the sum (i) the actual, direct economic damages sustained as a proximate result of the internal revenue officer's or employee's wrongful conduct, and (ii) costs of the action. No action may be filed in federal district court until the taxpayer exhausts administrative remedies available within the Internal Revenue Service.

The proposed regulations define actual, direct economic damages as actual pecuniary damages sustained by a taxpayer as a proximate results of reckless or intentional actions of an internal revenue officer or employee. Injuries such as inconvenience, emotional distress and loss of reputation are compensable only to the extent that they result in actual pecuniary damages. Litigation and administrative costs are not recoverable under this section as actual, direct economic damages.

The proposed regulations define costs of the action recoverable as damages under section 7433(b)(2) as: (1) Fees of the clerk and marshall; (2) fees of the court reporter for all or any part of the stenographic transcript necessarily obtained for use in the case; (3) fees and disbursements for printing and witnesses; (4) fees for exemplification and copies of papers necessarily obtained for use in the case; (5) docket fees; and (6) compensation of court appointed experts and interpreters. Costs of the action do not include any costs other than those costs specifically enumerated in the proposed regulations.

Reasonable litigation costs, including attorney's fees (generally limited to $75 per hour) not recoverable under this section may be recoverable under section 7430. If following the Internal Revenue Service's denial of an administrative claim on the grounds that the Internal Revenue Service did not violate section 7433(a), a taxpayer brings a civil action for damages in a district court of the United States, and establishes entitlement to damages under this section, substantially prevails with respect to the amount of damages in controversy and meets the requirements of section 7430(c)(4)(A)(iii) (relating to notice and net worth requirements), the taxpayer will be considered a "prevailing party" for purposes of section 7430. Such taxpayer, therefore, will generally be entitled to attorney's fees and other reasonable litigation costs not recoverable under section 7433.

Administrative costs, including attorney's fees incurred pursuing an administrative claim for damages under section 7433, are not recoverable under section 7430. Section 7430(c)(2) provides that recoverable administrative costs include only those costs incurred on or after the earlier of (1) the date of the receipt by the taxpayer of the notice of a decision by the Internal Revenue Service Office of Appeals, and (2) the date of the notice of deficiency. The legislative history to the Technical and Miscellaneous Revenue Act of 1988 indicates that this limitation is intended to prevent recovery of administrative costs incurred in a collection action. H.R. Conf. Rep. No. 1104, 100th Cong., 2d Sess. 226 (1988).

The proposed regulations provide that an action may not be maintained in federal district court under this section unless the taxpayer first files an administrative claim for damages with the Internal Revenue Service. The claim must be made in writing to the district director (marked for the attention of Chief, Special Procedures Function) of the district in which the taxpayer currently resides. The claim must include: (1) The name, current address, current home and work telephone numbers and any convenient times to be contacted, and taxpayer identification number of the taxpayer making the claim; (2) the grounds, in detail, for the claim; (3) a description of the damages incurred by the taxpayer; (4) the dollar amount of the claim, including an estimate of damages that have not yet been incurred, but that are reasonably foreseeable; and (5) the signature of the taxpayer or duly authorized representative. A taxpayer is precluded from maintaining a civil action for an amount greater than the amount (already incurred and estimated) specified in the administrative claim, except where the increased amount is based upon newly discovered evidence not reasonably discoverable at the time the administrative claim was filed, or upon allegation and proof of intervening facts relating to the amount of the claim.

The proposed regulations provide that after an administrative claim has been filed, an action may not be filed in federal district court until the earlier of (1) the time a decision is rendered on the claim or (2) six months from the date the administrative claim is filed. A taxpayer, however, must file an action in federal district court within two years after a cause of action accrues. Thus, if an administrative claim is filed in the last six months before the two-year limitation period expires, the taxpayer may file an action in federal district court any time after the administrative claim is filed and before the expiration of the two-year limitation period. A cause of action accrues under this section when the taxpayer has had a reasonable opportunity to discover all essential elements of a possible cause of action.

For purposes of the recovery of litigation costs under section 7430, if the Internal Revenue Service does not respond on the merits to an administrative claim for damages within six months after the claim is filed, the Internal Revenue Service's failure to respond will be considered a denial of the claim on the grounds that Internal Revenue Service did not violate section 7433(a).

Effective Date

These proposed regulations would be effective with respect to actions filed after the date final regulations are published in the **Federal Register.**

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these proposed regulations will be submitted

VOL
56
ISS
122
JE
25
1991
UMI

to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small businesses.

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time, place and date for the hearing will be published in the Federal Register.

Drafting Information

The principal author of these proposed regulations is Kevin B. Connelly, Office of Assistant Chief Counsel (General Litigation), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in their development.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental shelf, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

Adoption of Addition to the Regulations

Accordingly, title 26, part 301 of the Code of Federal Regulations is proposed to be amended as follows:

PART 301—[AMENDED]

Paragraph 1. The authority citation for part 301 continues to read in part:

Authority: 26 U.S.C. 7805.

Par. 2. Section 301.7433–1 is added under the heaing "Proceedings by Taxpayers and Third Parties" to read as follows:

§ 301.7433–1 Civil cause of action for certain unauthorized collection actions.

(a) *In general.* If, in connection with the collection of a federal tax with respect to a taxpayer, an officer or an employee of the Internal Revenue Service recklessly or intentionally disregards any provision of the Internal Revenue Code or any regulation promulgated under the Internal Revenue Code, such taxpayer may bring a civil action for damages against the United States in federal district court. The taxpayer has a duty to mitigate damages. The total amount of damages recoverable is the lesser of $100,000, or the sum of:

(1) The actual, direct economic damages sustained as a proximate result of the reckless or intentional actions of the officer or employee; and

(2) Costs of the action.

An action for damages filed in federal district court may not be maintained unless the taxpayer has filed an administrative claim pursuant to paragraph (e) of this section, and has waited for the period required under paragraph (d) of this section.

(b) *Actual, direct economic damages*—(1) *Definition.* Actual, direct economic damages are actual pecuniary damages sustained by the taxpayer as the proximate result of the reckless or intentional actions of an officer or an employee of the Internal Revenue Service. Injuries such as inconvenience, emotional distress and loss of reputation are compensable only to the extent that they result in actual pecuniary damages.

(2) *Litigation costs and administrative costs not recoverable.* Litigation costs and administrative costs are not recoverable as actual, direct economic damages. Litigation costs may be recoverable under section 7430 (see paragraph (h) of this section) or, solely to the extent described in paragraph (c) of this section, as costs of the action.

(i) *Litigation costs.* For purposes of this paragraph, litigation costs are any costs incurred pursuing litigation for relief from the action taken by the officer or employee of the Internal Revenue Service, including costs incurred pursuing a civil action in federal district court under paragraph (a) of this section. The term litigation costs includes the following:

(A) Court costs;

(B) Expenses of expert witnesses in connection with a court proceeding;

(C) Cost of any study, analysis, engineering report, test, or project prepared for a court proceeding; and

(D) Fees paid or incurred for the services of attorneys, or other individuals authorized to practice before the court, in connection with a court proceeding.

(ii) *Administrative costs.* For purposes of this section, administrative costs are any costs incurred pursuing administrative relief from the action taken by an officer or employee of the Internal Revenue Service, including costs incurred pursuing an administrative claim for damages under paragraph (e) of this section. The term administrative costs includes:

(A) Any administrative fees or similar charges imposed by the Internal Revenue Service; and

(B) Expenses, costs, and fees described in paragraph (b)(2)(i) of this section incurred pursuing administrative relief.

(c) *Costs of the action.* Costs of the action recoverable as damages under this section are limited to the following costs:

(1) Fees of the clerk and marshall;

(2) Fees of the court reporter for all or any part of the stenographic transcript necessarily obtained for use in the case;

(3) Fees and disbursements for printing and witnesses;

(4) Fees for exemplification and copies of paper necessarily obtained for use in the case;

(5) Docket fees; and

(6) Compensation of court appointed experts and interpreters.

(d) *No civil action in federal district court prior to filing an administrative claim*—(1) Except as provided in paragraph (d)(2) of this section, no action under paragraph (a) of this section shall be maintained in any federal district court before the earlier of the following dates:

(i) The date the decision is rendered on a claim filed in accordance with paragraph (e) of this section; or

(ii) The date six months after the date an administrative claim is filed in accordance with paragraph (e) of this section.

(2) If an administrative claim is filed in accordance with paragraph (e) of this section during the last six months of the period of limitations described in paragraph (g) of this section, the taxpayer may file an action in federal district court any time after the administrative claim is filed and before the expiration of the period of limitations.

(e) *Procedures for an administrative claim*—(1) *Manner.* An administrative claim for the lesser of $100,000 or actual, direct economic damages as defined in paragraph (b) of this section shall be sent in writing to the district director (marked for the attention of the Chief, Special Procedures Function) of the district in which the taxpayer currently resides.

(2) *Form.* The administrative claim shall include:

(i) The name, current address, current home and work telephone numbers and any convenient times to be contacted, and taxpayer identification number of the taxpayer making the claim;

(ii) The grounds, in reasonable detail, for the claim (include copies of any available substantiating documentation or correspondence with the Internal Revenue Service);

(iii) A description of the injuries incurred by the taxpayer filing the claim (include copies of any available substantiating documentation or evidence);

(iv) The dollar amount of the claim, including any damages that have not yet been incurred but which are reasonably foreseeable (including copies of any available substantiating documentation or evidence); and

(v) The signature of the taxpayer or duly authorized representative.

For purposes of this paragraph, a duly authorized representative is any attorney, certified public accountant, enrolled actuary, or any other person permitted to represent the taxpayer before the Internal Revenue Service who is not disbarred or suspended from practice before the Internal Revenue Service and who has a written power of attorney executed by the taxpayer.

(f) *No action in federal district court for any sum in excess of the dollar amount sought in the administrative claim.* No action for actual, direct economic damages under paragraph (a) of this section shall be instituted in federal district court for any sum in excess of the amount (already incurred and estimated) of the administrative claim filed under paragraph (e) of this section, except where the increased amount is based upon newly discovered evidence not reasonably discoverable at the time the administrative claim was filed, or upon allegation and proof of intervening facts relating to the amount of the claim.

(g) *Period of limitations*—(1) *Time for filing.* A civil action under paragraph (a) of this section must be brought in federal district court within 2 years after the date the cause of action accrues.

(2) *Right of action accrues.* A cause of action under paragraph (a) of this section accrues when the taxpayer has had a reasonable opportunity to discover all essential elements of a possible cause of action.

(h) *Recovery of costs under section 7430.* Reasonable litigation costs, including attorney's fees, not recoverable under this section may be recoverable under section 7430. If following the Internal Revenue Service's denial of an administrative claim on the ground that the International Revenue Service did not violate section 7433(a), a taxpayer brings a civil action for damages in a district court of the United States, and establishes entitlement to damages under this section, substantially prevails with respect to the amount of damages in controversy and meets the requirements of section 7430(c)(4)(A)(iii) (relating to notice and net worth requirements), the taxpayer will be considered a "prevailing party" for purposes of section 7430. Such taxpayer, therefore, will generally be entitled to attorney's fees and other reasonable litigation costs not recoverable under this section. For purposes of this paragraph, if the Internal Revenue Service does not respond on the merits to an administrative claim for damages within six months after the claim is filed, the Internal Revenue Service's failure to respond shall be considered a denial of the claim on the grounds that the Internal Revenue Service did not violate section 7432(a). Administrative costs, including attorney's fees incurred pursuing an administrative claim under paragraph (f) of this section, are not recoverable under section 7430.

(i) *Effective date.* This section applies with respect to civil action under section 7433 filed after June 25, 1991.

Fred T. Goldberg Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 223

[DoD Directive 5210.bb]

Department of Defense Unclassified Controlled Nuclear Information (DoD UCNI)

AGENCY: Office of the Secretary. DoD.

ACTION: Proposed rule.

SUMMARY: This part implements Public Law 100–180, section 123, pertaining to the protection and prevention of the unauthorized dissemination of Department of Defense Unclassified Controlled Nuclear Information (DoD UCNI) to distinguish it from a similar Department of Energy program. This part prescribes DoD policy for the identification and control of DoD UCNI and outlines procedures for document handling and marking, dissemination and transmission methods, safeguarding requirements, and criteria for withholding DoD UCNI from public release under the provisions of the Freedom of Information Act. This part also contains a topical guide describing types of information to be considered for control as DoD UCNI.

DATES: Written comments must be received by July 25, 1991.

ADDRESSES: Forward comments to the Office of the Deputy Under Secretary of Defense for Security Policy, room 3C285, the Pentagon, Washington, DC 20301.

FOR FURTHER INFORMATION CONTACT: Colonel R.E. Pike, 703–697–5568.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 223

Classified information; Security measures.

Accordingly, title 32, chapter I, subchapter M is proposed to be amended to add part 223 to read as follows:

PART 223—DEPARTMENT OF DEFENSE UNCLASSIFIED CONTROLLED NUCLEAR INFORMATION (DOD UCNI)

Sec.

223.1 Purpose.
223.2 Applicability and scope.
223.3 Definitions.
223.4 Policy.
223.5 Responsibilities.
223.6 Procedures.
223.7 Information requirements.
Appendix A to part 223—Procedures for Identifying and Controlling DoD UCNI
Appendix B to part 223—Guidelines for the Determination of DoD UCNI

Authority: 10 U.S.C. 128 and 5 U.S.C. 552(b)(3).

§ 223.1 Purpose.

This part implements 10 U.S.C. 128 by establishing policy, assigning responsibilities, and prescribing procedures for identifying, controlling, and limiting the dissemination of unclassified information on the physical protection of DoD special nuclear material (SNM), vital equipment, and facilities. That information shall be referred to as "the Department of Defense Unclassified Controlled Nuclear Information (DoD UCNI)," to distinguish it from a similar Department of Energy (DoE) program.

§ 223.2 Applicability and scope.

This part: (a) Applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Unified and Specified Commands, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "the DoD Components").

(b) Implements 10 U.S.C. 128, which is the statutory basis for controlling the DoD UCNI in the Department of Defense. Title 10, United Staets Code, Section 128 also constitutes the

VOL 56 ISS 122 JE 25 1991 UMI

authority for invoking 32 CFR part 286 to prohibit mandatory disclosure to DoD UCNI under the "Freedom of Information Act (FOIA)" in 5 U.S.C. 552.

(c) Supplements the security classification guidance contained in CG-W-5 [1] and CG-SS-1 [2] and DoD Instruction 5210.67 [3] by establishing procedures for identifying, controlling, and limiting the dissemination of unclassified information on the physical protection of DoD SNM.

(d) Applies to all SNM, regardless of form, in reactor cores or to other items under the direct control of the DoD Components.

(e) Applies equally to DoD UCNI under DoD control, except the statute applicable to DoE UCNI (42 U.S.C. 2011 *et seq.*) must be used with the concurrence of the DoE as the basis for invoking the FOIA (section 552 of 10 U.S.C.).

§ 223.3 Definitions.

(a) *Atomic energy defense programs.* Activities, equipment, and facilities of the Department of Defense used or engaged in support of the following:

(1) Development, production, testing, sampling, maintenance, repair, modification, assembly, utilization, transportation, or retirement of nuclear weapons or nuclear weapon components.

(2) Production, utilization, or transportation of DoD SNM for military applications.

(3) Safeguarding of activities, equipment, or facilities that support the functions in definitions (a) (1) and (2) of this section, including the protection of nuclear weapons, nuclear weapon components, or DoD SNM for military applications at a fixed facility or in transit.

(b) *Safeguards.* An integrated system of physical protection, material accounting, and material control measures designed to deter, prevent, detect, and respond to unauthorized possession, use, or sabotage of DoD SNM. Safeguards include the timely indication of possible diversion and credible assurance that no diversion has occurred.

(c) *Sensitive facility.* A DoD SNM facility that performs a sensitive function (see definition (d) of this section).

(d) *Sensitive function.* A function in support of atomic energy defense programs whose disruption could reasonably be expected to have a significant adverse effect on the health and safety of the public or the common defense and security (see definition (a) of this section).

(e) *Special nuclear material (SNM).* Plutonium, uranium enriched in the isotope-233 or in the isotope-235, except source material or any material artificially enriched by any of the foregoing.

(f) *Vital equipment.* Equipment, systems, or components whose failure or destruction would cause an impact on safeguarding DoD SNM resulting in an unacceptable interruption to a national security program or an unacceptable impact on the health and safety of the public.

§ 223.4 Policy.

It is DoD policy:

(a) To prohibit the unauthorized dissemination of unclassified information on security measures for the physical protection of DoD SNM, vital equipment, and facilities.

(b) That the decision to protect unclassified information as DoD UCNI shall be based on a determination that its disclosure or dissemination might reasonably result in compromising security measures for protecting DoD SNM and that such compromise could reasonably be expected to have an adverse effect on, or risk to, the health and safety of the public or the common defense and security by significantly increasing the probability of illegal production of nuclear weapons or the theft, diversion, or sabotage of DoD SNM, vital equipment, and facilities.

(c) That DoD personnel shall not use that authority to withhold information from the appropriate committees of the Congress.

§ 223.5 Responsibilities.

(a) The Under Secretary of Defense for Policy shall:

(1) Administer the DoD program for controlling DoD UCNI.

(2) Coordinate DoD compliance with the DoE program for controlling DoE UCNI.

(3) Prepare and maintain the reports required by 10 U.S.C. 128. Those reports shall have the following information:

(i) Identification of the type of information to be controlled as DoD UCNI. It is not necessary to report each document or numbers of documents.

(ii) Justification for identifying the type of information to be controlled as DoD UCNI.

(iii) Certification that only the minimal information necessary to protect the health and safety of the public or the common defense and security is being controlled as DoD UCNI.

(b) The Assistant Secretary of Defense (Public Affairs) shall provide guidance to the Under Secretary of Defense for Policy (USD(P)), other elements of the OSD, and the Heads of the DoD Components on the FOIA (5 U.S.C. 552), as implemented in 32 CFR part 286, as it applies to the DoD UCNI Program.

(c) The Heads of the DoD Components shall:

(1) Implement this part in their DoD Components.

(2) Advise the USD(P) of the following, when information not in the guidelines in appendix B to this part 223, is determined to be DoD UCNI:

(i) Identification of the type of information to be controlled as DoD UCNI. It is not necessary to report each document or numbers of documents.

(ii) Justification for identifying the type of information as DoD UCNI, based on the guidelines in Appendix B to this part 223 and prudent application of the adverse effects test.

§ 223.6 Procedures.

Appendix A to this part 223 outlines the procedures for controlling DoD UCNI. Appendix B to this part 223 provides general and topical guidelines for identifying information that may qualify for protection as DoD UCNI. The procedures and guidelines in appendices A and B to this part 223 complement the DoD Component programs to protect other DoD-sensitive unclassified information and may be used with them.

§ 223.7 Information requirements.

(a) Section 128 of 10 U.S.C. requires that the Secretary of Defense prepare on a quarterly basis a report to be made available on the request of any interested person. The report does not require the collection and collation of detailed statistical data or identification of specific documents protected under the statute. The intent of the report is to identify types or categories of information being protected under the statute and to provide the justification for protecting the information. Newly identified types of information determined to be DoD UCNI by the Heads of the DoD Components shall be submitted to the USD(P) for review and inclusion in the DoD UCNI guidelines in appendix B to this part 223.

[1] Controlled document. Not releasable to the public.

[2] Requests may be forwarded to U.S. Department of Energy (Forrestal Building), 1000 Independence Avenue SW., Attention: Distribution Office of DOE Publications, Washington, DC 20585.

[3] Copies may be obtained, at cost, from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

(b) The report is exempt from licensing in accordance with DoD 7750.5-M, [4] paragraph E.4.e.

Appendix A to Part 223—Procedures for Identifying and Controlling DoD UCNI

A. General

1. These procedures for identifying and controlling DoD UCNI are provided as guidance for the Heads of the DoD Components to implement the Secretary of Defense's authority for controlling and limiting the disclosure and dissemination of unclassified information about the physical protection of DoD SNM, vital equipment, or facilities.

2. The decision to protect unclassified information as DoD UCNI shall be based on a determination that its disclosure or dissemination could reasonably result in compromising security measures for protecting DoD SNM and that such compromise could reasonably be expected to have an adverse effect on, or risk to, the health and safety of the public or the common defense and security by significantly increasing the probability of illegal production of nuclear weapons or the theft, diversion, or sabotage of DoD SNM, vital equipment, or facilities.

3. DoD UCNI shall be identified, controlled, marked, transmitted, and safeguarded in the DoD Components, the North Atlantic Treaty Organization (NATO), and among DoD contractors, consultants, and grantees authorized to conduct official business for the Department of Defense. Contracts requiring the preparation of unclassified information that could be DoD UCNI shall have the requirements for identifying and controlling the DoD UCNI.

4. DoE G5-2 [1] and DoE Orders 5635.4 [2] and 5635.5 [3] provide background on implementation of the UCNI Program in the DoE. The DoD Components maintaining custody of DoE UCNI should refer to those documents for its identification and control.

B. General Criteria

1. The Secretary of Defense's authority for prohibiting the unauthorized disclosure and dissemination of DoD UCNI may be exercised by the Heads of the DoD Components and by the officials to whom such authority is specifically delegated by the Heads of the DoD Components. The disclosure and dissemination of DoD UCNI may be prohibited, if the disclosure or dissemination could reasonably be expected to have a significant adverse impact on, or risk to, the health and safety of the public or the common defense and security by significantly increasing the probability of illegal production of nuclear weapons or the theft, diversion, or sabotage of DoD SNM, vital equipment, or facilities.

2. DoD personnel, in making a determination to protect unclassified information as DoD UCNI, shall consider the probability of an illegal production, theft, diversion, or sabotage if the information proposed for protection were made available for public disclosure and dissemination. The determination to protect specific documents or information is not related to the ability of DoD UCNI to be obtained by other sources. The degree to which, if any, that information has been publicly disseminated shall not be considered before determining that a document or information is DoD UCNI.

3. For determining the control of DoD UCNI, the cognizant official should consider how the unauthorized disclosure or dissemination of such information could assist a potential adversary in the following:

a. Selecting a target for an act of theft, diversion, or sabotage of DoD SNM, vital equipment, or facilities (e.g., relative importance of a facility or the location, form, and quantity of DoD SNM). Information that can be obtained by observation from public areas outside controlled locations should not be considered as DoD UCNI.

b. Planning or committing an act of theft, diversion, or sabotage of DoD SNM, vital equipment, or facilities (e.g., design of security systems; building plans; methods and procedures for transfer, accountability, and handling of DoD SNM; or security plans, procedures, and capabilities).

c. Measuring the success of an act of theft, diversion, or sabotage of DoD SNM, vital equipment, or facilities (e.g., actual or hypothetical consequences of the sabotage of specific vital equipment or facilities).

d. Illegally producing a nuclear explosive device (e.g., unclassified nuclear weapon design information useful in designing a primitive nuclear device; location of unique DoD SNM needed to fabricate such a device; or location of a nuclear weapon).

e. Dispersing DoD SNM in the environment (e.g., location, form, and quantity of DoD SNM).

C. Identifying DoD UCNI

1. To be considered for protection as DoD UCNI, the information must:

a. Be unclassified.

b. Pertain to security measures, including plans, procedures, and equipment, for the physical protection of DoD SNM, vital equipment, or facilities.

c. Meet the adverse effects test; i.e., that the disclosure or dissemination of the information could result in compromising security measures for protecting DoD SNM and that such compromise could reasonably be expected to have an adverse effect on, or risk to, the health and safety of the public or the common defense and security by significantly increasing the probability of illegal production of nuclear weapons or the theft, diversion, or sabotage of DoD SNM, vital equipment, or facilities.

2. Information, in the categories in section C. of Appendix B to this part 223, about DoD SNM should be considered for protection as DoD UCNI.

3. Material originated before the effective date of these procedures, which is found in the normal course of business to have DoD UCNI, shall be protected as DoD UCNI. There is no requirement to conduct detailed file searches to retroactively identify and control DoD UCNI. As existing documents or materials are withdrawn from file, they should be reviewed to determine if they meet the criteria for protection as DoD UCNI and marked and controlled, accordingly.

D. Markings

1. An unclassified document with DoD UCNI shall be marked "DoD Unclassified Controlled Nuclear Information" at the bottom on the outside of the front cover, if any, and on the outside of the back cover, if any.

2. In an unclassified document, an individual page that has DoD UCNI shall be marked "DoD Unclassified Controlled Information" at the bottom of the page.

3. In a classified document, an individual page that has both DoD UCNI and classified information shall be marked at the top and bottom of the page with the highest security classification of information appearing on that page. In marking sections, parts, paragraphs, or similar portions, the parenthetical term "(DoD UCNI)" shall be used for those portions with DoD UCNI. In a classified document, an individual page that has DoD UCNI, but no classified information, shall be marked "DoD Unclassified Controlled Information" at the bottom of the page. The DoD UCNI marking may be combined with other markings, if all relevant statutory and regulatory citations are included.

4. Other material (e.g., photographs, films, tapes, or slides) shall be marked "DoD Unclassified Controlled Nuclear Information" to ensure that a recipient or viewer is aware of the status of the information.

E. Dissemination and Transmission

1. DoD UCNI may be disseminated in the DoD Components, the NATO, and among the DoD contractors, consultants, and grantees on a need-to-know basis to conduct official business for the Department of Defense. Recipients shall be made aware of the status of such information, and transmission shall be by means to preclude unauthorized disclosure or dissemination. Contracts that shall require access to DoD UCNI shall require compliance with this part and the DoD Component regulations and have the requirements for the marking, handling, and safeguarding of DoD UCNI.

2. DoD holders of DoD UCNI are authorized to convey such information to officials in other Departments or Agencies on a need-to-know basis to fulfill a Government function. Transmittal documents shall call attention to the presence of DoD UCNI attachments using an appropriate statement in the text, or marking at the bottom of the transmittal document, that "The attached document contains DoD Unclassified Controlled Nuclear Information (DoD UCNI)." Similarly, documents transmitted shall be marked, as prescribed in section D of this appendix.

3. DoD UCNI transmitted outside the Department of Defense requires application

[4] See footnote 2 to § 223.1(c).
[1] See footnote 2 to § 223.1(c).
[2] See footnote 2 to § 223.1(c).
[3] See footnote 2 to § 223.1(c).

VOL 56 ISS 122 25 JE 1991 UMI

of an expanded marking to explain the significance of the DoD UCNI marking. That may be accomplished by typing or stamping the following statement on the document before transfer:

DEPARTMENT OF DEFENSE
UNCLASSIFIED CONTROLLED NUCLEAR INFORMATION EXEMPT FROM MANDATORY DISCLOSURE

(5 U.S.C. 552(b)(3), as authorized by 10 U.S.C. 128)

4. Documents with DoD UCNI shall be transported so to preclude unauthorized disclosure. When not commingled with classified information, DoD UCNI may be sent by first-class mail in a single, opaque envelope or wrapping.

5. DoD UCNI may only be discussed or transmitted over an unprotected telephone or telecommunications circuit (to include facsimile transmissions) in an emergency. More secure means of communications shall be used, when practical.

6. Each part of electronically transmitted messages with DoD UCNI shall be marked appropriately. Unclassified messages with DoD UCNI shall have the abbreviation "DoD UCNI" before the beginning of the text.

7. DoD UCNI may be processed, stored, or produced on stand-alone personal computers, or shared-logic word processing systems, if protection from unauthorized disclosure or dissemination, in accordance with the procedures in section F of this Appendix 2 can be ensured.

8. A document marked as having DoD UCNI may be reproduced minimally without permission of the originator and consistent with the need to carry out official business.

F. Safeguarding DoD UCNI

1. During normal working hours, documents determined to have DoD UCNI shall be placed in an out-of-sight location, or otherwise controlled, if the work area is accessible to unescorted personnel.

2. At the close of business, DoD UCNI material shall be stored so to preclude disclosure. Storage of such material with other unclassified documents in unlocked receptacles; i.e., file cabinets, desks, or bookcases, is adequate, when normal Government or Government-contractor internal building security is provided during nonduty hours. When such internal building security is not provided, locked rooms or buildings normally provide adequate after-hours protection. If such protection is not considered adequate, DoD UCNI shall be stored in locked receptacles; i.e., file cabinets, desks, or bookcases.

3. Nonrecord copies of DoD UCNI materials must be destroyed by tearing each copy into pieces to reasonably preclude reconstruction and placing the pieces in regular trash containers. If the sensitivity or volume of the information justifies it, DoD UCNI material may be destroyed in the same manner as classified material rather than by tearing. Record copies of DoD UCNI documents shall be disposed of, in accordance with the DoD Components' record management regulations. DoD UCNI on magnetic storage media shall be disposed of by overwriting to preclude its reconstruction.

4. The unauthorized disclosure of DoD UCNI material does not constitute disclosure of DoD information that is classified for security purposes. Such disclosure justifies investigative and administrative actions to determine cause, assess impact, and fix responsibility. The DoD Component that originated the DoD UCNI information shall be informed of its unauthorized disclosure and the outcome of the investigative and administrative actions.

G. Requests for Public Release of DoD UCNI

Title 32, Code of Federal Regulations, part 286 applies. Information that qualifies as DoD UCNI, under 10 U.S.C. 128, is exempt from mandatory disclosure under 5 U.S.C. 552. Consequently, requests for the public release of DoD UCNI shall be denied under section 552(b)(3), citing 10 U.S.C. 128 as authority.

Appendix B to Part 223—Guidelines for the Determination of DoD UCNI

A. Use Of Determination Of DoD UCNI Guidelines

1. These guidelines for determining DoD UCNI are the bases for determining what unclassified information about the physical protection of DoD SNM, vital equipment, or facilities in a given technical or programmatic subject area is DoD UCNI.

2. The decision to protect unclassified information as DoD UCNI shall be based upon a determination that its disclosure or dissemination might reasonably result in compromising security measure for protecting DoD SNM and that such compromise might reasonably be expected to have an adverse effect on, or risk to, the health and safety of the public or the common defense and security by significantly increasing the probability of illegal production of nuclear weapons or the theft, diversion, or sabotage of DoD SNM, vital equipment, and facilities.

B. General

1. The policy for protecting unclassified information about the physical protection of DoD SNM, vital equipment, or facilities is to protect the public's interest by controlling certain unclassified Government information so to prevent the adverse effects described in §223.4 of this part and in appendix A to this part, without unduly restricting public availability of information that would not result in those adverse effects.

2. In controlling DoD SNM infomation, only the minimum restrictions needed to protect the health and safety of the public or the common defense and security shall be applied to prohibit the disclosure and dissemination of DoD UCNI.

3. Any material that has been, or is, widely and irretrievably disseminated into the public domain and whose dissemination was not, or is not, under Government control is exempt from control under these guidelines. However, the fact that information is in the public domain is not a sufficient basis for determining that similar or updated Government-owned and-controlled information in another document or material is not, or is no longer, DoD UCNI; case-by-case determinations are required.

C. Topical Guidance

The following elements of information shall be considered by the DoD Components during the preparation of unclassified information about the physical protection of DoD SNM to determine if it qualifies for control as DoD UCNI

1. Vulnerability Assessments

a. General vulnerabilities that could be associated with specific DoD SNM, vital equipment, or facility locations.

b. The fact that DoD SNM facility security-related projects or upgrades are planned or in progress.

c. Identification and description of security system components intended to mitigate the consequences of an accident or act of sabotage at a DoD SNM facility.

2. Material Control and Accountability

a. Total quantity or categories of DoD SNM at a facility.

b. Control and accountability plans or procedures.

c. Receipts that, cumulatively, would reval quantities and categories of DoD SNM of potential interest to an adversary.

d. Measured discards, decay losses, or losses due to fission and transmutation for a reporting period.

e. Frequency and schedule of DoD SNM inventories.

3. Facility Description

a. Maps, conceputual design, and construction drawings of a DoD SNM facility showing construction characteristics of building and associated electrical systems, barriers, and back-up power systems not observable from a public area.

b. Maps, plans, photographs, or drawings of man-made or natural features in a DoD SNM facility not observable from a public area; i.e., tunnels, storm or waste sewers, water intake and discharge conduits, or other features having the potential for concealing surreptitious movement.

4. Intrusion Detection and Security Alarm Systems

a. Information on the layout or design of security and alarm systems at a specific DoD SNM facility, if the information is not observable from a public area.

b. The fact that a particular system made or model has been installed at a specific DoD SNM facility, if the information is not observable from a public area.

c. Performance characteristics of installed systems.

5. Keys, Locks Combinations, and Tamper-Indicating Devices

a. Types and models of keys, locks, and combinations of locks used in DoD SNM facilities and during shipment.

b. Method of application of tamper-indicating devices.

c. Vulnerability information available from unclassified vendor specifications.

6. Threat Response Capability and Procedures

a. Information about arrangements with local, State, and Federal law enforcement

Agencies of potential interest to an adversary.

b. Information in "nonhostile" contingency plans of potential value to an adversary to defeat a security measure; i.e. fire, safety, nuclear accident, radiological release, or other administrative plans.

c. Required response time of security forces.

7. Physical Security Evaluations

a. Method of evaluating physical security measures not observable from public areas.

b. Procedures for inspecting and testing communications and security systems.

8. In-Transit Security

a. Fact that a shipment is going to take place.

b. Specific means of protecting shipments.

c. Number and size of packages.

d. Mobile operating and communications procedures that could be exploited by an adversary.

e. Information on mode, routing, protection, communications, and operations that must be shared with law enforcement or other civil agencies, but not visible to the public.

f. Description and specifications of transport vehicle compartments or security systems not visible to the public.

9. Information on Nuclear Weapon Stockpile and Storage Requirements, Nuclear Weapon Destruction and Disablement Systems, and Nuclear Weapon Physical Characteristics.

Refer to CG-W-5 for guidence about the physical protection of information on nuclear weapon stockpile and storage requirments, nuclear weapon destruction and disablement systems, and nuclear weapon physical characteristics that may, under certain circumstances, be unclassified. Such information meeting the adverse effects test shall be protected as DoD UCNI.

Dated: June 19, 1991.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 91-15056 Filed 6-24-91; 8:45 am]

BILLING CODE 3810-01-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900-AF95

Adjudication; Pension, Compensation, and Dependency and Indemnity Compensation Renouncement

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) is proposing to amend its adjudication regulations to establish a specific effective date of discontinuance when compensation, pension, or dependency and indemnity compensation benefits are renounced. This change is necessary because variations in workload between regional offices may cause some claims to be processed less expeditiously than others, resulting, under current rules referring to termination as of date of last payment, in different termination dates. The intended effect of this amendment is to establish a uniform termination date when monetary benefits are renounced.

DATES: Comments must be received on or before July 25, 1991. This change is proposed to be effective thirty days after the date of publication of the final rule. Comments will be available for inspection until August 4, 1991.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding this change to the Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132, at the above address and only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays), until August 4, 1991.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, (202) 233-3005.

SUPPLEMENTARY INFORMATION: Title 38, United States Code, section 3106 requires that, upon the filing of a written renouncement, payment of monetary benefits shall be terminated. Currently, 38 CFR 3.500(q) provides that the effective date of discontinuance when benefits are renounced will be the date of last payment. Because of differences in workload among regional offices, as well as fluctuations within the same office, some renouncements might be processed less expeditiously than others, and claims received by VA on the same date could result in benefits being terminated on different dates. A later effective date might not be advantageous to some beneficiaries who, for whatever reason, wish to terminate VA benefits without delay. We proposed to establish the date for the discontinuance of monetary benefits as the last day of the month in which the renouncement is received by amending 38 CFR 3.500(q).

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612. The reason for this certification is that this amendment would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.104, 64.105, 64.109 and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: April 11, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3, subpart A is proposed to be amended as set forth below.

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A continues to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 210, unless otherwise noted.

§ 3.500 [Amended]

2. In § 3.500(q), remove the words "Date of last payment." and add, in their place, the words "Last day of the month in which the renouncement is received."

POSTAL RATE COMMISSION

39 CFR Part 3001

Rules of Practice and Procedure

[Docket No. RM91-1]

AGENCY: Postal Rate Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice of proposed rulemaking solicits suggestions from interested persons for improvements in the Commission's rules of practice. These suggestions could lead to a further notice containing specific proposed rule changes to increase the fairness, comprehensiveness, and expedition of our proceedings.

DATES: Comments responding to this advance notice must be submitted on or before August 26, 1991.

ADDRESSES: Comments and correspondence should be sent to Charles L. Clapp, Secretary of the Commission, suite 300, 1333 H Street NW., Washington, DC 20268-0001 (telephone: 202/789-6840).

FOR FURTHER INFORMATION CONTACT: David F. Stover, General Counsel, Postal Rate Commission, suite 300, 1333 H Street NW., Washington, DC 20268-0001 (telephone: 202/789-6820).

SUPPLEMENTARY INFORMATION:

Periodically the Commission conducts a general review of its rules of practice to determine whether, where, and how the procedures by which we carry out our statutory responsibilities could be improved. Since this was last undertaken, changes to particular rules have been made as the need became apparent.

We are issuing this advance notice of proposed rulemaking in the hope of ascertaining from all interested persons what areas appear to them to remain in need of attention, after a substantial period of experience with the current configuration of the rules. Our inquiry, as is appropriate in procedural rulemaking, is not to elicit suggestions for possible change in the statutory process provided for by 39 U.S.C. 3624 et seq., but to identify opportunities to improve the way that process is carried out in actual practice.

In preparing this advance notice, however, we have not restricted our view to the phases of the process that take place in the hearing room. Other aspects of the process may offer the chance for improvements contributing, even if less directly, to the fair, economical, and expeditious decision of chapter 36 cases.

Without wishing to limit the scope of contributions, we would find it particularly helpful to have comments focused on these aspects of our process:

1. Information the Postal Service files periodically with the Commission (see 39 CFR part 3001, subpart G).
2. The process of public notice and provision for intervention at the outset of a ch. 36 case (see 39 CFR 3001.17-3001.20b).
3. The forms of public participation (i.e., intervention, limited participation, the "commenter rule"—see 39 CFR 3001.19-3001.20b).
4. Prehearing conferences (see 39 CFR 3001.24).
5. Discovery and incorporation of discovery responses as written cross-examination (see 39 CFR 3001.25-3001.28, 3001.31a, 3001.33).
6. Oral cross examination (see 39 CFR 3001.30).
7. Briefing and oral argument (see 39 CFR 3001.34, 3001.36-3001.37).
8. Motion practice (see 39 CFR 3001.21-3001.22).

We would welcome comments identifying aspects of the process that are particularly valuable to participants; those that are of less value; those that, while valuable, impose particularly substantial time and expense burdens; or those that are neither especially valuable nor free from substantial burdens.

Other areas in which comments would be especially helpful include:

1. Would participants be aided by an arrangement under which the Postal Service provided advance notice and some additional information before it actually made a 39 U.S.C. ch. 36 filing? If so, could the process of familiarization with the issues begin before the statutory time (in a case subject to 39 U.S.C. 3622) began to run—thereby allowing the Commission to begin the actual hearing process earlier? What would be the countervailing costs of such an arrangement? What sorts of additional "pre-filing" information would be useful? readily available? not unduly prejudicial to the Service's ability to litigate its case? [1]

2. Should the Commission use substantive rulemaking to avoid relitigation of technical issues already extensively explored in litigated proceedings? Would such a shift in technique produce net benefits by reducing the time and expense consumed by individual cases? Net detriments by decreasing the flexibility of the parties to suggest and the Commission to adopt novel approaches and techniques?

Following consideration of the comments solicited herein, the Commission will determine what further rulemaking proceedings are warranted and will give notice of its determination in the **Federal Register**.

Issued by the Commission on June 14, 1991.

Charles L. Clapp,

Secretary.

[FR Doc. 91-14686 Filed 6-24-91; 8:45 am]

BILLING CODE 7710-FW-M

[1] This set of questions is cast in terms of Postal Service filings alone because only the Postal Service may initiate a rate case or a classification case that involves changing rates [39 U.S.C. 3622(a)]; and only these cases are subject to a statutory time limit.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 5460 and 5470

[WO-230-02-6310-24 1A]

RIN 1004-AB56

Sales Administration: Contract Modification—Extension—Assignment

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rule.

SUMMARY: This rule would amend provisions of existing regulations in 43 CFR Part 5470—Contract Administration—Modification—Assignment. It is necessary to amend the existing regulations to provide more flexibility in granting timber sale contract extensions when unusual circumstances beyond the control of a purchaser prevent completion of the contract by the expiration date. The proposed rule would provide the contracting officer authority to extend the time for cutting and removal on timber sale contracts without reappraisal in some specific situations.

DATES: Comments must be received on or before July 5, 1991. Comments received or postmarked after the above date may not be considered in the decisionmaking process on the final rule.

ADDRESSES: Comments should be sent to: Director (140), Bureau of Land Management, room 5555, Main Interior Building, 1849 C Street NW., Washington, DC 20240. Comments will be available for public review at the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Richard Bird, (202) 653-6864.

SUPPLEMENTARY INFORMATION: The Department of the Interior has determined that the existing regulations on timber sale contract extensions are not flexible enough to deal with certain situations. The average length of timber sale contracts has decreased and the average size of timber sales has increased. Also, there any many seasonal restrictions put into timber sale contracts that tend to limit the length of operating seasons. These factors have caused some problems with our existing extension policy, and the industry has asked the Bureau of Land Management (BLM) to re-examine the requirement for reappraisal of timber sale contracts before granting an extension.

The BLM published a proposed rule on July 3, 1990 (55 FR 27477). Since the proposed rule was published, the northern spotted owl has been listed under the Endangered Species Act. This listing has made it necessary for the BLM to stop or delay operations on many timber sale contracts that had been executed while conferences on the sales were held with the Fish and Wildlife Service (FWS) to determine the impact these sales might have on the spotted owl. These delays will in some cases make it impossible for the purchaser to complete cutting and removal in the time specified in the timber sale contract. Under the current regulations, the BLM cannot extend the time for cutting and removal of these contracts without reappraisal. There has been a rapidly rising market for stumpage in the last two years. Therefore, reappraisal of these timber sale contracts would cause the price for the timber to increase significantly. In effect, the purchaser would be penalized for not completing the contracts on time when he was prevented from doing so by the Government. This is not a fair way to deal with our timber sale purchasers. To pursue such a course would likely result in much litigation between the BLM and timber sale purchasers.

For the reasons stated above, and because the proposed rule did not contain a redesignation found to be necessary, the BLM is issuing a reproposed rule at this time in order to allow the public to comment on the necessary changes from the original proposed rule. We are limiting the comment period to 10 days because some timber contracts are scheduled to expire in early July, 1991, and performance has been impossible through no fault of these purchasers. Comments are requested on the changes made from the proposed rule to determine whether this proposed rule needs to be amended before final promulgation.

Two letters containing a number of comments were received on the proposed rule, one from an industry association and one from a BLM field office. Both letters supported the proposed rule and favored expanding the scope of the rule to cover some additional situations.

One comment suggested changing the terminology to deal with adjustment of the contract termination date rather than attempting to provide authority to keep a contract in force for up to 30 days beyond the termination date. The BLM timber sale contracts do not have a "termination date." The contract has a date upon which rights to cut and remove timber expire. A contract is not terminated until all the requirements of the contract have been fulfilled, including cutting, removal, and site preparation. This comment is not consistent with BLM procedures and was not adopted for inclusion in the reproposed rule.

One comment suggested that the provision for a 30-day window for adjustment should include some standard for measuring or earning a postponement of the deadline for cutting and removal so that a BLM field representative would not have to "play God" in deciding if the contract holder does or does not qualify for an extension. The contracting officer (this title has been changed from "authorized officer" referred to in the proposed rule in order to conform to the contract form employed by the BLM) will follow a rule of reasonableness and consider the amount of time lost for any valid reason, both in making a decision of whether to grant an extension, and in determining the length of such extension. This is a part of the normal decisionmaking process. It is not necessary to spell out in the regulations each possible factor that might justify an extension or to include that amount of detail in the regulations. The comment was not adopted.

Two comments were received that suggested that the rule be expanded to cover delays in operations of the contract due to such things as: court actions delaying the operations of the sale, unusual natural/catastrophic events either on BLM land or other forest land, the loss of a manufacturing facility due to fire or other unanticipated causes, loss of access to the sale, unanticipated developments involving threatened or endangered species listings, archaeological finds, and so forth. The other comment suggested that the rule be expanded to cover delays in operation under the contract due to consultation with the FWS for timber sale contracts in spotted owl habitat, additional contract requirements incorporated in contract modifications requested by the Government, reviews for cultural resource values, or court injunctions obtained by persons not party to the contract. These comments have merit and have been partially adopted for inclusion in the reproposed rule. Delays caused by government agency intervention, whether State or Federal, and by court injunctions brought by third parties, would justify extension without reappraisal under the new proposed rule, but delays occasioned by causes beyond the purchaser's control, and also beyond the control of the United States, would not. Such causes would be considered risks of doing business.

One comment suggested language to clarify proposed § 5473.1(a) and (b). This comment has merit. However, in considering amendatory language, it was determined that § 5463.2 Extension of time., which is closely related to § 5473.1(b) of the original proposed rule, was improperly located in part 5463 on Expiration of Time for Cutting and Removal. In this proposed rule, therefore, this section has been relocated in part 5470 and adapted to address the concerns expressed in the original proposed rule and in the comment.

The proposed rule published today incorporates the changes suggested in and adopted from the comments received on the original proposed rule, and revisions to make the regulations more clear. It would provide that an extension may be granted for time lost as a result of: (1) Additional requirements incorporated in contract modifications requested by the Government; (2) delays necessitated by the requirements for consultation with the FWS under the Endangered Species Act; (3) reviews for cultural resource values; (4) court injunctions obtained by parties outside the contract; or (5) fire closures imposed by State agencies. The extensions would provide additional time, during the operating season, equal to time lost as a result of these reasons. The extensions referred to above would be granted without reappraisal.

The rule also would provide that short extensions of up to 30 days of operating time may be granted without reappraisal, if the reason for delay in cutting or removal was a cause beyond the control of the purchaser and was without his fault or negligence. The rationale for this provision is that if the contract can be finished in this short

period of time the purchaser has shown substantial compliance and will be allowed the short extension to complete the contract without penalty.

The principal author of this proposed rule is Richard Bird of the Division of Forestry, assisted by the staff of the Division of Legislation and Regulatory Management, BLM.

It is hereby determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined under Executive Order 12291 that this document is not a major rule, and under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) that it will not have a significant economic impact on a substantial number of small entities. Additionally, as required by Executive Order 12630, the Department has determined that the rule will not cause a taking of private property.

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subjects in 43 CFR

Part 5460

Forests and forest products, Government contracts, Public lands.

Part 5470

Forests and forest products, Government contracts, Public lands.

Under the authorities cited below, parts 5460 and 5470 of group 5000, subchapter E, chapter II of title 43 of the Code of Federal Regulations are proposed to be amended as set forth below:

PART 5460—SALES ADMINISTRATION—[AMENDED]

1. The authority citation for part 5460 is revised to read:

Authority: Sec. 5, 50 Stat. 875; 61 Stat. 681, as amended; 69 Stat. 367; 43 U.S.C. 1181e, 50 U.S.C. 601 *et seq.*

§ 5463.1 [Removed]

2. Section 5463.1 is amended by removing the phrase "§§ 5463.2 and 5473.1" at the end of the section and replacing it with the term "Subpart 5478".

§ 5463.2 [Removed]

3. Section 5463.2 is removed.

PART 5470—CONTRACT MODIFICATION—EXTENSION ASSIGNMENT

4. The authority citation for part 5470 continues to read:

Authority: Sec. 5, Stat. 875; 61 Stat. 681, as amended; 69 Stat. 367; 30 U.S.C. 601 et seq.; 43 U.S.C. 1181e, unless otherwise noted.

5. Section 5473.1 is revised to read as follows:

§ 5473.1 Application.

In order to be considered, written requests for extension shall be delivered to the appropriate BLM office prior to the expiration of the time for cutting and removal.

6. Section 5473.4 is revised to read as follows:

§ 5473.4 Approval of request.

(a) If the purchaser shows that his delay in cutting or removal was due to causes beyond his control and without his fault or negligence, the contracting officer may grant an extension of time, upon written request of the purchaser. Such extension will not to exceed one year, and will require an appraisal, if the delay was not imposed by the United States or any State government agency under paragraph (c) of this section. Market fluctuations are not cause for consideration of contract extensions. Additional extensions may be granted upon written request of the purchaser.

(b) The contracting officer may grant an extension of time without reappraisal, not to exceed 30 days of operating time, if the conditions of paragraph (a) of this section are met. No additional extensions may be granted without reappraisal.

(d) On a showing satisfactory to the contracting officer that a good faith effort was made to fulfill the contract prior to any delaying event listed in this paragraph, the contracting officer may grant, without reappraisal, an extension of time not to exceed that necessary to provide an additional amount of operating time equal to operating time lost as a result of:

(1) Additional contract requirements incorporated in contract modifications requested by the Government;

(2) Delays necessitated by the requirements for consultation with the U.S. Fish and Wildlife Service under the Endangered Species Act;

(3) Reviews for cultural resources values;

(4) Court injunctions obtained by parties outside the contract; or

(5) Closure of operations by State fire protection agencies due to fire danger.

(d) For purposes of this provision, "operating time" means a period of time during the operating season, and "operating season" means the time of the year in which operations of the type required to complete the contract are normally conducted in the location encompassing the subject timber sale, or the time of the year specified in the timber sale contract when such operations are permitted.

(e) Upon written request of the purchaser, the State Director may extend a contract to harvest green timber to allow that purchaser to harvest as salvage from Federal lands timber that has been damaged by fire or other natural or man-made disaster. The duration of the extension shall not exceed the time necessary to meet the salvage objectives. The State Director may also waive reappraisal for such extension.

8. Section 5473.4-1 is amended by revising paragraph (a) to read as follows:

§ 5473.4-1 Reappraisal.

(a) If an extension is granted under § 5473.4(a), reappraisal by the contracting officer of the material sold will be in accordance with this section.

* * * * *

Dated: February 5, 1991.

James M. Hughes,

Deputy Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

Notices

Federal Register
Vol. 56, No. 122
Tuesday, June 25, 1991

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Nutrition Guidance for Child Nutrition Programs

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of public comment.

SUMMARY: The U.S. Department of Agriculture announces the request for public comment on the publication, Nutrition Guidance for Child Nutrition Programs.

DATES: Written comments on the Draft Guidance must be postmarked no later than August 9, 1991.

ADDRESSES: Written comments on the Draft Guidance should be sent to: Cynthia Ford, Nutrition and Technical Services Division USDA, FNS, 3101 Park Center Drive, room 608, Alexandria, Virginia 22302, (703) 756–3556.

FOR FURTHER INFORMATION CONTACT: (1) For a copy of the Draft Guidance: Write to Lorie Conneen (USDA) at 3101 Park Center Drive, room 608, Alexandria, Va. 22302 or phone (703) 756–3556. (2) For other information: Cynthia Ford (USDA) at (703) 756–3556 or Rachel Ballard-Barbash (DHHS) at (202) 472–5370.

SUPPLEMENTARY INFORMATION: The Child Nutrition and WIC Reauthorization Act of 1989 requires the Secretary of Agriculture and the Secretary of Health and Human Services to jointly develop a publication to be entitled, Nutrition Guidance for Child Nutrition Programs. This publication is to be developed by November 1991 and disseminated within 6 months of that date to all school food service authorities, institutions, and organizations participating in the Child Nutrition Programs.

The target audience, approximately 275,000 program cooperators, varies from food service directors of large multi-unit school systems to family day care providers in a home setting.

This nutrition guidance, developed jointly by the U.S. Departments of Agriculture and Health and Human Services, gives nutrition advice to those responsible for preparing meals for children under the Child Nutrition Programs. This guidance is based on Nutrition and Your Health: Dietary Guidelines for Americans, the third edition, 1990, which provides advice for healthy Americans ages 2 and over—not for younger children and infants, whose dietary needs differ. Congressional report language states that the guidance is not to be quantitative in nature and that specific standards are not to be set.

The Nutrition Guidance for Child Nutrition Programs is the first step in a series of revised technical assistance efforts to help food service personnel and other persons responsible for feeding children improve children's health by offering meals that reflect current dietary guidelines. Future USDA plans are to review the meal patterns for all the Child Nutrition Programs, revise the menu planning guides, update publications describing the nutrient value and usage of USDA commodities and provide a wall chart which displays the information in an easy-to-use manner. Additional long range efforts are under consideration.

For those persons interested in commenting on the draft publication, written comments may be submitted to the above address. To be assured of consideration, comments must be postmarked no later than August 9, 1991.

Dated: June 13, 1991.

Betty Jo Nelsen,

Administrator, Food and Nutrition Service, U.S. Department of Agriculture.

BILLING CODE 3410-30-M

Forest Service

Management Guidelines for the Northern Goshawk in the Southwestern Region

AGENCY: Forest Service, USDA.

ACTION: Adoption of interim policy.

SUMMARY: Because of concern for the habitat needs of the northern goshawk (*Accipiter gentilis*) the Regional Forester, Southwestern Region of the U.S. Forest Service, is issuing interim management guidelines to provide protection for the northern goshawk, while allowing for continued, but modified, multiple-use activities within suitable northern goshawk habitat, including limited timber harvest. These guidelines are being issued as interim policy in the Forest Service Manual while the Southwestern Region collects more information on this sensitive species to provide a better understanding of their habitat preferences and other characteristics of the population.

Concern about the habitat needs and population viability of the northern goshawk led the Regional Forester, Southwestern Region, to classify it as a sensitive species on all National Forest System lands in Arizona and New Mexico in 1982. The northern goshawk is not being considered for listing under the Endangered Species Act by the U.S. Fish and Wildlife Service at this time.

These interim management guidelines provide direction for Southwestern Region forests to use when northern goshawk nest sites or other evidence of reproductive activities are found on National Forest System lands. The guidelines call for a northern goshawk post-fledging family area (PFA) to be established whenever and wherever a northern goshawk nest site is located or evidence of reproductive activity (such as the presence of courtship behavior or young birds) is discovered. The guidelines also provide standard definitions and methodology to use when establishing and managing northern goshawk nest sites, replacement nest sites and PFAs.

The guidelines were developed based on information assembled and recommended by the Goshawk Scientific Committee. The scientific committee was composed of Forest Service management and research biologists and silviculturists. The scientific committee worked with the Goshawk Task Force Group, an informal group with representatives from Federal and State agencies, environmental groups, concerned citizens, and the timber industry. The task force provided recommendations to the Regional Forester, Southwestern Region on northern goshawk management.

This interim policy is being published under Forest Service regulations at 36 CFR 216, Involving the Public in the Formulation of Forest Service

VOL
56
ISS

2
2
JE
2 5
1991
UMI

Directives. It is being published in advance of giving the public an opportunity to comment because of the immediate need to protect occupied northern goshawk habitat while gathering additional data about the northern goshawk during this field season. However, the Forest Service encourages and welcomes comments on this interim policy. Comments received on this interim policy will be used by the Forest Service when making future revisions to the management guidelines.

EFFECTIVE DATE: June 6, 1991. Comments on the guidelines should be received on or before September 6, 1991 to ensure use in the next policy revision.

ADDRESSES: Direct comments to: David F. Jolly, Regional Forester, 2670, Southwestern Region, USDA Forest Service, 517 Gold Avenue SW., Albuquerque, New Mexico 87102.

FOR FURTHER INFORMATION CONTACT: Director, Wildlife and Fisheries or Sandra Knight Assistant Threatened, Endangered and Sensitive Species Program Manager, (505) 842-3280 or 842-3288.

SUPPLEMENTARY INFORMATION:

Background and Need for Guidelines

The Southern Region has been concerned with the viability of the northern goshawk for the last decade. In 1982 the goshawk was placed on the Regional Forester's sensitive species list. Goshawk inventories and monitoring began in the early 1970's on the Kaibab National Forest, which had the Region's highest known density of goshawk nests. This work started because of concern over possible population declines. The monitoring effort was intensified in 1986 in cooperation with the Arizona Game and Fish Department to provide information for an extensive data base on goshawk nesting activity and reproductive success on the Kaibab Plateau.

In 1984, a joint Forest Service-New Mexico Game and Fish study was initiated which included the first telemetry (radio tracking) data collected on the goshawk in North America. In 1990 the Southwest Region of the Forest Service awarded a contract to develop a standard scientific protocol for surveying and monitoring northern goshawks. This protocol is now in draft form, undergoing continued scientific review, and has been provided to Region's forests for optional use this field season.

The goshawk is on the Forest Service sensitive species list. It is not on the Federal threatened and endangered species list nor is it presently under consideration for listing. It is a candidate for the State of Arizona's list of threatened native wildlife species. It is not on the State of New Mexico's list, which was recently revised and expanded.

In February, 1990 Regional Forester David F. Jolly received a letter signed by a number of Arizona and New Mexico environmental groups. The letter expressed concern over goshawk population viability based partially on the requirements of the implenting regulations for the National Forest Management Act.

In March of 1990, the Regional Forester decided to review the status of the goshawk. This internal review of goshawk data for Arizona and New Mexico, conducted from March to August, resulted in the decision in August, 1990, to establish a Goshawk Scientific Committee and a Goshawk Task Force Group to review goshawk management needs for the Southwest Region.

The Scientific Committee, composed of Forest Service management and research biologists and silviculturists, began meeting in October, 1990. They consulted with other top experts on goshawk biology and reviewed all available information on goshawk populations in the Southwest and northern goshawk habitat requirements and biology in general. They provided, and will continue to provide, scientific information on goshawk requirements to the Regional Forester and the Goshawk Task Force Group.

The Goshawk Task Force Group was made up of environmental groups, concerned citizens, and timber industry representation, as well as members from the U.S. Fish and Wildlife Service, the Arizona Game and Fish Department, the New Mexico Game and Fish Department and the Forest Service. Task Force Group meetings began early in January, 1990. The Goshawk Task Force Group will continue to review the findings of current studies being conducted by the Southwestern Region and the comments received by the Region concerning these guidelines when providing recommendations to the Regional Forester during future revisions of these guidelines. The Scientific Committee and the Goshawk Task Force Group continued to meet periodically since their inception.

The scientific committee approached goshawk management needs by describing desired conditions for nest sites, replacement nest sites, post-family fledging areas (PFAs) and foraging areas from published and unpublished research information. Nest sites are small areas (30 acres average) and include the nest tree and the area surrounding the nest tree that contain perches and roosts. They may contain one or more alternate nests. Replacement nest sites are areas with similar characteristics to the nest site that can be used sometime in the future.

PFAs represent an area of concentrated use by the goshawk family after the young leave the nest and until they are no longer dependent on the adults for food. The PFA provides the young hawks with the necessary hiding cover and prey and include the nest sites and replacement nest sites. A PFA is 600 acres in size.

Foraging areas (averaging about 6,000 acres in size) are more difficult to describe because of the larger size of the area and the variety of habitat requirements of goshawk prey species. The Scientific Committee is presently reviewing all available information on northern goshawk prey species. The habitat needs of the goshawk's principal prey species in the Southwest will be used to identify the necessary conditions for the foraging area. The final recommendations of the Scientific Committee are expected later this year.

The Scientific Committee's current recommendations for nest sites, replacement nest sites and PFAs serve as the basis for this interim management direction.

To improve our information base about this species, the Southwestern Region is increasing the survey effort to inventory suitable habitat and conduct studies on the northern goshawk. In 1991, the Region will spend over $600,000 in work related to the goshawk.

National Environmental Policy Act Compliance

Preliminary analysis by the Forest Service indicates a likely reduction in the amount of timber offered for harvest or under contract dung the 1 year life of this interim directive in the Region. The effects of these guidelines will be documented and disclosed to the public in compliance with the requirements of the National Environmental Policy Act (NEPA) on a case-by-case basis. Use of these guidelines, along with deviations from them, will be considered during the NEPA analyses done to implement specific projects called for in Forest Plans. These guidelines will not preclude other activities described in Forest Plans.

Northern Goshawk Interim Directive

These management guidelines issued through an interim directive in Forest Service Manual 2676.3, are in keeping with the provisions of the Forest Service Sensitive Species policy and the viable

population requirement of the National Forest Management Act implementing regulations.

Forest Service Manual

Albuquerque, New Mexico

Interim Directive No. 2670-91-1.
Effective Date: June 6, 1991.
Expiration Date: June 6, 1992.
Chapter: 2670—Threatened, Endangered, and Sensitive Plants and Animals.
Posting Notice: Last ID was No. 2, dated 6/28/90 to chapter 70.

This interim directive requires northern goshawk nest sites and post-fledging family areas be established and managed whenever a nest site is located.

David F. Jolly,
Regional Forester.

2670—Specific Direction on Individual Species

2670.3—Northern Goshawk

Concern about the habitat needs and population viability of the northern goshawk (*Accipiter gentilis*) resulted in the species being identified as "sensitive" by the Regional Forester in 1982.

1. Authority

This interim policy provides guidelines for carrying out active conservation programs to maintain viability of the northern goshawk, as directed in the implementing regulations for the National Forest Management Act, and FSM 2670.1.

2. Objectives

a. Search for goshawk nest sites in suitable northern goshawk habitat prior to management activities.

b. Identify general areas where replacement nest sites and post-fledging family areas (PFA) will be placed.

c. Provide for multiple use consistent with maintaining northern goshawk population viability.

d. Manage habitats to ensure continued existence of a well distributed northern goshawk population.

e. Specify guidelines for the management of desired habitat conditions to maintain reproductive pairs.

3. Policy

a. Conduct surveys of suitable habitat to locate northern goshawk nest sites. The location of the nest site(s) is the means of consistently identifying northern goshawk habitat.

b. Implement the Management Direction section of this interim policy whenever northern goshawk habitat has been identified by the location of known goshawk nest sites or other evidence of reproduction.

4. Responsibility

a. Regional Northern Goshawk Program Coordinator

The Regional Forester shall appoint a Regional Northern Goshawk Program Coordinator who shall:

(1) Assist Forest, District and Zone Wildlife Biologists in locating nest sites and PFA boundaries.

(2) Provide assistance to Forest and District personnel on implementation of northern goshawk management guidelines.

(3) Coordinate northern goshawk studies within the Region.

(4) Serve as chairperson on the Northern Goshawk Scientific committee and Northern Goshawk Task Force.

(5) Coordinate northern goshawk management and research with appropriate State and Federal agencies.

(6) Manage the Regional Northern Goshawk Program, providing budget and staffing advice along with data management.

(7) Provide guidance and assistance to Forests to evaluate effects of activities on the northern goshawk in biological evaluations.

b. Forest Supervisor

In addition to responsibilities listed at FSM 2670.45, Forest Supervisors shall ensure timely implementation of Regional direction concerning northern goshawk through specific procedures and actions including northern goshawk survey, monitoring, nest site and post-fledging family area selection, and identification.

(1) Review PFA and nest site boundaries submitted by the District Ranger where appropriate.

(2) Consult with Regional Northern Goshawk Program Manager on the locations of any northern goshawk PFA or nest site boundaries where there is uncertainty about where the boundary should be located.

(3) Coordinate the northern goshawk program at the Forest level with appropriate State and Federal agencies and research.

(4) Coordinate northern goshawk sites available for show-me trips with Districts.

(5) Ensure that release of information conforms with Forest Service policy identified in FSM 2671.2.

(6) Coordinate the selection of sites for monitoring with District Rangers.

(7) Review written documentation for road and trail location exemptions as appropriate.

(8) Provide guidance, assistance and quality control to ensure the biological evaluations adequately address potential adverse effects from management activities on goshawks.

(9) Review inventory and monitoring procedures used by Districts to ensure quality control and appropriateness.

c. District Ranger

In addition to responsibilities listed in FSM 2670.46, District Rangers shall:

(1) Ensure implementation of Forest Supervisor's direction, including necessary survey and monitoring, concerning northern goshawk through specific actions and procedures.

(2) Ensure all multiple-use objectives proposed within a northern goshawk PFA are consistent with northern goshawk habitat management through the Integrated Resource Management (IRM) process.

(3) Ensure that northern goshawk surveys and monitoring are conducted on their District using appropriate methodology.

(4) Locate nest sites, replacement nest sites and PFA area boundaries best meeting Regional requirements. Submit for review by the Forest Supervisor as appropriate.

(5) Locate, approve and document calling routes used during northern goshawk surveys.

(6) Identify District survey needs and assist Forest Supervisor in determining Forest priorities.

(7) Manage and conduct show-me trips as appropriate in coordination with the Forest Supervisor.

5. Definitions

Use this list of standard terms and definitions when referring to northern goshawk habitat management to reduce potential misunderstandings and provide greater consistency in the language used throughout the Region. Definitions are taken from several sources.

a. Active Nest. A nest known to have contained incubated eggs. A nest need not be successful to be considered active.

b. Adverse Management Activity. Any activity that could adversely modify goshawk habitat characteristics or adversely affect goshawk reproductive efforts.

c. Alternate Nest. Goshawk territories may contain three or more nests, only one of which will be active in a given year. Alternate nests can be in adjacent trees or as far away as 1 mile.

d. Breeding Season. That time period from March 1 through September 30

VOL 56 ISS 122 JE 25 1991 UMI

which includes courtship, nestling, and fledgling-dependency periods.

e. Clumpiness. The occurrence of trees in patches or groups generally with interlocking crowns.

f. Deferred Habitat. That portion of the PFA where management activities will not occur for some designated period of time.

g. Dominant Trees. Trees that by means of their numbers, coverage, or size, exert the greatest influence on the stand.

h. Down Logs. Fallen trees or portions of fallen trees that are at least 12" in diameter and 8 feet long.

i. Fledgling. A young hawk that has left the nest but is unable to completely care for itself. Usually identifiable by the presence of down.

j. Foraging Area. A large area used by the goshawk for hunting in order to meet their food and energy requirements.

k. Group Selection. A modification of the selection system in which trees are removed in small groups at a time.

l. Historic Site. Any reproductive site where northern goshawk were identified or observed prior to development of this directive.

m. Home Range. The entire area that an animal habitually uses for foraging, resting, watering, and so forth. Nesting home range size for goshawk pairs average about 6,000 acres. Adjacent pairs of goshawks have overlapping home ranges, they are not exclusive areas. A home range may contain one to several nest sites or alternate nests and the post-fledging family area.

n. Intermediate Treatment. The treatment (removal) of trees from a stand between the time of its formation and the regeneration cut. Removal is generally taken to include cleaning, thinning, liberation, improvement, salvage, and sanitation cuttings. Treatments other than removal are pruning, fertilization, and prescribed burning.

o. Lop and Scatter. A method to disperse logging debris by reducing limbs and tops from logging activities to a specific height (usually 2 to 3 feet) above the ground and scattered across an area.

p. Mesic. Habitats that are more moist and cooler than surrounding areas such as along drainages, base of slopes, and/or on north exposures.

q. Multi-storied Stands. Horizontal stratum (such as layers) of vegetation formed by a plant community, in forests essentially their canopy layers. The forest may have one or more such strata and hence be single-storied, two-storied, or multi-storied.

r. Nest. The slightly cupped platform of sticks in which the eggs are laid. Most nests of goshawks are placed within the lower two-thirds of tree crowns, often against the trunk but occasionally on a limb up to 10 feet from the trunk.

s. Nest Attempt. An attempt to nest as evidenced by observed courtship behavior within a nest site or new nest construction or reconstruction of an old nest (addition of new sticks or greenery).

t. Nest Site. The nest, nest tree, and area surrounding the nest that includes the stand of trees containing prey handling areas, perches, and roosts and may contain one or more alternate nests.

u. Nest Tree. The tree containing the nest.

v. Opening. In forest cover types, an area with less than 10 percent canopy coverage.

w. Plucking Post. A perch used by a goshawk to tear apart and feed on prey species. The remains of mammalian and avian prey can be located on the ground under the perch which can be a standing live tree, a snag or a fallen tree.

x. Post-fledging Family Area. An area within the goshawk home range, including nest sites, of concentrated use by the goshawk family after the young leave the nest.

y. Predator. A raptor that preys on northern goshawk or their young.

z. Protocol. Refers to a formalized methodology for monitoring and inventory.

aa. Replacement Nest Site. Sites with similar characteristics to the nest site that are potentially occupiable either now or sometime in the future and are approximately 30 acres in size.

bb. Reserve Trees. Dominant or codominant trees retained in the area in perpetuity within a goshawk foraging area. The trees are well distributed and occur in clumps of at least five trees with interlocking crowns.

cc. Seral Species. Plant species that will be replaced over time until a relatively stable forest community becomes established.

dd. Silvicultural System. A process which follows accepted silvicultural principles, whereby the tree crops are tended to produce crops of a desired form, harvested, and replaced.

ee. Single Storied Stands. Stands of trees having a single canopy layer, see multi-storied stands.

ff. Snag. A standing dead tree. Ponderosa pine and fir are at least 20" dbh and aspen at least 10" dbh.

gg. Stand. A community of trees possessing sufficient uniformity as regards composition, age, spatial arrangement, or condition to be distinguishable from adjacent communities.

hh. Successful Nest. A nest from which at least one young is fledged.

ii. Successional Stage. A stage or recognizable condition of a plant community which occurs during its development from bare ground to climax.

jj. Suitable Habitat. Habitat that is currently usable for nesting, roosting, and feeding by northern goshawk. It includes the nest sites, post-fledgling family area, and foraging area. Habitat need not be occupied to be considered suitable.

kk. Survey Area. Area around the proposed management activity in which a northern goshawk survey or inventory will be conducted.

ll. Territory. Any defended area (such as an exclusive area). An active nest is not an essential element of a territory, pairs defend nest sites before and during nest construction and sometimes will continue to defend after failure.

mm. Unsuitable Habitat. Habitat that is not occupied by northern goshawk, and does not have the capability of attaining the characteristics of suitable habitat at any time in the future through standard, prescribed management treatments or natural processes.

nn. Vegetation Structural Stage. Describes the forest successional stage, canopy coverage, and stories.

6. Survey and Inventory

a. Each Forest modify, develop and/or identify the protocol used this field season.

b. Inventory suitable habitat for projects meeting the adverse management activity definition. Use the following approach:

(1) Use existing survey data for all sales already under contract and sales with signed decision notices.

(2) Determine the level of survey needed to prepare a biological evaluation for FY 1991 sales in IRM phases 1 through 9 and accomplish this level.

(3) Complete at least 1 year of survey for sales to be sold in FY 1992.

7. Establishing Goshawk Management Areas

The District, Zone, or Forest Biologist/Wildlife Staff establish nest site and PFA boundaries. Use the following information to establish nest sites and PFA's. Refer to the definitions where appropriate.

a. Nest Sites. Suitable nest sites are critical in the reproductive biology of goshawks. They contain the nest tree and may contain alternate nest trees. Nest sites are occupied during the breeding season which generally begins in early March and ends by late September. Nest sites are frequently used more than 1 year. Alternate nest sites are often used intermittently for decades.

Nest sites are a forest stand (average of 30 acres) that contains the nest(s), the structural features of the vegetation (for example tree density, canopy closure) and landform (for example slope, aspect) within the area used by a pair of goshawks during the nesting season until the young fledge. Goshawk nest sites have a relatively high canopy closure and high density of large trees (see exhibit 1).

Establish a nest site, using best professional judgment, within the identified suitable habitat which incorporates the known nest tree. Plot the location of all nest site(s) and alternate nest sites identified on U.S.G.S. 2.5" Quad Maps.

Identify replacement nest sites based on professional judgment. Design and locate to ensure future nest site needs in the home range. Located in mesic areas or other area that reflect the landform attributes of existing nest sites.

b. Post-fledging Family Area (PFA). The PFA corresponds to a defended territory based on radio telemetry studies. Designation of the PFA is a management attempt to approximate the biological territory. It represents an area of concentrated use by the goshawk family after the young leave the nest and until they are no longer dependent on the adults for food. The PFA provides the young hawks with the necessary hiding cover from both nocturnal and diurnal predators and sufficient prey populations to develop hunting skills.

The desired stand conditions for PFA's include moderately closed overstory and understory canopies for hiding cover and habitat elements critical in the life-histories of the prey species such as large snags, nest-trees, large down logs, and food resources. The intent is to develop a management prescription for each PFA so that over time about 50 percent of the PFA is maintained in mature forest (15" dbh +) with scattered small openings.

Because the PFA is considerably larger (up to 600 acres in size) than nest sites, PFA's may include a mosaic of forest conditions. The PFA surrounds the nest tree(s), nest site(s), alternate and replacement nest sites.

Establish a PFA whenever a nest site is located. Location and shape of the PFA are at the discretion of the District, Zone, or Forest Biologist but must be based on habitat conditions and professional judgment. Where possible make PFA boundaries consistent with stand boundaries. Prior to establishing a PFA around a historical site, conduct surveys and inventories necessary to determine occupancy and habitat condition in the vicinity of historical nests. If a historical site is unoccupied but suitable habitat remains, a PFA may be established if there is evidence of recent (about the last 10 to 15 years) reproductive activity. If the site is unoccupied and little or no suitable habitat remains, establishment of a PFA is not required at this time.

The nest sites may take on several spatial distributions based on the current location of nests and topography with regards to suitable goshawk nesting habitat. The distribution of nest sites and replacement nest sites may all be centrally located within the PFA or take on a more linear distribution if sites are located within pine stringers or drainage/canyon situations. Once the nest sites and replacement nest sites (totaling 180 acres) have been established, the configuration of the 420 acres in the PFA should be considered. Though the PFA need not necessarily be circular in its delineation, an adequate buffer for all of the nest sites and replacement nest sites must be provided. The PFA provides particular or specialized needs to the goshawk family, as well as, buffering nesting activities from project disturbances occurring within the foraging areas.

Exclude areas to be managed as permanent openings within the PFA where possible and appropriate. Permanent openings (for example meadows, rocky outcrops, roads) should not be included in the PFA acreage. Increase the 600 acres needed in the PFA by the amount of acres in permanent openings.

c. Foraging Areas. The northern goshawk is a predator of larger birds and mammals. Goshawks must hunt for their prey over large areas in order to meet their food and energy requirements. These hunting or foraging areas average about 6,000 acres in size, including the PFA. The intent is to manage these areas to provide quality habitat for goshawk prey species.

8. Monitoring

Use systematic protocol to monitor goshawk activities.

9. Management Direction

Apply this management direction to all management activities proposed in suitable habitat. Include all activities that meet the adverse management activities definition in item 5.b.

a. Nest sites and replacement nest sites.

(1) Manage a total of six nest sites (3 suitable and 3 replacement) within a PFA. If no activities are scheduled to occur in the PFA this year, then it may not be necessary to delineate replacement nest sites.

(2) Maintain all known nest sites within the PFA. If fewer than three are known, designate potentially acceptable nest sites based on suitable habitat, stand structure, and topography.

(3) Manage for future development of up to three replacement nest sites.

(4) Designate approximately 30 acres for each nest site and replacement nest site. Nest sites are to be in a mature forest condition (see exhibit 1 for suggested guidelines).

(5) Cluster replacement nest sites in the center of the PFA. Locate within an approximate 0.5 mile radius.

(6) Allow no adverse management activities (see 5.b.) in active nest sites during the breeding season. Use an appropriate survey or monitoring method to determine goshawk activity.

(7) Allow approved activities in inactive nest sites after June 30. Use an appropriate monitoring method to determine goshawk inactivity.

b. Post-fledging family area.

(1) Establish a minimum of a 600-acre PFA around all known goshawk nest sites in the Region including ones located in planned and sold sales. Include alternate nest sites and replacement nest sites for a pair within the PFA.

(2) Establish a PFA for all nests located during sale administration or other activities in sold or planned sales.

(3) A PFA may be established when there is strong evidence that reproductive activity is occurring but no nest has been located. Consider a combination of factors such as the number of sightings, time of year of the sightings, courtship behavior, presence of juvenile birds, presence of plucking posts, and territorial behavior when evaluating the need to establish a PFA where no nest is known. Provide written documentation for establishment.

(4) Guide the exact location and shape of the PFA by the existing landscape, taking into account the biological needs of the goshawk. Include the known nests sites and replacement nest sites. Place the PFA so known or replacement nest sites are generally centered in the PFA, whenever possible and biologically appropriate.

(5) Manage the PFA over the long term in a manner so that approximately 10 percent of the area is in small openings of ⅛ to ¼ acre at any one time. Consider an opening to be forested vegetation types with less than 10 percent canopy coverage. Do not consider permanent openings (such as

VOL 56 ISS 122 JE 25 1991 UMI

meadows) as part of the 600-acre PFA. Use the group-selection silvicultural system with openings of ¼ acre in ponderosa pine and ⅓ acre in mixed conifer and spruce fir whenever possible.

(6) Sales under contract and FY 1991 sales in IRM phases 1 through 9 may implement thinnings from below (intermediate treatment) only if they are determined to meet the intent (as determined by a wildlife biologist and silviculturist) of PFA management. Specific guidelines will be issued at a later date on how intermediate treatments will be used to meet desired future stand conditions. The intent is to reduce the number of changes to existing or planned sales without having adverse effects on goshawks.

(7) Use lop and scatter to dispose of slash whenever possible.

(8) Allow no adverse management activities (see 5.b.) in PFA's with active nest sites during the breeding season. Use an appropriate survey or monitoring method to determine goshawk activity.

(9) Allow approved activities in PFA's with inactive nest sites after June 30. Use an appropriate monitoring method to determine goshawk inactivity.

(10) Within the PFA allow new road construction only if no other routes are reasonably available. If routes are selected that go through a PFA, written approval by the Forest Supervisor is required.

(11) Allow new trail constuction no closer than ¼ mile from nest sites except when no other routes are reasonably available. If routes are selected that are closer, written approval by the Forest Supervisor is required.

(12) If it is not legally (valid existing rights) possible to restrict adverse activities from occurring in the PFA, seek cooperation from those conducting the activity. If necessary restrict the season of use to outside the breeding season. Keep ground disturbing activities to the minimum necessary to accomplish the objective for entering the PFA.

c. Foraging area. No specific Region-wide guidelines for management of the foraging area (6,000 acres minus 600 acres is the foreaging area) are provided in this directive.

d. Incorporation of non-National Forest System (NFS) lands for 1991 planning:

(1) When the nest sites are located on NFS lands, place the PFA on NFS lands.

(2) When the nest site is located on private land, establish the PFA on a biological basis regardless of land ownership. Where appropriate, additional land may be protected on NFS lands.

e. Include northern goshawk habitat that meets Forest Plan old-growth requirements in the Forest old-growth allocation when it is appropriate and desirable to do so.

f. Where northern goshawk home ranges outside of PFA's overlap with Mexican spotted owl territories, implement spotted owl guidelines. Where PFA's overlap with Mexican spotted owl territories, implement management of PFA's according to these guidelines.

10. Biological Evaluation.

Use the biological evaluation process (FSM 2672.4) to evaluate the effects of all Forest Service programs and activities on the northern goshawk when they occur in suitable habitat. Include all known past, current, and proposed activities when analyzing cumulative effects. Use the biological evaluation process to determine possible needs for additional timing restraints or other mitigation measures not addressed by this interim directive.

11. Show-me Trips.

Show-me trips are not recommended, however they may benefit northern goshawk management by increasing awareness of the species and its habitat. It is important to manage and coordinate show-me trips to minimize disturbance and avoid possible adverse impacts to goshawks. Consolidate show-me trips to minimize the number of trips taken and incorporate with other inventory or monitoring activities whenever possible. Encourage the media to utilize existing footage and/or photographs in order to reduce show-me trips. Other considerations for show-me trip management include the number of visits per site and other activities at/near the site.

2676.3—Exhibit 1—Minimum Structural Attributes for Suitable Goshawk Nest Sites (Habitat)*

Forest cover type, name	Pinyon-juniper	Cotton-wood-willow	Interior ponderosa pine		Mixed-species		Aspen	Engelmann spruce-subalpine fir
Forest cover type, SAF code	239	235	237		209, 210, 211, 216, 219		217	206

4. Vegetation Structural Stages	4B–5	(1)	4B–5	4B–5	4B–5	4B–5	4A–5	4B–5

[1] Historically this forest cover type was used as nesting habitat only rarely.

Forest Cover Type—A descriptive classification of forestland based on present occupancy of an area by tree species (Eyre 1980). Forest cover types are named after predominant tree species. Predominance is determined by basal area and the name is confined to one (ponderosa pine and aspen) or two species (pinyon-juniper, cottonwood-willow, and Engelmann spruce-corkbark fir). The mixed-species conifer forest cover type per se is not a forest cover type but includes several cover types. Mixed-species includes the bristlecone pine, Interior Douglas-fir, white fir, blue spruce, and limber pine forest cover types. Most often mixed-species stands have a rich tree species diversity, including three or four different species, sometimes more.

Site Capability Potential—The capability of the soil or site to produce biomass (trees). Soil capability is determined by measuring the age and height of several dominant and codominant good growing trees and comparing the measurements with the appropriate site index table. This procedure is commonly referred to as determining the site index. The ponderosa pine site curves (Minor 1964) are used for the ponderosa pine forest cover type and Douglas-fir site index curves (Edminster and Jump, 1978) are used to determine site capability for the mixed-species. The break number indicates the separation between low and high site capability potential.

The structural attributes are the minimum requirements for suitable goshawk nest sites. The attributes are intended to permit inventory by individual forest cover types. The attributes are defined and measured as follows:

1. Live Trees—Trees with some or many visible living, green leaves or needles that are present some time during a year.

Main Canopy—The largest tree (overstory trees) in a stand that are more or less the continuous cover of branches and foliage formed collectively by the crowns of adjacent trees.

Trees per Acre—An average number of trees in a stand on a per acre basis.

DBH—(Diameter Breast Height) The outside bark diameter of a timber species tree measured at breast height. Breast height is 4.5 feet above the forest floor on the uphill side of the tree (USFS 1989).

DRC—(Diameter Root Crown) The outside bark diameter of a woodland tree measured slightly (2 inches) above the break between root collar and the normal-taper of the stem. Root collar is the region where root and stem merge. If the tree is multistemmed, the EDRC (equivalent diameter root crown) is calculated and the tree represents one tree.

Age—The mean age of the large live trees (main canopy) in the stand. Age is measured in years by boring a tree at DBH (timber species) or DRC (woodland, other tree species).

2. Total BA—(Basal Area) The cross section area of a tree or trees in a stand, generally expressed as square feet per acre (USFS 1989). Basal area is the cross section at DBH or DRC.

3. Total Canopy Cover—The percentage of a fixed area (stand) covered by the crowns delimited by the vertical projection of the outermost perimeter of the natural spread of the foliage for all live trees; small openings in the crown are included (USFS 1989).

4. Vegetation Structural Stages—A method of describing a stand of live trees that considers tree size, number of trees, and crown canopy cover.

* This table may change as a result of the Scientific Committee final report and will be updated at that time.

Dated: June 18, 1991.

David F. Jolly,

Regional Forester.

BILLING CODE 3410–11–M

Soil Conservation Service

Powell Creek Watershed Plan Supplement, AL

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Powell Creek Watershed Plan Supplement, Marengo and Hale Counties, Alabama.

FOR FURTHER INFORMATION CONTACT: Ernest V. Todd, State Conservationist, Soil Conservation Service, 665 Opelika Road, Auburn, Alabama 36830, Telephone (205) 887–4536.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Ernest V. Todd, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

This project concerns a plan for watershed protection and flood prevention to reduce erosion problems and flood damages.

The plan supplement includes the installation of three floodwater retarding structures and relocation of two others that were previously planned. Approximately 14.5 miles of stream channelization are deleted from the plan. Flood protection will be provided to 8,570 acres.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Ernest V. Todd.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under (10,904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials).

Dated: June 10, 1991.

Ernest V. Todd,

State Conservationist.

BILLING CODE 3410–16–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Shipper's Export Declaration.

Form Number(s): 7525–V–Alternate.

Alternate Approval Number: 0607–0152.

Type of Request: Prompt review—Revision to the Reporting Requirements for the Shipper's Export Declaration.

Burden: 529,700 hours.

Number of Respondents: 100,000.

Avg Hours Per Response: 1 hour for exporters subject to this new requirement.

Needs and Uses: The Forest Resources Conservation and Shortage Relief Act of 1990 requires that the Department of Commerce, in conjunction with the Departments of Agriculture and Interior, conduct a two-year study beginning 1/1/90 of exports from the United States of unprocessed hardwoods harvested from Federal or public lands east of the 100th meridian. The Act also requires exporters to declare on Shipper's Export Declarations (SEDs) the State in which this timber was grown and harvested. This submission requests prompt review from OMB to modify instructions for completing SEDs.

Affected Public: Individuals or households; farms; businesses or other for-profit organizations; non-profit institutions; and small businesses or organizations.

Frequency: On occasion.
Respondent's Obligation: Mandatory.
OMB Desk Officer: Marshall Mills, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Clearance Officer, (202) 377–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Marshall Mills, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: June 20, 1991.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

VOL 56 ISS 122 JE 25 1991 UMI

Foreign-Trade Zones Board

[Docket 35-91]

Foreign-Trade Zone 123—Denver, CO; Application for Subzone, Storage Technology Corporation Information Storage Equipment Plant Boulder County, CO

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City and County of Denver, Colorado, grantee of FTZ 123, requesting special-purpose subzone status for the information storage equipment manufacturing facilities of Storage Technology Corporation (StorageTek) located in Boulder County, Colorado, some 25 miles northwest of Denver. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on June 12, 1991.

StoregeTek is an international producer of large capacity electronic data storage and retrieval systems, impact printers and related data management software. It has plants in the U.S. and the U.K., and annual sales of $1 billion.

The proposed subzone would include the company's Boulder County, Colorado, production and distribution operations (5,000 employees): Site 1 (360 acres)—2270 South 88th St., Louisville; Site 2 (153 acres)—2345 Clover Basin Drive, Longmont; Site 3 (58,000 sq. ft.)—1351 S. Sunset Street, Longmont; Site 4 (92,000 sq. ft.)—520 Burbank Street, Broomfield.

StorageTek's Colorado facilities are used to manufacture large capacity electronic information storage and retrieval subsystems for data processing applications involving reel and cartridge tape devices, automatic cartridge library systems, solid-state disk subsystems, cached and non-cached disk control units, rotating magnetic disk subsystems, impact printers, and associated software. Some 10 percent of its components are sourced abroad, including hard and floppy disk drive units, table and rack mounted storage devices, printed circuit assemblies, high capacity output units, laser printers, power supplies, and related ADP parts and accessories, as well as electric motors, generators, transformers, capacitors, resistors, switches, photosensitive semiconductor devices, bearings, wire and cable, lenses, measuring instruments, air and vacuum pumps, and certain articles of rubber and ceramic. Currently, 40 percent of the finished products are exported.

Zone procedures would exempt StorageTek from Customs duty payments on the foreign components used in equipment produced for export. On domestic sales, the company would be able to choose the duty rates that apply to the finished products (0.0–4.2 percent). The duty rates on most components range from 0.0 to 16.0 percent. The application indicates that zone savings will help improve StorageTek's international competitiveness and increase export sales.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Donald W. Myhre, District Director, U.S. Customs Service, North Central Region, 300 Second Avenue South, Great Falls, Montana 59401; and Colonel Stewart Bornhoft, District Engineer, U.S. Army Engineer District Omaha, 25 North 17th Street, Omaha, Nebraska 68102–4978.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before August 9, 1991.

A copy of the application is available for public inspection at each of the following locations:

Office of the District Director, U.S. Department of Commerce, suite 600, 1625 Broadway, Denver, CO 80202.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th & Pennsylvania Avenue, NW., room 3716, Washington, DC 20230.

Dated: June 18, 1991.

John J. Da Ponte, Jr.,
Executive Secretary.

[FR Doc. 91–15078 Filed 6–24–91; 8:45 am]

BILLING CODE 3510-DS-M

[Docket 34-91]

Foreign-Trade Zone 136—Brevard County, FL; Application for Subzone, American Digital Switching Telecommunications and Computer Products Plant, Melbourne, FL

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Canaveral Port Authority, grantee of Foreign-Trade Zone 136, requesting subzone status for the telecommunications and computer products manufacturing and repair facility of American Digital Switching, Inc. (ADS), in Melbourne, Florida. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on June 11, 1991.

The ADS plant (5.08 acres, 27 employees) is located at 4255 Dow Road, Melbourne, Brevard County, Florida. The facility, established in 1989, is used to manufacture central office digital switches for telephone systems and custom-made personal computers. It is also used to repair and refurbish computers, printed boards, and related products. Certain components for the switches are sourced abroad, such as printed circuit boards, cables, frames, and transistors. Components for the assembly of the personal computers that are sourced from abroad include printed circuit boards, disk drives, monitors, keyboards, and power supplies. The repair operation uses a wide range of merchandise sourced from abroad, including the items listed above as well as microprocessor and memory integrated circuits, transformers, fans, oscillators, and other electronic components. Some of the products are re-exported.

Zone procedures would exempt ADS from Customs duty payments on foreign items used in manufacturing and repair operations for export. On manufacturing and repair operations for the domestic market, the company would be able to choose the duty rates for finished computers (3.9%) and printed circuit boards (5.3%). The duty rate for telephone system switches is 8.5 percent. Components have duty rates ranging from 0.0 to 5.3 percent. The application indicates that the zone savings would help improve the plant's international competitiveness.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Howard Cooperman, Regional Director for Inspection and Control, U.S. Customs Service, Southeast Region, 909 SE. First Avenue, Miami, FL 33131; and Colonel Bruce A. Malson, District Engineer, U.S. Army Engineer District Jacksonville, P.O. Box 4970, Jacksonville, FL 32232-0019.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before August 9, 1991.

A copy of the application is available for public inspection at each of the following locations:

U.S. Customs Service, Port Director's Office, 120 George King Blvd., P.O. Box 513, Cape Canaveral, Florida 32920.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, room 3716 14th & Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: June 17, 1991.

John J. Da Ponte, Jr.,
Executive Secretary

International Trade Administration

[C-557-701]

Carbon Steel Wire Rod from Malaysia; Termination of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of termination of countervailing duty administrative review.

SUMMARY: The Department of Commerce (the Department) has terminated the administrative review requested on the countervailing duty order on carbon steel wire rod from Malaysia, initiated on May 21, 1991, for the period January 1, 1990 through December 31, 1990.

EFFECTIVE DATE: June 25, 1991.

FOR FURTHER INFORMATION CONTACT: Beth Chalecki or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION: On April 25, 1991, Armco, Inc., Georgetown Steel Corp., and Raritan River Steel Co., petitioners in this case, requested a countervailing duty administrative review of the order on carbon steel wire rod from Malaysia for the period January 1, 1990 through December 31, 1990. No other interested parties requested reviews. On May 21, 1991, the Department initiated the administrative review for that period (56 FR 23271).

On May 10, 1991, the petitioners withdrew their request for review. As a result, the Department has determined to terminate the review.

This notice is published in accordance with 19 CFR 355.22(a)(3).

Dated: June 18, 1991.

Joseph A. Spetrini,
Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

[C-614-504]

Carbon Steel Wire Rod From New Zealand; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On August 16, 1990, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on carbon steel wire rod from New Zealand. We have now completed that review and determine that there were no shipments of the subject merchandise to the United States during the period January 1, 1987 through September 30, 1987. However, because of program-wide changes resulting in the termination of two programs found countervailable in the final determination, we are changing the cash deposit of estimated countervailing duties to zero.

EFFECTIVE DATE: June 25, 1991.

FOR FURTHER INFORMATION CONTACT: Al Jemmott or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On August 16, 1990, the Department of Commerce (the Department) published in the Federal Register (54 FR 33750) the preliminary results of its administrative review of the countervailing duty order on carbon steel wire rod from New Zealand (51 FR 7971; March 7, 1986). The Department has now completed that administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by the review are shipments from New Zealand of coiled, semi-finished, hot-rolled carbon steel wire rod of approximately round solid cross-section, not under 0.20 inch nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and valued over or under 4 cents per pound. During the review period, such merchandise was classifiable under items 607.1400, 607.1710, 607.1720, 607.1730, 607.2260 and 607.2300 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under items 7213.31.30, 7213.31.60, 7213.39.00, 7213.41.30, 7213.41.60, 7213.49.00 and 7213.50.00 of the Harmonized Tariff Schedule (HTS). The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1987 through September 30, 1987, one known manufacturer/exporter of this merchandise, Pacific Steel Limited, and 14 programs:

A. Export Performance Taxation Incentive (EPTI);
B. Export Market Development Taxation Incentive (EMDTI);
C. Sales Tax Exemptions or Refunds on Imported Capital Equipment and Machinery (STERICEM);
D. Crown Loans;

There were no shipments of the subject merchandise to the United States during the review period.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received written comments from the respondent, Pacific Steel Limited (PSL), and the petitioners, Atlantic Steel Company, Georgetown Steel Corp., North Star Steel Texas, Inc., and Raritan River Steel Company.

Comment 1: PSL argues that the Department should adjust the cash deposit rate on all future entries of the the subject merchandise because of the

VOL 56 ISS 122 JE 25 1991 UMI

Government of New Zealand's (GNZ) termination of the EPTI program. PSL further argues that in Steel Wire from New Zealand; Preliminary Results of Countervailing Duty Administrative Review (53 FR 28428; July 28, 1988) and Lamb Meat from New Zealand; Final Results of Countervailing Duty Administrative Review (54 FR 10590; May 8, 1989), the Department confirmed that the GNZ had terminated this program. PSL argues that, unlike an antidumping duty administrative review where the absence of sales provides no means of determining whether the margin of dumping has actually changed, the absence of entries or exports during the review period is not a valid reason for declining to revise the cash deposit rate in a countervailing duty administrative review. The Department knows that, with or without sales, the EPTI program is not available to any New Zealand exporters.

Petitioners, on the other hand, urge the Department to terminate the current administrative review and to maintain the cash deposit rate at its current level of 25.69 percent *ad valorem*. Citing 19 CFR 355.22, *PQ Corp* v. *United States*, 652 F. Supp. (CIT 1987), Carbon Steel Wire Rod from Argentina, 54 FR 49322 (1989) (antidumping review), and Certain In-Shell Pistachio Nuts from Iran, (rejection or request to initiate countervailing duty administrative review), petitioners contend that neither section 751(a) nor section 751(b) of the Tariff Act authorizes the Department to conduct an administrative review of a countervailing duty order in the absence of actual entries, sales, imports, or exports. Specifically petitioners contend that the Department must examine actual entries to determine: (1) Whether the program has been terminated with respect to PSL, (2) whether the allegedly terminated program confers residual benefits upon PSL, and (3) whether PSL has received benefits from any new programs. Petitioners distinguish Steel Wire from New Zealand and Lamb Meat from New Zealand by emphasizing that at least one of the respondents subject to those reviews had entries that the Department could review.

Department's Position: Section 751(a) of the Tariff Act authorizes the Department, in the absence of any entries, shipments, or exports, to conduct an administrative review of a countervailing duty order to adjust the cash deposit rate when a foreign government has instituted a program-wide change (*e.g.*, elimination or creation of a program). This conclusion follows from the statutory language of section 751(a) which provides in relevant part that "[a]t least once during each 12-month period beginning on the anniversary of the date of publication of a countervailing duty order * * * [the Department], if a request for such a review has been received * * *, shall * * * review and determine the amount of any net subsidy * * * and shall publish the results of such review, together with notice of any duty to be assessed, *estimated duty to be deposited*, or investigation to be resumed in the **Federal Register**." 19 U.S.C. 1675(a) (emphasis added).

A program-wide change, such as the government's elimination of a program, necessarily can trigger a review pursuant to section 751(a) even in the absence of entries, shipments, or exports, because such an event may result in a change to "the amount of any net subsidy". 19 U.S.C. 1675(a)(1)(A). Furthermore, the express language of the statute demonstrates that a section 751(a) administrative review has several purposes, one of which is to adjust any "estimated duty to be deposited."

In an investigation that preceded the preliminary results of this review, the Department confirmed that the GNZ had eliminated two programs—EPTI and STERICEM—found to confer countervailable benefits during the period of investigation in this proceeding. See Certain Steel Wire Nails from New Zealand; Final Affirmative Countervailing Duty Determination and Countervailing Duty Order (52 FR 37196; October 5, 1987). Because the GNZ's elimination of these government programs has reduced "the amount of the net subsidy" found in the final determination to a *de minimis* level of 0.02 percent *ad valorem* for the subject merchandise, and because section 751(a) authorizes the Department to conduct a review for the limited purpose of adjusting the cash deposit rate even in the absence of any entries, shipments, or exports, we are revising our preliminary results. Specifically, we are reducing the cash deposit rate to zero for all entries of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results.

We disagree with petitioners' contention that the Department must examine actual entries or exports of the subject merchandise to determine whether PSL is receiving any residual benefits from the terminated programs or any benefits from any new subsidy programs for purposes of adjusting the cash deposit rate. Because we have established that the EPTI and STERICEM programs were terminated in 1987 and 1986, respectively, and because the benefits bestowed by these programs were of a type that conferred immediate benefits and were expensed in the year of receipt, there is no basis to assume that any residual benefits remain. Furthermore petitioners' reliance upon 19 CFR 355.22 for the proposition that the Department does not possess the legal authority to conduct a countervailing duty administrative review in the absence of entries or exports is misplaced. Petitioners ignore the express language of § 355.22(b)(1) which provides in relevant part that "an administrative review * * * *normally* will cover entries or exports of the merchandise * * *." (emphasis added). This language does not preclude the Department from conducting a countervailing duty administrative review in the absence of entries in all cases. As explained above, the Department is still able to calculate "the amount of any net subsidy" in the absence of entries when a foreign government institutes a program-wide change. See, e.g., Certain Electrical Conductor Aluminum Redraw Rod from Venezuela; Final Results of Countervailing Duty Administrative Review, (56 FR 14232; April 8, 1991) (where Department conducted a review and changed the cash deposit rate as a result of a program-wide change despite no entries or exports).

Petitioners' reliance upon Pistachio Nuts from Iran is similarly misplaced, because the Department was not confronted with the elimination of any government programs or any other program-wide change in that case. The Department declined to conduct a countervailing duty administrative review in the absence of entries in Pistachio Nuts because the review would have had absolutely no effect upon "the amount of any net subsidy."

In contrast to Pistachio Nuts the subject administrative review involves a program-wide change (i.e., elimination of a government program) that has resulted in a change to "the amount of any net subsidy". Therefore, the Department correctly conducted the subject review and adjusted the cash deposit even though there were no entries during the review period. See, e.g., Aluminum Redraw Rod from Venezuela, supra; but see, e.g., Wool From Argentina; Final Results of Countervailing Duty Administrative Review, (56 FR 21661: May 10, 1991) (where Department did not change the cash deposit rate because there were no entries and no program-wide changes).

Finally, in citing PQ Corp and Carbon Steel Wire Rod from Argentina, two antidumping cases, petitioners miss the essential distinction between antidumping and countervailing duty administrative reviews. An antidumping review necessarily requires that actual entries, sales, or shipments be made during the review period, so that the Department can determine whether a respondent has increased its U.S. prices relative to its home market prices. In order words, the dumping calculation itself is tied to, or contingent upon, an entry or sale of the subject merchandise.

A countervailing duty administrative review, by contrast, does not necessarily require that actual entries or exports be made during the review period to allow the Department to calculate "the amount of any net subsidy." As explained above, the Department is able to calculate the net subsidy in the absence of entries or exports when a foreign government has undertaken a program-wide change, such as the elimination of a subsidy program.

Thus, the calculation of the net subsidy under these circumstances is not tied to, or contingent upon, an entry or exportation of the subject merchandise; rather, the calculation is dependent upon the Department's examination of the statutes, decrees, or regulations that have eliminated the government program. Therefore, the Department's practice with respect to the initiation of antidumping reviews in the absence of entries or sales does not govern the initiation of countervailing duty reviews under identical circumstances.

Comment 2: Petitioners contend that, if the Department adjusts the cash deposit rate in this administrative review, the Department would be promulgating a "new rule of general applicability" in violation of the Administrative Procedure Act (the APA) (5 U.S.C. 553), because the Department failed to provide petitioners with adequate notice of, and an opportunity to comment upon, its change in practice.

Department's Position: Our determination with respect to the cash deposit issue falls outside the purview of the APA for two reasons. First, contrary to petitioners' assertions, this determination does not constitute a "new rule of general applicability." Rather, our determination with respect to the cash deposit issue represents a continuation of our administrative practice. See, e.g., Aluminum Redraw Rod From Venezuela, supra.

Second, even if our determination were considered a "rule" within the meaning of the APA, such a "rule" would necessarily be an interpretative rule—that is, an interpretation of section 751(a) of the Tariff Act. See *Timken Co.* v. *U.S.*, 673 F. Supp. 495, 514 (CIT 1987) (*quoting Gibson Wine Co.* v. *Snyder*, 194 F.2d 329, 331 (D.C. Cir. 1952) ("Interpretative rules are 'statements as to what the administrative officer thinks the statute or regulation means.' "). It is well settled that interpretative rules fall within an exception to the rulemaking requirements of APA. See *id.*; 5 U.S.C. 553(b)(3)(A). Therefore, our determination in this review—in particular, our decision to change the cash deposit rate despite the absence of entries—was not subject to the notice and comment requirements of the APA.

Comment 3: Petitioners allege that in March 1988, prior to the review period, the GNZ provided an equity infusion on terms inconsistent with commercial considerations to New Zealand Steel (NZS) by assuming NZ $1.14 billion of NZS's debt in exchange for 61 percent of NZS's stock. Petitioners further allege that subsequent to the review period, in October 1987, the GNZ sold its NZS stock to another holding company, Equiticorp, for less than NZ $300 million and, thereby, conferred a domestic subsidy upon NZS. Petitioners then allege that NZS passed this subsidy onto PSL by selling steel billets, the main input used in the production of carbon steel wire rod, to PSL at subsidized prices. For these reasons, petitioners urge the Department to initiate an upstream subsidy investigation with respect to the production of steel billets.

PSL contends, by contrast, that petitioners failed to provide the Department with "reasonable grounds to believe or suspect" that NZS provided an upstream subsidy to PSL. Therefore, the Department correctly declined to initiate an upstream subsidy investigation in this administrative review. Specifically, PSL contends that NZS and PSL were not related during the review period, and that the petitioners failed to demonstrate that transactions between NZS and PSL were not at arm's length, that steel billets were not available at comparable prices from other sources during the review period, or that NZS undercut the prices charged by other suppliers of billets during that period.

Department's Position: Section 701(c) of the Tariff Act sets forth the legal standard that governs the initiation of an upstream subsidy investigation:

> Whenever the [Department] has reasonable grounds to believe or suspect that an upstream subsidy, as defined in section 1671(a)(1) of this title *[i.e.*, domestic subsidy], is being paid or bestowed, [the Department] shall investigate whether an upstream subsidy has in fact been paid or bestowed, and if so, shall include the amount of the upstream subsidy as provided in section 1671(a)(3) of this title.
>
> 19 U.S.C. 1671(c) (emphasis added).

Congress has explained that this "reasonable grounds to believe or suspect" standard is extremely rigorous. Compare H.R. Rep. No. 98-725, 98th Cong., 2d Sess. 80 (1984) with 130 Cong. Rec. H11,577 (daily ed. Oct. 5, 1984) and H.R. Rep. No. 98-1156, 98th Cong., 2d. Sess. 171 (1984); see also 130 Cong. Rec. S13,970 (daily ed.) (Oct. 9, 1984) (explanation by Senator Dole). Furthermore, the U.S. Court of International Trade (CIT) has ruled that the "reasonable grounds to believe or suspect" standard in the context of a cost-of-production investigation in an antidumping proceeding requires a petitioner to set forth "*specific* and *objective*" evidence in its allegation to trigger a cost-of-production investigation. *Al Tech Specialty Steel Corp.* v. *United States*, 575 F. Supp. 1277, 1282 (CIT 1983), *aff'd on other grounds*, 745 F.2d 682 (Fed. Cir. 1984) (emphasis supplied in original).

In this administrative review, petitioners' upstream subsidy allegation failed to provide the Department with "reasonable grounds to believe or suspect" that the GNZ conferred an upstream subsidy upon the manufacture or production of steel billets. Specifically, petitioners failed to provide sufficient evidence demonstrating that the GNZ's initial assumption of NZS's debt and subsequent sale of NZS's stock to Equiticorp constitute a countervailable domestic subsidy. As conceded by petitioners, "[w]e have been unable to obtain sufficient evidence regarding whether a market price existed for the stock of NZS following the GNZ's acquisition, and whether the GNZ's per-share acquisition price was above the market price." Petitioners' Submission at 4 (June 9, 1988).

In fact, petitioners themselves merely speculate that the transactions at issue might constitute a countervailable domestic subsidy. See Petitioners' Submission at 7 (June 9, 1988) ("[T]he original debt assumption may constitute a 'traditional' equity infusion, while the subsequent sale of shares to Equiticorp may be viewed as a 'bargain' sale conferring a subsidy on NZS) (emphasis added). Significantly, the petitioners acknowledge that the evidence upon which their allegation is based is unreliable: "Information on the transactions described herein was derived from publically-available periodicals and newswires. These publications contained certain

VOL 56 ISS 122 JE 25 1991 UMI

discrepancies and inconsistencies." Petitioners' Submission at 2, n.1 (June 9, 1988) (emphasis supplied). For these reasons, the Department correctly declined to initiate an upstream subsidy investigation in the subject administrative review.

Comment 4: Petitioners contend that NZS is subject to the outstanding countervailing duty order covering the subject merchandise, because NZS failed to make a timely request during the initial investigation pursuant to 19 CFR 355.38 (1988) to warrant an exclusion from the outstanding order. DOC Position: We disagree. In Carbon Steel Wire Rod from New Zealand; Final Affirmative Countervailing Duty Determination and Countervailing Duty Order (51 FR 7971; March 7, 1986), the Department determined that NZS received *de minimis* countervailable benefits. Therefore, the Department correctly excluded NZS from the countervailing duty order. Because petitioners failed to contest the Department's exclusion of NZS from the order within 30 days from the date of publication of the order, petitioners are barred from raising this challenge in this administrative review. See 19 U.S.C. 1516a.

Moreover, petitioners' reliance upon 19 CFR 355.38 (1988) is misplaced, because this regulation, contrary to the interpretation advanced by petitioners, provides a mechanism pursuant to which a foreign exporter that is neither a respondent named in the petition nor a respondent subject to the investigation can be excluded from a potential countervailing duty order. This regulation does not govern a participating respondent that has demonstrated to the satisfaction of the Department that it received *de minimis* benefits during the period of investigation.

Final Results of Review

As a result of our review, we determine that there were no shipments of the subject merchandise during the period January 1, 1987 through September 30, 1987. After considering all of the comments received, we determine that program-wide changes have eliminated the benefit from two programs, reducing the benefit to 0.02 percent *ad valorem*.

In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

Accordingly, the Department will instruct the Customs Service to waive cash deposits of estimated countervailing duties on shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: June 17, 1991.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-517-501]

Carbon Steel Wire Rod From Saudi Arabia; Preliminary Results of Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative reviews.

SUMMARY: The Department of Commerce has conducted administrative reviews of the countervailing duty order on carbon steel wire rod from Saudi Arabia. We preliminarily determine the total bounty or grant to be 0.13 percent *ad valorem* for the period January 1, 1988 through December 31, 1988. We also preliminarily determine the total bounty or grant to be 0.49 percent *ad valorem* for the period January 1, 1989 through December 31, 1989. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: June 25, 1991.

FOR FURTHER INFORMATION CONTACT: Philip Pia or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On February 1, 1989 and February 9, 1990, the Department of Commerce (the Department) published in the **Federal Register** notices of "Opportunity to Request Administrative Review" (54 FR 5102 and 55 FR 4646) of the countervailing duty order on carbon steel wire rod from Saudi Arabia. During February 1989 and February 1990, Georgetown Steel Corporation, Northstar Steel Texas, Inc., Raritan River Steel Company and Atlantic Steel Company, petitioners in this proceeding, and the Saudi Iron and Steel Company (HADEED), the respondent, requested administrative reviews covering the periods January 1, 1988 through December 31, 1988, and January 1, 1989 through December 31, 1989. We initiated the reviews on April 6, 1989 (54 FR 13913) and March 22, 1990 (55 FR 10642), respectively. The Department has now conducted these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by these reviews are shipments of Saudi carbon steel wire rod. Carbon steel wire rod is a coiled semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and valued over or under 4 cents per pound. During the 1988 review period, such merchandise was classifiable under item numbers 607.1400, 607.1710, 607.1720, 607.1730, 607.2200 and 607.2300 of the Tariff Schedules of the United States Annotated (TSUSA). During the 1989 review period, such merchandise was classifiable under item numbers 7213.20.00, 7213.31.30, 7213.31.60, 7213.39.00, 7213.41.30, 7313.41.60, 7213.49.00 and 7213.50.00 of the Harmonized Tariff Schedule (HTS). The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The reviews cover the periods January 1, 1988 through December 31, 1988, and January 1, 1989 through December 31, 1989, and eight programs. During the review period, there was only one Saudi producer and/or exporter of the subject merchandise, the Saudi Iron and Steel Company (HADEED).

Analysis of Programs

(1) Public Investment Fund Loan to HADEED

The Public Investment Fund (PIF) was established in 1971 as one of five specialized credit institutions set up by the Government of Saudi Arabia. The other specialized credit institutions are the Saudi Industrial Development Fund (SIDF), the Saudi Agricultural Bank, the Saudi Credit Bank and the Real Estate Development Fund. These specialized credit institutions are funded completely by the Saudi government and were the only sources of long-term financing in Saudi Arabia during the review period.

The PIF was established in 1971 to provide financing to large-scale, commercially productive projects that have some equity participation of the Saudi government. PIF by-laws exclude firms or projects without Saudi government equity from applying to the PIF for financing. From 1973 through the end of the review period, the PIF has provided loans to 18 firms. Of these, 12 (including HADEED) are at least 50 percent-owned by the Saudi Basic Industries Corporation (SABIC). Of the remaining six borrowers, three are 50 percent-owned by PETROMIN, and three are unrelated: Saudia Airlines, a utility company and a real estate investment fund. Firms receiving PIF financing represent less than one-half of all large scale firms, and only a very small portion of all industrial enterprises, in the Kingdom.

Because the application of the government equity participation requirement limited benefits under this program to a small number of enterprises, we therefore preliminarily determine that PIF loans are provided to a specific group of enterprises in Saudi Arabia, and that the PIF loan to HADEED is countervailable to the extent that it is given on terms inconsistent with commercial considerations.

The loan contract between the PIF and HADEED requires that HADEED pay a variable commission, or interest, on the outstanding balance based on its profitability in a given fiscal year. During 1988 and 1989, HADEED made repayments of loan principal and commission on its PIF loan.

Using the two sources for medium- to long-term industrial financing available in Saudi Arabia, private commercial banks and the SIDF, we have constructed composite interest rate benchmarks for each review period to determine whether the PIF loan to HADEED was on terms inconsistent with commercial considerations. Since the PIF loan covered 60 percent of HADEED's total project costs, for our benchmark we assumed that HADEED could have financed 50 percent of its total project costs with a SIDF loan (the maximum eligibility for a company with at least 50 percent Saudi ownership) and the remaining 10 percent of project costs with a Saudi commercial bank loan. The SIDF loan portion of the benchmark was used because, of all the specialized credit institutions, it is the only fund besides the PIF which lends to industrial or manufacturing projects and, thus, is most representative of what HADEED would otherwise have to pay for long-term loans in Saudi Arabia. We used the 1.9 percent flat rate of interest applied to SIDF loans through 1988 and 1989. The commercial bank portion of the benchmark was based on the average Jeddah Interbank Offering Rate (JIBOR) for 1988 and 1989, plus a one percent spread. Because the composite benchmarks for 1988 and 1989 are less than the actual commission, or interest rates, that HADEED paid on its PIF loan in 1988 and 1989, we preliminary determine that the PIF loan was not preferential for the periods January 1, 1988 through December 31, 1988, and January 1, 1989 through December 31, 1989.

(2) SABIC's Transfer of SULB Shares to HADEED

SABIC was established in 1976 by the Government of Saudi Arabia as an industrial development corporation. SABIC has been the majority shareholder in HADEED since the steel company's inception in 1979. In 1982, SABIC acquired all of the remaining shares in the Steel Rolling Company (SULB), a Saudi producer of steel reinforcing bars of which SABIC had been the majority shareholder since 1979. In December 1982, SABIC decided to transfer its shares in SULB to HADEED in return for new HADEED stock. Through the stock transfer, SULB became a wholly-owned subsidiary of HADEED.

In Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Carbon Steel Wire Rod From Saudi Arabia, (51 FR 4206; February 3, 1986), we determined that HADEED was unequityworthy in December 1982 and that the transfer of SABIC's shares in SULB to HADEED in exchange for additional shares in HADEED was inconsistent with commercial considerations.

To determine the benefit to HADEED from the acquisition of SULB, we used our rate of return shortfall methodology. We determined the amount of the equity infusion to be the net book value of SULB's equity at the time of the transfer. As best information available on the national average rate of return on equity in Saudi Arabia, we used the 1988 and 1989 annual average rates of return on U.S. direct investment in Saudi Arabia. Based on the most recent data available from the U.S. Commerce Department's Bureau of Economic Analysis, the 1988 and 1989 average rates of return on equity were 23.85 percent and 16.13 percent, respectively. We computed the rate of return shortfall by taking the difference between this figure and the 1988 and 1989 rates of return on equity in HADEED. Because HADEED's rates of return on equity in 1988 and 1989 were greater than average rates of return on U.S. direct investment in Saudi Arabia in 1988 and 1989, respectively, the rate of return shortfall for each review period is zero. On this basis, we preliminarily determine the benefit from this equity infusion to be zero for the period January 1, 1988 through December 31, 1988, and zero for the period January 1, 1989 through December 31, 1989.

(3) Preferential Provision of Equipment to HADEED

Under a lease/purchase arrangement, the Royal Commission for Jubail and Yanbu built for HADEED two bulk ship unloaders at the Jubail industrial port for unloading iron ore, and constructed a conveyor belt system for transporting iron ore from the pier to HADEED's plant in the Jubail Industrial Estate. When construction of these facilities was completed in 1982, the Commission transferred custody to HADEED under a lease/purchase agreement.

As originally planned, the bulk ship unloader and conveyor system was built to serve both HADEED and an adjacent plant in the Jubail Industrial Estate. The second plant was not built, however, leaving HADEED as the sole user of this equipment. The terms of the lease/purchase agreement require that HADEED must repay the equipment and construction costs plus a two-percent fee for the cost of money in 20 annual installments. The annual payments are stepped, with the lowest payment levels occurring at the beginning and the highest payment levels occurring at the end of the 20-year period.

In the *Saudi Wire Rod* (*op. cit.*), we found that the two-percent cost-of-money fee is the Commission's standard charge for recovery of costs on other facilities in the Jubail Industrial Estate. Of the projects examined, a urea berthside handling system built for the exclusive use of another company located in the Estate was the most comparable to HADEED ship unloader and conveyor system. Therefore, we compared the repayment schedule for HADEED's ship unloader and conveyor system to the repayment schedule for a berthside handling system. Although both agreements carried the standard cost-of-money fee, we found that HADEED's end-loaded, stepped repayment schedule was more advantageous than the annuity-style repayment schedule on the berthside handling system. Therefore, we determine that HADEED's ship unloader and conveyor system was provided on preferential terms. Moreover, because

VOL 56 ISS 122 JE 25 1991 UMI

the equipment is used exclusively by HADEED, we find that it is provided to a specific enterprise and, thus, confers a bounty or grant.

To calculate the benefit, we compare the principal and fees being paid in each year by HADEED to the principal and fees that would be paid under the repayment schedule used for the berthside handling system. We allocated the sum of the present values of the differences in the two repayment schedules over 20 years, using a two-percent discount rate. The resulting benefits for 1988 and 1989 were then divided by the value of HADEED's sales during 1988 and 1989, respectively. On this basis, we preliminarily determine the benefit from the preferential provision of the unloader and conveyor system to be 0.01 percent *ad valorem* for the period January 1, 1988 through December 31, 1988, and 0.01 percent *ad valorem* for the period January 1, 1989 through December 31, 1989.

(4) Income Tax Holiday for Saudi Joint Venture Projects

Under Article 7 of the Foreign Capital Investment Code of January 1, 1979, a 10-year income tax holiday may be granted for economic development projects. The following three conditions must be fulfilled to obtain approval by the Saudi Foreign Investment Committee: (1) Saudi participation is not less than 25 percent of total capital; (2) the foreign capital shall be invested in nontraditional development projects which, for the purposes of the Foreign Capital Investment Code, do not include petroleum related and/or mineral extraction projects; and (3) the investment shall be accompanied by foreign technical know-how and expertise. This tax holiday applies only to income taxes that are owed by the foreign share of the enterprise.

Because the application of these three requirements limited benefits under this program to a small number of enterprises, we therefore determine that it is specific and countervailable. In tax returns filed in 1988 and 1989, HADEED reported profits for fiscal 1987 and 1988, respectively. Thus, DEG, HADEED's foreign partner, would have been liable for income tax during the review periods had it not still been eligible for the income tax holiday.

To calculate the benefit from the tax holiday, we divided the amount of tax DEG would have paid in 1988 and 1989 absent the tax holiday by HADEED's total sales for 1988 and 1989, respectively. On this basis, we preliminarily determine the bounty or grant from the income tax holiday to be 0.12 percent *ad valorem* for the period January 1, 1988 through December 31, 1988, and 0.48 percent *ad valorem* for the period January 1, 1989 through December 31, 1989.

(5) Other Programs

We also examined the following programs and preliminarily determine that HADEED did not benefit from them during the 1988 and 1989 review periods:

1. SABIC loan guarantees;
2. Preferential provision of services by SABIC;
3. Government procurement preferences; and
4. Issuance of preferential government bonds.

Preliminary Results of Review

As a result of the review, we preliminarily determine the total bounty or grant to be 0.13 percent *ad valorem* for the period January 1, 1988 through December 31, 1988, and 0.49 percent *ad valorem* for the period January 1, 1989 through December 31, 1989. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

Therefore, the Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of this merchandise exported on or after January 1, 1988 and exported on or before December 31, 1989.

The Department also intends to instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Traffic Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the final results of this review.

Parties to the proceeding may request disclosure of the calculation methodology and interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e).

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under 19 CFR 355.38(c), are due.

The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: June 20, 1991.

Eric I. Garfinkel

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Mauritius

June 20, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: June 27, 1991.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-5810. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Categories 351/651 is being increased by application of special shift, decreasing the limit for Categories 341/641 to account for the increase.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 55 FR 50756, published on December 10, 1990). Also see 55 FR 46236, published on November 2, 1990; and 56 FR 8748, published on March 1, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 20, 1991.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on October 29, 1990, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, man-made fiber, silk blend and other vegetable fiber textile products, produced or manufactured in Mauritius and exported during the twelve-month period which began on October 1, 1990 and extends through September 30, 1991.

Effective on June 27, 1991, you are directed to amend further the directive dated October 29, 1990 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and Mauritius:

Category	Adjusted twelve-month limit [1]
341/641	273,887 dozen.
351/651	149,520 dozen.

[1] The limits have not been adjusted to account for any imports exported after September 30, 1990.

For the import period October 1, 1990 through February 27, 1991, you are directed to charge 52,991 dozen to Category 351 for the current restraint period. There are no charges for Category 651 for the October 1, 1990 through February 27, 1991 import period.

Also, you are directed to deduct 35,087 dozen from the charges made to Categories 351/651 for the period October 1, 1990 through September 30, 1991.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

List of Exempt Traditional Folklore Textile Products from Pakistan

June 20, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs replacing the existing list of traditional folklore textile products.

EFFECTIVE DATE: June 27, 1991.

FOR FURTHER INFORMATION CONTACT: Nicole Bivens Collinson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Under the terms of the Bilateral Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement, effected by exchange of notes dated May 20, 1987 and June 11, 1987, as amended, the Governments of the United States and Pakistan, reached agreement, effected by exchange of letters dated May 23 and 28, 1991, to replace the existing list of exempt traditional folklore textile products. A list of the newly agreed items is published as an enclosure to the letter to the Commissioner of Customs.

See **Federal Register** notices 48 FR 25257, published on June 6, 1983; and 52 FR 21611, published on June 8, 1987.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 20, 1991.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on May 27, 1983, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive, as amended, establishes export visa and exempt certification requirements for certain cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Pakistan.

Effective on June 27, 1991, you are directed to substitute the enclosed list of "Pakistan Items" for the existing list of Pakistan folklore textile products. "Pakistan items" are exempt from the limits of the bilateral agreement with Pakistan when properly certified by the Government of Pakistan prior to exportation.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Pakistan Folklore Items

"Pakistan Items" are those items that are uniquely and historically traditional Pakistani products. They are limited to the products enumerated below.

1. *Shisha Embroidered Dress:* A dress which is knee length or longer with at least the front area above the waist covered with an overlay. The overlay contains embroidery and mirrors which are attached to the overlay by embroidery. This dress has a partial back opening fastened by hooks, buttons, or snaps, but not by zippers or velcro.
   ●The mirrors and embroidery must cover the front area above the waist, however, there are no restraints on other sections being covered by mirrors and embroidery.
2. *Kurta:* A pullover tunic which is fingertip or knee length with a partial opening in front which may be fastened by hooks, buttons, or snaps, but not by zippers or velcro. The tunic may be collarless or have a stand-up collar, but may not have an out-turned shirt-type collar or out-turned shirt-type cuffs. A Kurta has no front pockets, but may have side-slit pocket(s), and must have sleeves that are a quarter length or longer. The fabric of the Kurta may be solid colored, striped, printed, crocheted, embroidered and/or patchworked with side slits of at least 2 inches on both sides.
3. *Gharara:* Pants/trousers with a drawstring waist with colored and/or metallic embroidery work. Each pant leg measures at least 36 inches across the bottom and closes at the ankle by a drawstring.
   ●Imported as a set with the Kurta.
4. *Multani Choli:* A tight fitting collarless top which is waist length or shorter and that has quarter or half length sleeves. The Multani Choli has a full front or back opening fastened by snaps, buttons, or hooks, but not by a zipper or velcro. This top may or may not be embroidered.
5. *Burqa:* A solid colored, loose fitting, and untapered gown which is ankle length with a full front opening from neck to ankle, fastened by snaps, buttons, or hooks, but not by a zipper or velcro. A head covering is imported with the Burqa which may or may not be attached to the gown.
6. *Baluchi/Peshawari Vest:* A sleeveless and loose fitting vest which may close with snaps, buttons, or hooks, but not by a zipper or velcro. The Baluchi/Peshawari vest extends to approximately waist length and is covered by substantial embroidery and mirrors which are at least on the front.
7. *Ghagra:* An extremely loose fitting, full, ankle length skirt which gathers at the waist by either a drawstring or hooks, but not by a zipper or velcro. The circumference of the skirt at the bottom is at least 5 yards.
8. *Bahee:* A drawstring pouch or string bag as described below.

VOL 56 ISS 122 JE 25 1991 UMI

Pakistan Folklore Items—Continued

a. Drawstring Pouch—A small pouch which is no more than 7 inches across when laid flat and is covered at least on one side with sequins, metallic string and other decorative material. A drawstring is used to close the opening.

b. String Bag—A small bag which is no more than 7 inches across and 6 inches in height when laid flat. The bag is covered with embroidery and mirrors at least on the front flap and is held by a twisted yarn shoulder strap.

9. *Sind Jutebo:* A loose fitting, ankle length dress, with or without a partial closure in the front or back fastened by snaps, buttons, or hooks, but not by a zipper or velcro. The dress may have side slits or side pockets and must have half length sleeves.
10. *Izarband:* A non-woven (knit) narrow fabric with two braided ends which results in loose fringe at both ends used as a drawstring.
11. *Bakashi Kameez:* A loose fitting tunic with an opening on one shoulder seam fastened by hooks, buttons, or snaps, but not by a zipper or velcro. The tunic has 3/4 length sleeves or longer and has matching embroidery work at least on the yoke and cuffs. The tunic is always longer than waist length, flares out near the bottom, and does not have side slits.
12. *Kaftan:* A women's loose fitting pullover full or ankle length garment with partial front or back opening fastened by hooks, buttons, snaps or string but not by a zipper or velcro. The fabric of the kaftan may be solid colored, striped, printed, crocheted, embroidered and/or patchworked. The kaftan has side slits or a back slit for walking.
13. *Ghilaf:* A cushion cover which is oblong, square, round, or of other shapes, covered with a combination of mirrors, embroidery, and other decorative material.
14. *Dupatta:* A scarf which is at least two meters or more in length and one meter or more in width. The scarf must be hemmed at both ends and constructed from thin, lightweight fabric.
15. *Shalwar:* Straight (men) or gathered (women) pants with a drawstring waist and either drawstring leg openings (no elastic) or cuffs. The men's shalwar has less stitching on the bottom of each leg than the women's shalwar.
16. *Pyjama:* Men's or women's pants without a waistband, but with a drawstring waist. The pant leg may either be straight or tapered with or without a small side slit. The garment may have pockets but has no front opening.
17. *Punjabi Kameez:* A loose fitting tunic with an out-turned collar and shirt type cuffs and a partial front opening fastened by hooks, buttons, or snaps, but not by a zipper or velcro. A tunic has side slits at least 2 inches or more on both sides. It has front pockets and side slit pockets. The fabric of Punjabi Kameez is solid colored, striped, printed, embroidered or patchworked.

BILLING CODE 3510-DR-F

Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States: Changes to the 1991 Correlation

June 20, 1991.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Changes to the 1991 Correlation.

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202)377-3400.

The Correlation: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (1991) presents the Harmonized Tariff Schedule numbers under each of the cotton, wool, man-made fiber, silk blend and other vegetable fiber categories used by the United States in monitoring imports of these textile products and in the administration of the bilateral agreement program. The following list includes some Harmonized Tariff Schedule numbers that will be published in the first supplement to the Harmonized Tariff Schedule of the United States (1991). The Correlation should be amended to reflect the changes indicated below:

Category	Changes to the 1991 Correlation
229	Delete 5608.19.2000. Add 5608.19.2090—definition remains unchanged.
339	Delete 6104.29.2046. Add 6104.29.2042—definition remains unchanged.
341	Delete 6204.29.4046. Add 6204.29.4070—definition remains unchanged.
345	Delete 6104.29.2056. Add 6104.29.2065—definition remains unchanged.
347	Delete 6113.00.0035. Add 6113.00.0038—modify definition to include "trousers, breeches and shorts." Delete 6210.40.2030. Add 6210.40.2035—modify definition to include "trousers, breeches and shorts."

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Request for Visit Authorization, OMB Number 0704-0221.

Type of Request: Reinstatement.

Average Burden Hours/Minutes per Response: 12 minutes.

Responses Per Respondent: 714.

Number of Respondents: 84.

Annual Burden Hours: 11,995.

Annual Responses: 59,976.

Needs and Uses: This information is collected to ascertain the persons who are visiting, and the place, time, and purpose of the visit. The information is used to coordinate the visit with the place to be visited and the release of information to satisfy the visit purpose.

Affected Public: Foreign embassies in the United States, International organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202-4302.

Dated: June 19, 1991.

L.M. Bynum,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Office of the Secretary

Defense Base Closure and Realignment Commission; Meetings

ACTION: Announcement of public deliberation meetings of the Defense Base Closure and Realignment Commission.

SUMMARY: Additional open public meetings of the Defense Base Closure and Realignment Commission will be held in Washington, DC in accordance with the following dates and times, and at the specific meeting locations shown: As previously published in the **Federal Register**, June 17, 1991, public meetings have been scheduled on June 28, 29 and 30, 9:30 a.m., Washington, DC to conduct deliberations on base closures and realignments; this announcement should be amended to include an additional day of public meetings on June 27, 1991, 9:30 a.m. and to delete the public meeting scheduled for June 29, 1991. The public meeting scheduled for June 27, 1991 will be held in room 2167 Rayburn House Office Building, Washington, DC and the public meetings scheduled for June 28 and 30 will be held in room 1100 Longworth House Office Building, Washington, DC.

Less than 15 days notice is being given in some instances due to the difficulties in confirming appropriate locations in the Washington, DC area to accommodate large public hearings.

FOR FURTHER INFORMATION CONTACT: Defense Base Closure and Realignment Commission, Mr. Cary Walker, Director of Communications and Public Affairs, (202) 653-0823.

Dated: June 21, 1991.

L.M. Bynum,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

Meeting of the Advisory Council on Dependents' Education

AGENCY: Department of Defense Dependents Schools (DoDDS), Office of the Secretary of Defense.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Dependents' Education (ACDE). It also describes the functions of the Council. Notice of this meeting is required under the National Advisory Committee Act. Although the meeting is open to the public, because of space constraints, anyone wishing to attend the meeting should contact the point of contact listed below.

DATES: July 26, 1991, 9 a.m. to 4:30 p.m. and July 27, 1991, 9 a.m. to 3 p.m..

ADDRESSES: July 26, The Pentagon, room 3E869, Washington, DC; July 27, Embassy Suites Hotel, Adams Morgan Room, 1402 Eads Street, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Ms. Marilyn Witcher, Public Affairs Officer, DoD Dependents Schools, 2461 Eisenhower Avenue, Alexandria, Virginia, 22331-1100, Telephone: 703-325-0867.

SUPPLEMENTARY INFORMATION: The Advisory Council on Dependents' Education is established under title XIV, section 1411, of Public Law 95-561, Defense Dependents' Education Act of 1978, as amended by title XII, section 1204(b)(3)-(5), of Public Law 99-145, Department of Defense Authorization Act of 1986 (20 U.S.C., chapter 25A, section 929, Advisory Council on Dependents' Education). The Council is cochaired by designees of the Secretary of Defense and the Secretary of Education. In addition to a representative of each of the Secretaries, 12 members are appointed jointly by the Secretaries. Members include representatives of educational institutions and agencies, professional employee organizations, unified military commands, school administrators, parents of DoDDS students, and one DoDDS student. The Director, DoDDS, serves as the Executive Secretary of the Council. The purpose of the Council is to advise the Secretary of Defense and the DoDDS Director about effective educational programs and practices that should be considered by DoDDS and to perform other tasks as may be required by the Secretary of Defense. The agenda includes discussions about the national goals for education, academic achievement encouragement, minority options in college recruitment, education of handicapped dependents, communications throughout the system, increased parental involvement, and responses to the recommendations made by the Council during its January meeting.

Dated: June 19, 1991.

L.M. Bynum,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before July 25, 1991.

ADDRESSES: Written coments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Mary P. Liggett, Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Mary P. Liggett, (202) 708-5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information

VOL

collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Acting Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Mary P. Liggett at the address specified above.

Dated: June 19, 1991.

Mary P. Liggett,

Acting Director, Office of Information Resources Management.

Office of Bilingual Education and Minority Languages Affairs

Type of Review: New.
Title: The Chapter 1 Implementation Study School Survey.
Frequency: One time.
Affected Public: State or local governments.

Reporting Burden

Responses: 4,000.
Burden Hours: 2,500.

Recordkeeping Burden

Recordkeepers: 0.
Burden Hours: 0.
Abstract: This study will provide descriptive information about program operations at the school level in the third year of implementation of the Hawkins-Stafford Amendments. The Department will use the information to evaluate the effectiveness of chapter 1 programs, the educators carrying out chapter 1 or similar programs, and evaluators and program managers charged with monitoring and improving the program's operations.

Office of Educational Research and Improvement

Type of Review: Extension.
Title: Application for Grants under the National Diffusion Network Program.
Frequency: Annually.
Affected Public: State or local governments; non-profit institutions.

Reporting Burden

Responses: 50.
Burden Hours: 1,200.

Recordkeeping Burden

Recordkeepers: 113.
Burden Hours: 1,356.
Abstract: This form will be used by State Educational Agencies (SEAs), state or local governments and non-profit institutions to apply for funding under the National Diffusion Network Program. The Department uses the information to make grant awards.

Office of Planning, Budget and Evaluation

Type of Review: New.
Title: A Study of Satisfactory Progress Rules and the Grades of Students.
Frequency: One time.
Affected Public: Non-profit Institutions.

Reporting Burden

Responses: 225.
Burden Hours: 225.

Recordkeeping Burden

Recordkeepers: 0.
Burden Hours: 0.
Abstract: This study will collect data from postsecondary institutions regarding the legislative definition of satisfactory academic progress required for Federal Student Aid. The Department will use this data for program assessment and to report to Congress.

BILLING CODE 4000-01-M

Office of Postsecondary Education

College Work-Study—Community Service Learning Program

AGENCY: Department of Education.

ACTION: Notice of Closing date for filing the campus-based reallocation form to receive supplemental allocations for the College Work-Study—Community Service Learning (CWS–CSL) program.

SUMMARY: The Secretary gives notice to institutions of higher education of the deadline for an institution to apply for supplemental 1992–92 allocations under the CWS–CSL program. The Secretary is authorized under section 442(e) of the Higher Education Act of 1965, as amended (HEA), to reallocate unexpended College Work-Study (CWS) funds that institutions received for expenditures during the 1990–91 award year (July 1, 1990 through June 30, 1991) as supplemental allocations for the 1991–92 award year (July 1, 1991 through June 30, 1992). Supplemental allocations will be issued this fall in accordance with reallocation procedures contained in 34 CFR 675.3 and 675.4.

Section 442(e)(2) of the HEA requires the Secretary to use an amount not in excess of 25 percent of those CWS funds available for reallocation each year to issue supplemental CWS–CSL allocations to eligible institutions for the purpose of initiating, improving and expanding programs of community service learning. CWS–CSL supplemental allocations may be used only for administrative expenses related to the development of work-study programs involving the employment of CWS-eligible students in community service learning activities.

The CWS-CSL program is authorized by section 447 of title IV of the HEA. (42 U.S.C. 2756a).

Closing Date: An instititution must apply for 1991–92 supplemental allocations for the CWS–CSL program by submitting the completed data cells on the Campus-Based Reallocation Form (ED Form E40–4P; OMB No. 1840–0559).

To ensure consideration for the 1991–92 funds, the Campus-Based Reallocation Form must be mailed or hand-delivered by July 26, 1991.

Campus-Based Reallocation Forms Delivered by Mail: A Campus-Based Reallocation Form that is delivered by mail must be addressed to the U.S. Department of Education, Office of Student Financial Assistance, Division of Programs Operations and Systems, Campus-Based Programs Branch, 400 Maryland Avenue, SW., (room 4621, Regional Office Building 3), Washington, DC 20202–5452.

An institution must show proof of mailing consisting of one of the following: (1) A legible mail with the date of mailing stamped by the U.S. Postal Service; (2) a legibly dated U.S. Postal Service postmark; (3) A dated shipping label invoice; or receipt from a commercial carrier; or (4) Any other proof of mailing acceptable to the Secretary of Education.

If a Campus-Based Reallocation Form is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) A mail receipt that is not dated by the U.S. Postal Service. An institution should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an institution should check with its local post office. An institution is encouraged to use certified or at least first-class mail.

Campus-Based Reallocation Forms Delivered by Hand: A Campus-Based Reallocation Form that is delivered by hand must be taken to the U.S. Department of Education, Office of Student Financial Assistance, Division of Program Operations and Systems, Campus-Based Programs Branch, 7th and D Streets, SW., room 4621, Regional Office Building 3, Washington, DC. Hand-delivered Campus-Based Reallocation Forms will be accepted between 8 a.m. and 4:30 p.m. (Washington, DC. time) daily, except Saturdays, Sundays and Federal holidays. A Campus-Based Reallocation Form that is hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Campus-Based Reallocation Form and Information Package: Campus-Based Reallocation Forms and a CWS–CSL program information package will be mailed to all participating institutions by the Campus-Based Programs Branch in June. Each institution applying for 1991–92 supplemental allocations must submit the form in accordance with the instructions included in the package.

The CWS–CSL program information package is intended to aid applicants in applying for assistance under the CWS–CSL program. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantees performance requirements beyond those specifically imposed under the statute and regulations governing the program.

Applicable Regulations: Applicable regulations are 34 CFR part 675 (College Work-Study and Job Location and Development Programs), 34 CFR part 668 (Student Assistance General Provisions), 34 CFR part 82 (New Restrictions on Lobbying), 34 CFR part 85 (Government-Wide Debarement and Suspension (Nonprocurement and Government-Wide Requirements for Drug-Free Workplace (Grants)), and 34 CFR part 86 (Drug-Free Schools and Campuses).

FOR FURTHER INFORMATION CONTACT: For further information or to request a Campus-Based Reallocation Form, contact Ms. Gloria Easter, Chief, Financial Management Section, Division of Program Operations and Systems, Office of Student Financial Assistance, U.S. Department of Education, 400 Maryland Avenue, SW., (room 4621, ROB–3), Washington, DC 20202–5452. Telephone (202) 708–7741. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–377–8339. (In the Washington, DC 202 area code, telephone 708–9300 between a.m. and p.m., Eastern time.)

Progam Authority: 42 U.S.C. Sections 2751–2756a.

(Catalog of Federal Domestic Assistance No. 84.033, College Work-Study Program)

Dated: June 17, 1991.

Michael J. Farrell,

Acting Assistant Secretary for Postsecondary Educations.

DEPARTMENT OF ENERGY

Office of Fossil Energy

[FE Docket No. 91-25-NG]

Cascade Natural Gas Corp.; Order Granting Blanket Authorization to Import Canadian Natural Gas

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of an order granting blanket authorization to import Canadian natural gas.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order authorizing Cascade Natural Gas Corporation to import up to 56 Bcf of Canadian natural gas over a two-year period beginning on the date of first delivery after June 18, 1991.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, June 18, 1991.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

[FE Docket No. 91-28-NG]

Energy Marketing Exchange, Inc.; Application to Export Natural Gas to Canada and Mexico

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to export natural gas to Canada and Mexico.

SUMMARY: The Office of Fossil Energy of the Department of Energy (DOE) gives notice of receipt on April 8, 1991, of an application filed by Energy Marketing Exchange, Inc. (EME), requesting blanket authorization to export up to 73.1 Bcf of natural gas to Canada and up to 73.1 Bcf of natural gas to Mexico over a two-year period commencing with the date of first delivery. EME intends to use existing U.S. pipeline facilities which are interconnected with Canadian and Mexican pipeline facilities at various points on the U.S./Canadian and U.S./Mexican borders. EME states that it will submit quarterly reports detailing each transaction.

The application was filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., Eastern time, July 25, 1991.

ADDRESSES: Office of Fuels Programs, Fossile Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Charles E. Blackburn, Office fo Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–7751.

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, GC–14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–0503.

SUPPLEMENTARY INFORMATION: EME, a New Jersey corporation with its principal place of business in Edison, New Jersey, is a wholly-owned subsidiary of KCS Group, Inc., a Delaware corporation. EME has marketed gas to industrial end-users including electric utility companies and cogeneration facilities and to local distribution companies since early 1984. Affiliates of EME are engaged in the exploration for production, gathering, processing of natural gas in New Mexico, Texas, Louisiana, and New York.

EME anticipates that it will sell the requested natural gas volumes on a short-term or spot basis and that the contractual arrangements will be the product of arms-length negotiations with an emphasis on competitive prices and contract flexibility. EME requests authorization to export natural gas for its own account and for the accounts of

VOL 56 ISS 122 JE 25 1991 UMI

its U.S. suppliers and Canadian and Mexican purchasers.

The export application will be reviewed under section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In deciding whether the proposed export is in the public interest, domestic need for the natural gas will be considered, and any other issue determined to be appropriate, including whether the arrangement is consistent with DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they relate to the requested export authority. The applicant asserts that there is no current need for the domestic gas that would be exported under the proposed arrangement. Parties opposing this arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of EME's application is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on June 14, 1991.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–M

Financial Assistance: Cooperative Agreement with BP Research

AGENCY: Department of Energy.

ACTION: Notice of intent to negotiate a Cooperative Agreement with BP Research for Membrane/Distillation Hybrid Process Research & Development for Propane/Propene Separation at Reduced Energy Costs.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR.14 (e) it plans to award a Cooperative Agreement to BP Research. This is a new award for membrane/distillation hybrid process research and development for propane/propene separation at reduced energy costs. The BP Research application was submitted in response to a notice of Program Interest (NOPI) published in the Federal Register on July 26, 1990, and in the Commerce Business Daily on August 6, 1990. This unsolicited application has been accepted by DOE in accordance with DOE Financial Assistance Rules 10 CFR 600.14(e)(1)(i) and (ii). The Cooperative Agreement will have a three year project period for a cost of $7,449,850 with a DOE share of $2,099,850. The application is for the development of a unique facilitated transport membrane to selectively allow permeation of propylene molecules with retaining propane molecules. The BP proposal to develop molybdenum dimmers as facilitator for the membrane is a totally new approach to facilitated transport and is highly innovative. The application was evaluated and considered meritorious as the proposed concept has superior applicability and commercial potential to the U.S. petrochemical industry and the degree of industrial interest was found to be high. BP Research operates an excellent research laboratory and has a Pilot Plant suitable for onstream testing of the development process. The principal investigator, and co-principal investigator and the research team are highly qualified for the proposed research.

Contact: Department of Energy, Idaho Operations Office, attn: Ginger Sandwina, Contracts Management Division, 785 DOE Place, Idaho Falls, ID 83402–1129 (208) 526–8696.

Dated: June 17, 1991.

Dolores J. Ferri,

Director, Contracts Management Division.

BILLING CODE 6450–01–M

Office of Energy Research

Basic Energy Sciences Advisory Committee Open Meeting

Pursuant to the provision of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Basic Energy Sciences Advisory Committee (BESAC)

Date and Time: July 8, 1991—8 a.m.–5 p.m.; July 9, 1991—9 a.m.–12 noon

Place: Lawrence Berkeley Laboratory, One Cyclotron Road, Berkeley, California 94720, Building 50A, room 5132.

Contact: James S. Coleman, Department of Energy, Office of Basic Energy Sciences (ER–15), Office of Energy Research, Washington, DC 20585, Telephone: 301–353–3822.

Purpose of the Committee: To provide advice on the continuing basis to the Department of Energy (DOE) on the many complex scientific and technical issues that arise in the planning, management, and implementation of the research program for the Office of Basic Energy Sciences (BES).

Tentative Agenda: Briefings and discussions of:

July 8, 1991

- Report of Subcommittee on Combustion Research
- Other Subcommittee Reports
- Discussion of Letter to DOE
- Public Comment (10 Minute Rule)

July 9, 1991

- Further Discussion of Letter to DOE
- Other BESAC Business
- Public Comment (10 Minute Rule)

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact: James S. Coleman at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: The transcript of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on June 20, 1991.

Edwin F. Ings,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. CP91–2087–000; et al.]

Questar Pipeline Co., et al.; Natural gas certificate filings

June 18, 1991.

Take notice that the following filings have been made with the Commission:

1. Questar Pipeline Co.

[Docket No. CP91–2087–000]

Take notice that on May 23, 1991, Questar Pipeline Company (Questar), pursuant to section 7(c) of the Natural Gas Act, filed an application requesting permanent certificate authority to use the Texota Federal L No. 1 injection/withdrawal well in conjunction with the operation of Questar's Chalk Creek Underground Storage Reservior (Chalk Creek).

The Texota Federal L No. 1 well had previously been granted a limited certificate for a two year term in Docket No. CP89–1515–000. In the event that the requested authorizations are not in place prior to the expiration of the limited term certificate, Questar requests the Commission issue temporary authorization to provide for the use of the Texota well for Chalk Creek's upcoming 1991–1992 heating season.

Comment date: July 9, 1991, in accordance with Standard Paragraph F at the end of this notice.

2. Columbia Gulf Transmission Co.

[Docket Nos. CP91–2280–000, CP91–2281–000, CP91–2282–000, CP91–2283–000]

Take notice that on June 14, 1991, Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, filed in the above-referenced dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of shippers under its blanket certificate issued in Docket No. CP86–239–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[1]

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related ST docket numbers of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by Columbia Gulf and is summarized in the attached appendix.

Comment date: August 2, 1991, in accordance with Standard Paragraph G at the end of this notice.

[1] These prior notice requests are not consolidated.

Docket No. (date filed)	Shipper name (type)	Peak day, average day, annual MMBtu	Receipt [1] points	Delivery points	Contract date, rate schedule, service type	Related docket, start up date

3. Mojave Pipeline Co., Kern River Gas Transmission Co.

[Docket No.'s CP89–1–007, CP89–2048–005]

Take notice that on June 10, 1991, Mojave Pipeline Company (Mojave), 4520 California Avenue, suite 200, Bakersfield, CA. 93309, filed in Docket No. CP89–1–000, and Kern River Gas Transmission Company, P.O. Box 2511, Houston, TX 77252–2511, filed in Docket No. CP89–2048, (collectively known as applicants), pursuant to section 7(c) of the Natural Gas Act and subpart A of the regulations of the Federal Energy Regulatory Commission (Commission)

VOL 56 ISS 122 JE 25 1991 UMI

hereunder, for an amendment to the certificates of public convenience and necessity issued to Mojave and Kern River on January 24, 1990. Mojave Pipeline Co., 50 FERC 61,060. Applicant seeks to amend these certificates, as more fully set forth in the amendment to its application which is on file with the Commission and is open to public inspection.

Applicant seeks authorization to change a small section of the route along which it will construct its pipeline. Two segments of the proposed reroute, located near Bakersfield, California and totaling 1.3 miles in length, may not be within the corridors studied in the Mojave-Kern River-El Dorado Environmental Impact Statement (EIS). Applicant states that it wishes to undertake the reroute in order to comply with environmental mitigation measures mandated by the Commission and with the wishes of the City of Bakersfield. Applicant therefore seeks Commission authorization to construct its facilities in the area not studied in the EIS.

Comment date: July 9, 1991, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 91-15015 Filed 6-24-91; 8:45am]

BILLING CODE 6717-01-M

[Docket Nos. CP91-2206-000, et al.]

Tennessee Gas Pipeline Co., et al; Natural gas certificate filings

June 17, 1991.

Take notice that the following filings have been made with the Commission:

1. Tennessee Gas Pipeline Co.

[Docket No. CP91-2206-000]

Take notice that on June 7, 1991, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed an application in Docket No. CP91-2206-000, pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing it to transport, on a firm basis, an aggregate maximum quantity of 71,610 Dt daily on behalf of four shippers and to construct and operate pipeline facilities necessary to provide this service, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Tennessee proposes to provide an aggregate firm transportation service of 71,610 Dt per day on behalf of Lockport Energy Associates, L.P. (Lockport), Dartmouth Power Associates Limited Partnership (Dartmouth), Pepperell Power Associates Limited Partnership (Pepperell), and Boston Edison Company (Boston Edison). The shippers, quantities, receipt points, and delivery point are as follows:

Shipper	Maximum daily quantity (Dth per day)	Receipt point	Delivery point
Lockport	28,000	Gulf Coast	Lockport, NY.
Dartmouth	14,010	Wright, NY	Mendon, MA.
Pepperell	9,600	Niagara, NY	Tewksbury, MA.
Boston Edison	20,000	Gulf Coast	Mendon, MA.

Tennessee intends to commence service to Lockport, Dartmouth, and Pepperell on November 1, 1992. Service to Boston Edison is scheduled to commence on November 1, 1993.

In order to perform the contemplated transportation services, Tennessee intends to construct and operate facilities in two stages. For the service scheduled to commence in 1992, Tennessee proposes to construct and operate 18.25 miles of 30-inch mainline looping, 11.08 miles of 36-inch mainline looping, and a total addition of 3,100 horsepower of compression at two existing compressor stations. For the 1993 service, Tennessee proposes to construct and operate 9.59 miles of 30-inch mainline looping, 11.22 miles of 36-inch mainline looping, and an addition of 1,000 horsepower of compression at an existing compressor station. The estimated cost of these facilities is $72,702,000. Tennessee plans to initially finance these facilities with funds on hand, funds generated internally, borrowings under revolving credit agreements, or short-term financing which will be rolled into permanent financing.

Tennessee intends to provide the proposed transportation services under Rate Schedule NET-EU, which contains a single-part demand charge. The proposed demand charge is derived from the incremental cost of service associated with providing the transportation service to the four new shippers.

Comment date: July 8, 1991, in accordance with Standard Paragraph F at the end of the notice.

2. Northwest Pipeline Corporation

[Docket No. CP91-2246-000]

Take notice that on June 10, 1991, Northwest Pipeline Corporation (Northwest), P.O. Box 58900, Salt Lake City, Utah 84158-0900, filed in Docket No. CP91-2246-000 a request pursuant to §§ 157.205, 157.211 and 157.212 of the Commission's Regulations under the Natural Gas Act for authorization to construct and operate a proposed delivery meter, and for approval to reallocate a portion of Northwest Natural Gas Company (Northwest Natural) existing firm maximum daily delivery quantities under its blanket certificate issued in Docket No. CP82-433-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest states that Northwest Natural has requested Northwest to establish a new meter station, the Samon Creek Meter Station, to be located in Clark County, Washington. Northwest indicates that the new meter station would be used for firm gas sales service to Northwest Natural under Northwest's Rate Schedule ODL-1 and/or for transportation deliveries for the account of shippers for whom Northwest is, or will be, authorized to transport gas. The estimated cost of the Salmon Creek Meter Station is approximately $250,000.

Northwest states that to facilitate deliveries to the proposed Salmon Creek Meter Station, Northwest and Northwest Natural have revised the Exhibit A of the May 15, 1980 ODL-1 Service Agreement to add the new Salmon Creek delivery point and to reflect the proposed reallocation of 50,640 therms of maximum daily delivery quantities from the existing Camas delivery point located in Clark County, Washington to the proposed Salmon Creek delivery point.

Comment date: August 1, 1991, in accordance with Standard Paragraph G at the end of this notice.

3. Green Canyon Pipe Line Co., Viking Gas Transmission Co., Viking Gas Transmission Co., Natural Gas Pipeline Co., of America, Natural Gas Pipeline Co., of America, Natural Gas Pipeline Co., of America

[Docket Nos. CP91-2254-000,[1] CP91-2255-000, CP91-2256-000, CP91-2257-000, CP91-2258-000, CP91-2259-000]

[1] These prior notice requests are not consolidated.

Take notice that on June 11 and 12, 1991, Applicants filed in the above referenced dockets, prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under their blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicants and is included in the attached appendix.

Applicants state that each of the proposed services would be provided under an executed transportation agreement, and that the Applicants would charge rates and abide by the terms and conditions of the referenced transportation rate schedule(s).

4. Northwest Pipeline Corporation

[Docket No. CP91-2252-000]

Take notice that on June 11, 1991, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84158, filed in Docket No. CP91-2252-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) to partially abandon metering facilities at the existing Ritzville Meter Station (Ritzville) in Adams County, Washington, and to construct and operate upgraded metering facilities at Ritzville to replace those being abandoned, under Northwest's blanket certificate issued in Docket No. CP82-433-000 pursuant to section 7 of the Natural Gas Act, all as more fully detailed in the application which is on file with the Commission and open to public inspection.

Specifically, Northwest proposes to abandon the existing meter and to replace it with a meter with greater capacity. It is stated that the increase in capacity is needed to accomodate the increased needs of the Washington Water Power Company, for which Northwest provides firm sales and transportation services. It is explained that the existing facilities were installed by Pacific Northwest Pipeline Corporation, a predecessor of Northwest, in 1957 under Commission authorization in Docket No. G-12828. It is asserted that the proposed meter will provide a maximum station design capacity of 2,688 dt equivalent of natural gas per day. It is estimated that the cost of installing the new meter would be $24,795, which includes the $1,700 cost of removing the existing meter.

Comment date: August 1, 1991, in accordance with Standard Paragraph G at the end of this notice.

5. Texas Gas Transmission Corporation

[Docket No. CP91-2250-000]

Take notice that on June 11, 1991, Texas Gas Transmission Corporation (Texas Gas), P.O. Box 1160, Owensboro, Kentucky 42302, filed in Docket No. CP91-2250-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) to add and delete delivery points used to serve existing customers in Warrick County, Indiana, under Texas Gas' blanket certificate issued in Docket No. CP82-407-000 pursuant to section 7 of the Natural Gas Act, all as more fully detailed in the application which is on file with the Commission and open to public inspection.

Specifically, Texas Gas proposes to add delivery points to two existing customers, Boonville Natural Gas Corporation (Boonville) and Chandler Natural Gas Corporation (Chandler) and to delete the respective delivery points from a third existing customer, Ohio Valley Gas, Inc. (Ohio Valley). Texas Gas states that it would provide service to Boonville and Chandler pursuant to separate service agreements dated November 1, 1990. It is estimated that the Boonville delivery point would serve 6 residential customers receiving 6 MMBtu equivalent on a peak day and 870 MMBtu equivalent annually and that the Chandler delivery point would serve 76 customers receiving approximately 35 MMBtu equivalent on a peak day and 7,530 MMBtu equivalent annually.

It is asserted that the reason for the proposal is that both Boonville and Chandler have entered into sales agreements with Ohio Valley, dated October 25, 1990. It is explained that the delivery points would be deleted from Texas Gas' service agreement with Ohio Valley and would be added to Texas Gas' service agreements with Boonville and Chandler. It is stated that the proposed deliveries to Boonville and Chandler would be within their respective contract demands and that the service could be accomplished without detriment to Texas Gas' other existing customers.

Comment date: August 1, 1991, in accordance with Standard Paragraph G at the end of this notice.

6. South Georgia Natural Gas Co.; Southern Natural Gas Co.

[Docket Nos. CP91-2272-002; CP91-2273-000]

Take[3] notice that the above referenced companies (Applicants) filed in the above referenced dockets, prior notice requests pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under their blanket certificates issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by the Applicants and is included in the attached appendix.

The Applicants also state that each would provide the service for each shipper under an executed transportation agreement, and that the Applicants would charge the rates and abide by the terms and conditions of the referenced transportation rate schedules.

Comment date: August 1, 1991, in accordance with Standard Paragraph G at the end of this notice.

[3] These prior notices requests are not consolidated.

Docket No. (date filed)	Applicant	Shipper name	Peak day,[1] avg., annual	Points of [2] Receipt	Points of [2] Delivery	Start up date, rate schedule	Related [3] dockets

7. Columbia Gas Transmission Corporation

[Docket No. CP91-2253-000]

Take notice that on June 11, 1991, Columbia Gas Transmission Corporation (Columbia), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP91-2253-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for permission and approval to abandon a point of delivery to Mountaineer Gas Company (MGC), located on a non-jurisdictional production pipeline in the Rocky Fork Production Field, Kanawha County, West Virginia pursuant to United's blanket certificate issued in Docket No. CP83-76-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Columbia proposes to abandon a point of delivery to MGC for a tap consumer served directly from an existing gathering facility owned by Viking Energy, Inc, which is being abandoned due to the deteriorating condition of the line. Due to the condition of the line, Columbia states that the consumer is currently being provided alternative service from an existing MGC distribution line, located approximately 500 feet from the existing pipeline to be abandoned. It is stated that the proposed abandonment will not result in any abandonment of service to the consumer since MGC is responsible for providing and maintaining all necessary gas supplies and deliveries to the consumer.

Comment date: August 1, 1991, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 91-15016 Filed 6-24-91; 8:45 am]

BILLING CODE 6717-01-M

Western Area Power Administration

[Rate Order No. WAPA 49]

Rate Order—Boulder Canyon Project

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of a Rate Order for the Boulder Canyon Project power rates.

SUMMARY: Notice is given of the confirmation and approval by the Deputy Secretary of the Department of Energy (DOE) of Rate Order No. WAPA-49 and Rate Schedule BCP-F3 placing increased power rates in effect on an interim basis. The rates will remain in effect on an interim basis until the Federal Energy Regulatory Commission (FERC) confirms, approves, and places them in effect on a final basis for a 5-year period or until they are replaced by other rates.

VOL 56 ISS 122 JE 25 1991 UMI

COMPARISON OF EXISTING AND PROPOSED RATES

[Boulder Canyon Project]

Rate schedules	Existing BCP–F1	Proposed BCP–F3 [1]
Capacity Charge	$0.75/kW-month	$1.05/kW-month.
Energy Charge	3.410 mills/kWh	5.11 mills/kWh.
Composite Rate	6.813 mills/kWh	10.21 mills/kWh.

[1] Rate schedule BCP–F2 was never implemented.

The capacity component and the energy component of the rate reflect the Base Charge identified in 10 CFR part 904, Western Area Power Administration's (Western) General Regulations for the Charges for the Sale of Power from the Boulder Canyon Project, 51 FR 43124, November 28, 1986 (Western's 1986 General Regulations), which provides the basic revenue requirements for the Boulder Canyon Project (BCP).

The Lower Basin Development Fund Contribution Charge identified in Western's 1986 General Regulations, which provides for the contributions to the Lower Colorado River Basin Development Fund, consists of an additional energy rate of 4.5 mills per kilowatthour (kWh) to purchase in Arizona and 2.5 mills per kWh to purchasers in California and Nevada.

The Base Charge increase reflects significant increases in overall costs associated with future replacements and operation and maintenance (O&M) expenses.

EFFECTIVE DATE: In order to ensure sufficient cash balances in the Colorado River Dam Fund, the new rates will become effective on the first day of the first full billing period after 6/10/91, and will continue in effect pending the FERC's approval of them or substitute rates on a final basis for a 5-year period, or until superseded.

FOR FURTHER INFORMATION CONTACT:

Mr. Thomas A. Hine, Area Manager, Phoenix Area Office, Western Area Power Administration, P.O. Box 6457, Phoenix, AZ 85005–2453, (602) 352–2453.

Mr. Robert C. Fullerton, Director, Division of Marketing and Rates, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401–3398, (303) 231–1545.

Mr. Ronald K. Greenhalgh, Assistant Administrator for Washington Liaison, Western Area Power Administration, room 8G–061, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–5581.

SUPPLEMENTARY INFORMATION: By Delegation Order No. 0204–108, effective December 14, 1983 (48 FR 55664), as amended May 30, 1986 (51 FR 19744), reassigned by DOE notice 1110.29 dated October 27, 1988, and clarified by Secretary of Energy Notice SEN–10–89 dated August 3, 1989, and subsequent revisions, the Secretary of Energy delegated (1) the authority on a nonexclusive basis to develop long-term power and transmission rates to the Administrator of Western; (2) the authority to confirm, approve, and place such rates in effect on an intreim basis to the Deputy Secretary of DOE; (3) and the authority to confirm, approve, and place in effect on a final basis, to remand, or to disapprove such rates to FERC.

The proceeding for the proposed power rates and the associated customer consultation and comment period were initiated on October 25, 1990, with a notice in the **Federal Register** (55 FR 43026).

The October 25 notice announced a public information forum for November 15, 1990, and a public comment forum on November 30, 1990, with the consultation and comment to end January 28, 1991.

Western, in the "Notice of Proposed Power Rate Adjustment, Boulder Canyon Project," (55 FR 43026) October 25, 1990, because of projected cash-flow deficiencies in early future years, presented two rate proposals for consideration. One proposal set a level rate for the entire study period while the other proposal set a lower level rate for the entire study period with an additional revenue component for each of the fiscal years (FY) 1991–95. The BCP customers were asked to indicate which proposal they preferred, and the first rate proposal was identified.

During the comment period, Western received 10 comment letters on the BCP rate adjustment. At the November 30, 1990, public comment forum, six persons representing customers commented orally. Five major issues and several miscellaneous issues were raised. All public comments were considered in the preparation of the rate order. Western has concluded that the BCP rate adjustment is needed to meet cost-recovery criteria.

Some of the BCP customers have expressed concern about how project rates are currently determined. On February 20, 1991, at a customer's request, a meeting was held with customer representatives for the express purpose of considering how future project rate adjustments should be prepared and processed. Initially, the BCP customers, along with Western and the Bureau of Reclamation, will review the principles of ratesetting for the BCP. Subsequently, specific action will be proposed for incorporation in BCP ratesetting methodology, and Western will review and consider those proposals. Changes in policy and regulation will be considered in the overall process. Western will include in the next BCP rate adjustment any of the proposals that it has accepted at that time.

A power repayment study (PRS) is prepared annually in accordance with DOE Order RA 6120.2, Power Marketing Administration Financial Reporting. The existing power rates for BCP are based on the FY 1986 PRS. The FY 1990 Current PRS indicates that the existing rates do not yield sufficient revenue to staisfy the cost-recovery criteria through the study period.

In Rate Order No. WAPA–40, results of the proposed FY 1990 PRS are being compared to the FY 1986 PRS, which was the basis for the existing BCP rates. The comparison shows the following differences:

1. The projected O&M expenses for the 5-year budget period (FY 1991–95) have increased about $9.0 million per year, which reflects inflation and more appropriately considers the age and associated replacement requirements of the BCP.

2. Project replacement for the 5-year budget period (FY 1991–95) has increased about $32.5 million. This large increase reflects in part the difference in reporting methodology between the two PRS's, as well as the more recent recognitions of needed replacements.

3. The cost of the visitor facilities increased $38.1 million, reflecting the impact of inflation and some changes in features.

Rate Order No. WAPA–40, confirming and approving the BCP rate adjustment on an interim basis, is issued, and Rate Schedule BCP–F3 will be promptly submitted to the FERC for confirmation and approval on a final basis.

Issued in Washington, DC, June 10, 1991.

W. Hanson Moore,

Deputy Secretary.

Order Confirming, Approving, and Placing Boulder Canyon Project Power Rates in Effect on an Interim Basis.

June 10, 1991.

Pursuant to section 302(a) of the Department of Energy (DOE) Organization Act, 42 U.S.C. 7101, *et seq.*, the power marketing functions of the Secretary of the Interior and the Bureau of Reclamation (Reclamation), under the Reclamation Act of 1902, 43 U.S.C. 372, *et seq.*, as amended and supplemented by subsequent enactments,and particularly section 9(c) of the Reclamation Act of 1939, 43 U.S.C. 485(c), and acts and regulations specifically applicable to the Boulder Canyon Project, were transferred to and vested in the Secretary of Energy.

By Delegation Order No. 0204–108, effective Decembeer 14, 1983 (48 FR 55664), as amended May 30, 1986 (51 FR 19744), reassigned by DOE Notice 1110.29 dated October 27, 1988, and clarified by Secretary of Energy Notice SEN–10–89 dated August 3, 1989, and subsequent revisions, the Secretary of Eneregy delegated (1) the authority on a nonexclusive basis to develop long-term power and transmission rates to the Administrator of the Western Area Power Administration (Western); (2) the authority to confirm, approve, and place such rates in effect on an interim basis to the Deputy Secretary of DOE (Deputy Secretry); (3) and the authority to confirm, approve, and place in effect on a final basis, to remand, or to disapprove such rates to the Federal Energy Regulatory Commission (FERC). This rate order is issued pursuant to the delegation to the Administrator and the Deputy Secretary and the rate adjustment procedures at 10 CFR part 903, published in the **Federal Register** on September 18, 1985 (50 FR 37835).

Acronyms and Definitions

As used in this rate order, the following acronyms and definitions apply:

Adjustment Act	Boulder Canyon Project Adjustment Act, July 19, 1940, (43 U.S.C. 618, *et seq.*).
Annual Uprating Program Payments	Uprating Program contributions which were provided by various Boulder Canyon Project (BCP) contractors in accordance with the 1984 Act and are to be repaid with interest to those contractors by fiscal year (FY) 2017.
Base Charge	Charges made up of an energy component and a capacity component according to Western's 1986 General Regulations, § 904.7.
BCP	Boulder Canyon Project.
Capacity Component	Shown in power repayment study (PRS) as a dollar per kilowatt (kW) per year charge. Billed on a dollar per kW per month basis. Applied each billing period to each kW of rated output to which each contractor is entitled by contract.
Colorado River Basin Project Act	The Colorado River Basin Project Act, September 30, 1968 (43 U.S.C. 1501, *et seq.*).
Colorado River Dam Fund	A fund established by section 2 of the Boulder Canyon Project Act of 1928 which is to be used only for the purposes specified in the Boulder Canyon Project Adjustment Act of 1940, The Colorado River Basin Project Act of 1968, and the Hoover Power Plant Act of 1984.
Contribution Charge	Lower Basin Development Fund Contribution Charge is part of the rate schedule and is expressed in mills per kilowatthour (kWh), required by law to be included in the BCP rates.
Conformed Criteria	Conformed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects (49 FR 50582, December 28, 1984) beginning on June 1, 1987.
DOE Order RA 6120.2	Power Marketing Administration Financial Reporting guidelines.
Energy Component	Expressed in mills per kWh. Applied to each kWh made available to each contractor.
1941 General Regulations	General Regulations for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act.
Hoover Dam	The dam on the Colorado River which forms Lake Mead.
1984 Act	Hoover Power Plant Act of 1984, August 17, 1984 (43 U.S.C. 619, *et seq.*).
LCRBDF	Lower Colorado River Basin Development Fund—a fund established by the Colorado River Basin Project Act of 1968.
Pinch-point	The FY in which the level of the rate is set as dictated by a revenue requirement in some future year to meet relatively large annual costs or to repay investments which come due.
Project Act	Boulder Canyon Project Act, December 21, 1928 (43 U.S.C. 617, *et seq.*).
Proposed PRS	Establishes the revenues to be collected through a rate that the Administrator submits to the Deputy Secretary. Charges for capacity and energy rates will provide sufficient revenue to pay all annual costs plus required debt service.
PRS	Power repayment study.
Rate Brochure	Western Area Power Administration, Boulder Canyon Project, Proposed Power Rate Adjustment Brochure, Phoenix Area Office, October 1990. A document prepared for public distribution explaining the background of Western's rate proposal.
Reclamation	Bureau of Reclamation of the Department of the Interior.
Reclamation's 1986 General Regualtions	General Regulations for Power Generation, Operation, Maintenance, and Replacement at the Boulder Canyon Project, Arizona/Nevada, 43 CFR part 431, (51 FR 23980, July 1, 1986).
Western's 1986 General Regualtions	General Regulations for the Charges for the Sale of Power from the Boulder Canyon Project, 10 CFR part 904, (51 FR 43154, November 28, 1986).
Treasury	Secretary of the Department of the Treasury.
Uprating Program	Non Federally financed work to increase the capacity of the existing generating and associated electrical equipment at the BCP.
WAPA–40	Western Area Power Administration Rate Order No. WAPA–40 for BCP based on the FY 1990 PRS. WAPA–40 is the basis for the provisional rates.

VOL 56 ISS 122 JE 25 1991 UMI

Effective Date

The new rates will become effective on an interim basis on the first day of the first full billing period after June 10, 1991, and will be in effect pending the FERC's approval of them or substitute rates on a final basis for a 5-year period, or until superseded.

Public Notice and Comment

1. On October 25, 1990, a formal 95-day customer consultation and comment period was initiated with an announcement of the proposed rate adjustment published in the Federal Register at 55 FR 43020. That notice also announced a public information forum conducted November 15, 1990, and a public comment forum conducted November 30, 1990. Several informal meetings of BCP contractor representatives were held prior to the initiation of the formal rate proceeding. At those meetings PRS data and methodology to be utilized in the ratesetting process were closely reviewed.

2. A document entitled Western Area Power Administration, Boulder Canyon Project, Proposed Power Rate Adjustment, Brochure, October 1990, Phoenix Area Office (Rate Brochure), which provided information about the BCP rate adjustment, was handed out at the November 15, 1990, public information forum. By letter of November 20, 1990, the Rate Brochure was mailed to BCP customers and interested parties.

3. At the information forum held on November 15, 1990, Western representatives explained the need for the rate increase and answered questions.

4. The comment forum was conducted on November 30, 1990, to give the public an opportunity to comment for the record. Six persons representing customers made oral presentations. Ten comment letters were received during the 95-day comment period ending January 28, 1991. Formally submitted comments have been addressed in this rate order. Western has responded to the comments and has included the responses as part of the record.

Project History

The BCP was authorized for construction by the Boulder Canyon Project Act (Project Act) on December 21, 1928 (43 U.S.C. 617, *et seq.*). The Project Act provided for a dam to be built in the Black Canyon located on the Colorado River adjacent to the Arizona/Nevada border. The dam was built for the expressed purposes of (1) controlling the flooding in the lower regions of the Colorado River drainage system, (2) improving navigation of the Colorado River and its tributaries, (3) regulating the Colorado River, while providing storage and delivery of the stored water for the reclamation of public lands, and (4) generating electrical energy as a means of making the BCP a self-supporting and financially solvent undertaking. Congress authorized the Secretary of the Department of the Treasury (Treasury) to advance up to $165 million to the Secretary of the Interior to provide for the construction of the dam, powerplant, and related features; $25 million of the $165 million was allocated to flood control.

Construction of a dam in the Black Canyon of the Colorado River began in 1930, and the first generating unit of the powerplant went into service in 1937. Upon completion of the BCP facilities, power sales commenced, in accordance with the provisions of the Project Act, to contractors in the States of Arizona, California, and Nevada.

The Project Act was modified in 1940 by the Boulder Canyon Project Adjustment Act, July 19, 1940 (Adjustment Act), (43 U.S.C. 618 *et seq.*). The Adjustment Act, among other things, authorized the Secretary of the Interior to promulgate and to put into effect power rates based upon a repayment period from June 1, 1937, to May 31, 1987 (amended by the Hoover Powerplant Act of 1984 (1984 Act), August 17, 1984 (43 U.S.C. 619, *et seq.*)); to reduce the interest rate from 4 percent to 3 percent per annum on unpaid Treasury advances; to require annual payments to the States of Arizona and Nevada in lieu of taxes levied; and to defer without interest until June 1, 1987, the repayment of the $25 million allocated to flood control.

Subsequent and pursuant to the Adjustment Act, the Secretary of the Interior published and implemented the May 20, 1941, General Regulations for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act (1941 General Regulations) for the period ending May 31, 1987.

As the end of the 50-year term of the original contracts approached, controversy developed among the BCP contractors over renewal rights to BCP power, and litigation resulted. Compromises were reached and embodied in the 1984 Act.

The 1984 Act authorized an increase to the capacity of the existing generating and associated electrical equipment at the BCP. The work to accomplish this increase, referred to as the Uprating Program, was to be funded initially by advances from certain BCP contractors to Reclamation. Funds advanced would be returned to these contractors through credits on their monthly power bills. The 1984 Act also provided for advances from the Treasury for the improvement of visitor facilities at the BCP. The 1984 Act also requires that an additional charge of 4.5 mills/kWh be assessed on energy sales to Arizona and an additional charge of 2.5 mills/kWh be assessed on energy sales to California and Nevada; all revenue resulting from the additional charge (Lower Basin Development Fund Contribution Charge (Contribution Charge)) is to be transferred to the Lower Colorado River Basin Development Fund (LCRBDF). The Contribution Charge is not part of the PRS, but is included in the rate schedule.

Under the 1984 Act, the BCP's power was sold to 15 customers located in the States of Arizona, California, and Nevada in accordance with the Conformed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects (Conformed Criteria) (49 FR 50582, December 28, 1984), beginning on June 1, 1987.

Due to the numerous requirements set out in the 1984 Act and the earlier separation of the Federal responsibilities relating to Hoover Dam between Reclamation and Western, both agencies published new regulations governing their respective responsibilities at the BCP after June 1, 1987. Reclamation adopted 43 CFR part 431, General Regulations for Power Generation, Operation, Maintenance, and Replacement at the Boulder Canyon Project, Arizona/Nevada (Reclamation's 1986 General Regulations) (51 FR 23990, July 1, 1986). Western adopted 10 CFR part 904, General Regulations for the Charges for the Sale of Power from the Boulder Canyon Project (Western's 1986 General Regulations) (51 FR 43154, November 28, 1986). These regulations supersede the 1941 General Regulations, which terminated on May 31, 1987.

Power Repayment Study

In accordance with Western's 1986 General Regulations, Western and Reclamation developed the data utilized in the PRS. The purpose of the PRS is to project a level of annual revenues sufficient to repay all costs and obligations of the BCP during the repayment period in accordance with applicable laws, regulations, policies, and directives.

The BCP FY 1990 PRS on which the proposed rates are based was prepared following the Conformed Criteria, the 1984 Act, Power Marketing and Financial Reporting guidelines (DOE Order RA 6120.2) and the guidelines set out in Western's 1986 General Regulations. Western's 1986 General Regulations provided for a Base Charge for BCP power, made up of an energy component and a capacity component.

The energy component of the Base Charge is expressed in mills per kWh. This component is applied to each kWh made available to each contractor as provided for by contract, except for the energy purchased by Western at the request of a contractor to meet that contractor's deficiency in energy entitlement (pursuant to section 105(a)(2) of the 1984 Act and section F of the Conformed Criteria) and/or to reduce that contractor's Uprating Program credit carry forward as provided by contract.

The capacity component of the Base Charge is shown in the PRS as a dollar-per-kW-per-year charge. This is billed on a dollar-per-kW-per-month basis. The capacity component of the Base Charge is applied each billing period to each kW of rated output to which each contractor is entitled by contract. In addition, as required by the 1984 Act, Western's 1986 General Regulations provided for the Contribution Charge.

The Base Charge capacity and energy rates developed from the PRS are necessary to recover the costs associated with the BCP. The Contribution Charge as provided by the rate schedule is necessary to collect the revenues required by section 1543(c)(2) of the Colorado River Basin Project Act, September 30, 1968 (43 U.S.C. 1501, *et seq.*).

Existing and Proposed Rates for the Boulder Canyon Project

The existing power rates and the proposed power rates necessary to meet the revenue requirements for the BCP are listed below. These proposed rates will be in place for 5 years and are to become effective on an interim basis on the first day of the first full billing period after June 10, 1991.

COMPARISON OF EXISTING AND PROPOSED RATES, BOULDER CANYON PROJECT

	Existing	Proposed
Rate schedules	BCP-F1	BCP-F3
Capacity charge	$0.75/kW-month.	$1.05/kW-month
Energy charge	3.410 mills/kWh.	5.11 mills/kWh
Composite rate	6.813 mills/kWh.	10.21 mills/kWh

Certification of Rate

The Administrator of Western has certified that the BCP power rates are the lowest possible consistent with sound business principles. The rates have been developed in accordance with administrative policies, regulations, and applicable laws.

Discussion

The BCP is considered a single entity for financial and repayment purposes and the power generated by the BCP is marketed in the States of Arizona, California, and Nevada.

The rate adjustment would increase annual power revenues by $13.4 when FY 1990 is compared to FY 1992. The increase is necessary to satisfy the cost-recovery criteria as set forth in DOE Order No. RA 6120.2.

The existing and proposed revenue requirements for the BCP are as follows:

TOTAL POWER REVENUE

	Existing (FY 1990)	Proposed (FY 1992)
BCP power revenue	$31,232,765	$50,232,396

Note: Revenue for FY 1991 reflects a mixture of existing and proposed rates.

Statement of Revenue and Related Expenses

The following table provides a summary of revenue and expense data through the proposed rate-approval period.

COMPARISON OF 5-YEAR RATE PERIOD, REVENUES AND EXPENSES ($1,000)

	FY 1990 Rate Study 1991-95	FY 1986 Rate Study 1991-95	Difference
Total revenues	$244,314	$177,423	$66,891
Expenses:			
Operation and maintenance	99,562	54,760	44,802
Payments to States	3,000	3,000	0
Other	3,378	0	3,378
Annual uprating payments	[1] 76,946	[1] 88,157	(11,211)
Annual replacement payments	34,854	[1] 2,204	32,460
Interest	24,671	16,854	8,017
Total expense	242,221	164,775	77,446

[1] Not treated as an expense in FY 1986 rate study.
[2] Includes principal and interest.

Basis for Rate Development

The basis for charges for capacity and energy, generated and sold from the BCP, is set out in Western's 1986 General Regulations which provides for a Base Charge made up of an energy component and a capacity component.

Primary Issues—Public Comments

During the 95-day comment period, Western received 10 comment letters on the BCP rate adjustment, one of which included comments of two entities. At the November 30, 1990, public comment forum, six persons representing customers commented orally.

Written comments were received from the following sources:

Arizona Power Authority (Arizona)
Basic Management Incorporated (Nevada)
The City of Boulder City, Nevada (Nevada)
Colorado River Commission of Nevada (Nevada)
Lincoln County Power District No. 1 (Nevada)
Department of Water and Power of the City of Los Angeles (California)
Metropolitan Water District of Southern California (California)
Overton Power District No. 5 (Nevada)
Pioneer Chlor Alkali Company, Inc. (Nevada)
Southern California Edison Company (California)
Valley Electric Association, Inc. (Nevada)

Representatives of the following organizations made oral comments:

Arizona Power Authority (Arizona)
California cities of Anaheim, Azusa, Banning, Colton, and Riverside (California)

VOL 56 ISS 122 JE 25 1991 UMI

Colorado River Commission of Nevada (Nevada)
Department of Water and Power of the City of Los Angeles (California)*
Southern California Edison Company (California)

Most of the comments received at the public meetings and in correspondence throughout the 95-day customer consultation and comment period addressed the use of the pinch-point concept by the PRS and the associated future year surpluses, the cost of the visitor facilities, the treatment of replacements, perceived policy violations, and the function of a BCP engineering and oversight committee.

The comments and responses, at times paraphrased for brevity and consistency and at times quoted for essence, are discussed below.

Issue 1: Several contractors asked for implementation of the provisions of §§ 431.5 and 431.6 of Reclamation's 1986 General Regulations. Section 431.5 states, in part:

> Reclamation shall submit annually on or before April 15th to Western and Contractors, cost data, including one year of actual costs for the last completed fiscal year and estimated costs for the next 5 fiscal years, for operation, maintenance, replacements, additions and betterments, non-Federal funds advanced for the uprating program by non-Federal purchasers, and interest on and amortization of the Federal investment.

Section 431.6 states, in part:

> Reclamation shall submit annually on or before April 15th to Western and Contractors, an estimated annual operation schedule for the Hoover Powerplant showing estimated power generation and estimated maintenance outages * * *.

Also, there is the contention that § 431.5 cost data submitted by Reclamation should not be freely revised as to the costs subsequent to April 15.

Response: By April 15 of each year, Reclamation submits cost data to all Hoover contractors and Western, including 1 year of actual costs for the last completed fiscal year and estimates based on budget estimates for the next 5 fiscal years as required by Reclamation's 1986 General Regulations, § 431.5, and an estimated annual operation schedule showing estimated power generation and estimated maintenance outages as required by § 431.6.

Frequent revisions of costs have been made to reflect current costs and conditions. Often this was done as a result of concerns expressed by one or more BCP contractors. Limiting cost revision, while providing perceived consistency, would hinder the flow of information among the various parties interested in BCP financial activities.

Western expects the frequency of revisions of cost estimates to be discussed in the future by all concerned parties and agreement reached as to the need for and frequency of revisions.

Issue 2: It was pointed out that the budget on which the PRS is based lags behind, by up to 2 years, the time the rate determined by the PRS is placed in effect.

Response: There definitely is a lag between budget implementation and implementation of the rate adjustment. The sequence of events that creates the lag between budget formulation, budget implementation, and its use in the ratesetting PRS is as follows.

The FY 1990 PRS is prepared in December 1990. It utilizes the FY 1991 budget document, which is the most recent approved congressional budget (CB). The 1991 budget document is for the 5 years, FY 1991–95. Initial formulation of the FY 1991 budget took place in January 1989. The time elapsed from initial FY 1991 budget formulation and its use in the FY 1990 PRS is 24 months. The time elapsed between the preparation of the FY 1990 PRS and the implementation of a rate based on that PRS is about 12 months. The total time elapsed between the formulation of the FY 1991 budget and rate implementation is about 3 years. It should be recognized that from the budget's formulation in January of 1989 until its approval by Congress in March 1990, the budget was subject to change, thus the reason for using the most recent CB.

Issue 3: Concern was expressed about the need for documentation of the costs associated with the visitor facilities.

Response: The estimated cost for the visitor facilities at Hoover Dam, based upon 1983 prices, was $32,000,000. The facilities included two parking structures to accommodate 420 cars, 20 tour buses, and 80 recreational vehicles, two 50-passenger elevators, the road realignment, transmission tower relocations, and a visitor center. The current estimate based upon October 1991 prices is $69,000,000, or an increase of $37,000,000. The facilities as currently designed include only one multi level parking structure in lieu of the two structures originally conceived plus the addition of the interpretive materials (such as visual displays), an additional adit to a new penstock platform, a ventilation shaft, and a utility bore hole. It should be noted that the 1983 estimate includes the visitor center and parking structure as a single cost, whereas in the 1991 estimate the parking structure and visitor center, which includes the interpretive costs, are separated.

The noncontract costs associated with investigation, design and specifications, and construction supervision have increased from $6,468,000 in the 1983 estimate to $11,197,000 in the 1991 estimate, or a total of $4,797,000. For estimating purposes noncontract costs are computed based upon historical data as a percentage of the construction costs. The 1983 noncontract costs were estimated at 25 percent of the construction costs. The 1991 noncontract costs are currently estimated at approximately 20 percent of the construction costs.

Minor contracts, as listed in the 1991 estimate, are to cover contracts under $50,000 face value and contingencies on the major contracts. The 1983 estimated costs included the contingencies in the feature item. The estimated construction costs for each feature in the 1991 estimate were arrived at from actual contract costs, historical costs, or the estimated construction costs as provided by an architectural and engineering firm. Therefore, the $4,859,000 in minor contracts in the 1991 estimated cost are to cover unanticipated claims on ongoing contracts and/or cost overruns on unawarded contracts and other contracts under $50,000.

Issue 4: The ratesetting methodology, known as pinch-point, utilized by Western results in surplus revenue in some years. The pinch-point methodology should be clearly stated. Also, the use of pinch-point methodology and the resulting surplus revenue in the PRS is inconsistent with Western's 1986 Regulations, and Western's 1986 Regulations should be amended.

Response: The level of the rate is normally dictated by a revenue requirement in some future year to meet relatively large annual costs or to repay investments which come due. Such ratesetting future year is known as the PRS pinch-point, and will likely be greater than the rate necessary to meet revenue requirements of the years that follow. This is consistent with paragraph 10c of DOE Order RA 6120.2 which states in part that, "Revenue and cost estimates for the remaining years of the power system's repayment period should reflect price levels, rate levels, and contractual commitments consistent with conditions anticipated during the cost evaluation period." Often this results in the prepayment of debt and the accumulation of large amounts of surplus revenues by the end of the power system's repayment period. However, DOE Order RA 6120.2 also requires that Western review the adequacy of the current rates through the annual preparation of a PRS. Rates will then be adjusted, either upward or downward, as necessary and as administratively feasible, to insure that the revenue level satisfies all the criteria specified in Western's 1986 General Regulations.

The provisions of Western's 1986 General Regulations do not preclude the existence of surplus revenues. Section 904.5(a) of those regulations states in part that, "Western shall collect all electric service revenues from the project in accordance with applicable statutes and regulations and deposit such revenues into the Colorado River Dam Fund. All receipts from the project shall be available for payment of the costs and financial obligations associated with the Project."

Pinch-point methodology, even though it may result in surplus revenue in some future years, is a supportable approach for setting BCP rates. Western recognizes that such methodology is a concern of some of the BCP customers. Consequently, Western met with BCP customers on February 20, 1991, to discuss future ratesetting procedures and assumptions for the BCP. The February 20 meeting resulted in the formation of a customer/Western/Reclamation group to identify the principles of BCP ratesetting. Any change in BCP ratesetting will be reviewed for consistency with policy and regulation.

Issue 5: Various changes to the PRS were suggested as follows: The PRS should show subtotals at the end of the budget period and at the end of the contract period. The PRS columns should be reordered with revenue requirements shown, then resources, and finally rates. Western's PRS computer program needs to be changed with respect to the computation of column 25. The PRS should be modified to accommodate display of the carry-over balance in the revolving fund.

Response: The response to the above issues are in the order that the issues are presented.

Subtotals, if shown, in the PRS at the end of the budget period and at the end of the contract period would not be of value since they would include historical, as well as future, data. Consequently, Western has elected not to show any additional subtotals.

The PRS columns, as displayed, are similar to and consistent with the display for other Western projects, and there does not seem to be any overriding reason to change. Rates that might be shown annually would have no significance to the purpose of the PRS since the study sets rates on a long-term basis.

Western agrees that the data in column 25 is misleading for some years, as is the total after the last study year. However, the column 25 display does not impact the results of the PRS. Western will correct the display of column 25 before the next rate adjustment.

The suggestion that the PRS should be modified to accommodate display of the carry-over balance in the revolving fund will be considered by Western for implementation, but at this time the PRS has not been changed since this has policy implications for other revolving fund projects which should be coordinated and considered.

Issue 6: It was suggested that there was significant variation in operation and maintenance (O&M) cost from year to year for the BCP, and that these variations should be explained and documented. Also, it was suggested that O&M should incorporate an inflation factor for the entire period of the PRS.

Response: Year to year variation in O&M expense is not unusual and should, in fact, be expected. It should be recognized that O&M does not necessarily reflect a cost index, such as the consumer price index, but more so represents the wear and tear on equipment.

O&M expenses have been discussed in detail from time to time at the various customer meetings that preceded the formal rate adjustment activities. During the consultation and comment period, detailed O&M data was available at locations specified in the Federal Register that initiated the BCP rate adjustment.

Looking at the ratesetting PRS, the percent changes in total O&M from year to year vary from a high of 16.2 percent (1988 to 1989) to a low of minus 12.1 percent (1995 to 1996 and beyond). These variations seem to be well within what might be expected on a project as large and dynamic as Boulder Canyon.

Reclamation's budget guidelines do not presently allow for inflation to be factored into its budget documents. Western uses a 4-percent inflation factor for its budget. These budget documents are used for the first 5 future years in the PRS. Estimating the economic climate beyond 5 years is generally unreliable and, therefore, inflation is not applied to the out years of the PRS.

Issue 7: Several BCP contractors asked that the annual decreases of carry-over revenue shown in the column 47 of the PRS be explained. Also, several contractors requested an explanation of the difference between the carry-over in the PRS and the cash balance as indicated by Reclamation.

Response: The PRS indicates, in column 47 labeled "Cumulative Earned Surplus," a revolving fund carry-over balance at the end of FY 1988. These funds are available, and are used, to assist in meeting the future annual obligation of the project. During FY 1989 the total income to the project was not sufficient to pay all the annual expenses. A portion of the FY 1988 revolving fund carry-over was used to pay for the remaining annual expenses in FY 1989. The revolving fund carry-over balance at the end of FY 1989 was therefore reduced by the amount of the insufficiency. Again in FY 1990, the total income to the project was not sufficient to pay all of the annual expenses and the revolving fund was reduced by the amount of the FY 1990 insufficiency. The projected revenue and costs data for FY 1991 indicates that in addition to the total income, all of the remaining carry-over balance in the revolving fund at the end of FY 1990 will be needed to meet FY 1991 annual expenses.

It should be noted that the funds shown as year-end revolving fund carry-over balances were, for the most part, created by deferring, when permissible, all principal and interest payments on the project's investments. This procedure has been necessary to assure that sufficient funds would be available at the end of FY 1990 to prevent the project from becoming deficit during FY 1991.

The revolving fund carry-over balance at the end of FY 1990 reconciles to Reclamation's "cash" balance at the end of FY 1990. The PRS carry-over balance may be reconciled to Reclamation's cash balance by considering the difference between power sales and cash received and the difference between actual dollars expended and dollars obligated. The revenues shown in the PRS are reflective of actual power sales made during FY 1990, not "cash" received during FY 1990. Power sold during a month is billed the tenth of the following month, with payment due 20 days later.

Western then transfers this revenue to Reclamation. This results in about a 2-month lag between the actual sale of power as shown in the PRS and the receipt by Reclamation of the revenue associated with the sale. The PRS shows actual FY 1990 costs for completed activities, while Reclamation is required to reduce the "cash" available in the revolving fund by all obligations which have been incurred, including items such as undelivered orders and stores.

---

* Two representatives made oral comments, and one of them also commented, along with another person, for Southern California Edison Company.

VOL 56 ISS 122 JE 25 1991 UMI

Undelivered orders and store costs were not included in the PRS. To the extent practicable these costs will be included in the future studies.

Issue 8: Replacements Issues:

Issue: Replacements should not be annualized (i.e., expensed in the PRS). Such expensing of replacements is in violation of DOE Order RA 6120.2, paragraph 10.1, and inconsistent with section 5 of the Adjustment Act.

Paragraph 10.1 of DOE RA 6120.2 states:

> Future replacement costs will be included in repayment studies by adding the estimated capital cost of replacement to the unpaid Federal investment in the year each replacement is estimated to go into service, and adding it to the allowable unamortized investment. The capital cost of each replacement is determined by estimating the cost at current price levels of the new unit of property, less salvage, if any, at the end of the service life of the unit replaced. The allowable unamortized investment is developed by adding each year's investment as it goes into service and then deducting each increment of investment at the end of its allowable repayment period. Replacements should be accounted for separately from the original investment.

Section 5 of the Adjustment Act states:

> If at any time there shall be insufficient sums in the Colorado River Dam Fund to meet the cost of replacements, however necessitated, in addition to meeting the other requirements of this Act, or of regulations authorized hereby and promulgated by the Secretary, the Secretary of the Treasury, upon request of the Secretary of the Interior, shall readvance to the said fund, in amounts not exceeding, in the aggregate, moneys repaid to the Treasury pursuant to section 2(b) hereof, the amount required for replacements, however necessitated, in excess of the amount currently available therefore in said Colorado River Dam Fund. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums, not exceeding said aggregate amount, as may be necessary to permit the Secretary of the Treasury to make such readvances. All such readvances shall bear interest.

Response: While DOE Order RA 6120.2 allows for the capitalization of replacements, it also allows for replacements to be treated as an annual expense. DOE Order RA 6120.2 provides for including the cost of a replacement in the year it is placed in service, and adding such cost to the allowable unamortized investment. Where replacements are expensed, the replacement is recognized as a cost in the year it is placed in service, and paid for in that year. Further, the allowable unamortized investment of an expensed replacement would normally be zero.

The FERC, in its May 18, 1988, Order approving the rate study upon which Rate Schedule BCP–F1 was based, did not find fault with essentially expensing replacements at that time. Western does not feel that the FERC will change its position with this filing and find the expensing of replacements in violation of paragraph 10.1 of DOE Order RA 6120.2.

The above-cited statutory provision of section 5 of the Adjustment Act cited above does not require that all funds required for replacement work be readvanced from the Treasury; rather, the provisions allow for such readvancement from the Treasury where "* * * there shall be insufficient sums * * * to meet the cost of replacements * * *" (emphasis added). If Congress would have intended all replacement work to be funded by readvances from the Treasury, whether or not sufficient funds were available in the Colorado River Dam Fund, it could have easily provided for such a result. However, Congress did not require readvances for all replacement work, and Western declines to adopt such a position. The rates as set forth in this rate order will provide the necessary revenues to pay for the projected replacement work. Therefore, at this time it is not anticipated that a readvance is necessary.

Section 2 of the Adjustment Act clearly provides for the expensing of replacements for the BCP. The amendment of section 2 of the Adjustment Act, by the 1984 Act, significantly changed the financial treatment of the BCP by requiring that sufficient revenues be collected anually to pay for operation, maintenance, and replacements. Section 2, as amended by the 1984 Act, reads in part as follows:

> All receipts from the project shall be paid into the Colorado River Dam Fund and shall be available, without further appropriation, for:
>
> (a) Defraying the costs of operation (including purchase of supplemental energy to meet temporary deficiencies in firm energy which the Secretary of Energy is obligated by contract to supply), maintenance and replacements of, and emergency expenditures for, all facilities of the project, within such separate limitations as may be included in annual appropriations Acts * * *.

Comparing section 2 and section 5 of the Adjustment Act, it is apparent that section 2 provides for normal BCP financial operation utilizing revolving fund authority while section 5 deals with the special situation of an unusual or emergency deficiency in available funds.

The Deputy Secretary, by virtue of approval of these rates, recognizes that even if replacements are normally to be capitalized as a matter of policy, a deviation in this instance is justified as allowed in paragraph 1. of DOE Order RA 6120.2. Further, as described above, there are statutes that govern the issue, which is also recognized in the departmental order.

Issue: It was suggested that PRS should not include replacements after the end of the contract period (FY 2017) and that the cost of replacements with life extending beyond the end of the contract period should be prorated.

Response: DOE Order R.A. 6120.2, paragraph 10(1) begins, "Future replacement costs will be included in the repayment studies * * *." The FERC in its May 4, 1990, Order (Docket No. EF 89–5041–000) relating to the filing of proposed rates for Western's Parker-Davis Project, clearly interprets the above cited paragraph 10.1. to mean that replacement costs are to be included for the entire repayment study period. The United States has the responsibility to maintain BCP in a safe manner and in sound operating condition. Sound operation was expected during its first 50 years of operation and should likewise be expected during all future years. The plant's power resource is contracted from customer to customer over its life, even though the contracting entities may or may not remain the same from one contracting period to another. It would be unreasonable to expect that a new group of customers would receive a lesser facility than their predecessors. For these reasons, Western does not feel that not including replacements after the end of the contract period (2017) or prorating replacements with lives beyond the end of the contract period is acceptable.

Issue: By subsequently reducing the original level of replacements, there was acknowledgment of unwarranted replacements. In effect, this constituted a deviation on the intent of the Reclamation Act of 1939. Section 9(c) of the Reclamation Act of 1939 states, in part:

> Any sale of electric power or lease of power privileges, made by the Secretary in connection with the operation of any project or division of a project, shall be for such periods, not to exceed 40 years, and at such rates as in his judgment will produce power revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost, interest on an appropriate share of the construction investment at not less than three per centum per annum, and such other fixed charges as the Secretary deems proper * * *.

Response: It is true that replacement costs were reduced significantly as a result of interface among the various parties interested in the replacement program of the BCP. It is not unusual to take a close look at costs immediately prior to expending funds or when considering a rate adjustment. The close scrutiny that might result in a reduction in estimated costs does not constitute an acknowledgment of previous unwarranted costs or a deviation from the intent of the Reclamation Act of 1939 but rather reflects professional judgment and current project condition. Future costs are adjusted from time to time in order to accomplish optimization of the BCP within the confines of budget constraints and the various laws and regulations.

Issue: Replacements should not be made because of obsolescence or to maintain state-of-the-art status.

Response: The general concept is correct. Replacements that may appear to be made because of obsolescence or to maintain state-of-the-art status are usually made because of a lack of reliability and/or unavailability of spare parts. BCP replacements will continue to be closely monitored to ensure they are necessary and not made solely because of age or to maintain state-of-the-art status.

Issue: Repacement costs appears to be excessive.

Response: Prior to development of the proposed rate, replacement costs were closely scrutinized in a joint effort by Western, Reclamation, and the BCP contractors. For the first 5 future years of the PRS, replacements are projected to total about $34.7 million. Considering current dollars and the age of the project, the replacement cost over the next 5 years is well within expectations. The replacements included in the PRS are considered to be required to maintain project integrity and, therefore, are consistent with the operational responsibility of Reclamation and Western.

Issue 9: It was suggested that to help eliminate any cash-flow deficiency for the BCP, the repayment (inclusive of interest) at the current interest rate should be deferred for the air slots and the visitor facilities.

Response: The BCP is expected to be able to get through FY 1991 without experiencing a cash-flow deficiency. This has been achieved by deferring interest payments on the investments associated with the Dam and Appurtenant Works, Air Slots, and Flood Control, and to the extent practicable curtailing all nonessential activities. The PRS presented in the Rate Brochure deferred interest costs at the interest rate associated with the individual investment. However, in the Provisional Rate PRS the deferred interest costs are at the current Treasury interest rate in effect at the time the deferment occurs. This is consistent with Western's ratesetting policy.

Issue 10: It was suggested that a current audit should be performed for the BCP.

Response: At this time, neither Western nor Reclamation is contemplating having an audit of the BCP performed. It is felt that the accounting for the project is in accordance with Western and Reclamation instructions and regulations. However, the BCP will be part of the Western-wide audits that will be conducted periodically. The initiation of a new process, in FY 1987, has required significant adjustments in Western, Reclamation, and customer interface. The extent of public involvement and the complexities of the work demand that new processes be developed. Accordingly, all of these parties have agreed to cooperate in a effort to resolve the various concerns regarding the accounting and ratesetting of the BCP.

Issue 11: It was suggested that the BCP's Engineering and Oversight (E&O) Committee's role be defined and that part of its role would be to have the authority to participate in budget formulation for the BCP. Also, it was suggested that the role of the E&O Committee should be formalized in a letter agreement. Further, the E&O Committee should act as a facilitator of communications.

Response: Prior to this time, the E&O Committee functioned somewhat informally. Likewise, the role of the E&O Committee is not the subject of formal agreement. Western feels that the E&O Committee's work to date has been beneficial to all parties involved with the BCP rate adjustment. It seems appropriate to formalize the existence and role of such committee. It should be recognized that the involvement of Reclamation with the E&O Committee would likely be even greater than that of Western. Consequently, Reclamation would be expected to take the lead in any E&O Committee activity. While Western feels that the E&O Committee could facilitate communications and assure thorough coordination of issues, among all parties, Reclamation and Western have the ultimate decision making authority in budget formulation for the BCP.

Issue 12: It was proposed that Western's policy regarding the use of forced payments should be clearly established, and that forced payments are beneficial and should be documented for each power repayment study in which they are applied.

Response: Western's policy is to utilize forced payments to the extent they result in a rate that is the lowest possible consistent with sound business principles. Documentation of forced payments does occur within the PRS and is part of the supporting and analytical printout of the study. Consequently, Western does not believe there is a need for additional identification of forced payments in the PRS.

Issue 13: The treatment of the cost of pressure relief valve repair as an extraordinary expense was questioned.

Response: All expenditures for the BCP are broken down into O&M, replacements, additions, or extraordinary maintenance. Anything that requires a considerable amount of money to repair or renovate, but is not being replaced, is categorized as extraordinary maintenance. Pressure relief valves are included in this category since each valve will require up to $200,000 to rebuild, using large amounts of labor and material to repair cavitation and replacement of necessary removable parts. Work is planned on two valves (one in each wing of the powerplant) each year in connection with necessary turbine work.

Issue 14: It was suggested that certain data required by the FERC's filing requirements (18 CFR 300, specifically sections 11(b)(3)[vi], 11(b)(5)(ii) and 11(b)(5)(iii)) be provided to the customers during the consultation and comment period.

Response: These sections are part of the required technical support for the rate schedule that is made up of statements A through F. Statements A through F are not prepared until after the close of the consultation and comment period. The source of these statements, except F, is the PRS. While the statements are not available to interested parties during the consultation and comment period, the PRS is available. The information that appears in the sections mentioned in this issue can be readily developed by a user of that PRS. As stated later in this Rate Order under Availability of Information, the entire record of this rate adjustment, including statements A–F, is available for public review.

Issue 15: It has been proposed that there be immediate establishment of a BCP rate for 1 year in lieu of the usual implemention of a long-term rate in accordance with standard procedures. Further, during that year, issues associated with the BCP rate process and financial management would be

VOL
56
ISS
122
JE
25
1991
UMI

resolved leading to the implementation of a long-term rate.

Response: If there was a pressing need for the immediate implementation of a rate for a short term, Western feels that such rate implementation could and would be accomplished. However, at the present time there is no need to utilize a rate for a short term, and BCP rate implementation is following the normal process.

Issue 16: Two contractors felt that their requests for information were not responded to. The requestors and the dates of request are Colorado River Commission of Nevada, November 6, 1990; and Lincoln County Power District No. 1, January 9, 1991.

Response: A November 6, 1990, letter from the Colorado River Commission was a "Request for copies of Phoenix Area Project's budget and financial data" for purposes of the "analysis of the cost of service for the Federal power resources." The request did not mention in its subject line or within the letter the proposed power rate adjustment for the BCP. Since the Colorado River Commission did not indicate that its request for data was focusing on the BCP rate adjustment, Western did not treat it as part of the rate activity and responded to the request by letter of January 28, 1991.

Lincoln County Power District's (District) request of January 9, 1991, specifically referenced the BCP rate adjustment and asked that the response be provided by January 24, 1991, to their consultant.

Western's response was by faxogram on January 24, 1991, sent to the District's consultant as had been specified by the January 9, 1991, letter.

Western feels it has properly and adequately responded to both requests of information. The record of decision for the BCP Rate Adjustment, as required by § 300.10(f)(2) of 18 CFR 300, does not include letters related to Colorado River Commission's request of November 6, 1991, since that request was not related to the BCP rate adjustment. However, the District's request of January 9, 1991, and related documents are included because it was BCP rate adjustment related.

It should be recognized that the Notice of Proposed Power Rate Adjustment, Boulder Canyon Project, (55 FR 43026) October 25, 1990, states under Availability of Information that, "All brochures, studies, comments, letters, memorandums, and other documents made or kept by Western for the purpose of developing the proposed rate are and will be available for inspection and copying at the Boulder City Office, located at the address noted above."

Western, to the extent that it is able to do so, willingly provides rate adjustment documents and data in response to oral or written requests.

Issue 17: A plan was proposed which would require each contractor to deposit its pro rata share of a stated annual contribution in a replacement escrow account in the contractor's name, to be invested "* * * and to be available for requisition by Reclamation for replacements, all in a manner similar to requisitions from escrow accounts for investments in the uprating program. The amounts so collected would be excluded from revenue requirements to be met by rates."

Response: Western agrees that this proposal might be a viable alternative approach to providing funds that could be applied to BCP replacements. Such an approach could, at some future date, be considered for incorporation in the financial management of the BCP.

Issue 18: It was recommended that joint agency procedures should be agreed to between Western and Reclamation detailing the financial forecasting/rate development process. These procedures should establish specific requirements and time tables for accomplishment of the requirements by both Western and Reclamation. Also, a concern was expressed that there is a lack of coordination of data flow between Reclamation and Western.

Response: Since the creation of Western, there has been close coordination between Western and Reclamation. While there exists no specific written procedures for such coordination for the BCP, aside from §§ 431.5 and 431.6 of Reclamation's 1986 General Regulations and the agreement dated March 28, 1980, between Reclamation and Western, the flow of information between the two agencies has been freely and willingly exchanged.

Western is open to further discussions with regard to the possible formalization of procedures with Reclamation.

Issue 19: Western can and should utilize a shorter ratesetting period, while still forecasting revenue requirements over the total 55-year planning period. A shorter period for establishing rates is consistent with DOE Order RA 6120.2, which requires the annual preparation of power repayment studies, and FERC filing requirements, § 300.1(b)(6) of 18 CFR 300, which limits the confirmation and approval period by FERC of Western's rates to 5 years.

Response: Paragraph 10a of DOE Order RA 6120.2 does provide for publication annually of a PRS. However, the annual publication is for the purpose of determining the need for a rate adjustment rather than being a vehicle for setting rates for a short period of time.

While § 300.1(b)(6) of 18 CFR 300 states that the rate approval period must not exceed 5 years, the apparent purpose is to provide a period of time that would limit the use of any one rate without reevaluation.

Further, an annual rate adjustment would add to project cost and would be exceedingly time consuming.

For these reasons, Western does not feel that a shorter ratesetting period, while still forecasting revenue requirements over the life of the study, is supported by either DOE Order RA 6120.2 or 18 CFR 300.

Issue 20: It is felt that Reclamation and Western have duplicated costs when going from historical costs to budget costs. In explanation, one comment was:

> Certain contracts issued in FY 1989 were not completed by fiscal year end. Since the work was not complete, the 1990 budget included the same work not completed in 1989, even though the funds for such projects were obligated in 1989. Thus, amounts shown as expenditures in the 1990 budget will not actually be spent. Their duplication of amounts causes the FY 1990 estimated costs to be overstated.

Further, it was stated that both Reclamation and Western need to take responsibility for seeing to it that actual expenditures conform to the budget.

Response: Funds available for a specific contract may be totally obligated in a particular fiscal year and only partially expended due to slippage in contractor scheduling or other reasons. An unliquidated obligation would then be carried forward into the next fiscal year for the unexpended portion of the obligation. These unliquidated obligations are then available until expended. However, the PRS does reflect the use of funds until that year in which the associated facility is completed. Therefore, there is no duplication and costs are not overstated.

The timing factor mentioned above also impacts the relationship between actual expenditures and budgeted amounts. However, the desirability of having a close match of actual dollars to those budgeted is fully recognized and is a goal that both Western and Reclamation continously strive to achieve.

Issue 21: It was stated that "One of the major items making up extraordinary maintenance is office remodeling. Out of a total of $6.9 million to be spent between 1991 and 1995, almost half is for office remodeling * * *"

Response: The $6.9 million of extraordinary maintenance, with almost half for office remodeling, is an amount that has been revised. Presently, for the BCP there is about $400,000 in office remodeling out of approximately $5,000,000 of total extraordinary maintenance expense from FY 1991 through FY 1995.

Issue 22: Certain law, policy, and regulation related to the setting of rates for the BCP were cited as not being appropriately considered and/or applied. Those cited were: DOE Order R.A.6120.2, paragraphs 6a, 8, 10a, and 10f; the Adjustment Act, section 5; Reclamation's 1986 General Regulations, §§ 431.5 and 431.6; Western's 1986 General Regulations, FERC's filing requirements, 18 CFR 300; the 1984 Act; and the Reclamation Act of 1939, section 9(c).

Response: Law, policy, and regulation listed in this issue have been specifically addressed in responding to the various other issues of this rate order. However, any continuing perceived infractions will be further reviewed and discussed with the BCP contractors and other interested parties.

Environmental Evaluation

In compliance with the National Environmental Policy Act of 1969 (NEPA), Council on Environmental Quality (CEQ) Regulations (40 CFR parts 1500 through 1508), and DOE guidelines published in the **Federal Register** on December 15, 1987 (52 FR 47662), Western conducts and environmental evaluation of proposed rate adjustments.

Western prepared an environmental assessment (EA) for the proposed rate adjustment. The EA documented only economic impacts for the proposed action, and found no significant impacts to the human environment as defined by the CEQ. Based on the information included in the EA, DOE issued a finding of no significant impact on May 3, 1991.

Executive Order 12291

DOE has determined that this is not a major rule within the meaning of the criteria of section 1(b) of Executive Order 12291. In addition, Western is exempt from sections 3, 4, and 7 of that order, and therefore will not prepare a regulatory impact statement.

Availability of Information

Information regarding this rate adjustment, including studies, comments, letters, memorandum, and other documents made or kept by Western for the purpose of developing the power rates is available for public review at the Phoenix Area Office, Western Area Power Administration, Division of Power Rates and Statistics, 615 43d Avenue, Phoenix, Arizona 85009–5313, telephone: (602) 352–2525; Division of Marketing and Rates, Western Area Power Administration, 1627 Cole Boulevard, Golden, Colorado 80401–3398; and the Office of the Assistant Adminstrator for Washington Liaison, Western Area Power Administration, room 8G–061, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585–0001.

Submission to FERC

The rates herein confirmed, approved, and placed in effect on an interim basis, together with supporting documents, will be submitted to the FERC for confirmaiton and approval on a final basis.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective the first day of the first full billing period after June 10, 1991, Rate Schedule BCP–F3. This rate schedule shall remain in effect on an interim basis pending the FERC confirmation and approval of them or substitute rates on a final basis for a period of 5 years, or until it is superseded.

Issued At Washington, DC, June 10, 1991.

W. Henson Moore,

Deputy Secretary.

[Rate Schedule BCP–F3, Supersedes Rate Schedule BCP–F1 and Rate Schedule BCP–F2 which was not implemented]

Schedule of Rates for Power Service

Effective

On the first day of the first full billing period after June 10, 1991.

Available

In the marketing area served by the Boulder Canyon Project.

Appplicable

To power customers served by the Boulder Canyon Project supplied through one meter at one point of delivery, unless otherwise provided by contract.

Character and Conditions of Service

Alternating current, 60 hertz, three-phase, delivered and metered at the voltages and points established by contract.

Monthly Rate

Capacity Charge: The Base Charge capacity rate is $1.05/kW-month for each kW of rated capacity to which each contractor is entitled by contract during the billing period.

Energy Charge: The Base Charge energy rate is 5.11 mills/kWh for each kWh measured or scheduled at the point of delivery during the billing period, except for purchased power.

Lower Basin Development Fund Contribution Charge

The Lower Basin Development Fund Contribution Charge is 4.5 mills/kWh for each kWh measured or scheduled to an Arizona purchaser and 2.5 mills/kWh for each kWh measured or scheduled to a California or Nevada purchaser, except for purchased power.

Billing for Unauthorized Overruns

For each billing period in which there is a contract violation involving an unauthorized overrun of the contractual power obligations, such overruns shall be billed at 10 times the above base charge capacity and energy rates. The Lower Basin Development Fund Contribution Charge shall be applied also to each kWh of overrun.

Adjustments

None.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–398–4]

Fossil Fuel-Fired Utility Steam Generating Units; Acid Rain Provisions

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: This notice is to inform the public and affected utility units that EPA has prepared guidance and a submittal form for elections under section 406 of the Clean Air Act as amended by the Clean Air Act Amendments of 1990. Section 406(a) provides that Governors may elect "bonus" allowances for fossil fuel-fired utility steam generating units within "clean" states, which are in lieu of any other bonus allowances that an eligible unit would receive under section 405. EPA has sent this guidance to the Governors of each state most likely to be affected by section 406. These states are Arizona, Arkansas, California, Colorado, Louisiana, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Vermont, and Wyoming, based on the

VOL
56
ISS
122
JE
25
1991
UMI

most recent draft of the National Allowance Data Base (NADB).

DATES: Governors must notify the Administrator by sending the appropriate submittal form (or sufficient information as outlined in the submittal form) to EPA by June 30, 1991. The Governor's notification may either declare an election of bonus allowances or may defer the election of bonus allowances until publication of the final database. Governors that do elect at this time will have an opportunity to revise their elections upon publication of the final National Allowance Data Base in December, 1991.

Failure to provide the necessary notification (either an election or affirmative deferral) to EPA by June 30, 1991 will result in EPA determining the choice most beneficial to all the fossil fuel-fired steam generating units in the State.

ADDRESSES: Copies of the guidance and submittal forms are available upon request at the following location: U.S. Environmental Protection Agency, Acid Rain Division, ANR-445, 401 M Street, SW., Washington, DC 20460, Attention: Clean States.

Completd forms (signed by the Governor) may be sent to the same location.

FOR FURTHER INFORMATION CONTACT: Kathy Barylski, Acid Rain Division, at the above address; telephone (202) 382-3677, (FTS) 382-3877.

SUPPLEMENTARY INFORMATION: Acid rain occurs when sulfur dioxide and nitrogen oxide emissions are transformed in the atmosphere and return to earth in rain, fog or snow. Approximately 17 million tons of $SO2$ were emitted in 1985 by electric utilities. Acid rain damages lakes, harms forests and buildings, contributes to reduced visibility, and is suspected of damaging health.

The Acid Rain control program adopted in title IV of the Clean Air Act Amendments of 1990 (Pub. L. 101-549) will result in a permanent 10 million ton reduction in sulfur dioxide (SO_2) emissions from 1980 levels. The centerpiece of the acid rain control program is an innovative market approach in which emission allowances are transferable, allowing market forces to govern their ultimate use. To be in compliance with the Act, affected sources (mainly electrical utilities) are required to hold an amount of emission allowances at least equal to their annual emissions. Existing sources, and some other sources as provided in the amendments, will receive an initial allowance allocation. If a source reduces it emissions more than required, it will have left-over allowances that it can sell to another source. This would allow the other source to emit more then otherwise allowed under title IV while remaining in compliance. Such allowance transactions will achieve total emissions reductions in the most cost-effective way.

Title IV is implemented in two phases. Phase I runs from 1995 to 2000 and affects 261 units which are specifically listed in the Act. Phase II begins in 2000 and is permanent. It affects most utility units that emit SO_2. Also, units not explicitly affected by Phase II requirements may opt into the allowance system.

Section 406 of the Act provides bonus allowances for "clean" states at the election of such states' Governors. States which, in 1985, had a state-wide average sulfur dioxide emission rate for all fossil fuel-fired utility units of 0.8 pounds per million British Thermal Unit (lb/mmBtu) or less are considered clean states. EPA has not yet determined which states are eligible because the National Allowance Data Base (NADB), which will support such a determination, is not final. However, from the draft database and assuming that states which had an average 1985 emission rate of less than 0.8 lb/mmBtu may be eligible under section 406 in the final database, the following states are most likely to be eligible: Arizona, Arkansas, California, Colorado, Louisiana, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Vermont, Wyoming.

The bonus allowances in section 406 are in lieu of other bonus allowances provided under section 405. If the Governor of an eligible state does not make an election to choose calculations under sections 405 and 406 (that is, if the Governor does not notify EPA of a choice by June 30, or if the Governor does not make the election following publication of the final database in December when that Governor has, as of June 30, affirmatively deferred the election until publication of the final database), then, as provided by section 403(a)(1) of the Act, EPA will determine which of sections 405 and 406 provides more allowances for the State Determinations by the Administrator regarding State eligibility for this election, unit eligibility for bonus allowances under section 406, and, in the absence of a Governor's election, the elections that would provide the greatest benefit to units in the State will be proposed in December, 1991. Because the database upon which the Governors' decisions are based is not yet complete, EPA will allow Governors to affirmatively defer their elections until publication of the final database or to change their elections based upon the final database, which will be available in December, 1991, if the Governors' decisions would be significantly affected by changes in the database.

To ensure adequate notice to all potentially eligible units, EPA has chosen to provide this notice.

The guidance and submittal form provided today are designed to further the requirements of the Paperwork Reduction Act by reducing the burden upon Governors in responding to section 408 of the Clean Air Act as amended by the Clean Air Act Amendments of 1990. Also, the submittal form does not go beyond the necessary notification required by the Act. Submittal of notification to EPA by June 30, 1991 is mandated under the Clean Air Act Amendments of 1990.

Dated: June 19, 1991.

William K. Reilly,

Administrator.

[FRL-3967-6]

Clean Air Act Advisory Committee; Open Meetings

SUMMARY: On November 8, 1990, the U.S. Environmental Protection Agency (EPA) gave notice of the establishment of a Clean Air Act Advisory Committee (CAAAC) (55 FR, 46993, No. 217). This Committee was established pursuant to the Federal Advisory Committee Act (5 U.S.C. app I) to provide advice to the Agency on policy and technical issues related to the development and implementation of the requirements of the Clean Air Act Amendments of 1990.

OPEN MEETING DATES: Notice is hereby given that the Clean Air Act Advisory Committee will hold an open meeting on July 25, 1991 from 8:30 a.m. to 4 p.m., at the Washington Hilton Hotel, 1919 Connecticut Avenue, NW., Washington, DC. Seating will be available on a first come, first served basis but should be fully adequate for all members of the public interested in attending.

The meeting will include a discussion of the status of Clean Air Act implementation efforts, the role of voluntary air pollution reduction and pollution prevention opportunities in the Clean Air Act.

INSPECTION OF COMMITTEE DOCUMENTS: Documents relating to the above noted topics will be publicly available at the meeting. Thereafter, these documents, together with the CAAAC meeting minutes will be available for public inspection in EPA Air Docket No. A-90-39 in room 1500 of EPA Headquarters 401 M Street, SW., Washington, DC. Hours of inspections are 8:30 a.m. to 12 noon and 1:30 to 3:30 p.m. Monday through Friday.

ADDITIONAL MEETING DATES: The next scheduled meeting dates for the CAAC are: October 24, 1991 and January 16, 1992. These meetings will also be held at the Washington Hilton Hotel.

FOR FURTHER INFORMATION CONTACT: Concerning the CAAAC or its activities please contact Mr. Paul Rasmussen, Designated Federal Official to the Committee at (202) 382-7430, FAX (202) 245-4185, or by mail at U.S. EPA, Office of Program Management Operations (ANR-443), Office of Air and Radiation, Washington, DC 20460.

Dated: June 18, 1991.

Jerry Kurtzweg,

Acting Assistant Administrator, Office of Air and Radiation.

[FR Doc. 91-15059 Filed 6-24-91; 8:45 am]

BILLING CODE 6560-50-M

Science Advisory Board; Ecological Processes and Effects Committee and Environmental Engineering Committee; Open Meetings; July 16-18, 1991

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that two meetings of the Science Advisory Board will be held in tandem at the U.S. EPA Environmental Research Laboratory, 200 SW 35th St., Corvallis, OR 97333. The first meeting will be a review of Wetlands Research by the Wetlands Research Subcommittee of the Ecological Processes and Effects Committee. This meeting will start at 8:30 a.m. on July 16, and will adjourn no later than 2 p.m. July 17. The second meeting will be a review of research for constructed wetlands by the Constructed Wetlands Subcommittee of the Environmental Engineering Committee. This meeting will begin at 3 p.m. on July 17 and will adjourn no later than 5 p.m. on July 18, 1991. Both meetings are open to the public. Seating will be on a first come basis.

The main purpose of the first meeting is to review a Five Year Research Plan for Wetlands Research that has been developed by the Agency's Office of Research and Development. This research is intended to support the on-going needs of the regulatory programs within the Office of Water. Copies of the relevant EPA documents pertaining to the wetlands research review are available from Dr. Eric Preston at the EPA Corvallis Laboratory, (503) 757-4601.

The main purpose of the second meeting is to review the Agency's research plan for constructed wetlands and to provide advice on the broad spectrum of engineering, ecological and environmental issues which play a role in constructed wetlands activities. Copies of the relevant EPA documents pertaining to the constructed wetlands review are available from Mr. Donald Brown at the EPA Cincinnati, Ohio Laboratory (513) 569-7630.

Agendas for both meetings are available from Mrs. Marcy Jolly, Staff Secretary, Science Advisory Board (A101F), U.S. Environmental Protection Agency, Washington DC 20460 (202-382-2552). Members of the public desiring additional information should contact either Dr. Edward S. Bender, Designated Federal Official, Ecological Processes and Effects Committee, or Dr. K. Jack Kooyoomjian, Designated Federal Official, Environmental Engineering Committee by telephone at the number noted above or by mail to the Science Advisory Board (A101F), 401 M Street, SW., Washington, DC 20460 no later than c.o.b. July 8, 1991. Anyone wishing to make a presentation at the meeting should forward a written statement to the appropriate Designated Federal Official by the date noted above. The Science Advisory Board expects that the public statements presented at its meetings will not be repetitive of previously submitted written statements. In general, each individual or group making an oral presentation will be limited to a total time of ten minutes.

Dated: June 11, 1991.

Sam R. Rodenberg,

Acting Director, Science Advisory Board.

[FR Doc. 91-15055 Filed 6-24-91; 8:45 am]

BILLING CODE 6560-50-M

[FRL-3968-2]

Science Advisory Board; Environmental Health Committee; Open Meeting

Under Public Law 92-463, notice is hereby given that a meeting of the Environmental Health Committee of the Science Advisory Board will be held on July 17-18, 1991 at the One Washington Circle Hotel, One Washington Circle NW., Washington DC 20037. The hotel telephone number is (202) 872-1680.

The meeting will start at 9 a.m. on July 17, and will adjourn no later than 5 p.m. July 18, and is open to the public. The main purpose of this meeting is to review the draft document "Formaldehyde Risk Assessment Update," developed by the Agency's Office of Toxic Substances (The review will address several issues, including the weight-of-evidence support for classifying formaldehyde as a probable human carcinogen (Category B 1), the use of DNA protein cross-link data in the risk assessment of formaldehyde, and the use of the available epidemiological data). Copies of the formaldehyde document, and technical information on this topic may be obtained from Dr. Mary Henry (CTS 796) U.S. EPA, Office of Toxic Substances, 401 M St., SW., Washington DC 20460 (Telephone number 202-382-4301). This document is not available from the Science Advisory Board.

On day two of the meeting (July 18), the Committee will discuss plans and subjects for reviews to be carried out during Fiscal Year 1992, and will consider what specific skills and disciplines might be added to the Committee membership to support the planned reviews.

An Agenda for the meeting is available from Mary Winston, Staff Secretary, Science Advisory Board (A101F), U.S. Environment Protection Agency, Washington DC 20460 (202-382-2552). Members of the public desiring additional information about the conduct of the meeting should contact Mr. Samuel Rondberg, Executive Secretary and Designated Federal Official, Environmental Health Committee, by telephone at the number noted above or by mail to the Science Advisory Board (A101F), U.S. EPA, 401 M Street, SW., Washington, DC 20460. Anyone wishing to make a presentation at the meeting should forward a written statement to Mr. Rondberg by July 8, 1991. The Science Advisory Board expects that the public statements presented at its meetings will not be repetitive of previously submitted written statements. In general, each individual or group making an oral presentation will be limited to a total time of ten minutes.

Dated: June 18, 1991.

Sam Rondberg,

Acting Staff Director, Science Advisory Board.

TSCA Chemical Testing; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

VOL 56 ISS 122 JE 25 1991 UMI

ACTION: Notice.

SUMMARY: This notice announces the receipt of test data on 1,1,1-trichloroethane (CAS No.71–55–6), submitted pursuant to a consent order under the Toxic Substances Control Act (TSCA). Publication of this notice is in compliance with section 4(d) of TSCA.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. E–543B, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD (202) 544–0551.

SUPPLEMENTARY INFORMATION: Under 40 CFR 790.60, all TSCA section 4 consent orders must contain a statement that results of testing conducted pursuant to these testing consent orders will be announced to the public in accordance with section 4(d).

I. Test Data Submission

Test data for 1,1,1-trichloroethane were submitted by the Halogenated Solvents Industry Alliance pursuant to a consent order at 40 CFR 799.5000. They were received by EPA on May 28, 1991. The submission describes the neurotoxicologic examination of rats exposed to 1,1,1-trichloroethane vapor for 13 weeks. Health effects testing is required by this test rule. This chemical is used as a cleaning stabilizer.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of submissions.

II. Public Record

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPTS–44572). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 12 noon, and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays in the TSCA Public Docket Office, rm. NE–G004, 401 M St., SW., Washington, DC 20460.

Authority: 15 U.S.C. 2603.

Dated: June 18, 1991.

Charles M. Auer,

Director, Existing Chemical Assessment Division, Office of Toxic Substances.

FEDERAL MARITIME COMMISSION

Port Authority of New York and New Jersey; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–003930–004.

Title: Port Authority of New York & New Jersey/Universal Maritime Services Corp. Terminal Agreement.

Parties: Port Authority of New York & New Jersey, Universal Maritime Services Corp. (UMS).

Synopsis: The Agreement, filed June 17, 1991, amends the basic agreement to provide the terms for UMS' construction of a certain facility at the Red Hook Container Terminal and to revise the parties' termination rights.

Dated: June 20, 1991.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 91–15085 Filed 6–24–91; 8:45 am]

BILLING CODE 6730–01–M

American Transport Lines, Inc., et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 212–010386–017.

Title: Argentina/U.S. Atlantic Coast Agreement.

Parties: American Transport Lines, Inc., Empresa Lineas Maritimas Argentinas S.A., A. Bottacchi S.A. de Navegacion C.F.I.I., Companhia de Navegacao Lloyd Brasileiro, Van Nievelt, Goudriaan & Co., (Holland Pan American Line), Reefer Express Lines Pty., Ltd., Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck (Columbus Line).

Synopsis: The proposed amendment would delete Van Nievelt, Goudriaan & Co. (Holland Pan American Line) and Reefer Express Lines Pty., Ltd. as parties to the agreement. It would also adjust pool shares among the remaining parties as required by the withdrawal provisions of the Agreement.

Agreement No.: 212–010386–018.

Title: Argentina/U.S. Atlantic Coast Agreement.

Parties: American Transport Lines, Inc., Empresa Lineas Maritimas Argentinas S.A., A. Bottacchi S.A. de Navegacion C.F.I.I., Companhia de Navegacao Lloyd Brasileiro, Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck (Columbus Line).

Synopsis: The proposed amendment would provide criteria for crediting a party's sailing obligations when carrying cargo under space charter, and it would clarify that charter revenue earned from space charter will not be subject to the pool.

Agreement No.: 212–010386–019.

Title: Argentina/U.S. Atlantic Coast Agreement.

Parties: American Transport Lines, Inc., Empresa Lineas Maritimas Argentinas S.A., A. Bottacchi S.A. de Navegacion C.F.I.I., Companhia de Navegacao Lloyd Brasileiro, Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck (Columbus Line).

Synopsis: The proposed amendment would delete provisions of the Agreement which conflict with the Commission's rules concerning the notice and waiting period required prior to the effectiveness of agreement modifications.

Agreement No.: 212–010386–020.

Title: Argentina/U.S. Atlantic Coast Agreement.

Parties: American Transport Lines, Inc., Empresa Lineas Maritimas Argentinas S.A., A Bottacchi S.A. de Navegacion C.F.I.I., Companhia de Navegacao Lloyd Brasileiro, Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck (Columbus Line).

Synopsis: The proposed amendment would provide additional detail with respect to the procedure (and liability) for chartering space as permitted under the authority of the agreement and require semi-annual reporting to the Commission on the space chartering activity undertaken pursuant to this authority. The proposed amendment would also permit the parties to agree upon the deployment, scheduling and utilization of their vessels subject to this Agreement, and to cooperate with respect to shoreside services.

By Order of the Federal Maritime Commission.

Dated: June 19, 1991.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

The Board of Commissioners of New Orleans, et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10220. Interested parties may submit protests or comments one each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 560.602 and/or 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No: 224–200533.

Title: The Board of Commissioners of the Port of New Orleans/Dupuy Storage & Forwarding Corporation.

Parties: The Board of Commissioners of the Port of New Orleans (Board); Dupuy Storage & Forwarding Corporation (Dupuy).

Filing Party: Ms. Julie Ann Berrone; Staff Attorney, Port of New Orleans, P.O. Box 60046, New Orleans, LA 70160.

Synopsis: The Agreement, filed June 17, 1991, provides for the Board to lease to Dupuy 60,800 square feet or the Perry Street Wharf facility for a period of two years. Dupuy shall use the facility for the loading and unloading of cargo from vessels, barges, and other watercraft, warehousing, stevedoring and related purposes; and pay the Board a base rent of $91,200.00 for the first year with a five percent increase beginning the second year. All applicable charges except for demurrage and shedddage charges shall be paid in accordance with the Board's Dock Department Tariff.

By Order of the Federal Maritime Commission.

Dated: June 19, 1991.

BILLING CODE 6730-01-M

Tariffs of Certain Common Carriers by Water; Suspension

This is to give Notice that the Commission is suspending the tariffs (listed in the attachment) of certain common carriers by water operating in the United States trades for twelve months effective June 19, 1991.

On May 20, 1991, the Commission issued an Order adopting, and remanding in part the Initial Decision in Docket No. 89-27, *Martyn Merritt, AMG Services, Inc. d/b/a Ariel Maritime Group and Ariel Maritime, Oasis Express Line, Javelin Line, Trans Africa Line, Coast Container Line, Buccaneer Line, and Union Exportadora Lines-Possible Violations of Sections 10(a)(1) and 10(b)(1) of the Shipping Act of 1984.* That Order directed that the tariffs of Oasis Express Line, Javelin Line, Coast Container Line*, Trans AfricaLine, Buccaneer Line*, and Union Exportadora Lines* be suspended for a period of twelve months. This suspension is effective June 19, 1991. The Commission also ordered that no respondent, officer, employee, agent, subsidiary, division or successor of any respondent in Docket No. 89-27 may file any tariff to provide transportation of cargo by water between the United States and any foreign country for a period of twelve months.

Finally, the Commission directed that any tariff which is found to provide any continuation of services offered by any respondent, subsidiary, division or successor to any respondent shall likewise be suspended during the twelve month period.

For further information concerning this matter contact Bryant L. VanBrakle, Acting Director, Bureau of Domestic Regulation at (202) 523-5796.

Joseph C. Polking,

Secretary.

*Certain tariffs published by Sterling Maritime Ltd. dba Coast Container Line (FMC-1 & 3), Sterling Maritime Ltd. dba Union Exportadora Lines (FMC-5) and Charles Klaus and Co. Ltd. dba Buccaneer Line (FMC-1) were voluntarily cancelled in April, 1991.

*Since certain tariffs published by Sterling Maritime Ltd. dba Coast Container Line (FMC-1 & 3), Sterling Maritime Ltd. dba Union Exportadora Lines (FMC-5), and Charles Klaus and Co. Ltd. dba Buccaneer Lines (FMC-) were voluntarily cancelled, they are not included in this list.

**There are slight differences between the carrier names on the two Maritimo Comercio Empresa S.A. dba Javelin Line tariffs as well as on the two tariffs of Maritimo Comercio Empresa S.A. dba Trans Africa Line. The title page of Javelin FMC-6 indicates that Javelin Line is the trade name, while on FMC-7 Javelin Lines is shown as the trade name. The title page of Trans Africa FMC-1 shows Commercio being spelled with one "m," while Commercio appears with two "mm's" on the title page of FMC-2.

FEDERAL TRADE COMMISSION

[File No. 911-0046]

Alpha Acquisition Corp., et al.; Proposed Consent Agreement with Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, RWE, a corporation based in Germany, to grant the required technology license, and establish other required agreements, subject to prior Commission approval, within six months of the date of the final order, or else consent to the appointment of a trustee to effectuate these requirements. In addition, for ten years, RWE would be required to obtain prior FTC approval before acquiring any entity that manufactures, distributes, or sells high-purity alumina, with sales in the U.S. of 125,000 pounds or more in any six-month period.

DATES: Comments must be received on or before August 26, 1991.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Marc Schildkraut, FTC/S-3302, Washington, DC 20580. (202) 326-2622.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(i) of the Commission's rules of practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order

The Federal Trade Commission ("the Commission"), having initiated an investigation of the proposed acquisition by Alpha Acquisition Corp., a wholly-owned subsidiary of RWE-DEA Aktiengesellschaft fur Mineraloel und Chemie, which in turn is a partially-owned subsidiary of RWE Aktiengesellschaft (hereinafter collectively "RWE"), of all of the issued and outstanding common stock of Vista Chemical Company (hereinafter "Vista"), which acquisition is more fully described at paragraph 6 below, and RWE and Vista having been furnished with a copy of a draft complaint that the Bureau of Competition has presented to the Commission for its consideration and which, if issued by the Commission, would charge RWE and Vista with violations of the Clayton Act and Federal Trade Commission Act, and it now appearing that RWE and Vista are willing to enter into an agreement containing an order to make available through license certain patents, technology, and knowhow, to cease and desist from certain acts and providing for other relief:

It is hereby agreed by and between RWE, by its duly authorized officers, and counsel for the Commission and by and between Vista, by its duly authorized officers, and counsel for the Commission that:

1. Proposed respondent Alpha Acquisition Corp. is a corporation organized, existing and doing business under and by virtue of the laws of Delaware, with its principal office and place of business at Uberseering 40, 2000 Hamburg 60, Federal Republic of Germany.

2. Proposed respondent RWE-DEA Aktiengesellschaft fur Mineraloel und Chemie is a corporation organized and existing under the laws of Germany, with its principal office and place of business at Uberseering 40, 2000 Hamburg 60, Federal Republic of Germany.

3. Proposed respondent RWE Aktiengesellschaft is a corporation organized under the laws of Germany, with its principal office and place of business at Kruppstrasse 5, 4300 Essen 1, Federal Republic of Germany.

4. Proposed respondent Vista Chemical Company is a corporation organized, existing and doing business under and by virtue of the laws of Delaware, with its principal office and place of business at 900 Threadneedle, Houston, Texas 77224.

5. RWE and Vista admit all the jurisdictional facts set forth in the attached draft of complaint. This admission is solely for the purposes of this agreement, the order contemplated by this agreement, any modification of the order or other proceeding related to the order, any action relating to a possible violation of this agreement or the order contemplated by this agreement, or any action relating to a possible violation of any law administered or enforced by or on behalf of the Commission in connection with the Acquisition (as hereinafter defined).

6. On December 13, 1990, RWE and Vista entered into an Agreement and Plan of Merger whereby RWE would make a tender offer to purchase all of the issued and outstanding shares of Common Stock of Vista (hereinafter the "Acquisition").

7. RWE and Vista each waives:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

c. All rights to seek judicial review or otherwise challenge or contest the validity of the order entered pursuant to this agreement; and

d. All rights under the Equal Access to Justice Act.

8. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify RWE and Vista, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

9. This agreement is for settlement purposes only and does not constitute an admission by RWE or Vista that the law has been violated as alleged in the draft of complaint hereto attached.

10. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to RWE and Vista, (1) issue its complaint corresponding in form and substance with the draft of complaint attached hereto and its decision containing the following Order to cease and desist, which also provides for the licensing of certain technology and other relief in disposition of the proceeding, and (2) make information public with respect thereto. When so entered, the Order shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The Order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to Order to RWE counsel, and to Vista's address as stated in this agreement shall constitute service. RWE and Vista each waives any right they may have to any other manner of service. The complaint may be used in construing the terms of the Order, and no agreement, understanding, representation or interpretation not contained in the Order or this agreement may be used to vary or contradict the terms of the Order.

11. RWE and Vista have each read the draft of complaint and Order contemplated hereby. RWE and Vista each understands that once the Order has been issued, each will be required to file one or more compliance reports showing that each has fully complied with the Order. RWE and Vista each further understands that each may be liable for civil penalties in the amount provided by law for each violation of the Order after it becomes final.

Order

I

As used in this Order, the following definitions shall apply:

(A) *Acquisition* means the agreement and Plan of Merger entered into on December 13, 1990, by which RWE agreed to make a tender offer for all of the issued and outstanding shares of Vista common stock.

(B) *Alumina Joint Venture* means the joint venture established pursuant to either paragraphs IV or VI of this Order, between RWE and the Licensee.

(C) *Automotive Emissions Control Catalysts* means catalysts that are employed to provide a catalytic process to control the release of emissions in automotive systems.

(D) *Chemical Catalysts* means catalysts that are useful in chemical synthesis processes, excluding catalysts used solely for petroleum refining applications other than (1) catalytic reforming catalysts, (2) isomerization catalysts, and (3) any other petroleum refining catalyst applications which Vista internally delineates as chemical catalyst applications for purposes of alumina pricing.

(E) *Commission* means the Federal Trade Commission.

(F) *Construct* includes the building of a new facility or modifying of an existing facility.

(G) *High-Purity Alumina* means all grades and types of alumina produced or sold by Vista as of the date that this

VOL
56
ISS
122
JE
25
1991
UMI

Order is accepted by the Commission for public comment.

(H) *Hold Separate Agreement* means the Agreement to Hold Separate, attached hereto and made a part hereof as Appendix I.

(I) *Joint Venture Alumina* means all grades and types of Catapal B and Catapal CF, other grades of Vista alumina used in Chemical Catalysts and Automotive Emission Control Catalysts, and alumina slurry which the joint venture may use, directly or indirectly, exclusively for the production of Sol Gel Abrasives, in each case manufactured by Vista at its Lake Charles plant as of the date of this Order is accepted by the Commission for public comment.

(J) *Lake Charles Plant* means Vista's alcohol-alumina co-production facility located at Vista's Lake Charles Chemical Plant, Old Spanish Trail Road, Westlake, Louisiana.

(K) *Licensee* means the person licensed pursuant to paragraphs II, III, or VI of this Order.

(L) *License Agreements* means the Vista Agreement and RWE License Agreement.

(M) *North America* means the United States and its territories and possessions.

(N) *On-purpose* refers to a plant the principal output of which is alumina or alumina alkoxide.

(O) *Or* includes "any" and may have either disjunctive or conjunctive meaning; provided, however, that in sentences where "or" is preceded by "either," "or" has only disjunctive meaning.

(P) *Precipitated Alumina* means alumina obtained generally by precipitating dissolved aluminum trihydrate (also known as "gibbsite"), then usually followed by filtering, washing and spray-drying the resulting alumina.

(Q) *RWE* means RWE Aktiengesellschaft, RWE–DEA Aktiengesellschaft fur Mineraloel und Chemie, and Alpha Acquisition Corp., their predecessors, subsidiaries, divisions, groups and affiliates controlled by RWE Aktiengesellschaft, RWE–DEA Aktiengesellschaft fur Mineraloel und Chemie, and Alpha Acquisition Corp., and their respective directors, officers, employees, agents, and representatives, and their respective successors and assigns.

(R) *RWE License Agreement* means a License Agreement pursuant to which RWE Technology and RWE Patent Rights are licensed to the Licensee in accordance with paragraphs II, III, or VI of this Order.

(S) *RWE Patents Rights* means any patent existing or patent application pending, in each case as of the date that this Order is accepted by the Commission for public comment, in the United States relating to RWE's process for On-purpose production of aluminum alkoxide for use in High-Purity Alumina, or similar aluminas. For the purposes of this definition, RWE excludes Vista.

(T) *RWE Tecnology* means all general and specific information known to RWE prior to the date this Order is accepted by the Commission for public comment, relating to: (1) Design, construction, and operation of an On-purpose aluminum alkoxide production facility and (2) production of aluminum alkoxide at an On-purpose facility producing High-Purity Alumina or similar alumina, in each case including (but not limited to) all technical information, data, specifications, drawings, design and equipment specifications, manuals, engineering reports, manufacturing designs and reports, operation manuals, and formulations. For purposes of of this definition, RWE excludes Vista.

(U) *Sol Gel Abrasives* means the class of abrasives or abrasive grains that employ high dispersible alumina as a raw material, and are used in certain industrial processing applications.

(V) *Vista* means Vista Chemical Company, its predecessors, subsidiaries, divisions, groups and affiliates controlled by Vista and their respective directors, officers, employees, agents, and representatives, and their respective successors and assigns.

(W) *Vista License Agreement* means a License Agreement pursuant to which Vista Technology and Vista Patent Rights are licensed to the Licensee in accordance with paragraphs II, III, or VI of this Order.

(X) *Vista Patent Rights* means any Vista patent or patent application pending, in each case, as of the date that this Order is accepted by the Commission for public comment, in the United States relating to the production of or applications for Vista's High-Purity Alumina except thickeners, ceramics (excluding Sol Gel Abrasives), and aluminas not produced in commercial quantities (excluding Sol Gel Abrasives).

(Y) *Vista Technology* means all general and specific information known the Vista prior to the date this Order is accepted by the Commission for public comment relating to: (1) Design, construction, and operation of an On-purpose High-Purity Alumina production facility, (2) production at an On-purpose High-Purity Alumina production facility of High-Purity Alumina, except thickeners and ceramics (excluding Sol Gel Abrasives), and aluminas not produced in commercial quantities (excluding Sol Gel Abrasives), and (3) the processing of aluminum alkoxide or alumina slurry into all grades of alumina powder, alumina sol or colloidal alumina for use in all applications except thickeners, ceramics (excluding Sol Gel Abrasives), and aluminas not produced in commercial quantities (excluding Sol Gel Abrasives). Such technology shall include, but shall not be limited to, all technical information, data, specifications, drawings, design and equipment specifications, manuals, engineering reports, manufacturing designs and reports, operating manuals, and formulations.

II

It is ordered That not later than six (6) months after the date this Order becomes final, RWE shall, absolutely and in good faith, grant a perpetual license of Vista Technology, Vista Patent Rights, RWE Technology, and RWE Patent Rights for the purposes of producing in North America and marketing High-Purity Alumina or similar aluminas to a person that obtains the prior approval of the Commission and only in a manner and pursuant to License Agreements that receive the prior approval of the Commission. Such License Agreements shall permit the Licensee to (1) design, construct or operate one On-purpose-alumina production facility utilizing the RWE Technology or RWE Patent Rights and one or more alumina production facilities utilizing the Vista Technology or Vista Patent Rights and (2) enter into a joint venture or other arrangement controlled by the Licensee with any partners for the purpose of designing, constructing, financing or operating alumina production facilities; provided, however, if at any time after three (3) years from the date of the formation of the Alumina Joint Venture the Licensee has not commenced construction of an alumina production facility, then the Licensee may (i) sublicense to a third party (the "Minority Partner") the right to design, construct, or operate one alumina production facility and (ii) enter into a joint venture or other arrangement controlled by the Licensee with the Minority Partner for the exclusive purpose of selling and marketing all or substantially all the alumina produced by the alumina production facility designed, constructed, or operated by the Minority Partner pursuant to such sublicense, subject, in each case, to the approval of RWE, which approval shall not be unreasonably withheld; provided, further, that RWE need not approve such sublicense unless the Licensee enters into a joint venture or other arrangement pursuant to clause (ii) above and agrees to forgo the construction of any alumina production facility during the term of the Alumina Joint Venture unless the sublicense is terminated prior to the construction or operation of the Minority Partner's alumina production facility. The purpose of granting such License Agreements is to establish the licensee as a viable competitor in the market for High-Purity Alumina or similar aluminas and to remedy the lessening of competition resulting from the Acquisition as alleged in the Commission's complaint. Nothing in this Order shall prohibit the License Agreements from containing the following provisions:

(A) A provision prohibiting assignment before construction of an alumina production facility; provided, however, that the Licensee may assign all of its rights under both License Agreements (1) to any person who is under the control of the owners of such Licenses and, if the Alumina Joint Venture has not been terminated prior to such assignment, to the managing partner of the Alumina Joint Venture, or (2) to any party, approved by RWE, which approval shall not be unreasonably withheld, to whom the Licensee shall also sell its interest in the Alumina Joint Venture pursuant to paragraph IV. (G) of this Order. The party so approved for the assignment shall thereafter be the "Licensee" pursuant to this Order.

(B) A provision prohibiting assignment of the License Agreements after the construction of one or more alumina production facilities described in paragraph II of this Order except by the Licensee to (1) any person who is under the control of the owners of such Licenses or (2) any owners of each such alumina production facility; provided, however, that in no event may any License Agreement be assigned to a person who does not own an alumina production facility utilizing applicable technology and patent rights licensed under such License Agreement in accordance with paragraph II of this Order.

(C) A provision prohibiting the Licensee from disclosing Vista Technology, Vista Patent Rights, RWE Technology or RWE Patent Rights to any non-licensee, except if such non-licensee needs to know, and agrees to restrict the use of, such information for the purpose of designing, constructing, financing the construction of, or operating one or more alumina production facilities.

It is Further Ordered That, in the event the first Licensee who has held the Licenses for four (4) years either does not, within four (4) years of the date of the grant of the licenses set out in paragraph II of this Order, commence construction of an alumina production facility utilizing RWE Technology, RWE Patent Rights, Vista Technology or Vista Patent Rights, or does not complete construction within six (6) years of the date of the grant of the licenses set out in paragraph II of this Order, or the Alumina Joint Venture terminates for any reason other than those set out in paragraph IV.(A) of this Order ("failure dates"), RWE shall grant new licenses, or shall cause the granting of new licenses, to a new Licensee within six (6) months of the first such failure date, under the terms and conditions set out in paragraph II of this Order and may terminate the perpetual licenses granted under paragraph II of this Order.

IV.

It is Further Ordered That at the same time it grants the licenses under paragraph II of this Order, RWE shall absolutely and in good faith, enter into an Alumina Joint Venture and an agreement to supply Joint Venture Alumina consistent with paragraphs IV. (A) through IV.(M) of this Order with a Licensee that obtains the prior approval of the Commission and only in a manner that receives the prior approval of the Commission. The purposes of the Alumina Joint Venture and supply agreement are to impart the practical, technological and business skills the Licensee may need to produce and sell High-Purity Alumina or similar aluminas, to establish the Licensee as a viable competitor in the market for High-Purity Alumina or similar aluminas, and to remedy the lessening of competition resulting from the Acquisition as alleged in the Commission's complaint.

(A) The initial term of the Alumina Joint Venture shall be four (4) years; provided, however, the Alumina Joint Venture term shall be extended at the request of the Licensee for two (2) additional years if the Licensee has started construction of a High-Purity Alumina or similar alumina manufacturing facility within the first four (4) years; provided, further, the Alumina Joint Venture shall in all events terminate no later than sixty (60) days after the Licensee has finished construction and commenced commercial operation of either (1) an alumina production facility utilizing the Vista Technology, Vista Patent Rights, RWE Technology or RWE Patent Rights or (2) a Precipitated Alumina production facility.

(B) Upon thirty (30) days prior notice to the Commission, RWE also may terminate the Alumina Joint Venture agreement, the supply agreement, or the License Agreements due to the bankruptcy, insolvency or receivership of the Licensee or the Alumina Joint Venture or material breach of any such agreement by the Licensee. If the Alumina Joint Venture terminates for any reason other than those set out in paragraph IV. (A) of this Order, RWE shall, within six (6) months of the termination of the Alumina Joint Venture, either cause the Licensee to assign its rights, title and interest in the Alumina Joint Venture to a new Licensee with the prior approval of the Commission, or shall form a new Alumina Joint Venture with a new Licensee under the terms and conditions of paragraphs II–IV of this Order.

(C) Any material breach of the License Agreements, the Alumina Joint Venture agreement, or supply agreement by RWE shall constitute a violation of this Order. In the event that the Alumina Joint Venture terminates due to the breach of RWE, then within six (6) months of the termination, RWE shall form a new Alumina Joint Venture with a Licensee under the terms and conditions of paragraphs II–IV of this Order.

(D) The Licensee either shall be the managing partner of the Alumina Joint Venture, or otherwise have the managing responsibility for day-to-day administrative control of the Alumina Joint Venture and with the authority to make all marketing, pricing and other decisions not specifically delegated to the management committee or subject to the approval of the limited or minority partner as set out in the Alumina Joint Venture agreement that receives the prior approval of the Commission. The Licensee shall be reimbursed by the Alumina Joint Venture for all accounting, tax and other administrative services it provides.

(E) Alumina Joint Venture may have a management committee. The Licensee shall designate a majority of the members of the management committee. The management committee may consider and decide issues concerning substantial borrowing, contractual obligations, capital expenditures, disposition of assets, incurring of administrative expenses, incurring of research and development expenses, incurring working capital obligations, and the maintenance of reserves.

(F) The Licensee shall own a 51% interest in the Alumina Joint Venture. That interest shall increase to the extent the Licensee makes disproportionate capital contributions to the Alumina Joint Venture.

(G) The Licensee may sell its interest in the Alumina Joint Venture only to a party approved by RWE, which approval shall not be unreasonably withheld, with the prior approval of the Commission; provided, however, that the License Agreements are assigned to such party.

(H) RWE shall make available to the Alumina Joint Venture all Vista customer-specific marketing information, including copies of Vista customer files, as of the date that this Order is accepted by the Commission for public comment, relating to Chemical Catalysts, Automotive Emissions Control Catalysts, and Sol Gel Abrasives (including prospective North American customer files relating to such abrasives), except to the extent that a customer prohibits disclosure of information provided to Vista pursuant to a confidentiality agreement, or that a customer prohibits disclosure of information provided to Vista on the basis that such information constitutes such customer's trade secrets. RWE shall use its best efforts to secure authority from customers to provide such information to the Licensee. The Licensee may disclose any information made available by RWE to the Alumina Joint Venture pursuant to this paragraph IV.(H) (other than information independently known to Licensee on a non-confidential basis from sources other than RWE) only to a person who needs to know, and agrees to use, such information for the purpose of designing, constructing, financing the construction of, or operating one or more alumina manufacturing facilities in a manner consistent with paragraph II of this Order. At the request of the Licensee, RWE shall provide engineering services and customer technical services, from its North American operations, during the term of the Alumina Joint Venture. In addition, RWE shall provide to the Alumina Joint Venture, at the request of the Licensee, marketing, logistics and distribution personnel, from its North American operations, for no more than six months after the establishment of the Alumina Joint Venture. RWE shall be reimbursed by the Alumina Joint Venture for the services and personnel it provides. If, at the end of Alumina Joint Venture term, the Licensee has employed the license to construct a facility for the manufacture of High-Purity Alumina or similar alumina, the file and information provided to or generated by the Alumina Joint Venture pursuant to this Paragraph shall become the property of the Licensee.

(I) RWE shall supply the Alumina Joint Venture with grades and types of Joint Venture Alumina in the quantities the Licensee specifies. In the initial year of the Alumina Joint Venture, RWE shall supply up to [the specified volume] of Joint Venture Alumina. Thereafter, until the expiration of the Alumina Joint Venture, RWE's supply obligation shall increase by [the specified number of] pounds per year, but in all events, its total obligation shall not exceed [the specified volume] of Joint Venture Alumina. RWE is not required to provide more than ten (10) percent of the supply obligation in the form of alumina slurry. The quality of the alumina slurry supplied shall be comparable to that used by Vista, on or before the date this Order is accepted by the Commission for public comment, to produce test quantities of alumina for Sol Gel Abrasive applications. There shall be no limitations on the applications for which the Alumina Joint Venture may sell Joint Venture Alumina, except as provided in paragraph I.(I) of this Order.

(J) In connection with the formation of the Alumina Joint Venture, RWE shall, on an expedited basis, use its best efforts to assign to the Alumina Joint Venture all Vista customers and contracts, as of the date that this Order is accepted by the Commission for public comment, pertaining to Joint Venture Alumina used in Chemical Catalysts and Automotive Emissions Control Catalysts. Without the consent of the Licensee, RWE shall not supply customers assigned to the Alumina Joint Venture with any Joint Venture Alumina manufactured in North America, other than alumina for Sol Gel Abrasives.

(K) The base price of the alumina or alumina slurry supplied to the Alumina Joint Venture shall be [the specified price]; provided, however, that the pricing formula may contain reasonable adjustments for inflation.

(L) No RWE employee on the management committee or assigned to the Alumina Joint Venture on a temporary basis shall disclose to RWE "material confidential information" relating to the Alumina Joint Venture's assets and businesses not in the public domain, except as such information would be available to RWE in the normal course of business. "Material confidential information," as used herein, means competitively sensitive or proprietary information not independently known to RWE from sources other than the Alumina Joint Venture, and includes but is not limited to customer lists, price lists, marketing methods, patents, technologies, processes, or other trade secrets. If upon dissolution of the Alumina Joint Venture, the Licensee is not operating or is not in control of a joint venture or other arrangement that is operating an alumina production facility pursuant to a License Agreement (or is not in control of a joint venture or other arrangement that will market and sell the output of an alumina production facility that has been constructed pursuant to a sublicense permitted by paragraph II of this Order), all marketing, research and development and technical services files created by the Alumina Joint Venture or transferred pursuant to paragraph IV.(H) of this Order will become the exclusive property of RWE.

(M) RWE shall neither restrict nor limit the ability of the Alumina Joint Venture or the Licensee to hire personnel employed by Vista as of the date this Order is accepted by the Commission for public comment or thereafter; provided, however, RWE may enforce existing confidentiality agreements covering information outside the scope of Vista Technology and Vista Patent Rights, and the RWE Technology and RWE Patent Rights.

V

It is Further Ordered That:

(A) RWE shall not, without prior approval of the Commission, make or agree to any modifications to the License Agreements, Alumina Joint Venture agreement, or agreement to supply Joint Venture Alumina or any other instruments approved by the Commission pursuant to this Order, other than those modifications permitted by the License Agreements, Alumina Joint Venture agreement, or agreement to supply Joint Venture Alumina or any other instruments approved by the Commission pursuant to this Order.

(B) RWE shall provide to the Commission, as promptly as possible and in any event no later than thirty (30) days after either their receipt or transmittal, copies of all communications between RWE and the Licensee or Alumina Joint Venture regarding breaches of the License Agreements, Alumina Joint Venture agreement, or agreement to supply Joint Venture Alumina or any other instruments approved by the Commission pursuant to this Order.

VI

It Is Further Ordered That:

(A) If RWE has not licensed the RWE Technology, RWE Patent Rights, Vista Technology and Vista Patent Rights absolutely and in good faith and with the Commission's approval as set out in paragraphs II and III of this Order, and established the Alumina Joint Venture and supply agreement as set out in paragraph IV of this Order, within six (6) months of the date this Order becomes final, or within six months of the first to occur of a failure date as set out in paragraph III of this Order, or within six (6) months of the date the Alumina Joint Venture terminates as set out in paragraph IV.(B) or IV.(C), (i) RWE shall consent to the appointment by the Commission of a trustee or (ii) in the event the Commission or the Attorney General brings an action pursuant to section 5(*l*) of the Federal Trade Commission Act, 15 U.S.C. 45(*l*), or any other statute enforced by the Commission, RWE shall consent to the appointment of a trustee in such action. In each case, the trustee shall be authorized to license the Vista Technology, Vista Patent Rights, the RWE Technology, and RWE Patent Rights, consistent with the provisions of Paragraph II of this Order, and, unless the Alumina Joint Venture has terminated pursuant to paragraph IV.(A) of this Order, establish an Alumina Joint Venture and supply agreement consistent with the provisions of paragraph IV of this Order. Neither the appointment of a trustee nor a decision not to appoint a trustee under this paragraph shall preclude the Commission or the Attorney General from seeking civil penalties or any other relief available to it, including a court-appointed trustee, pursuant to section 5(*l*) of the Federal Trade Commission Act, or any other statute enforced by the Commission, for any failure by RWE to comply with this Order.

(B) If a trustee is appointed by the Commission or a court pursuant to paragraph VI.(A) of this Order, RWE shall consent to the following terms and conditions regarding the trustee's powers, authorities, duties and responsibilities:

1. The Commission shall select the trustee, subject to the consent of RWE, which consent shall not be unreasonably withheld. The trustee shall be a person with experience and expertise in acquisitions, diverstitures and licensing agreements.

2. The trustee shall, subject to the prior approval of the Commission, have the exclusive power and authority to license the Vista Technology, Vista Patent Rights, RWE Technology and RWE Patent Rights, on terms and conditions consistent with paragraph II of this Order and such license shall contain the provisions contained in paragraphs II.(A), II.(B) and II.(C) of this Order.

3. If applicable, the trustee shall, subject to the prior approval of the Commission, have the exclusive power and authority to establish the Alumina Joint Venture and supply agreement on terms and conditions consistent with paragraph IV of this Order. The Alumina Joint Venture agreement shall provide that without the consent of the limited or minority partner neither the managing partner nor the management committee may take any of the following actions: (a) Enter into contracts with, or in favor of, Licensee or any of its respective affiliates; (b) transfer, sell or dispose of any of the Alumina Joint Venture's assets (other than the sale of alumina in the ordinary course of business) or merge the Alumina Joint Venture with another entity; (c) require the limited partner to make any capital contribution (net of aggregate cash distributions to the limited partner) in excess of $500,000; (d) admit any other person as a partner; (e) execute or deliver any general assignment for the benefit of creditors of the Alumina Joint Venture or file a voluntary petition in bankruptcy on behalf of the Alumina Joint Venture or fail to contest the filing of any involuntary petition in bankruptcy against the Alumina Joint Venture (or involving a substantial portion of its assets) within a reasonable time.

4. The trustee shall have twelve (12) months from the date of appointment to license the Vista Technology, Vista Patent Rights, RWE Technology and RWE Patent Rights, and, if applicable, establish the Alumina Joint Venture and supply agreement. If, however, at the end of the twelve-month period the trustee has submitted a plan to accomplish these objectives, or believes that they can be accomplished within a reasonable time, the Commission may extend the period.

5. The trustee shall have full and complete access to the personnel, books, records and facilities necessary to fulfill the trustee's obligations. RWE shall develop such financial or other information as such trustee may reasonably request and shall cooperate with any reasonable request of the trustee. RWE shall take no action to interfere with or impede the trustee's licensing of the technology and, if applicable, the establishment of the Alumina Joint Venture and supply agreement. Any delays caused by RWE shall extend the time under this pagraph in an amount equal to the delay, as determined by the Commission or the court for a court-appointed trustee.

6. Consistent with RWE's absolute and unconditional obligations under paragraph II and paragraph IV of this Order, the trustee shall use his or her best efforts to negotiate the most favorable price and terms available with the Licensee, consistent with the provisions of paragraph II and paragraph IV of this Order and the trustee's obligations under paragaph VI of this Order.

7. The trustee shall serve, without bond or other security, at the cost and expense of RWE, on such reasonable and customary terms and conditions as the Commission or a court may set. The trustee shall have authority to employ, at the cost and expense of RWE, such consultants, accountants, attorneys, investment bankers, business brokers, appraisers, and other representatives and assistants as are reasonably necessary to carry out the trustee's duties and responsibilities. The trustee shall account for all monies derived or received from the new Licensee and all expenses incurred. After approval by the Commission and, in the case of a court-appointed trustee, by the court, of the account of the trustee, including fees for his or her services, all remaining monies shall be paid at the direction of RWE and the trustee's power shall be terminated. The trustee's compensation shall be based at least in significant part on a commission arrangement contingent on the trustee's accomplishing the objectives set out in paragraph VI.(A) of the Order.

8. RWE shall indemnify the trustee and hold the trustee harmless against any losses, claims, damages, or liabilities arising in any manner out of, or in connection with, the trustee's duties under this Order.

9. If the trustee ceases to act or fails to act diligently, a substitute trustee shall be appointed in the same manner as provided in paragraph VI.(A) of this Order.

10. Within sixty (60) days after appointment of the trustee, and subject to the prior approval of the Commission and, in the case of a court-appointed trustee, of the court, RWE either shall execute a trust agreement or shall cause the execution of a trust agreement that transfers to the trustee all rights and powers necessary to permit the trustee to license the Vista Technology, Vista Patent Rights, RWE Technology, and RWE Patent Rights and, if applicable, establish the Alumina Joint Venture and supply agreement required by this Order.

11. The Commission and, in the case of a court-appointed trustee, the court may on its own initiative or at the request of the trustee issue such additional orders or directions not inconsistent with paragraphs II, IV, or VI of this Order as may be necessary or appropriate to license the Vista Technology, Vista Patent Rights, RWE Technology, and RWE Patent Rights and, if applicable, set up the Alumina

Joint Venture and supply agreement required by this Order.

12. The trustee shall report in writing to RWE and to the Commission every sixty (60) days concerning the trustee's efforts to license the Vista Technology, Vista Patent Rights, RWE Technology, and RWE Patent Rights and, if applicable, set up the Alumina Joint Venture and supply agreement.

VII

It is Further Ordered That:

(1) within sixty (60) days after the date this Order becomes final and every sixty (60) days thereafter until RWE has received the prior approvals of the Commission pursuant to paragraphs II and IV of this Order and (2) within sixty (60) days after the date any obligation of RWE arises under paragraphs III, IV. (B), or IV.(C) of this Order and every sixty (60) days thereafter until RWE has received the prior approvals required by paragraphs II and IV, RWE shall submit to the Federal Trade Commission a verified written report setting forth in detail the manner and form in which it intends to comply, is complying and has complied with the Order. RWE shall include in its compliance reports, among other things that are required from time to time, a full description of substantive contacts or negotiations concerning licensing the technology or establishing the Alumina Joint Venture and supply agreement, including the identity of all parties contacted. RWE also shall include in its compliance reports copies of all written communications to and from such parties, memorializations of all oral communications, all internal memoranda, and reports and recommendations concerning licensing, joint ventures or supply agreements.

(B) One year from the date this Order becomes final and annually for the period of the Alumina Joint Venture and supply agreement, as set out in paragraph IV of this Order, RWE shall file a verified written report setting forth in detail the manner and form in which it is complying with the requirements of paragraph IV. RWE shall include in its reports a full description of the Alumina Joint Venture and its own participation, including its ownership share of the Alumina Joint Venture, the profits it has obtained from the Alumina Joint Venture, and any financial or other information that RWE has obtained from the Alumina Joint Venture. RWE shall also include in its reports a full description of the volumes of High-Purity Alumina or similar alumina specified by the Licensee on behalf of the Alumina Joint Venture, the pricing of alumina to the Alumina Joint Venture (including any price change and the reasons for), and any product performance deficiencies identified by the managing partner. RWE shall further include in its reports copies of all written correspondence between itself and the Alumina Joint Venture or the managing partner and the minutes of management committee meetings.

VIII

It is Further Ordered That, for a period commencing on the date this Order becomes final and continuing for ten (10) years, RWE shall cease and desist from acquiring, without the prior approval of the Federal Trade Commission, directly or indirectly, through subsidiaries or otherwise, assets located anywhere in the world used for the production, distribution or sale of High-Purity Alumina or similar alumina in or into North America in an amount exceeding 125,000 pounds in any six (6) month period in the 36 months prior to the application. RWE also shall cease and desist from acquiring, without the prior approval of the Commission, directly or indirectly, through subsidiaries or otherwise, any interest in, or the stock or share capital of any entity that owns or operates assets located anywhere in the world engaged in the production, distribution or sale of High-Purity Alumina or similar alumina that were consumed in North America in any six (6) month period in the 36 months prior to the application; provided, however, these prohibitions shall not relate to the construction of new facilities., One year from the date this Order become final and annually for none years thereafter, RWE shall file with the Commission a verified written report of its compliance with this paragraph.

IX

It is Further Ordered That, for the purposes of determining or securing compliance with this Order, and subject to any legally recognized privilege, upon written request and on reasonable notice to RWE as practicable, made to its principal office, RWE shall permit any duly authorized representatives of the Federal Trade Commission:

(A) Access, during office hours and in the presence of counsel, to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of RWE, as applicable, relating to any matters contained in this Order; and

(B) Upon five days' notice to RWE, as applicable, and without restraint or interference from RWE, to interview officers or employees of RWE, who may have counsel present, regarding such matters.

X

It is Further Ordered That, RWE shall notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in any respondent such as dissolution, assignment or sale resulting in the emergency of a successor corporation, the creation, dissolution or sale of subsidiaries or any other change that may affect compliance obligations arising out of the Order.

XI

It is Further Order That RWE shall comply with all terms of the Agreement to Hold Separate, attached hereto and made a part hereof as appendix I.

Appendix I

Agreement to Hold Separate

This Agreement to Hold Separate (the "Agreement") is by and among Alpha Acquisition Corp., a Delaware corporation, ("Alpha Acquisition"), RWE–DEA Aktiengesellschaft fur Mineraloel und Chemie ("TWE–DEA"), a German corporation, RWE Aktiengesellschaft ("RWE") a German corporation (collectively the "Acquiring Parties"), Vista Chemical Company ("Vista"), a Delaware corporation, and the Federal Trade Commission (the Commission"), an independent agency of the United States Government, established under the Federal Trade Commission Act of 1914, 15 U.S.C. 41 *et seq.* (collectively, "the Parties").

Whereas, Alpha Acquisition, a wholly-owned subsidiary of RWE–DEA, over 99 percent of whose voting securities are currently held by RWE, commenced a tender offer on December 18, 1990, for all of the issued and outstanding shares of Vista, with the intent of effecting a merger of Vista into Alpha Acquisition, pursuant to which Vista would become a subsidiary of RWE–DEA, all as contemplated by and provided for in that certain Agreement And Plan Of Merger entered into among Alpha Acquisition, RWE–DEA and Vista as of December 13, 1990; and

Whereas, the Commission is now investigating the transaction to determine if the Acquisition would violate any of the statutes enforced by the Commission; and

Whereas, if the Commission accepts the attached Agreement Containing Consent Order ("Consent Order"), the Commission must place it on the public record for a period of at least sixty (60) days and may subsequently withdraw such acceptance pursuant to the provisions of section 2.34 of the Commission's Rules; and

Whereas, the Consent Order provides for the disposition by RWE and Vista of the RWE Patent Rights, the RWE Technology, the Vista Patent Rights, and the Vista Technology to a Licensee approved by the Commission and further provides for the formation of an Alumina Joint Venture with such Licensee and an arrangement to supply the Alumina Joint Venture with Joint Venture Alumina (such patent, technology and contract rights collectively the "Subject Assets"); and

Whereas, RWE has submitted to the Commission an application for the approval of Discovery Aluminas, Inc., a Louisiana Corporation ("Discovery") pursuant to paragraphs II and IV of the Consent Order; and

Whereas, the Commission is concerned that if an understanding is not reached, preserving the viability and independence of the Subject Assets during the period prior to the final acceptance of the Consent Order by the Commission (after the 60-day public notice period), relief resulting from any proceeding challenging the legality of the Acquisition might not be possible, or might be less than an effective remedy; and

Whereas, the Commission is concerned that if the Acquisition is consummated, it will be necessary to preserve the Commission's ability to require effective relief and the Commission's right to seek to establish a viable competitor; and

Whereas, the purpose of this Agreement and the Consent Order is to preserve an independent competitor pending the license of technology as required by the Consent Order, in order to remedy any anticompetitive effects of the Acquisition; and

Whereas, the Acquiring Parties' entering into this Agreement shall in no way be construed as an admission by them that the acquisition is illegal; and

Whereas, the Acquiring Parties understand that no act or transaction contemplated by this Agreement shall be deemed immune or exempt from the provisions of the antitrust laws or the Federal Trade Commission Act by reason of anything contained in this Agreement.

Now, Therefore, The Parties agree, upon understanding that the Commission has not yet determined whether the Acquisition will be challenged, and in consideration of the Commission's agreement that, unless the Commission determines to reject the Consent Order, it will not seek further relief from the Acquiring Parties with respect to the Acquisition, except that the Commission may exercise any and all rights to enforce this Agreement and the Consent Order to which it is annexed and made a part thereof, and in the event the Subject Assets have not been transferred to a License approved by the Commission, to seek the transfer of such assets as are held separate pursuant to this Agreement, as follows:

1. The Acquiring Parties agree to execute and be bound by the attached Consent Order.

2. In the event the Acquiring Parties or Vista fail to comply with the terms of this Agreement, the Parties agree that the Commission or the Attorney General may seek, in addition to any other remedies that may be available, any remedies, including civil penalties, that would be available pursuant to section 5(*l*) of the Federal Trade Commission Act, or any other statute enforced by the Commission, as if this Agreement were a final order of the Commission.

3. Upon the execution by the Parties of this Agreement, Vista will enter into the Alumina Joint Venture agreement, supply agreement and License Agreement annexed as exhibits to the Application of Discovery; and RWE will enter into the License Agreement and transfer agreement annexed as exhibits to the Application of Discovery. The Alumina Joint Venture agreement, supply agreement and License Agreements shall be consistent with, except for the duration of such agreements and the provisions requiring Commission prior approval (each of which shall be governed by this Agreement), by the provisions of paragraphs II and IV of the Agreement Containing Consent Order. Any material breach of the License Agreements, the Alumina Joint Venture agreement, or the supply agreement executed as part of the Alumina Joint Venture by RWE shall constitute a breach of this Agreement.

4. If within one hundred fifty (150) days of the date the Application of Discovery goes on the public record (i) Discovery becomes bankrupt or goes into receivership before the Application is approved by the Commission, (ii) the Alumina Joint Venture agreement, supply agreement and License Agreements annexed as exhibits to the Application of Discovery terminate for any reason, or (iii) the Commission rejects the Discovery application, the Acquiring Parties shall, as soon as practicable but in any event within thirty (30) days of the occurrence of either (i), (ii), or (iii) cause to be created a new corporation ("Newco") on the following terms and conditions:

a. Newco shall be incorporated under the laws of Delaware and shall have its principal place of business either in Texas or Louisiana. Newco's Certificate of Incorporation and By-Laws shall be substantially in the form of Exhibits A and B attached hereto.

b. The purposes of Newco shall be to purchase from Discovery its interest in the Subject Assets pursuant to the Transfer Agreement, to hold and exploit such interest and to maintain a competitive presence in the production and marketing of High Purity Alumina until such time as RWE has complied with paragraphs II and IV of the Agreement Containing Consent Order or a trustee has complied with paragraph VI of the Consent Order.

c. In connection with the formation of Newco, the Acquiring Parties shall purchase from Newco all its authorized common stock for $1.8 million pursuant to a subscription agreement substantially in the form of Exhibit C attached hereto.

d. The Board of Directors of Newco shall consist of at least three members, no more than one of which shall be an officer or director of, or otherwise affiliated with, the Acquiring Parties.

e. RWE shall cause Newco to employ or shall otherwise furnish to Newco suitable and sufficient personnel to carry out the purposes of Newco; such personnel shall have appropriate skills, experience and abilities to carry out the duties for which they have been employed.

5. The Acquiring Parties agree that, in the event Newco is created pursuant to paragraph 4, the Acquiring Parties shall hold all of Newco's assets and business operations separate and apart on the following terms and conditions:

a. The Newco assets and businesses shall be operated independently of the Acquiring Parties and independently of any other Parties owned in whole or in part by any of the Acquiring Parties, except to the extent that RWE must exercise discretion and control over any Newco assets to assure compliance with this Agreement or the Consent Order.

b. RWE shall not exercise direction or control over, or influence directly or indirectly, any of Newco's assets and businesses.

c. Except for the single RWE director, officer, employee, or agent serving on the "New Board" [as defined in subparagraph 5.h), RWE shall not permit any director, officer, employee, or agent of RWE to also be a director, officer or employee of Newco.

d. Except as required by law, and except to the extent that necessary information is exchanged in the course of evaluating the Acquisition, or by virtue of RWE's or Vista's participation in the Alumina Joint Venture pursuant to the Alumina Joint Venture agreement, defending investigations or litigation, obtaining legal advice, or acting to assure compliance with this Agreement or the Consent Order, RWE shall not receive or have access to, or the use of, any "material confidential information" relating to Newco's assets and businesses not in the public domain, except as such information would be available to the Acquiring Parties in the normal course of business as if RWE and Newco were separate and unrelated entities. Any such information that is obtained pursuant to this subparagraph shall only be used for the purposes set out in this subparagraph. "Material confidential information," as used herein, means competitively sensitive or proprietary information not independently known to the Acquiring Parties from sources other than Newco, and includes but is not limited to customer lists, price lists, marketing methods, patents, technologies, processes, or other trade secrets.

e. The Acquiring Parties shall not change the composition of the management of Newco except that the directors serving on the "New Board" (as defined in paragraph 5.h), excluding the director who is an officer, partner, employee or agent of RWE, shall have the power to remove employees for cause and fill any vacancies which may arise.

f. RWE shall do nothing to diminish the viability and marketability of Newco and shall not sell, transfer, encumber, or otherwise impair the marketability or viability of its assets (other than in the normal course of business or as provided herein).

g. All material transactions out of the ordinary course of business and not otherwise precluded shall be subject to a majority vote of the New Board (as defined in paragraph 5.h).

h. RWE may cause Newco to adopt new Articles of Incorporation and By-laws, provided that they are not inconsistent with other provisions of this Agreement, and may cause the election of a new board of directors of Newco ("New Board"). RWE may elect the directors to the New Board. Except as

VOL 56 ISS 122 25 JE 1991 UMI

permitted by this Agreement, the director of Newco who is also a partner, officer, employee or agent of RWE shall not receive in his capacity as director of Newco material confidential information relating to Newco's business in high-purity alumina, and shall not disclose any such information received under this Agreement to RWE or to any company owned in whole or in part by RWE. Nor shall such director use such information to obtain any advantage for RWE or for any company owned in whole or in part by RWE. Said director of Newco shall enter into a confidentiality agreement prohibiting disclosure of confidential information relating to Newco's business in high-purity alumina. Such director may participate in matters that come before the New Board that do not concern Newco's business in high-purity alumina. Such director may participate in matters that come before the New Board concerning carrying out RWE's and Vista's responsibility to complete the technology license, establish a joint venture and make a supply agreement. Except as permitted by this Agreement, such director shall not participate in, or attempt to influence the vote of any other director with respect to, any matters that would involve a conflict of interest if RWE and Newco were separate and independent entities. Meetings of the Board during the term of this Agreement shall be stenographically transcribed and the transcripts shall be retained for two (2) years after the termination of this Agreement.

i. All earnings and profits of Newco shall be accounted for and retained separately in Newco.

j. Should the Commission seek in any proceeding to compel RWE to divest itself of the shares of stock or assets of Vista or Newco, or to compel RWE to divest any assets or businesses they may hold, or to seek any other injunctive or equitable relief, RWE shall not raise any objection based upon the expiration of the applicable Hart-Scott-Rodino Antitrust Improvements Act waiting period or the fact that the Commission has permitted Vista stock to be acquired. RWE also waives all rights to contest the validity of this Agreement.

k. Newco shall provide the Commission and RWE with quarterly financial statements in the same form and content as Newco would be required to file periodically with the Securities and Exchange Commission and the New York Stock Exchange if Newco were a publicly-held company whose stock were listed and traded on the New York Stock Exchange.

6. If the Commission disapproves the Consent Order after public comment, then within six (6) months of the closing date of the transfer of Discovery's interests in the Subject Assets to Newco (the "Closing Date"), RWE shall submit for Commission approval a plan to divest all the stock or assets of Newco. RWE shall have an absolute and unconditional obligation to divest all the stock or assets and assign all licensing and other agreements of Newco in accordance with such plan within six (6) months of approval of such plan by the Commission. If within eighteen (18) months of the Closing Date the Commission has not approved a plan submitted by RWE, RWE shall consent to the appointment by the Commission of a trustee who shall be authorized to sell and make assignments, consistent with the provisions of paragraph VI of the Consent Order, all the stock or assets of Newco. Provided, however, that the duration of each agreement shall be extended by the amount of time that Newco is owned by RWE, less the time between the submission of such plan to, and approval of such plan by, the Commission.

7. This Agreement, except paragraph 2, shall terminate if any of the following four events occurs:

a. The Commission approves the Application of Discovery;

b. If RWE has become obligated to create Newco pursuant to paragraph 4 above, on the date on which RWE has performed the acts set forth in paragraphs II and IV of the Agreement Containing Consent Order, whether or not the Consent Order has received final approval of the Commission;

c. If RWE has become obligated to create Newco pursuant to paragraph 4 above, on the date on which the trustee pursuant to paragraph VI of the Consent Order has satisfied paragraphs II and IV of the Consent Order;

d. In the event the Commission has not acted upon the Application of Discovery within one hundred fifty (150) days of the date the Application of Discovery goes on the public record, the Acquiring Parties may, at their option, terminate this Agreement by delivering written notice of termination to the Commission, which termination shall be effective no earlier than ten (10) days after the Commission's receipt of such notice, and this Agreement shall thereafter be of no further force and effect. If this Agreement is so terminated, the Commission may take such action as it deems appropriate, including but not limited to an action pursuant to section 13(b) of the Federal Trade Commission Act, 15 U.S.C. 53(b).

Termination of this Agreement shall in no way operate to terminate the Agreement Containing Consent Order to Cease and Desist that the Acquiring Parties have entered into in this matter.

8. For the purpose of determining or securing compliance with this Agreement, subject to any legally recognized privilege, and upon written request with reasonable notice to the Acquiring Parties made to their offices, RWE shall permit any duly authorized representative or representatives of the Commission:

a. Access during the office hours of RWE or Newco and in the presence of counsel to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of RWE and Newco relating to compliance with this Agreement; and

b. Upon five (5) days notice to RWE or Newco, and without restraint or interference from them, to interview partners, officers, directors or employees of RWE or Newco, who may have counsel present, regarding any such matters.

9. This Agreement shall not be binding until approved by the Commission.

Certificate of Incorporation of (Newco)

Article First

The name of the corporation is (NEWCO) (the "Corporation").

Article Second

The address of the registered office of the Corporation in the State of Delaware is 1209 Orange Street, in the City of Wilmington, County of New Castle. The name of the registered agent of the Corporation at such address is The Corporation Trust Company.

Article Third

The purpose of the Corporation is to engage in any lawful act or activity for which corporations may be organized under the General Corporation Law of the State of Delaware (the "GCL").

Article Fourth

The total number of shares of stock which the Corporation shall have authority to issue is 1,000 shares of the par value of $.01 per share. All such shares shall be of one class and shall be designated "Common Stock".

Article Fifth

The name and mailing address of the sole incorporator is as follows:

Name	Address
(Name)	(Address)

Article Sixth

For the management of the business and the conduct of the affairs of the Corporation, and for further definition, limitation and regulation of the powers of the Corporation and of its directors and stockholders, it is further provided that:

(1) The business and affairs of the Corporation shall be managed by or under the direction of the Board of Directors;

(2) The directors shall have concurrent power with the stockholders to make, alter, amend, change, add to or repeal the By-Laws of the Corporation;

(3) The number of directors of the Corporation shall be as from time to time fixed by, or in the manner provided in, the By-Laws of the Corporation. Election of directors need not be by written ballot unless the By-Laws so provide;

(4) No director shall be personally liable to the Corporation or any of its stockholders for monetary damages for breach of fiduciary duty as a director, except for liability (i) for any breach of the director's duty of loyalty to the Corporation or its stockholders, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) pursuant to section 174 of the GCL or (iv) for any transaction from which the director derived an improper personal benefit. Any repeal or modification of this Article Sixth by the stockholders of the Corporation shall not adversely affect any right or protection of a director of the Corporation existing at the time of such repeal or modification with respect to acts or omissions occurring prior to such repeal or modification;

(5) Any director or any officer elected or appointed by the stockholders or by the Board of Directors of the Corporation, or any committee thereof, may be removed at any time by a unanimous written consent of the stockholders of the Corporation or in such other manner as shall be provided in the By-Laws of the Corporation; and

(6) In addition to the powers and authority hereinbefore or by statute expressly conferred upon them, the directors are hereby empowered to exercise all such powers and do all such acts and things as may be exercised or done by the Corporation, subject, nevertheless, to the provisions of the GCL, this Certificate of Incorporation, and any By-Laws adopted by the stockholders; *provided, however,* That no By-Laws hereafter adopted by the stockholders shall invalidate any prior act of the directors which would have been valid if such By-Laws had not been adopted.

Article Seventh

The Corporation shall, to the full extent permitted by section 145 of the GCL as presently in effect or as it may hereafter be amended, indemnify all persons whom it may indemnify pursuant thereto and advance expenses of litigation to directors and officers when so requested.

Article Eighth

Meetings of stockholders may be held within or without the State of Delaware, as the By-Laws may provide. The books of the Corporation may be kept (subject to any provision contained in the GCL) outside the State of Delaware at such place or places as may be designated from time to time by the Board of Directors or in the By-Laws of the Corporation.

Article Ninth

The Corporation reserves the right to amend, alter, change or repeal any provision contained in this Certificate of Incorporation, in the manner now or hereafter prescribed by statute, and all rights conferred upon stockholders herein are granted subject to this reservation.

In Witness Whereof, I (NAME), the sole incorporator of (NEWCO), have executed this Certificate of Incorporation on this ___ day of _____, 1991, and DO HEREBY CERTIFY under the penalties of perjury that the facts stated in this Certificate of Incorporation are true.

(Name) _____
Sole Incorporator

BY–LAWS OF NEWCO (a Delaware corporation)

Adopted _____, 1991

Article I

Offices

Section 1. Registered Office. The registered office of (NECO) (the "Corporation") in the State of Delaware shall be in the City of Wilmington, County of New Castle, and the registered agent in charge thereof shall be The Corporation Trust Company.

Section 2. Other Offices. The Corporation may have such other offices in such places, either within or without the State of Delaware, as the Board of Directors (the "Board" or the "Board of Directors") may from time to time determine or the business of the Corporation may require.

Article II

Meetings of Stockholders

Section 1. Place of Meetings. Meetings of the stockholders for the election of directors or for any other purpose shall be held at such time and place, either within or without the State of Delaware, as shall be designated from time to time by the Board of Directors and stated in the notice of the meeting or in a duly executed waiver of notice thereof.

Section 2. Annual Meetings. The annual meetings of stockholders of the Corporation (the "Annual Meetings") shall be held on such date and at such time as shall be designated from time to time by the Board of Directors and stated in the notice of the meeting, at which meetings the stockholders shall elect by a plurality vote a Board of Directors, and transact such other business as may properly be brought before the meeting. Written notice of the Annual Meeting stating the place, date and hour of the meeting shall be given to each stockholder entitled to vote at such meeting not less than ten nor more than sixty days before the date of the meeting.

Section 3. Special Meetings. Unless otherwise prescribed by law or by the Certificate of Incorporation, special meetings of stockholders of the Corporation ("Special Meetings") for any purpose or purposes, may be called by either (i) the Chairman, if there be one, or (ii) the President, (iii) any vice President, if there be one, (iv) the Secretary or (v) any Assistant Secretary, if there be one, and shall be called by any such officer at the request in writing of a majority of the Board of Directors or at the request in writing of stockholders owning a majority of the capital stock of the Corporation issued and outstanding and entitled to vote. Such request shall state the purpose or purposes of the proposed meeting. Written notice of a Special Meeting stating the place, date and hour of the meeting and the purpose or purposes for which the meeting is called shall be given not less than ten nor more than sixty days before the date of such meeting to each stockholder entitled to vote at such meeting.

Section 4. Quorum. Except as otherwise provided by law or by the Certificate of Incorporation, the holders of a majority of the capital stock issued and outstanding and entitled to be voted at the meeting, present in person or represented by proxy, shall constitute a quorum at all meetings of the stockholders for the transaction of business. If, however, such quorum shall not be present or represented at any meeting of the stockholders, the stockholders entitled to vote at the meeting, present in person or represented by proxy, shall have power to adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum shall be present or represented. At such adjourned meeting at which a quorum shall be present or represented, any business may be transacted which might have been transacted at the meeting as originally noticed. If the adjournment is for more than thirty days, or if after the adjournment a new record date is fixed for the adjourned meeting, a notice of the adjournment meeting shall be given to each stockholder entitled to vote at the meeting.

Section 5. Voting. Unless otherwise required by law, the Certificate of Incorporation or these By-Laws, any question brought before any meeting of stockholders shall be decided by the vote of the holders of a majority of the stock represented and entitled to vote at the meeting. Each stockholder represented at a meeting of stockholders shall be entitled to cast one vote for each share of the capital stock entitled to vote at the meeting held by such stockholder. Such votes shall be cast in person or by proxy but no proxy shall be voted on or after three years from its date, unless such proxy provides for a longer period. The Board of Directors, in its discretion, or the office of the Corporation presiding at a meeting of stockholders, in his discretion, may require that any votes cast at such meeting shall be cast by written ballot.

Section 6. Consent of Stockholders in Lieu of Meeting. Unless otherwise provided in the certificate of incorporation, any action required or permitted to be taken, by the laws of the State of Delaware, at any Annual or Special Meeting may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the holders of outstanding stock having not less than the minimum number of votes that would be necessary to authorize or take such action at a meeting at which all shares entitled to vote thereon were present and voted. Prompt notice of the taking of the corporate action without a meeting by less than unanimous written consent shall be given to those stockholders who have not consented in writing.

Section 7. List of Stockholders Entitled to Vote. The officer of the Corporation who has charge of the stock ledger of the Corporation shall prepare and make, at least ten days before every meeting of stockholders, a complete list of the stockholders entitled to vote at the meeting, arranged in alphabetical order, and showing the address of each stockholder and the number of shares registered in the name of each stockholder. Such list shall be open to the examination of any stockholder, for any purpose germane to the meeting, during ordinary business hours, for a period of at least ten days prior to the meeting, either at a place within the city where the meeting is to be held, which place shall be specified in the notice of the meeting, or, if not so specified, at the place where the meeting is to be held. The list shall also be produced and kept at the time and place of the meeting during the whole time thereof, and may be inspected by any stockholder of the Corporation who is present.

Section 8. Stock Ledger. The stock ledger of the Corporation shall be the only evidence as to who are the stockholders entitled to examine the stock ledger, the list required by section 7 of this Article II or the books of the Corporation, or to vote in person or by proxy at any meeting of stockholders.

VOL 56 ISS 122 JE 25 1991 UMI

Article III

Board of Directors

Section 1. General Powers. The property, business and affairs of the Corporation shall be managed by or under the direction of the Board, which may exercise all such powers of the Corporation and do all such lawful acts and things as are not by law or by the Certificate of Incorporation directed or required to be exercised or done by the stockholders.

Section 2. Number and Election of Directors. The Board of Directors shall consist of not less than one nor more than fifteen members, the exact number of which shall initially be fixed by the Incorporator and thereafter from time to time by the Board of Directors. Except as provided in Section 5 of this Article, directors shall be elected by a plurality of the votes cast at Annual Meetings, and each director so elected shall hold office until the next Annual Meeting and until his successor is duly elected and qualified, or until his earlier resignation or removal. Any director may resign at any time upon notice to the Corporation. Directors need not be stockholders of the Corporation.

Section 3. Organization and Order of Business. At each meeting of the Board, the President, if the President shall be a director, shall act as chairman of the meeting and preside thereat. In the case of the absence of the President, or if the President shall not be a director, any director chosen by a majority of the directors present at the meeting shall act as chairman of the meeting and preside at the meeting. The Secretary of the Corporation or, in the case of his absence, any person (who shall be an Assistant Secretary, if an Assistant Secretary shall be present at the meeting) whom the chairman shall appoint, shall act as secretary of such meeting and keep the minutes thereof.

Section 4. Removal of Directors. Any director or the entire Board may be removed, with or without cause, at any time by the holders of a majority of the shares then entitled to vote at an election of directors.

Section 5. Vacancies. Vacancies and newly created directorships resulting from any increase in the authorized number of directors may be filled by a majority of the directors then in office, though less than a quorum, or by a sole remaining director, and the directors so chosen shall hold office until the next annual election and until their successors are duly elected and qualified, or until their earlier resignation or removal.

Section 6. Duties and Powers. The business of the Corporation shall be managed by or under the direction of the Board of Directors which may exercise all such powers of the Corporation and do all such lawful acts and things as are not by statute or by the Certificate of Incorporation or by these By-Laws directed or required to be exercised or done by the stockholders.

Section 7. Meetings. The Board of Directors may hold meetings, both regular and special, either within or without the State of Delaware. Regular meetings of the Board of Directors may be held without notice at such time and at such place as may from time to time be determined by the Board of Directors. Special meetings of the Board of Directors may be called by the Chairman, if there be one, the President, or any director. Notice thereof stating the place, date and hour of the meeting shall be given to each director either by mail not less than forty-eight hours before the date of the meeting, by telephone or telegram on twenty-four hours' notice, or on such shorter notice as the person or persons calling such meeting may deem necessary or appropriate in the circumstances.

Section 8. Quorum. Except as may be otherwise specifically provided by law, the Certificate of Incorporation or these By-Laws, at all meetings of the Board of Directors, one third of the total number of directors constituting the Board of Driectors shall constitute a quorum for the transaction of business, except that if one director constitutes the Board of Directors, then one director shall constitute a quorum, and the act of a majority of the directors present at any meeting at which there is a quorum shall be the act of the Board of Directors. If a quorum shall not be present at any meeting of the Board of Directors, the directors present thereat may adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum shall be present.

Section 9. Actions of Board by Written Consent. Unless otherwise provided by the Certificate of Incorporation or these By-Laws, any action required or permitted to be taken at any meeting of the Board of Directors or of any committee thereof may be taken without a meeting, if all the members of the Board of Directors or committee, as the case may be, consent thereto in writing, and the writing or writings are filed with the minutes of proceedings of the Board of Directors or committee.

Section 10. Meetings by Means of Conference Telephone. Unless otherwise provided by the Certificate of Incorporation or these By-Laws, members of the Board of Directors, or any committee designated by the Board of Directors, may participate in a meeting of the Board of Directors or such committee by menas of a conference telephone or similar communications equipment by means of which all persons participating in the meeting can hear each other, and participation in a meeting pursuant to this section 10 shall constitute presence in person at such meeting.

Section 11. Committees. The Board of Directors may, by resolution passed by a majority of the entire Board of Directors, designate one or more committees, each committee to consist of one or more of the directors of the Corporation. The Board of Directors may designate one or more directors as alternate members of any committee, who may replace any absent or disqualified member at any meeting of any such committee. In the absence or disqualification of a member of a committee, and in the absence of a designation by the Board of Directors of an alternate member to replace the absent or disqualified member, the member or members thereof present at any meeting and not disqualified from voting, whether or not he or they constitute a quorum, may unanimously appoint another member of the Board of Directors to act at the meeting in the place of any absent or disqualified member. Any committee, to the extent allowed by law and provided in the resolution establishing such committee, shall have and may exercise all the powers and authority of the Board of Directors in the management of the business and affairs of the Corporation. Each committee shall keep regular minutes and report to the Board of Directors when required.

Section 12. Compensation. The directors may be paid their expenses, if any, of attendance at each meeting of the Board of Directors and may be paid a fixed sum for attendance at each meeting of the Board of Directors or a stated salary as director. No such payment shall preclude any director from serving the Corporation in any other capacity and receiving compensation therefor. Members of special or standing committees may be allowed like compensation for attending committee meetings.

Section 13. Interested Directors. No contract or transaction between the Corporation and one or more of its directors or officers, or between the Corporation and any other corporation, partnership, association, or other organization in which one or more of its directors or officers are directors or officers, or have a financial interest, shall be void or voidable solely for this reason, or solely because the director or officer is present at or participates in the meeting of the Board of Directors or committee thereof which authorizes the contract or transaction, or solely because his or their votes are counted for such purpose, if (i) the material facts as to his or their relationship or interest and as to the contract or transaction are disclosed or are known to the Board of Directors or the committee, and the Board of Directors or committee in good faith authorizes the contract or transaction by the affirmative votes of a majority of the disinterested directors, even though the disinterested directors be less than a quorum; (ii) the material facts as to his or their relationship or interest and as to the contract or transaction are disclosed or are known to the stockholders entitled to vote thereon, and the contract or transaction is specifically approved in good faith by vote of the stockholders; or (iii) the contract or transaction is fair as to the Corporation as of the time it is authorized, approved or ratified, by the Board of Directors, a committee thereof or the stockholders. Common or interested directors may be counted in determining the presence of a quorum at a meeting of the Board of Directors or of a committee which authorizes the contract or transaction.

Article IV

Officers

Section 1. General. The officers of the Corporation shall be chosen by the Board of Directors and shall be a President, a Secretary and a Treasurer. The Board of Directors, in its discretion, may choose one or more Vice Presidents, Assistant Secretaries, Assistant Treasurers and other officers. The Board of Directors, in its discretion, also may choose a Chairman of the Board of Directors and any Vice Chairman of the Board of Directors (who must be directors). Any number of offices may be held by the same person, unless otherwise prohibited by law, the Certificate of Incorporation or these By-Laws. The officers of the Corporation need not be stockholders of the Corporation nor, except in the case of the Chairman or Vice Chairman of the Board of Directors, need such officers be directors of the Corporation.

Section 2. Election. The Board of Directors at its first meeting held after each Annual Meeting shall elect the officers of the Corporation who shall hold their offices for such terms and shall exercise such powers and perform such duties as shall be determined from time to time by the Board of Directors; and all officers of the Corporation shall hold office until their successors are chosen and qualified, or until their earlier resignation or removal. Any officer elected by the Board of Directors may be removed at any time by the affirmative vote of a majority of the Board of Directors. Any vacancy occurring in any office of the Corporation shall be filled by the Board of Directors. The salaries of all officers of the Corporation shall be fixed by the Board of Directors.

Section 3. Voting Securities Owned by the Corporation. Powers of attorney, proxies, waivers of notice of meeting, consents and other instruments relating to securities owned by the Corporation may be executed in the name of and on behalf of the Corporation by the President or any Vice President and any such officer may, in the name of and on behalf of the Corporation, take all such action as any such officer may deem advisable to vote in person or by proxy at any meeting of security holders of any corporation in which the Corporation may own securities and at any such meeting shall possess and may exercise any and all rights and power incident to the ownership of such securities and which, as the owner thereof, the Corporation might have exercised and possessed if present. The Board of Directors may, by resolution, from time to time confer like powers upon any other person or persons.

Section 4. Chairman of the Board of Directors. The Chairman of the Board of Directors, if there be one, shall preside at all meetings of the stockholders and of the Board of Directors. He shall be the Chief Executive Officer of the Corporation, and except where by law the signature of the President is required, the Chairman of the Board of Directors shall possess the same power as the President to sign all contracts, certificates and other instruments of the Corporation which may be authorized by the Board of Directors. During the absence or disability of the President, the Chairman of the Board of Directors shall exercise all the powers and discharge all the duties of the President. The Chairman of the Board of Directors shall also perform such other duties and may exercise such other powers as from time to time may be assigned to him by these By-Laws or by the Board of Directors.

Section 5. Vice Chairmen of the Board of Directors. Each Vice Chairman of the Board of Directors, if any, shall be a member thereof and shall perform such duties and have such powers as from time to time may be assigned by the Board of Directors.

Section 6. President. The President shall, subject to the control of the Board of Directors and, if there be one, the Chairman of the Board of Directors, have general supervision of the business of the Corporation and shall see that all orders and resolutions of the Board of Directors are carried into effect. He shall have the power alone or with any other authorized officer to execute all bonds, mortgages, contracts and any other instruments of the Corporation, under the seal of the Corporation or otherwise (as shall the other officers of the Corporation when so authorized by these By-Laws, the Board of Directors or the President). In the absence or disability of the Chairman of the Board of Directors, or if there be none, the President shall preside at all meetings of the stockholders and the Board of Directors. If there be no Chairman of the Board of Directors, the President shall be the Chief Executive Officer of the Corporation. The President shall also perform such other duties and may exercise such other powers as from time to time may be assigned to him by these By-Laws or by the Board of Directors.

Section 7. Vice Presidents. At the request of the President or in his absence or in the event of his inability or refusal to act (and if there be no Chairman of the Board of Directors), the Vice President or the Vice Presidents if there are more than one (in the order designated by the Board of Directors) shall perform the duties of the President, and when so acting, shall have all the powers of and be subject to all the restrictions upon the President. Each Vice President shall have the power alone or with any other authorized officer to execute all bonds, mortgages, contracts and any other instruments of the Corporation, under the seal of the Corporation or otherwise (as shall the other officers of the Corporation when so authorized by these By-Laws, the Board of Directors or the President). Each Vice President shall perform such other duties and have such other powers as the Board of Directors from time to time may prescribe. If there be no Chairman of the Board of Directors and no Vice President, the Board of Directors shall designate the officer of the Corporation who, in the absence of the President or in the event of the inability or refusal of the President to act, shall perform the duties of the President, and when so acting, shall have all the powers of and be subject to all the restrictions upon the President.

Section 8. Secretary. The Secretary shall attend all meetings of the Board of Directors and all meetings of stockholders and record all the proceedings at the meeting in a book or books to be kept for that purpose; the Secretary shall also perform like duties for the standing committees when required. The Secretary shall give, or cause to be given, notice of all meetings of the stockholders and special meetings of the Board of Directors, and shall perform such other duties as may be prescribed by the Board of Directors or President, under whose supervision he shall be. If the Secretary shall be unable or shall refuse to cause to be given notice of all meetings of the stockholders and Special Meetings, and if there be no Assistant Secretary, then either the Board of Directors or the President may choose another officer to cause such notice to be given. The Secretary shall have custody of the seal of the Corporation and the Secretary or any Assistant Secretary, if there be one, shall have authority to affix the same to any instrument requiring it and when so affixed, it may be attested by the signature of the Secretary or by the signature of any such Assistant Secretary. The Board of Directors may give general authority to any other officer to affix the seal of the Corporation and to attest the affixing by his signature. The Secretary shall see that all books, reports, statements, certificates and other documents and records required by law to be kept or filed are properly kept or filed, as the case may be.

Section 9. Treasurer. The Treasurer shall have the custody of the corporate funds and securities and shall keep full and accurate accounts of receipts and disbursements in books belonging to the Corporation and shall deposit all moneys and other valuable effects in the name and to the credit of the Corporation in such depositories as may be designated by the Board of Directors. He shall have the power alone or with any other authorized officer to execute all bonds, mortgages, contracts and any other instruments of these Corporation, under the seal of the Corporation or otherwise (as shall the other officers of the Corporation when so authorized by these By-Laws, the Board of Directors or the President). The Treasurer shall disburse the funds of the Corporation as may be ordered by the Board of Directors, taking proper vouchers for such disbursements, and shall render to the President and the Board of Directors, at its regular meetings, or when the Board of Directors so requires, an account of all his transactions as Treasurer and of the financial condition of the Corporation. If required by the Board of Directors, the Treasurer shall give the Corporation a bond in such sum and with such surety or sureties as shall be satisfactory to the Board of Directors for the faithful performance of the duties of his office and for the restoration to the Corporation, in case of his death, resignation, retirement or removal from office, of all books, papers, vouchers, money and other property of whatever kind in his possession or under his control belonging to the Corporation.

Section 10. Assistant Secretaries. Except as may be otherwise provided in these By-Laws, Assistant Secretaries, if there be any, shall perform such duties and have such powers as from time to time may be assigned to them by the Board of Directors, the President, any Vice President, if there be one, or the Secretary, and in the absence of the Secretary or in the event of his disability or refusal to act, shall perform the duties of the Secretary, and when so acting, shall have all the powers of and be subject to all the restrictions upon the Secretary.

Section 11. Assistant Treasurers. Assistant Treasurers, if there be any, shall perform such duties and have such powers as from time to time may be assigned to them by the Board of Directors, the President, any Vice President, if there be one, or the Treasurer,

VOL 56 ISS 122 JE 25 1991 UMI

and in the absence of the Treasurer or in the event of his disability or refusal to act, shall perform the duties of the Treasurer, and when so acting, shall have all the powers of and be subject to all the restrictions upon the Treasurer. If required by the Board of Directors, an Assistant Treasurer shall give the Corporation a bond in such sum and with such surety or sureties as shall be satisfactory to the Board of Directors for the faithful performance of the duties of his office and for the restoration to the Corporation, in case of his death, resignation, retirement or removal from office, of all books, papers, vouchers, money and other property of whatever kind in his possession or under his control belonging to the Corporation.

Section 12. Other Officers. Such other officers as the Board of Directors may choose shall perform such duties and have such powers as from time to time may be assigned to them by the Board of Directors. The Board of Directors may delegate to any other officer of the Corporation the power to choose such other officers and to prescribe their respective duties and powers.

Article V

Stock

Section 1. Form of Certificates. Every holder of stock in the Corporation shall be entitled to have a certificate signed, in the name of the Corporation (i) by the Chairman of the Board of Directors, the President or a Vice President and (ii) by the Treasurer or an Assistant Treasurer, or the Secretary or an Assistant Secretary of the Corporation, certifying the number of shares owned by him in the Corporation.

Section 2. Signatures. Where a certificate is countersigned by (i) a transfer agent other than the Corporation or its employee, or (ii) a registrar other than the Corporation or its employee, any other signature on the certificate may be a facsimile. In case any officer, transfer agent or registrar who has signed or whose facsimile signature has been placed upon a certificate shall have ceased to be such officer, transfer agent or registrar before such certificate is issued, it may be issued by the Corporation with the same effect as if he were such officer, transfer agent or registrar at the date of issue.

Section 3. Lost Certificates. The Board of Directors may direct a new certificate to be issued in place of any certificate theretofore issued by the Corporation alleged to have been lost, stolen or destroyed, upon the making of an affidavit of that fact by the person claiming the certificate of stock to be lost, stolen or destroyed. When authorizing such issue of a new certificate, the Board of Directors may, in its discretion and as a condition precedent to the issuance thereof, require the owner of such lost, stolen or destroyed certificate, or his legal representative, to advertise the same in such manner as the Board of Directors shall require and/or to give the Corporation a bond in such sum as it may direct as indemnity against any claim that may be made against the Corporation with respect to the certificate alleged to have been lost, stolen or destroyed.

Section 4. Transfers. Stock of the Corporation shall be transferable in the manner prescribed by law and in these By-Laws. Transfers of stock shall be made on the books of the Corporation only by the person named in the certificate or by his attorney lawfully constituted in writing and upon the surrender of the certificate therefor, which shall be cancelled before a new certificate shall be issued.

Section 5. Record Date. In order that the Corporation may determine the stockholders entitled to notice of or to vote at any meeting of stockholders or any adjournment thereof, or entitled to express consent to corporate action in writing without a meeting, or entitled to receive payment of any dividend or other distribution or allotment of any rights, or entitled to exercise any rights in respect of any change, conversion or exchange of stock, or for the purpose of any other lawful action, the Board of Directors may fix, in advance, a record date, which shall not be more than sixty days nor less than ten days before the date of such meeting, nor more than sixty days prior to any other action. A determination of stockholders of record entitled to notice of or to vote at a meeting of stockholders shall apply to any adjournment of the meeting; *provided, however,* That the Board of Directors may fix a new record date for the adjourned meeting.

Section 6. Beneficial Owners. The Corporation shall be entitled to recognize the exclusive right of a person registered on its books as the owner of shares to receive dividends, and to vote as such owner, and to hold liable for calls and assessments a person registered on its books as the owner of shares, and shall not be bound to recognize any equitable or other claim to or interest in such share or shares on the part of any other person, whether or not it shall have express or other notice thereof, except as otherwise provided by law.

Article VI

Notices

Section 1. Notices. Whenever written notice is required by law, the Certificate of Incorporation or these By-Laws, to be given to any director, member of a committee or stockholder, such notice may be given by mail, addressed to such director, member of a committee or stockholder, at his address as it appears on the records of the Corporation, with postage thereon prepaid, and such notice shall be deemed to be given at the time when the same shall be deposited in the United States mail. Written notice may also be given personally or by telegram, telex or cable.

Section 2. Waivers of Notice. Whenever any notice is required by law, the Certificate of Incorporation or these By-Laws, to be given to any director, member of a committee or stockholder, a waiver thereof in writing, signed, by the person or persons entitled to said notice, whether before or after the time stated therein, shall be deemed equivalent thereto.

Article VII

General Provisions

Section 1. Dividends. Dividends upon the capital stock of the Corporation, subject to the provisions of the Certificate of Incorporation, if any, may be declared by the Board of Directors at any regular or special meeting, and may be paid in cash, in property, or in shares of the capital stock. Before payment of any dividend, there may be set aside out of any funds of the Corporation available for dividends such sum or sums as the Board of Directors from time to time, in its absolute discretion, deems proper as a reserve or reserves to meet contingencies, or for equalizing dividends, or for repairing or maintaining any property of the corporation, or for any proper purpose, and the Board of Directors may modify or abolish any such reserve.

Section 2. Disbursements. All checks or demands for money and notes of the Corporation shall be signed by such officer or officers or such other person or persons as the Board of Directors may from time to time designate.

Section 3. Fiscal Year. The fiscal year of the Corporation shall be fixed by resolution of the Board of Directors.

Section 4. Corporate Seal. The corporate seal shall have inscribed thereon the name of the Corporation, the year of its organization and the words "Corporate Seal, Delaware". The seal may be used by causing it or a facsimile thereof to be impressed or affixed or reproduced or otherwise.

Section 5. Amendments. These By-Laws may be amended or repealed, or new By-Laws may be adopted, by the Board of Directors at any meeting thereof (or by action by written consent as provided under section 141(f) of the Delaware General Corporation Law); *provided* that By-Laws adopted by the Board may be amended or repealed by the stockholders.

Article VIII

Indemnification

Section 1. Power to Indemnify in Actions, Suits or Proceedings Other Than Those by or in the Right of the Corporation. Subject to section 3 of this Article VIII, the Corporation shall indemnify any person who is or was a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the Corporation) by reason of the fact that he is or was a director, officer, employee request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the Corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of *nolo contendere* or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of the Corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his conduct was unlawful.

Section 2. Power to Indemnify in Actions, Suits or Proceedings by or in the Right of the Corporation. Subject to section 3 of this Article VIII, the Corporation shall indemnify any person who is or was a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the Corporation to procure a judgment in its favor by reason of the fact that he is or was a director, officer, employee or agent of the Corporation, or is or was a director or officer of the Corporation serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by him in connection with the defense or settlement of such action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the Corporation; except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable to the Corporation unless and only to the extent that the Court of Chancery or the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability, in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the Court of Chancery or such other court shall deem proper.

Section 3. Authorization of Indemnification. Any indemnifiction under this Article VIII (unless ordered by a court) shall be made by the Corporation only as authorized in the specific case upon a determination that indemnification of the director, officer, employee or agent is proper in the circumstances because he has met the applicable standard of conduct set forth in section 1 or section 2 of this Article VIII, as the case may be. Such determination shall be made (i) by the Board of Directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or (ii) if such a quorum is not obtainable, or even if obtainable a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, or (iii) by the stockholders. To the extent, however, that a director, officer, employee or agent of the Corporation has been successful on the merits or otherwise in defense of any action, suit or proceeding described above, or in defense of any claim issue or matter therein, he shall be indemnified against expenses (including attorneys' fees) actually and reasonably incurred by him in connection therewith, without the necessity of authorization in the specific case.

Section 4. Good Faith Defined. For purposes of any determination under section 3 of this Article VIII, a person shall be deemed to have acted in good faith and in a manner he reasonbly believed to be in or not opposed to the best interests of the Conporation, or with respect to any criminal ation or proceeding, to have had no reasonable cause to believe his conduct was unlawful, if his action is based on the records or books of account of the Corporation or another enterprise, or on information supplied to him by the officers of the Corporation or another enterprise in the course of their duties, or on the advice of legal counsel for the Corporation or another enterprise or on information or records given or reports made to the Corporation or another enterprise by an independent certified public accountant or by an appraiser or other expert selected with reasonable care by the Corporation or another enterprise. The term "another enterprise" as used in this section 4 shall mean any other corporation or any partnership, joint venture, trust, employee benefit plan or other enterprise of which such person is or was serving at the request of the Corporation as a director, officer, employee or agent. The provisions of this section 4 shall not be deemed to be exclusive or to limit in any way the circumstances in which a person may be deemed to have met the applicable standard of conduct set forth in sections 1 or 2 of this Article VIII, as the case may be.

Section 5. Indemnification by a Court. Notwithstanding any contrary determination in the specific case under section 3 of this Article VIII, and notwithstanding the absence of any determination thereunder, any director, officer, employee or agent may apply to any court of competent jurisdiction in the State of Delaware for indemnification to the extent otherwise permissible under sections 1 and 2 of this Article VIII. The basis of such indemnification by a court shall be a determination by such court that indemnification of the director, officer, employee or agent is proper in the circumstances because he has met the applicable standards of conduct set forth in section 1 or 2 of this Article VIII, as the case may be. Neither a contrary determination in the specific case under section 3 of this Article VIII not the absense of any determination thereunder shall be a defense to such application or create a presumption that the director, officer, employee or agent seeking indemnification has not met any applicable standard of conduct. Notice of any application for indemnification pursuant to this section 5 shall be given to the Corporation promptly upon the filing or such application. If successful, in whole or in part, the director, officer, employee or agent seeking indemnification shall also be entitled to be paid the expense of prosecuting such application.

Section 6. Expenses Payable in Advance. Expenses incurred by a director or officer in defending or investigating a threatened or pending action, suit or proceeding may be paid by the Corporation in advance of the final disposition of such action, suit or proceeding upon receipt of an undertaking by or on behalf of such director, officer, employee or agent to repay such amount if it shall ultimately be determined that he is not entitled to be indemnified by the Corporation as authorized in this Article VIII.

Section 7. Nonexclusivity of Indemnification and Advancement of Expenses. The indemnification and advancement of expenses provided by or granted pursuant to this Article VIII shall not be deemed exclusive of any other rights to which those seeking indemnification or advancement of expenses may be entitled under any By-Law, agreement, contract, vote of stockholders or disinterested directors or pursuant to the direction (howsoever embodied) of any court of competent jurisdiction or otherwise, both as to action in his official capacity and as to action in another capacity while holding such office, it being the policy of the Corporation that indemnification of the persons specified in section 1 and 2 of this Article VIII shall be made to the fullest extent permitted by law. The provisions of this Article VIII shall not be deemed to preclude the indemnification of any person who is not specified in section 1 or 2 of this Article VIII but whom the Corporation has the power or obligation to indemnify under the provisions of the General Corporation Law of the State of Delaware, or otherwise.

Section 8. Insurance. The Corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the Corporation, or is or was a director or officer of the Corporation serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise against any liability asserted against him and incurred by him in any such capacity, or arising out of his status as such, whether or not the Corporation would have the power or the obligation to indemnify him against such liability under the provisions of this Article VIII.

Section 9. Certain Definitions. For purposes of this Article VIII, references to "the Corporation" shall include, in addition to the resulting corporation, any constituent corporation (including any constituent of a constituent) absorbed in a consolidation or merger which, if its separate existence had continued, would have had power and authority to indemnify its directors, officers, employees or agents, so that any person who is or was a director, officer, employee or agent of such constituent corporation, or is or was a director of officer of such constituent corporation serving at the request of such constituent corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise, shall stand in the same position under the provisions of this Article VIII with respect to the resulting or surviving corporation as he would have with respect to such constituent corporation if its separate existence had continued. For purposes of this Article VIII, references to "fines" shall include any excise taxes assessed on a person with respect to an employee benefit plan; and references to "serving at the request of the Corporation" shall include any service as a director, officer, employee or agent of the Corporation which imposes duties on, or involves services by, such director, officer, employee or agent with respect to an employee benefit plan, its participants or beneficiaries; and a person who acted in good faith and in a manner he reasonably believed to be in the interest of the participants and beneficiaries of an

VOL 56 ISS 122 JE 25 1991 UMI

employee benefit plan shall be deemed to have acted in a manner "not opposed to the best interests of the Corporation" as referred to in Article VIII.

Section 10. Survival of Indemnification and Advancement of Expenses. The indemnification and advancement of expenses provided by, or granted pursuant to, this Article VIII shall, unless otherwise provided when authorized or ratified, continue as to a person who has ceased to be a director, officer, employee or agent and shall inure to the benefit of the heirs, executors and administrators of such a person.

Section 11. Limitation of Indemnification. Notwithstanding anything contained in this Article VIII to the contrary, except for proceedings to enforce rights to indemnification (which shall be governed by section 5 hereof), the Corporation shall not be obligated to indemnify any director, officer, employee or agent in connection with a proceeding (or part thereof) initiated by such person unless such proceeding (or part thereof) was authorized or consented to by the Board of Directors.

Section 12. Indemnification of Employees and Agents. The Corporation may, to the extent authorized from time to time by the Board of Directors, provide rights to indemnification and to the advancement of expenses to employees and agents of the Corporation similar to those conferred in this Article VIII to directors and officers of the Corporation.

Analysis to Aid Public Comment on the Provisionally Accepted Consent Order

The Federal Trade Commission has accepted for public comment from RWE Aktiengesellschaft, RWE–DEA Aktiengesellschaft fur Mineraloel und Chemie, Alpha Acquisition Corporation (collectively "RWE") and Vista Chemical Company ("Vista") an agreement containing consent order. This agreement has been placed on the public record for sixty days for reception of comments from interested persons.

Comments received during this period will become part of the public record. After sixty days, the Commission will again review the agreement and the comments received, and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Commission's investigation of this matter concerns the proposed acquisition by RWE of all of the issued and outstanding common stock of Vista. RWE and Vista are producers of high-purity alumina, and both companies employ a similar production process that also obtains synthetic linear alcohols as a co-product. This production process is unique to RWE and Vista. The alumina that the companies produce is used in manufacturing diverse products such catalysts for petroleum refineries, chemical manufacturing, and automobile emissions control, abrasive grains, for industrial finishing applications, and anti-skid agents, for the paper industry.

RWE manufactures high purity alcohol process alumina for these applications at its plants in Germany, and exports it throughout the world. RWE has substantial sales of this alumina in the United States. Vista manufactures high purity alcohol process alumina at its plant in the United States, and also exports it throughout the world. Most of Vista's sales are in the United States.

The agreement containing consent order would, if issued by the Commission, settle the complaint that alleges an anticompetitive effect in the world market for high purity alcohol process alumina.

The Commission has reason to believe that the acquisition would have an anticompetitive effect in the world market for high purity alcohol process alumina and would violate section 7 of the Clayton Act and section 5 of the Federal Trade Commission Act, unless an effective remedy eliminates the anticompetitive effect.

The proposed order accepted for public comment contains provisions requiring the licensing of: (1) Certain RWE production technology for high-purity alcohol process alumina; (2) certain Vista production technology for high-purity alcohol process alumina; and (3) certain Vista processing technology for high-purity alcohol process alumina. The licensed technology includes both patent rights, trade secrets, and other company know-how. The processing technology excludes processing technology relating to aluminas used for thickeners and most ceramics applications.

The purpose of these provisions is to provide a new company with the technology required to build a plant and establish itself as a producer of high-purity alcohol process alumina comparable to either Vista or RWE.

In addition, the proposed order contains provisions by which RWE would participate in an alumina joint venture with the technology licensee, and would supply the joint venture with alumina. The volume of alumina that RWE would be obligated to supply has been made a part of the proposed order, but because of the sensitive nature of this information, has not been included in the publicly available order.

The licensee would operate the joint venture; RWE would have a minority ownership share that would decline to the extent of disproportionate capital investments by the licensee. RWE would have a limited role in the management of the venture, and would have access only to limited information. The joint venture would have an initial term of four years that could be extended for another two years if the licensee has commenced construction of facilities necessary to produce high-purity alumina, and would terminate within sixty days of the date that the plant begins commercial production.

RWE would provide specified types and volumes of alumina to the joint venture. In particular, the joint venture could specify that RWE supply, from the Vista Lake Charles alumina plant, any grades and types of Vista's Catapal® B and Catapal® CF, or any other grades of Vista alumina that are used in chemical catalysts or automotive emissions control catalysts, which it would be free to market to any application. The joint venture could also specify that RWE supply alumina slurry of a quality that is suitable for use in sol gel abrasives, for marketing to that application.

The price of alumina to the joint venture has been made a part of the proposed order, but because of the sensitive nature of this information, has not been included in the publicly available order. The purpose of including in the proposed order an explicit price term is to provide that the alumina joint venture obtains a price that will enable it to compete effectively in marketing alumina.

The proposed order further provides that RWE should provide the licensee with specific customer information relating to certain applications for high-purity alumina; Chemical catalysts; automotive emissions control catalysts; and abrasives. In addition, the proposed order provides that RWE assign to the joint venture any current Vista contracts relating to these applications.

The purpose of the joint venture is to provide the licensee with marketing experience, so as to facilitate this successful utilization of the technology licenses ultimately to construct new facilities (or modify existing facilities) to produce high-purity alumina.

If the licensee does not commence construction of the necessary facilities within four years of the execution of the licensing agreement, does not complete construction within six years, or if the original license terminates due to termination of the joint venture by reason of financial failure or material breach of the joint venture agreement by the licensee, the proposed order further provides that RWE license the technology to some other person. The purpose of this provision is provide an additional opportunity for use of the license to bring onstream new production of the relevant product.

Under the terms of the proposed order, RWE must complete the required technology license and establish the other necessary agreements within six months of the date the proposed order becomes final. If RWE fails to complete the required licensing within the six-month period, RWE shall consent to the appointment of a trustee, who would have twelve additional months to license the technology, establish the joint venture, and make the necessary supply agreement. In either case, the proposed licensing agreement must be approved by the Federal Trade Commission after the divestiture proposal has been placed on the public record for reception of comments from interested persons.

For a period of ten years from its effective date, the proposed order would also prohibit RWE from acquiring, without prior Commission approval, assets or any interest in any company throughout the world that is engaged in the manufacture, distribution or sale of high-purity alumina, and that has had, during the last three years, sales of at least 125,000 pounds of high-purity alumina in the United States in any six-month period.

The purpose of this analysis is to invite public comment concerning the consent order and any other aspect of the acquisition. This analysis is not intended to constitute an official interpretation of the agreement and order or to modify its terms in any way.

Donald S. Clark,
Secretary.

BILLING CODE 6750–01–M

[File No. 901 0025]

Medical Staff of Broward General Medical Center; and Medical Staff of Holy Cross Hospital; Proposed Consent Agreements With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreements.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, the two consent agreements, accepted subject to final Commission approval, would prohibit, among other things, the two medical staffs from entering, or attempting to enter, into any agreement which would prevent or restrict the offering or delivery of health care services by Holy Cross Hospital, Broward General Hospital, Cleveland Clinic Florida (CFF), and CFF physician, or any other provider of health care services.

DATES: Comments must be received on or before August 26, 1991.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Mark Horoschak, FTC/S–3115, Washington, DC 20580. (202) 326–2756.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreements containing consent orders to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, have been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

The Federal Trade Commission, having initiated an investigation of certain acts and practices of the Medical Staff of Broward General Medical Center and it now appearing that the proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It Is Hereby Agreed by and between the proposed respondent and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Medical Staff of Broward General Medical Center is an unincorporated association, organized and existing under the laws of the State of Florida, with its mailing address at 1600 South Andrews Avenue, Fort Lauderdale, FL 33316.

2. The proposed respondent admits all the jurisdictional facts set forth in the draft of the complaint here attached.

3. The proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of the attached complaint, will be placed on the public record for a period of sixty (60) days and information with respect thereto will be publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by the proposed respondent that the law has been violated as alleged in the draft of the complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of §2.34 of the Commission's Rules, the Commission may, without further notice to the proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of the complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information

VOL
56
ISS
122
JE

1991
UMI

public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the United States Postal Service of the complaint and decision containing the order to the proposed respondent's address as stated in this agreement shall constitute service. The proposed respondent waives any right to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. The representatives and counsel of proposed respondent Broward General Medical Staff have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, the Broward General Medical Staff will be required to file compliance reports showing that it has fully complied with the order. The proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I.

It is Ordered that for purposes of this order, the following definitions shall apply:

A. *Medical Staff* means the Medical Staff of Broward General Medical Center, its successors, assigns, officers, directors, committees, agents, employees, and representatives.

B. *NBHD* means the North Broward Hospital District, a tax supported entity with its principal offices located at 1625 Southeast Third Avenue, Fort Lauderdale, FL 33316, the hospitals that are owned by the North Broward Hospital District, and its subsidiaries, affiliates, successors, assigns, officers, administrators, directors, committees, agents, employees, and representatives.

C. *Broward General* means the Broward General Medical Center, one of the hospitals of the North Broward Hospital District, located at 1600 South Andrews Avenue, Fort Lauderdale, FL 33316, its subsidiaries, affiliates, successors, assigns, officers, administrators, directors, committees, agents, employees, and representatives.

D. *CCF* means Cleveland Clinic Florida, a nonprofit corporation organized under Florida law, located at 3000 West Cypress Creek Road, Ft. Lauderdale, FL 33309, its parent foundation (Cleveland Clinic Foundation, which is located at 9500 Euclid Avenue, Cleveland, OH 44195), any entity located in Florida that is owned, controlled or under the management of Cleveland Clinic Florida or Cleveland Clinic Foundation, and the officers, directors, committees, agents, employees, and representatives of Cleveland Clinic Florida or Cleveland Clinic Foundation.

E. *Corrective action* means action taken pursuant to and in conformance with the Medical Staff's bylaws against any person with hospital privileges at Broward General whose activities or professional conduct is reasonably believed to be detrimental to patient safety or the delivery of quality patient care.

II.

It Is Further Ordered that the Medical Staff directly or indirectly, or through any device, in connection with activities in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from entering into, attempting to enter into, organizing, continuing, or acting in furtherance of any agreement or combination, express or implied, between or among its members or with other physicians, providers of health care services, medical societies, hospitals, or medical staffs, for the purpose or with the effect of preventing or restricting the offering or delivery of health care services by the NBHD, Broward General, CCF, any CCF physician, or any other provider of health care services, including any agreement to:

A. Refuse to deal or threaten to refuse to deal with the NBHD, Broward General, CCF, any CCF physician, or any other provider of health care services, including, but not limited to, any agreement or combination to refuse or threaten to refuse to:

1. Participate in any Medical Staff or NBHD committee, admit any patient to any NBHD hospital, fulfill any Medical Staff obligation imposed or recognized under any provisions of the Florida statutes, the Code of the NBHD, the By-Laws or Rules and Regulations of the Medical Staff, or fulfill any other function customarily performed by the Medical Staff;

2. Refer patients to, accept patient referrals from, provide back-up for, or consult in the treatment of any patient with, any CCF physician; or

3. Associate with NBHD or CCF as an employee or independent contractor or otherwise deal with NBHD, CCF or any CCF physician.

B. Deny, impede, or refuse to consider any application for hospital privileges or for changes in hospital privileges by any person solely because of his or her affiliation with CCF.

C. Deny or recommend to deny, limit, or otherwise restrict hospital privileges for any CCF physician without a reasonable basis for concluding that the denial, limitation, or restriction serves the interests of the hospital in providing for the efficient and competent delivery of health care services.

D. Discriminate, or threaten to discriminate, against any CCF physician with hospital privileges at Broward General with respect to the rights accorded to a member of the Medical Staff.

E. Encourage, advise, pressure, induce, or attempt to induce any person to engage in any action prohibited by this order.

III.

A. It Is Further Ordered that this order shall not be construed to prohibit the respondent Medical Staff or its members from engaging, pursuant to the Medical Staff's bylaws, in credentialing, corrective action, utilization review, quality assurance, or peer review at Broward General, where such conduct neither constitutes nor is part of any agreement, combination or conspiracy the purpose, effect, or likely effect of which is to impede competition unreasonably.

B. It Is Further Ordered that this order shall not be construed to prohibit any individual member of the Medical Staff from entering into an agreement or combination with any other physician or health care practitioner with whom the individual Medical Staff member practices in partnership or in a professional corporation, or who is employed by the same person.

IV.

It Is Further Ordered that the Medical Staff shall:

A. Within thirty (30) days after the date this order becomes final:

1. Mail a copy of this order, the accompanying complaint, and the attached Announcement to: (a) Each Commissioner on the NBHD Board of Commissioners; (b) the Chief Executive Officers of Cleveland Clinic Florida and Cleveland Clinic Foundation; and (c) each member of the Medical Staff as of the date this order becomes final; and

2. Retract in writing the Medical Staff's September 20, 1985, resolution opposing any affiliation between CCF and the NBHD.

B. For a period of three (3) years after the date this order becomes final:

1. Report to the Federal Trade Commission any adverse recommendation by the Medical Staff concerning any application for hospital privileges, or changes in existing hospital privileges, of any CCF physician or other CCF health care practitioner, within thirty (30) days after final action upon the Medical Staff's recommendation;

2. Distribute to each new member of the Medical Staff a copy of this order, the accompanying complaint, and the attached Announcement within 30 days after he or she is officially admitted to the Medical Staff; and

3. Maintain records adequate to describe in detail any action taken in connection with the activities covered by this order and, upon reasonable notice, make such records available to the Federal Trade Commission staff for inspection and copying.

C. Within sixty (60) days after the date this order becomes final, annually for three (3) years on the anniversary date of the initial report, and at such other times as the Federal Trade Commission may by written notice require, file with the Federal Trade Commission a report setting forth in detail the manner and form in which it has complied with and intends to continue complying with this order.

D. Notify the Federal Trade Commission of any proposed change in its organization that may affect compliance obligations arising out of this order at least thirty (30) days prior to the effective date of any such proposed change.

Appendix A—Announcement

As you may be aware, on [date] the Federal Trade Commission issued a complaint and a final consent order against the Broward General Medical Staff.

The order generally prohibits the Medical Staff from collectively refusing to deal with the North Broward Hospital District, Broward General ("Broward General"), Cleveland Clinic Florida ("CCF"), or CCF physicians. The order also prohibits the Medical Staff from refusing to evaluate applications for hospital privileges of any person because of his or her affiliation with CCF, or recommending the denial of hospital privileges for any CCF physician without a reasonable basis for concluding that the denial is reasonably related to the efficient operation and competent delivery of health care services at Broward General.

In addition, the order prohibits the Medical Staff from discriminating or threatening to discriminate against any CCF physician with privileges at Broward General, regarding the rights accorded to a member of the Medical Staff. Finally, the Medical Staff is also prohibited from encouraging any person or organization to take actions that the order prohibits the Medical Staff from taking.

Under the order, the Medical Staff retracted its September 20, 1985, resolution, which the complaint alleges was a threat to boycott Broward General to discourage the Hospital from affiliating with CCF.

The agreement between the Federal Trade Commission and the Broward General Medical Staff is for settlement purposes only and does not constitute an admission by the Medical Staff that the law has been violated as alleged in the complaint. The order does not prohibit the members of the Medical Staff from lawfully carrying on their medical practices and from providing patient care at Broward General and does not otherwise prohibit the Medical Staff, its officers and committees from engaging in lawful peer review and quality assurance at Broward General.

For more specific information, you should refer to the FTC complaint and order. The civil penalty for violation of the order is $10,000 per day for each order violation. A copy of the order is enclosed.

(Vice Chief of Staff)
Broward General Medical Staff.

Medical Staff of Broward General Medical Center Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted, subject to final approval, the agreement of the Medical Staff of Broward General Medical Center ("respondent Medical Staff"), Fort Lauderdale, Florida, to a proposed consent order. The agreement would settle charges by the Federal Trade Commission that the respondent Medical Staff violated section 5 of the Federal Trade Commission Act by conspiring to prevent, delay and limit competition from the Cleveland Clinic Foundation ("Cleveland Clinic" or "the Clinic"), through the use of boycott threats and other anticompetitive practices.

The proposed consent order has been placed on the public record for sixty days for reception of comments by interested persons. After sixty days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

A complaint, prepared for issuance by the Commission with the proposed order, alleges that the Cleveland Clinic, located in Cleveland, Ohio, is a provider of health care services to patients requiring complex medical care. According to the complaint, the Clinic is organized and operated as a multispecialty group medical practice and, as such, provides consumers an alternative to traditional individual and single specialty group forms of practice. Under the Clinic's multispecialty group practice format, patients often can obtain all necessary specialized medical care and ancillary services from employees of the Clinic, including salaried physicians.

The complaint alleges that the Cleveland Clinic sought to establish a regional branch in Northern Broward County, Florida. According to the complaint, in 1985 the North Broward Hospital District ("NBHD"), which owns and operates Broward General Medical Center ("the Hospital"), and the Cleveland Clinic sought to negotiate an affiliation pursuant to which the Hospital's facilities would be utilized in the development of the Clinic's Northern Broward County branch, known as Cleveland Clinic Florida ("CCF"). NBHD officials proposed developing an affiliation at Broward General under which physicians on the Hospital's Medical Staff would be invited to participate in a joint venture with NBHD and CCF.

The complaint further alleges that respondent Medical Staff considered the proposed affiliation to be a competitive threat to the individual and small group fee-for-service form of medical practice existing in Northern Broward County. Respondent Medical Staff was concerned that consumers would find CCF's alternative form of practice sufficiently attractive to disrupt existing patterns of patient referrals among individual physicians and small single specialty groups, thereby reducing revenues of existing physicians and physician groups.

The complaint alleges that in an effort to eliminate the competitive threat from CCF, respondent Medical Staff conspired with at least some of its members and others, to prevent, delay and limit competition from CCF through the use of boycott threats directed at Broward General, as well as other anticompetitive practices. The complaint alleges that at various times during and in furtherance of the combination and conspiracy, respondent Medical Staff and others have:

VOL 56 ISS 122 JE 25 1991 UMI

A. Agreed to boycott and threatened to boycott Broward General in order to coerce NBHD and Broward General:

(i) To refuse to affiliate with the Clinic, and

(ii) To prevent CCF physicians from becoming members of the respondent Medical Staff;

B. Refused to deal with Cleveland Clinic except on collectively determined terms;

C. Induced NBHD, through pretextual justifications, to deny hospital privileges to CCF physicians; and

D. Refused to process applications for privileges by CCF physicians.

The complaint further alleges that respondent Medical Staff's actions have injured consumers in the Nothern Broward County, by, among other things, depriving consumers of the price and quality benefits of competition between CCF's integrated multispecialty group practice and independent fee-for-service practitioners, and hindering CCF's ability to offer health care services to consumers by raising its costs, reducing its efficiency, and delaying or preventing CCF from offering specialty and subspecialty services.

The Proposed Consent Order

The proposed consent order would prohibit respondent Medical Staff from entering or attempting to enter into any agreement or combination to refuse to deal or threaten to refuse to deal with Broward General, CCF, any CCF physician, or any other provider of health care services, for the purpose or with the effect of preventing or restricting the offering or delivery of health care services.

The consent order specifically would prohibit any agreement or combination for the purpose or with the effect of preventing or restricting the offering or delivery of health care services by the NBHD, Broward General, CCF, any CCF physician, or any other provider of health care services including any agreement to: (1) Refuse or threaten to refuse to provide, or delay unreasonably in providing, an application for medical staff privileges to any CCF physician who submits a written request for the same; (2) deny, impede, or refuse to consider any application for hospital privileges or for changes in hospital privileges by any person solely because of his or her affiliation with CCF; (3) deny or recommend to deny, limit, or otherwise restrict hospital privileges for any CCF physician without a reasonable basis for concluding that the denial, limitation, or restriction serves the interests of the hospital in providing for the efficient and competent delivery of health care services; (4) discriminate, or threaten to discriminate, against any CCF physician with hospital privileges at Broward General with respect to the rights accorded to a member of the Medical Staff; and (5) encourage, advise, pressure, induce, or attempt to induce any person to engage in any action prohibited by the order.

The proposed order would not prohibit the respondent Medical Staff from engaging, pursuant to the Medical Staff's bylaws, in credentialing, corrective action, utilization review, quality assurance, or peer review at the Hospital, where such conduct is not part of any agreement to impede competition unreasonably. This provision makes clear that respondent Medical Staff can engage in its customary activities so long as they are not aimed at impeding competition. The proposed order further would not prohibit respondent Medical Staff's members from entering into agreements with physicians with whom they may practice as partners, in professional corporations, or as employees of the same person.

The order also would require respondent Medical Staff to mail copies to the complaint and order to NBHD and CCF officials. Further, the order would require respondent Medical Staff to retract in writing the Medical Staff's September 20, 1985, resolution opposing any affiliation between CCF and the NBHD.

Finally the order requires that the respondent Medical Staff: (1) File compliance reports with the Commission; (2) report any adverse recommendation by the Medical Staff concerning any application for hospital privileges, or change in existing hospital privileges, or any CCF physician; (3) distribute to each new member of the Medical Staff a copy of the order, the accompanying complaint, and the attached Announcement; and (4) notify the Federal Trade Commission of any proposed change in its organization that may effect compliance obligations arising out of this order.

The purpose of this analysis is to facilitate public comment on the proposed order. The analysis is not intended to constitute an official interpretation of the agreement and proposed order to modify its terms in any way.

The proposed order was entered into for settlement purposes only and does not constitute an admission by the proposed respondent that the law has been violated as alleged in the complaint.

The Federal Trade Commission, having initiated an investigation of certain acts and practices of the Medical Staff of Holy Cross Hospital, and it now appearing that the proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of acts and practices being investigated,

It Is Hereby Agreed by and between the proposed respondent and its counsel, and counsel for the Federal Trade Commission that:

1. Proposed respondent Medical Staff of Holy Cross Hospital is an unincorporated association, organized and existing under the laws of the State of Florida, with its mailing address at 4725 N. Federal Highway, Ft. Lauderdale, FL 33308.

2. The proposed respondent admits all the jurisdictional facts set forth in the draft of the complaint here attached.

3. The proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of the attached complaint, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision in disposition of the proceeding.

5. This agreeent is for settlement purposes only and does not constitute an admission by the proposed respondent that the law has been violated as alleged in the draft of the complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to the proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of the complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the United States Postal Service of the complaint and decision containing the order to the proposed respondent's address as stated in this agreement shall constitute service. The proposed respondent waives any right to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent's representatives and its counsel have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, the Medical Staff of Holy Cross Hospital will be required to file compliance reports showing that the Medical Staff of Holy Cross Hospital has complied with the order. The proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I.

It Is Ordered that for purposes of this order, the following definitions shall apply:

1. *Medical Staff* means the Medical Staff of Holy Cross Hospital, its successors, assigns, officers, directors, committees, agents, employees, and representatives.

2. *Holy Cross Hospital* means Holy Cross Hospital, Inc., a not-for-profit corporation with its principal officers located at 4725 N. Federal Highway, Ft. Lauderdale, FL 33308, its subsidiaries, affiliates, successors, assigns, officers, administrators, directors, committees, agents, employees, and representatives.

3. *CCF* means Cleveland Clinic Florida, a nonprofit corporation organized under Florida law, located at 3000 West Cypress Creek Road, Ft. Lauderdale, FL 33309, its parent foundation (Cleveland Clinic Foundation, which is located at 9500 Euclid Avenue, Cleveland, OH 44195), any entity located in Florida that its owned, controlled, or under the management of Cleveland Clinic Florida or Cleveland Clinic Foundation, and the officers, directors, committees, agents, employees, and representatives of Cleveland Clinic Florida or Cleveland Clinic Foundation.

4. *Corrective action* means action taken pursuant to and in conformance with the Medical Staff's bylaws against any person with hospital privileges at Holy Cross Hospital whose activities or professional conduct is reasonably believed to be determental to patient safety or the delivery of quality patient care.

II.

It Is Ordered that the Medical Staff, directly or indirectly, or through any device, in connection with activities in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from entering into, attempting to enter into, organizing, continuing, or acting in furtherance of any agreement or combination, express or implied, between or among its members or with other physicians, providers of health care services, medical societies, hospitals, or medical staffs, for the purpose or with the effect of preventing or restricting the offering or delivery of health care services by Holy Cross Hospital, CCF, and CCF physician, or any other provider of health services, including any agreement to:

A. Refuse to deal or threaten to refuse to deal with Holy Cross Hospital, CCF, and CCF physician, or any other provider of health care services, including, but not limited to, any agreement or combination to refuse or threaten to refuse to:

1. Admit any patient to Holy Cross Hospital, fulfill any Medical Staff obligation imposed or recognized under any provision of the Florida statutes, the By-laws or Rules and Regulations of the Medical Staff, or fulfill any other function customarily performed by the Medical Staff;

2. Refer patients to, accept patient referrals from, provide back-up for, or consult in the treatment of any patient with, any CCF physician; or

3. Associate with Holy Cross Hospital or CCF as an employee or independent contractor, or otherwise deal with Holy Cross Hospital, CCF or any CCF physician.

B. Refuse or threaten to refuse to provide, or delay unreasonably in providing, an application for medical staff privileges to any CCF physician who submits a written request for the same.

C. Deny, impede, or refuse to consider any application for hospital privileges or for changes in hospital privileges by any person solely because of his or her affiliation with CCF.

D. (i) Deny or recommend to deny, limit, or otherwise restrict hospital privileges for any CCF physician, or (ii) close or recommend to close any portion of the Medical Staff without a reasonable basis for concluding that such action or recommendation serves the interests of the hospital in providing for the efficient and competent delivery of health care services.

E. Discriminate, or threaten to discriminate, against any CCF physician with hospital privileges to Holy Cross Hospital with respect to the rights accorded to a member of the Medical Staff.

F. Encourage, advise, pressure, induce, or attempt to induce any person to engage in any action prohibited by this order.

III.

A. *It Is Further Ordered* that this order shall not be construed to prohibit the respondent Medical Staff or its members from engaging, pursuant to the Medical Staff's bylaws, in credentialing, corrective action, utilization review, quality assurance, or peer review at Holy Cross Hospital, where such conduct neither constitutes nor is part of any agreement, combination, or conspiracy the purpose, effect, or likely effect of which is to impede competition unreasonably.

B. *It Is Further Ordered* that this order shall not be construed to prohibit any individual member of the Medical Staff from entering into an agreement or combination with any other physician or health care practitioner with whom the individual Medical Staff member practices in partnership or in a professional corporation, or who is employed by the same person as said Medical Staff member.

IV.

It Is Further Ordered that the Medical Staff shall:

A. Within thirty (30) days after the date this order becomes final:

1. Mail a copy of this order, the accompanying complaint, and the attached Announcement to: (a) Each member of the Board of Trustees of the Holy Cross Hospital; (b) the Chief Executive Officer of Holy Cross Hospital; (c) the Administrator of Holy Cross Hospital; (d) the Chief Executive Officers of Cleveland Clinic Florida and Cleveland Clinic Foundation; and (e) each memer of the Medical Staff; and

2. Revise the Medical Staff privilege application form by deleting any

VOL 56 ISS 122 JE 25 1991 UMI

question relating to whether an applicant is an employee of a corporation and any request for a copy of any employment agreement between an applicant and any other person or corporation. A copy of such revised application form shall be provided to the Federal Trade Commission within thirty (30) days after being adopted by vote of the Medical Staff as provided in the Medical Staff bylaws.

B. For a period of three (3) years after the date this order becomes final:

1. Report to the Federal Trade Commission any adverse recommendation by the Medical Staff concerning any application for hospital privileges, or change in existing hospital privileges, of any CCF physician or other CCF health care practitioner, within thirty (30) days after final action upon the Medical Staff's recommendation;

2. Distribute to each new member of the Medical Staff a copy of this order, the accompanying complaint, and the attached Announcement within 30 days after he or she is officially admitted to the Medical Staff; and

3. Maintain records adequate to describe in detail any action taken in connection with the activities covered by this order and, upon reasonable notice, make such records available to the Federal Trade Commission staff for inspection and copying.

C. Within sixty (60) days after the date this order becomes final, annually for three (3) years on the anniversary date of the initial report, and at such other times as the Federal Trade Commission may by written notice require, file with the Federal Trade Commission a report setting forth in detail the manner and form in which it has complied with and intends to continue complying with this order.

D. Notify the Federal Trade Commission of any proposed change in its organization that may affect compliance obligations arising out of this order at least thirty (30) days prior to the effective date of any such proposed change.

Appendix A—Announcement

As you may be aware, on (date) the Federal Trade Commission issued a complaint and a final consent order against the Holy Cross Hospital Medical Staff.

The order generally prohibits the Medical Staff from collectively refusing to deal with Holy Cross Hospital, Cleveland Clinic Florida ("CCF") or CCF physicians. The order also prohibits the Medical Staff from refusing to evaluate applications for hospital privileges of any person because of his or her affiliation with CCF, or recommending the denial of hospital privileges for any CCF physician without a reasonable basis for concluding that the denial is reasonably related to the efficient operation of and competent delivery of health services at Holy Cross Hospital.

In addition, the order prohibits the Medical Staff from discrimination or threatening to discriminate against any CCF physician with privileges of Holy Cross Hospital, regarding the rights accorded to a member of the Medical Staff. Finally, the Medical Staff is also prohibited from encouraging any person or organization to take actions that the order prohibits the Medical Staff from taking.

Under the order, the Medical Staff removed from the hospital privilege application form the inquiry whether an applicant is an employee of a corporation, which the complaint alleges was added to the application form as a means of discriminating against applications filed by physician employees of CCF.

For more specific information, you should refer to the FTC complaint and order. The civil penalty for violation of the order is $10,000 per day for each order violation. A copy of the order is enclosed.

(President),
Holy Cross Hospital Medical Staff.

Medical Staff of Holy Cross Hospital Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted, subject to final approval, the agreement of the Medical Staff of Holy Cross Hospital ("respondent Medical Staff"), Fort Lauderdale, Florida, to a proposed consent order. The agreement would settle charges by the Federal Trade Commission that the respondent Medical Staff violated section 5 of the Federal Trade Commission Act by conspiring to prevent, delay and limit competition from the Cleveland Clinic Foundation ("Cleveland Clinic" or "the Clinic"), through the use of boycott threats and other anticompetitive practices.

The proposed consent order has been placed on the public record for sixty days for reception of comments by interested persons. After sixty days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

A complaint, prepared for issuance by the Commission with the proposed order, alleges that the Cleveland Clinic, located in Cleveland, Ohio, is a provider of health care services to patients requiring complex medical care. According to the complaint, the Clinic is organized and operated as a multispecialty group medical practice, and, as such, provides consumers an alternative to traditional individual and single specialty group forms of practice. Under the Clinic's multispecialty group format, patients often can obtain all necessary specialized medical care and ancillary services from employees of the Clinic, including salaried physicians.

The complaint alleges that the Cleveland Clinic sought to establish a regional branch in Northern Broward County, Florida. According to the complaint, Holy Cross Hospital ("the Hospital") and the Cleveland Clinic sought in 1986 to negotiate an affiliation pursuant to which the Hospital's facilities would be utilized in the development of the clinic's Northern Broward County branch, known as Cleveland Clinic Florida ("CCF"). The proposed affiliation provided that CCF would lease unused hospital beds and purchase ancillary hospital-based services from Holy Cross Hospital.

The complaint further alleges that respondent Medical Staff considered the proposed affiliation to be a competitive threat to the individual and small group fee-for-service form of medical practice existing in Northern Broward County. Respondent Medical Staff was concerned that consumers would find CCF's alternative form of practice sufficiently attractive to disrupt existing patterns of patient referrals among individual physicians and small single specialty groups, thereby reducing revenues of existing physicians and physician groups.

The complaint alleges that in an effort to eliminate the competitive threat from CCF, respondent Medical Staff conspired with at least some of its members and others, to prevent, delay and limit competition from CCF through the use of boycott threats directed at Holy Cross Hospital, as well as other anticompetitive practices. The complaint alleges that at various times during and in furtherance of the combination and conspiracy, respondent Medical Staff and others have:

A. Agreed to boycott and threatened to boycott Holy Cross Hospital in order to coerce the Hospital:

(i) To refuse to affiliate with the Clinic, and

(ii) To prevent CCF physicians from becoming members of the Medical Staff;

B. Refused to deal with Cleveland Clinic except on collectively determined terms;

C. Induced Holy Cross Hospital, through pretextual justifications, to deny hospital privileges to CCF physicians; and

D. Refused to process applications for privileges by CCF physicians.

The complaint further alleges that respondent Medical Staff's actions have injured consumers in Northern Broward County, by, among other things, depriving consumers of the price and quality benefits of competition between CCF's integrated multispecialty group practice and independent fee-for-service practitioners, and hindering CCF's ability to offer health care services to consumers by raising its costs, reducing its efficiency, and delaying or preventing CCF from offering specialty and subspecialty services.

The Proposed Consent Order

The proposed consent order would prohibit respondent Medical Staff from entering or attempting to enter into any agreement or combination to refuse to deal or threaten to refuse to deal with Holy Cross Hospital, CCF, any CCF physician, or any other provider of health care services for the purpose or with the effect of preventing or restricting the offering or delivery of health care services.

The consent order specifically would prohibit any agreement or combination for the purpose or with the effect of preventing or restricting the offering or delivery of health care services by Holy Cross Hospital, CCF, any CCF physician, or any other provider of health services, including any agreement to: (1) Refuse or threaten to refuse to provide, or delay unreasonably in providing, an application for medical staff privileges to any CCF physician who submits a written request for the same; (2) deny, impede, or refuse to consider any application for hospital privileges or for changes in hospital privileges by any person solely because of his or her affiliation with CCF; (3) deny or recommend to (i) deny, limit, or otherwise restrict hospital privileges for any CCF physician, or (ii) close any portion of the Medical Staff without a reasonable basis for concluding that such decision or recommendation serves the interests of the hospital in providing for the efficient and competent delivery of health care services; (4) discriminate, or threaten to discriminate, against any CCF physician with hospital privileges at Holy Cross Hospital with respect to the rights accorded to a member of the Medical Staff; and (5) encourage, advise, pressure, induce, or attempt to induce any person to engage in any action prohibited by the order.

The proposed order would not prohibit the respondent Medical Staff from engaging, pursuant to the Medical Staff's bylaws, in credentialing, corrective action, utilization review, quality assurance, or peer review at Holy Cross Hospital, where such conduct is not part of any agreement to impede competition unreasonably. This provision makes clear that respondent Medical Staff can engage in its customary activities so long as they are not aimed at impeding competition. The proposed order further would not prohibit respondent Medical Staff's members from entering into agreements with physicians with whom they may practice as partners, in professional corporations, or as employees of the same person.

The order also would require respondent Medical Staff to mail copies of the complaint and order to Holy Cross Hospital and CCF officials. Further, the order would require respondent Medical Staff to revise its Medical Staff privilege application form by deleting the question whether an applicant is an employee of a corporation, and the associated request for a copy of any employment agreement between an applicant and any other person or corporation.

Finally the order requires that the respondent Medical Staff: (1) File compliance reports with the Commission; (2) report any adverse recommendation by the Medical Staff concerning any application for hospital privileges, or change in existing hospital privileges, of any CCF physician; (3) distribute to each new member of the Medical Staff a copy of the order, the accompanying complaint, and the attached Announcement; and (4) notify the Federal Trade Commission of any proposed change in its organization that may affect compliance obligations arising out of this order.

The purpose of this analysis is to facilitate public comment on the proposed order. The analysis is not intended to constitute an official interpretation of the agreement and proposed order or to modify its terms in any way.

The proposed order was entered into for settlement purposes only and does not constitute an admission by the proposed respondent that the law has been violated as alleged in the complaint.

Donald S. Clark,
Secretary.

[FR Doc. 91-15087 Filed 6-24-91; 8:45 am]
BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

Report to Congress on the Costs of Operating Privately Owned Vehicles

The law (5 U.S.C. 5707(b)) requires the Administrator of General Services to periodically investigate the cost to Government employees of operating privately owned vehicles (automobiles, motorcycles, and airplanes) while on official business, to report the results of the investigations to Congress, and to publish the report in the Federal Register. This report is being published to comply with the requirements of the law.

Dated: June 12, 1991.
Richard G. Austin,
Administrator of General Services.

Report to Congress

The Travel Expense Amendments Act of 1975 (5 U.S.C. 5707(b)(1)) requires that the Administrator of General Services, in consultation with the Comptroller General of the United States, the Secretaries of Defense and Transportation, and representatives of Government employee organizations, conduct periodic investigations of the cost of operating privately owned vehicles (automobiles, motorcycles, and airplanes) to Government employees while on official business and report the results to the Congress at least once a year. The law further requires that a determination of the average, actual cost per mile be made based on the results of the investigation. Such figures must be reported to the Congress within 5 working days after the determinations have been made.

Pursuant to the requirements of 5 U.S.C. 5707(b)(1), the General Services Administration (GSA) conducted an investigation of the 1989 costs of operating privately owned motorcycles, automobiles, and airplanes and consulted with representatives of employee organizations, the General Accounting Office, and the Departments of Defense and Transportation on the results. As required, GSA is reporting the results of the investigation and the cost per mile determinations. GSA's cost studies show per-mile operating costs of 21.0 cents for motorcycles, 25.5 cents for automobiles, and 72.0 cents for airplanes.

I will issue a regulation to increase the current 24-cent for automobiles to 25 cents per mile, the maximum reimbursement allowance under existing law (5 U.S.C. 5704). The law also provides reimbursement ceilings of 20 and 45 cents per mile for motorcycles

VOL 56 ISS 122 JE 25 1991 UMI

and airplanes, respectively. GSA is considering alternative approaches to establishing reimbursement allowances for Federal employee use of privately owned vehicles while on official Government business.

This report on the cost of operating privately owned vehicles will be published in the Federal Register.

[FR Doc. 91-14971 Filed 6-24-91; 8:45 am]

BILLING CODE 6820-34-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Statement of Organization, Functions, and Delegations of Authority

Part F. of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services, Health Care Financing Administration (HCFA), (49 FR 35347, dated September 6, 1984) is amended to include the Secretary's delegation to the Administrator, HCFA, of the authority to conduct various demonstration projects under the provisions of the Omnibus Budget Reconciliation Act of 1986, Public Law 99-509, and the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203.

The specific changes to part F. are described below:

Section F.30., Delegations of Authority, is amended by adding paragraphs GG. through OO. The new delegations of authority read as follows:

GG. The authority under section 9305(k) of the Omnibus Budget Reconciliation Act of 1986, Public Law 99-509, and as may hereafter be amended, to conduct at least four projects on prior and concurrent authorization for post-hospital extended care and home health services furnished under part A or part B of title XVIII of the Social Security Act. The demonstration projects authorized under section 9305(k) of Public Law 99-509 must be developed in consultation with an advisory panel that includes experts in the delivery of post-hospital extended care services, home health services, and long-term care services and includes representatives of hospitals, physicians, skilled nursing facilities, home health agencies, long-term care providers, fiscal intermediaries, and Medicare beneficiaries.

HH. The authority under section 9342 of the Omnibus Budget Reconciliation Act of 1986, Public Law 99-509, as amended by section 4104(a)(2) of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, and as may hereafter be amended, to conduct at least 5 but not more than 10, 4-year demonstration projects to determine the effectiveness, cost, and impact on health status and functioning of providing comprehensive services for individuals entitled to benefits under title XVIII of the Social Security Act, who are victims of Alzheimer's disease or related disorders.

II. The authority under section 9412(b) of the Omnibus Budget Reconciliation Act of 1986, Public Law 99-509, as amended by section 4118(g) of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, and section 4744(a) of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, and as may hereafter be amended, to conduct a frail elderly demonstration which includes the authority to grant waivers of certain requirements of titles XVIII and XIX of the Social Security Act to not more than 15 public or nonprofit private community-based organizations to enable such organizations to provide comprehensive health care services on a capitated basis to frail elderly patients at risk of institutionalization. In order to receive a waiver under section 9412(b) of Public Law 99-509, an organization must be awarded a grant from the Robert Wood Johnson Foundation.

JJ. The authority under section 9414 of the Omnibus Budget Reconciliation Act of 1986, Public Law 99-509, as amended by section 4118(o) of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, and as may hereafter be amended, to enter into an agreement with the State of New Jersey for the purpose of conducting a pilot project under title XIX of the Social Security Act for providing respite care services for elderly and disabled individuals in order to determine the extent to which (1) the provision of necessary respite care services to individuals at risk of institutionalization will delay or avert the need for institutional care, and (2) respite care services enhance and sustain the role of the family in providing long-term care services for elderly and disabled individuals at risk of institutionalization.

KK. The authority under section 4007(c) of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, as amended by section 411(b)(6)(C) of the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, and as may hereafter be amended, to conduct a demonstration project to develop and determine the costs and benefits of establishing a uniform system for the reporting by Medicare participating hospitals of balance sheet and information described in section 4007(c)(2) of Public Law 100-203. The demonstration must be conducted with hospitals in at least two States, one of which maintains a uniform hospital reporting system, to report such information based on standard information established by the Secretary.

LL. The authority under section 4015(a) of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, and as may hereafter be amended, to conduct no more than three capitation demonstration projects with an entity which is either an eligible organization with a contract under section 1876 of the Social Security Act or which meets the restrictions and requirements of section 4015(a) of Public Law 100-203. No project may be authorized under section 4015(a) of Public Law 100-203 unless the entity offering the project has the necessary financial reserves to pay for any liability for benefits under the project including those liabilities for health benefits under Medicare and any supplemental benefits.

MM. The authority under section 4015(b) of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, to conduct demonstration projects for the purpose of testing alternative payment methodologies pertaining to capitation payments under title XVIII of the Social Security Act (the Act) including: (1) Computing adjustments to the average per capita cost under section 1876 of the Act on the basis of health status or prior utilization of services, and (2) accounting for geographic variations in cost in the adjusted average per capita costs applicable to an eligible organization under section 1876 of the Act which differs from payments currently provided on a county-by-county basis. No project may be authorized under section 4015(b) of Public Law 100-203 unless an entity is an eligible organization as defined in section 1876(b) of the Act and all the requirements of subsections (c) and (i)(3) of section 1876 of the Act are met.

NN. The authority under section 4027 of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, as amended by section 411(d) of the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, and as may hereafter be amended, to conduct a demonstration project to develop and test alternative methods of paying home health agencies on a prospective basis for services furnished under the Medicare and Medicaid programs.

OO. The authority under section 4079 of the Omnibus Budget Reconciliation Act of 1987, Public Law 100-203, and as may hereafter be amended, to enter into an agreement with not fewer than four eligible organizations submitting applications under section 4079 of Public Law 100-203 to conduct demonstration projects to provide payment on a prepaid, capitated basis for community nursing and ambulatory care furnished to any individual entitled to benefits under part A and enrolled under part B of title XVIII of the Social Security Act (other than an individual medically determined to have end-stage renal disease) who resides in the geographic area served by the organization and enrolls with such organization in accordance with section 4079(c)(2) of Public Law 100-203. No agreements may be entered into with an eligible organization to conduct a demonstration project under section 4079 of Public Law 100-203 unless the organization meets the requirements of subsections (c) and (d) of section 4079 with respect to members enrolled with the organization.

Reservation of Authority

The authority to make reports to Congress has been reserved by the Secretary and is not included in the delegations described in paragraphs GG. through OO. above.

The authorities herein delegated may be further redelegated. The delegation of these authorities is effective immediately. In addition, I hereby affirm and ratify any actions taken by the Administrator or other Health Care Financing Administration officials which, in effect, involved the exercise of the authorities delegated herein prior to the effective date of this delegation.

Dated: June 12, 1991.

Louis W. Sullivan,

Secretary, Department of Health and Human Services.

BILLING CODE 4120-03-M

Health Resources and Services Administration

Program Announcement and Proposed Funding Priority for Grants for Area Health Education Centers Special Initiatives

The Health Resources and Services Administration (HRSA) announces the acceptance of applications for fiscal year (FY) 1992 for Grants for Area Health Education Centers Special Initiatives under the authority of section 781(a)(2) of the Public Health Service (PHS) Act, as amended by the Health Professions Reauthorization Act of 1988, title VI of Public Law 100-607. Comments are invited on the proposed funding priority. This authority will expire on September 30, 1991. This program announcement is subject to reauthorization of this legislative authority and to the appropriation of funds.

The Administration's budget request for FY 1992 does not include funding for this program. Applicants are advised that this program announcement is a contingency action being taken to assure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Section 781(a)(2) authorizes Federal project assistance to medical and osteopathic schools which have previously received Federal financial assistance for an area health education centers (AHEC) program under either section 802 of Public law 96-484 in FY 1979 or under section 781(a)(1). In addition, section 781(a)(2) authorizes medical and osteopathic schools currently receiving Federal support for an AHEC program to apply for project assistance on behalf of an area health education center that is no longer federally funded as part of that program.

Section 781(a)(2) applications will be for projects to improve the distribution, supply, quality, utilization, and efficiency of health personnel in the health services delivery system; to encourage regionalization of educational responsibilities of the health professions schools; or to prepare, through preceptorships and other programs, individuals subject to a service obligation under the National Health Service Corps Scholarship program (section 338-A of the PHS Act) to effectively provide health services in health professional shortage areas (section 332 of the PHS Act). Public Law 101-597, enacted November 16, 1990, changed the term 'Health Manpower Shortage Area' to read 'Health Professional Shortage Area.'

To receive support, programs must meet the requirements of regulations set forth in 42 CFR part 57, subpart MM. The period for Federal support shall not exceed two years.

National Health Objectives for the Year 2000

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. The Area Health Education Centers Special Initiatives Program is related to the priority area of Educational and Community-Based Programs. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone (202) 783-3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service supported eduction and service programs which provide comprehensive primary care services to the underserved.

Review Criteria

The review of applications will take into consideration the following criteria:

1. The relative merit of the proposed project; and

2. The relative cost-efficiency of the proposed project.

In addition, the following mechanisms will be applied in determining the funding of approved applications.

1. Funding preferences—funding of a specific category or group of approved applications ahead of other categories or groups of applications, such as competing continuations ahead of new projects.

2. Funding priorities—favorable adjustment of aggregate review scores when applications meet specified objective criteria.

The following funding preference was established in FY 1988 after public comment and the Administration is extending this preference in FY 1992.

Funding Preference

In making awards under section 781 for FY 1992, a funding preference will be given to approved competing continuation applications as authorized by section 781(a)(1).

The following funding priorities were established in FY 1991 after public comment and the Administration is extending these priorities in FY 1992.

Funding Priorities

In determining the order of funding of approved applications the following priorities will be given to:

1. Applications which demonstrate substantial clinical training in one or more PHS Act section 332 Health Professional Shortage Area(s) and/or a

VOL
56
ISS
122
JE
25
1991
UMI

PHS Act section 329 Migrant Health Center, PHS Act section 330 Community Health Center, or State-designated clinic/center serving an underserved population. Section 332 establishes criteria to designate geographic areas, population groups, medical facilities, and other public facilities in the States as Health Professional Shortage Areas. Section 329 authorizes support for migrant health facilities nationwide and comprises a network of health care services for migrant and seasonal farm workers. Section 330 authorizes support for community health care services to medically underserved populations.

2. Applications proposing centers (projects) that will serve Health Professional Shortage Areas with a greater proportion of American Indian/Alaskan Natives, Asian/Pacific Islanders, Blacks, and/or Hispanics than exists in the general population in the United States.

Proposed Funding Priority for Fiscal Year 1992

Additionally, the following funding priority is proposed: Applications which are innovative in their health professions educational approaches to infant mortality prevention, HIV/AIDS, substance abuse or geriatrics. Innovation may be demonstrated by the concept/methodology to be used, by the establishment of a new educational relationship with a health care delivery system, by the population to be served within the center area, or by the subject or disease for the educational intervention, as opposed to the continuation of an existing effort.

These curricular areas are combined in a single funding priority to reduce the total number of funding priorities and to place an emphasis in all the program areas on innovation. Substance abuse was added because of its critical importance as a health care problem and the general perception that many health care providers do not effectively assist patients through prevention counseling, diagnosis or treatment.

Interested persons are invited to comment on the proposed funding priority. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the FY 1992 award cycle, the comment period has been reduced to 30 days. All comments received on or before July 25, 1991 will be considered before the final funding priorities are established. No funds will be allocated or final selections made until a final notice is published stating whether the final funding priority will be applied.

Written comments should be addressed to: Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 4C–25, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Medicine, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Requests for application materials and questions regarding grants policy and business management aspects should be addressed to: Grants Management Officer (U–76), Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 8C–26, Rockville, Maryland 20857, Telephone: (301) 443–6857.

Completed applications should be forwarded to the Grants Management Officer at the above address.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and Supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

The deadline date for receipt of applications is August 5, 1991. Applications shall be considered as meeting the deadline if they are either: (1) *Received on* or before the deadline date, or (2) *Postmarked on* or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

If additional programmatic information is needed, please contact: Division of Medicine, Multidisciplinary Centers and Programs Branch, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 4C–05, Rockville, Maryland 20857, Telephone: (301) 443–6950.

This program is listed at 93.924 in the *Catalog of Federal Domestic Assistance*. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

Dated: May 16, 1991.

Robert G. Harmon,

Administrator.

AGENCY: Social Security Administration, HHS.

ACTION: Notice of Social Security Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(1), the Commissioner of Social Security gives notice of Social Security Ruling 91–4. This Ruling, which is based on an opinion of the Office of the General Counsel, concerns whether Texas would recognize the validity of a Haitian divorce and whether a claimant for widow's insurance benefits who was a party to such a divorce would be estopped from denying its validity.

EFFECTIVE DATE: June 25, 1991.

FOR FURTHER INFORMATION CONTACT: Joanne K. Castello, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (301) 965–1711.

SUPPLEMENTARY INFORMATION: Although we are not required to do so pursuant to 5 U.S.C. 552(a)(1) and (a)(2), we are publishing this Social Security Ruling in accordance with 20 CFR 422.406(b)(1).

Social Security Rulings make available to the public precedential decisions relating to the Federal old-age, survivors, disability, supplemental security income, and black lung benefits programs. Social Security Rulings are based on case decisions made at all administrative levels of adjudication, Federal court decisions, Commissioner's decisions, opinions of the Office of the General Counsel, and other policy interpretations of the law and regulations.

Although Social Security Rulings do not have the force and effect of the law or regulations, they are binding on all components of the Social Security Administration, in accordance with 20 CFR 422.406(b)(1), and are to be relied upon as precedents in adjudicating other cases.

If this Social Security Ruling is later superseded, modified, or rescinded, we will publish a notice in the **Federal Register** to that effect.

In accordance with 20 CFR 422.418, all references to individuals or specific businesses involved have been deleted from the Ruling so as not to disclose confidential information, unless this information is already a matter of public record.

(Catalog of Federal Domestic Assistance Programs Nos. 93.802 Social Security—Disability Insurance; 93.803 Social Security—Retirement Insurance; 93.805 Social Security—Survivor's Insurance; 93.806 Special Benefits for Disabled Coal Miners; 93.807 Supplemental Security Income.)

Dated: June 3, 1991.

Gwendolyn S. King,

Commissioner of Social Security.

Sections 202(e)(1), 216(c), and 216(d)(2) of the Social Security Act (42 U.S.C. 402(e)(1), 416(c), and 416(d)(2)) Relationship—Validity of a Haitian Divorce—Estoppel—Texas

20 CFR 404.335, 404.336(a)(2), and 404.345

The claimant and the worker were married in Connecticut on April 30, 1972, and both parties were domiciled in Texas when the worker divorced the claimant in Haiti on December 29, 1976. The worker died in Texas in 1979. On March 12, 1987, the claimant applied for widow's insurance benefits on the deceased worker's earnings record. Because the claimant and the worker were domiciled in Texas rather than Haiti when the divorce decree was entered, a Texas court could refuse to recognize the Haitian divorce as valid. The evidence of record, however, showed that the claimant consented fully to the divorce, submitted freely to the jurisdiction of the Haitian court, was represented by counsel in the proceeding, and received property pursuant to a settlement agreement which was incorporated into the divorce decree. The evidence also showed that the claimant allowed the divorce to go unchallenged for more than 10 years and that she acted in full recognition of its validity by filing separate tax returns under her maiden name from 1976 through 1979 and by having her last name legally changed from her married name to her maiden name in 1977. Further, the evidence showed that, when the claimant changed her name, she specifically cited the Haitian divorce decree and its failure to restore her maiden name as a reason for making the change. *Held*, in view of the foregoing, the claimant was estopped from denying the validity of her divorce from the worker and, thus, was not entitled to widow's insurance benefits on his earnings record. Moreover, the claimant was not entitled to benefits as the worker's surviving divorced spouse because, under 42 U.S.C. 416(d)(1), she had not been married to him for at least 10 years.

A question has been raised regarding the validity of a Haitian divorce. Specifically at issue is whether Texas would recognize such a divorce and whether a claimant who was a party to the divorce would be estopped from denying its validity. In this particular case, the Social Security Administration (SSA) believes that whether or not a Texas court would recognize the Haitian divorce, the claimant would be estopped from challenging its validity.

The worker and the claimant were married on April 30, 1972, in Madison, Connecticut. The worker flew to Haiti on December 29, 1976, to obtain a divorce and remained there for several days. On December 23, 1976, before the divorce was granted, the claimant signed a notarized statement acknowledging the divorce, submitting herself to the jurisdiction of the Haitian court, and appointing an attorney to appear on her behalf. On that same date, the parties signed a property settlement agreement which was incorporated into the divorce decree. The divorce decree was rendered in Haiti on December 29, 1976, though both parties were residents of Texas. On July 11, 1977, the claimant was granted a court order changing her last name from her married name to her maiden name. She also filed separate tax returns under her maiden name from 1976 through 1979. The worker died in Texas in 1979. On March 12, 1987, the claimant applied for widow's insurance benefits on the worker's earnings record.

To be eligible to receive widow's insurance benefits, a claimant must meet the requirements set out in section 202(e)(1) of the Social Security Act (the Act). According to that section of the Act, "the widow (as defined in section 216(c)) and every surviving divorced wife (as defined in section 216(d)) of an individual who died a fully insured individual * * * shall be entitled to a widow's insurance benefit * * *." To be eligible as a widow as defined in section 216(c), a woman must be the surviving wife of the decedent. To be eligible as a surviving divorced wife under section 216(d)(2), a woman must have been married to the deceased worker for a period of 10 years immediately before the date the divorce became effective. Because the claimant and the worker were married in 1972 and divorced in 1976 in Haiti, the claimant would not qualify for benefits as a surviving divorced wife if this Haitian divorce were recognized as valid, since the duration of the marriage did not meet the 10-year requirement. If the divorce were not recognized, the claimant would be deemed to have been married to the worker until the time of his death and would therefore be eligible to receive benefits as a widow unless she is estopped from denying the validity of her divorce. The determination of whether the claimant would be entitled

UMI

to survivor benefits thus depends initially upon the law in Texas as it pertains both to the recognition of foreign divorce decrees and to the applicability of estoppel.

Article 4, section 1 of the United States Constitution, the "full faith and credit" clause, requires each State of the union to enforce the acts, records, or judicial proceedings "of every other state." This clause does not, however, require States to enforce decrees of foreign countries. *Schacht* v. *Schacht*, 435 S.W. 2d 197 (Tex. Civ. app.—Dallas 1968). Should a State decide to enforce such a decree, the decision would be based on the doctrine of comity. This doctine allows a State court to give full effect to a decision of another jurisdiction based on the mutual interests of respect and justice. Therefore, while a Texas court could give effect to a Haitian divorce decree, it is not bound to do so.

A key factor which a Texas court would consider in determining whether to give full faith and credit to a foreign divorce is whether the parties to the divorce were domiciled in the foreign country when the decree was entered. *Schacht, supra.* According to the U.S. Supreme Court, "(u)nder our system of law, judicial power to grant a divorce—jurisdiction strictly speaking—is founded on domicile * * *. Domicile implies a nexus between person and place of such permanence as to control the creation of legal relations and responsibilities of the utmost significance." *Williams* v. *North Carolina*, 325 U.S. 226, 65 S. Ct. 1092, 89 LE 1577 at 1581 (1944). Thus, if the parties to a foreign divorce were not domiciled in the particular foreign country, the courts will rarely recognize the validity of the divorce, even where the country had no such domicile requirement. *Turman* v. *Turman*, 99 S.W. 2d 947 (Tex. Civ. App.—Ft. Worth 1936), cert. denied 301 U.S. 698; 13 ALR 3d 1419; 24 AM. Jur. 2d section 1106.

In Texas, when determining the validity of a foreign divorce, a court will assume the divorce law of the foreign country is the same as the divorce law of Texas in the absence of proof to the contrary. *Tallant* v. *State*, 656 S.W. 2d 828 (Tex. Civ. App.—Ft. Worth, 1983); *Webb* v. *Webb*, 461 S.W. 2d 204 (Tex. Civ. App.—San Antonio, 1970). Texas law requires that one of the parties have residence in the State for 6 months and in the county where the divorce is sought for 90 days before the court in the county can assert jurisdiction over the parties. TEX. FAM. CODE ANN. section 321 (Vernon 1986). Because neither the worker nor the claimant was domiciled in Haiti at the time of their divorce, as evidenced by the divorce decree which lists their hometown as Houston, Texas, a Texas court could refuse to recognize the divorce as valid based on jurisdictional grounds.

Even though a Texas court could decline to recognize the claimant's and the worker's Haitian divorce, however, it is SSA's opinion that the claimant would nonetheless be estopped from denying the validity of the divorce. This opinion is based on several grounds.

First, Texas courts have generally held that, where the parties to a foreign divorce have consented to the divorce and have submitted to the jurisdiction of the foreign court, they will be estopped from collaterally attacking the judgment. *Dunn* v. *Tiernan*, 284 S.W. 2d 754 (Tex. Civ. App.—El Paso, 1955, writ ref. n.r.e.) (a husband who obtained bilateral divorce in a Mexican court was estopped from later collaterally attacking the decree). See also *Webb* v. *Webb, supra* (one who has consented to and participated in a foreign divorce is estopped from collaterally attacking the divorce and thus, the issue of whether the parties so participated is one of fact for the jury); *Moody* v. *Moody*, 465 S.W. 2d 836 (Tex. Civ. App.—Corpus Christi, 1971, writ ref. n.r.e.) (a party who participated in a divorce suit, without objecting to the jurisdiction of the court, may not thereafter assail the decree in a collateral proceeding on the theory that one or more of the parties were nonresidents). Additionally, the Fifth Circuit Court of Appeals has recognized and applied this principle of Texas law. In *Diehl* v. *U.S.*, 438 F.2d 705, 708 (5th Cir. 1971), the court stated that as a result of *Dunn* v. *Tiernan*, "it was settled in Texas that a party who seeks and obtains a Mexican divorce is thereafter estopped to deny its validity."

In the situation presented here, even though the claimant was not physically present in Haiti when the divorce decree was rendered, she signed a notarized settlement agreement 6 days before the date of the divorce by which she gave her full and total consent to the divorce. In addition, on that same day, she signed a notarized waiver submitting herself to the jurisdiction of the Haitian court and appointing an attorney to appear on her behalf, which he did. In the absence of some evidence that the claimant was subject to duress or coercion when she signed, it is SSA's opinion that such evidence of consent would be sufficient to allow a Texas court to estop the claimant from challenging the validity of the divorce based on the decisions in *Dunn, Webb,* and *Moody, supra.* No allegations of duress or coercion have been made.

SSA's second basis for concluding that the claimant would be estopped from denying the validity of the divorce is that, in Texas, courts have held that, where a party to an invalid divorce has received money or property pursuant to that divorce, that party will be estopped from later attacking the decree. *Morehouse* v. *Morehouse*, 111 S.W. 2d 831 (Tex. Civ. App.—San Antonio, 1938). Similarly, a Texas court has ruled that when a party has received property pursuant to an annulment decree, the party is estopped from later asserting the invalidity of the decree. *Lunt* v. *Lunt*, 121 S.W. 2d 445 (Tex. Civ. App.—El Paso, 1938).

The evidence of record clearly indicates that the claimant and the worker entered into and signed a property settlement agreement which stipulated that the parties desired a divorce and that the settlement agreement was to be determinative of the disposition of all of the property owned by the parties. This agreement was incorporated into the Haitian divorce decree which ordered the provisions of the agreement to be carried out. Pursuant to the agreement, the worker relinquished any rights he had in the home belonging to the claimant in Boulder, Colorado, and in addition, the claimant was to receive her share of personal and community property. Thus, it appears from the evidence that the claimant did receive property pursuant to the divorce and could therefore be stopped from challenging the divorce on that basis.

A third factor which would weigh against the claimant if she asserted the invalidity of the divorce is the length of time which has expired since the divorce was rendered. Because more than 10 years elapsed between the date of the divorce and the date the claimant applied for benefits, a court could apply laches against the claimant.[1] In Texas jurisprudence, there is support for the proposition that for laches to apply, a mere lapse of time is insufficient; there must also be a resulting disadvantage to another. *Simpson* v. *Simpson*, 380 S.W. 2d 855 (Tex. Civ. App.—Dallas, 1964, writ ref. n.r.e.). Here, there is nothing in the record to indicate that this 10-year lapse has caused a hardship to anyone (e.g., no party has remarried in the intervening 10 years), and therefore SSA does not believe that laches would be an independent ground for estoppel against the claimant. However, it should be noted that the court in *Dunn* indicated that a delay of 22½ months in attacking a foreign divorce decree would subject the delaying party to a charge of laches and, thus, weighed this factor against the attacking party. SSA believes, therefore, that a delay of 10 years in challenging this decree would be weighed heavily against the claimant in a court's decision on whether to allow such a challenge.

[1] Laches is an equitable doctrine which is defined as a failure to do something which should be done or to claim or enforce a right at a proper time. Black's Law Dictionary (5th Ed. 1979). The effect of laches is to prevent one from bringing a claim after the proper time for bringing the claim has elapsed.

Finally, it should be strongly emphasized that the court's decision on whether to allow the claimant to attack the Haitian divorce decree would be based on principles of equity. As the court stated in *Dunn:*

> Estoppel being an equitable matter and divorce itself being an equitable matter, the principles of equity must apply. This being true it would not be equitable for he who was a party to the fraud and who had benefitted therefrom, to now cry fraud to his own advantage * * *.

284 S.W. 2d at 767. In the instant case, the claimant fully agreed to the divorce, submitted herself freely to the jurisdiction of the Haitian court, was represented by counsel in the proceeding, and recieved property pursuant to a settlement agreement incorporated into the divorce decree. She then acted in full recognition of the decree as valid by having her last name changed in July of 1977 from her married name to her maiden name, citing the Haitian divorce decree and its failure to restore her maiden name as a reason for making the change. Further, she began filing separate tax returns under her maiden name. The claimant enjoyed whatever benefits she sought from her divorce during the 10-year period that the divorce remained unchallenged. To now find that the divorce was invalid so that the claimant could collect benefits as the deceased worker's widow, in SSA's view, would appear to a court to be clearly inequitable, and SSA therefore concludes that a Texas court would estop the claimant from challenging the divorce.

SSA notes that its operating instructions comport with this conclusion. GN 00305.465 of the Program Operations Manual System (POMS) lists five grounds upon which a party may be estopped from denying the validity of a divorce. Three of these gounds appear to be applicable to this situation. First, GN 00305.465B of the POMS states that a party may be estopped where he or she was the defendant in a divorce action and accepted the court's jurisdiction. As stated above, the claimant gave her full consent and submitted to the jurisdiction of the Haitian court. Next, GN 00305.465D of the POMS states that estoppel may be found where a party has accepted property or money or a property settlement on this basis of the divorce decree. The claimant agreed to the property settlement incorporated into the Haitian divorce and received a home and personal property pursuant to the settlement. Finally, GN 00305.465 E of the POMS notes that estoppel may lie where the party otherwise accepted or acted in recognition of the decree as valid (e.g., knew of the divorce and allowed it to stand unchallenged for a long time). The claimant in this case let her divorce go unchallenged for more than 10 years, and when she had her name changed, she specifically cited the Haitian divorce as one of her reasons for making the change.

In conclusion, the law and facts in this case indicate that, because the worker and the claimant were domiciled in Texas rather than Haiti when the divorce decree was entered, a Texas court could refuse to recognize the Haitian divorce as valid. The claimant, however, is the only person with standing to challenge the decree. Because she submitted to the jurisdiction of the Haitian court, agreed to a property settlement, and then subsequently acted in recognition of the divorce as valid, SSA believes that she would be estopped from denying the validity of the divorce. Therefore, SSA concludes that the divorce would stand as valid, making the claimant ineligible to receive widow's benefits under section 202(e) (1) of the Act. Moreover, because the claimant was married only 4 years prior to the divorce rather than 10 years as required by section 216(d)(1) of the Act, she would also be ineligible as a surviving divorced spouse.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV-010-91-7122-09-1101]

Termination of Environmental Impact Statement for Thousand Springs Power Plant Project, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Termination of Thousand Springs Power Plant EIS.

SUMMARY: The Bureau of Land Management, Elko District Office, has received notification from Sierra Pacific Resources, legal representative for Thousand Springs Generating Company, to cease all project activities relative to the Thousand Springs Power Plant Environmental Impact Statement (EIS).

The Draft EIS for the proposal was released to the public in January of 1990. The document was analyzing the environmental impacts that would result from a land exchange and the subsequent construction and operation of an eight-unit, 2,000 megawatt, coal-fired power plant and alternatives.

Since August 1990, the project proponents had placed the completion of the Final EIS in suspension. Project termination has now been confirmed, and therefore, a Final Environmental Impact Statement will not be prepared.

Dated: June 14, 1991.

Rodney Harris,

District Manager.

Chicago and North Western Transportation Co.—Abandonment Exemption—Between Crawford, NE, and Crandall, WY

AGENCY: Interstate Commerce Commission.

ACTION: Notice.

SUMMARY: Chicago and North Western Transportation Company (CNW) on June 14, 1991 amended a petition for exemption filed on June 4, 1991 under 49 U.S.C. 10505 to abandon a line of railroad in Nebraska and Wyoming so that it now seeks to abandon only the 42.9-mile line between Crawford, NE and Crandall, WY. We believe that the comments from members of the public, particularly those located in the areas affected by the proposed abandonment, should be sought and considered as part of our consideration of this petition, as amended. In addition, we will hold one or more public hearings in the affected area, at a time and place to be announced, to hear testimony from interested persons about the proposed abandonment.

The CNW will have 10 days to reply to any comments. We will publish notice of this decision in the Federal Register. Interested parties will have 20 days following publication to file comments. An original and 10 copies of all comments must be filed with the Secretary of the Commission and copies of all comments must be served on the CNW.

DATES: Comments are due July 15, 1991. CNW replies are due July 25, 1991.

ADDRESSES: Send comments (an original and 10 copies) referring to AB–1 (Sub-No. 236X) to: Office of the Secretary, Interstate Commerce Commission, Case Control Branch, Washington, DC 20423. DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 89–52]

Maryanne Marsilli Isaac, R.Ph., d/b/a Bell Apothecary; Granting of Registration

On October 17, 1989, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Maryanne Marsilli Isaac, R.Ph. (Respondent), d/b/a Bell Apothecary, 2045 Fairview Avenue, Easton, Pennsylvania 18042, proposing to deny her application for registration executed on November 1, 1988. The Order to Show Cause alleged that Respondent's registration is inconsistent with the public interest as the term is defined in 21 U.S.C. 823(f).

By letter dated November 15, 1989, Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held in Philadelphia, Pennsylvania on

May 15 and 16, 1990. The case was subsequently transferred to Administrative Law Judge Mary Ellen Bittner.

On January 31, 1991, Judge Bittner issued her opinion and recommended ruling, findings of fact, conclusions of law and decision. On February 21, 1991, Respondent filed exceptions to Judge Bittner's recommended ruling pursuant to 21 CFR 1316.66. On March 1, 1991, the administrative law judge transmitted the record of these proceedings, including Respondent's exceptions, to the Administrator. The Administrator has considered the record in its entirety and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon the findings of fact and conclusions of law as hereinafter set forth.

The administrative law judge found that Respondent has been a licensed pharmacist since 1961 and is currently licensed in the States of Pennsylvania, New Jersey, and Delaware. On June 6, 1986, Respondent purchased Bell Apothecary from Mr. Richard Rosenberg, who continued to work at Bell as a registered pharmacist for a few months after the sale to Respondent. Mr. Wakeem Isaac (Respondent's husband) also worked as a registered pharmacist at Bell until May 1988.

On February 26, 1988, the Pennsylvania Commonwealth's Attorney's Office conducted an audit of Boro Pharmacy. Mr. Wakeem Isaac owned and operated Boro Pharmacy, in which Respondent worked on a part-time basis from 1980 to 1986. The results of the audit indicated excessive and unexplained shortages of Schedule III and IV controlled substances. The audit also revealed numerous recordkeeping violations. Following the audit of his pharmacy, Mr. Isaac was arrested and convicted of five misdemeanor counts of violating Pennsylvania controlled substances recordkeeping requirements. Also he was ordered not to dispense any Schedule II controlled substances for a period of six months from the sentencing date.

On August 11, 1988, Investigators from the Drug Enforcement Administration conducted an audit of Bell Pharmacy that covered the period of June 6, 1986 to August 11, 1988. The audit disclosed overages of 42.72 percent of Dexedrine 5 mg. tablets, 65.63 percent of Dexedrine 10 mg. tablets, and 23.07 percent of Dexedrine 15 mg. tablets; and shortages of 6.68 percent of Percodan tablets and 2.23 percent of Tylox, all Schedule II substances. Two months later, Mr. Isaac supplied the DEA Investigator with additional records from Bell Pharmacy. The Investigator recalculated the audit which, as amended, showed shortages and overages of no more than five percent for any substance audited.

The investigation also revealed that Mr. Isaac had filled at least 50 prescriptions for Schedule II controlled substances during the audit period, notwithstanding the court's order that he not dispense any Schedule II controlled substances until August 28, 1988. Additionally, the investigation revealed that more than 830 dosage units of Percocet, a Schedule II substance, were dispensed to a patient named Jane Morrow, between June 28, 1988 and August 25, 1988. The investigation also revealed that Mr. Isaac dispensed 100 dosage units of Percocet to Ms. Morrow pursuant to an oral prescription, and that no written prescription was ever furnished. Written prescriptions are required for all Schedule II pharmaceuticals.

An Order to Show Cause proposing to revoke the DEA registrations of both pharmacies, Boro and Bell, was issued in December 1988. On April 27, 1988, the then-Administrator, adopting the opinion of the administrative law judge, revoked both registrations. In that case, the Administrator concluded that both Respondent and Mr. Isaac demonstrated their inability to properly operate a pharmacy.

The administrative law judge also found that the Pennsylvania Board of Pharmacy held a hearing pursuant to an administrative complaint issued against Mr. Isaac. The Board concluded that Mr. Isaac failed to properly supervise an unlicensed employee and restrict that employee's access to controlled substances. The Board also concluded that Mr. Isaac had failed to comply with state recordkeeping practices. The Board fined Mr. Isaac $1,000.00 and suspended his license to practice pharmacy for a five-year period beginning November 17, 1988. The first year of the suspension was to be active and the remaining four years probationary. Mr. Isaac was prohibited form working in or around the Boro and Bell pharmacies.

At the hearing in this matter, Respondent offered the testimony of several character witnesses, the witnesses stated that they have seen Respondent operate in a very professional manner and that Respondent has an excellent reputation and is well-respected in the community. Respondent also testified on her own behalf. Respondent asserted that she needs a DEA registration so that she can maintain a complete "patient profile," in order to have a central record of all the medications each customer takes. Respondent testified that her inability to maintain complete customer profiles in her computer records poses safety hazards and that she needs to keep track of all possible contraindications and medical conditions. Respondent also testified that she takes thirty credits of continuing education every two years although she admits that none of the programs she has taken were related to controlled substances.

The administrative law judge further found that Respondent has not been disciplined by the state licensing authorities or convicted of any criminal conduct. There is no contention that Ms. Isaac personally filled prescriptions improperly or for no legitimate medical purposes.

The administrative law judge concluded that the registration of Respondent would not be in the public interest. It is clear that recordkeeping violations occurred at Boro Pharmacy during the time Respondent was working there, and that Respondent failed to detect the serious overages and shortages at the pharmacy. Respondent also permitted her husband to fill prescriptions for Schedule II controlled substances, in violation of the conditions of his February 1986 sentence. Additionally, Respondent permitted her husband to fill prescriptions for excessive amounts of Percocet for one patient. The administrative law judge recommended the denial of Respondent's application for DEA registration.

Respondent filed exceptions to the findings of the administrative law judge, stating essentially that Respondent is being held accountable for the "sins" of her husband. Respondent also states that Mr. Isaac has had no involvement whatsoever in the operation of Bell Apothecary since 1988. Respondent also asserted that the Government has presented no evidence of wrongdoing since the issuance of the 1988 Final Order.

After considering all of the evidence, including the opinion and recommended ruling of the administrative law judge, the Administrator has decided not to deny Respondent's application. The Administrator concludes that there is sufficient evidence in the record to believe that Respondent, given the opportunity, will utilize a DEA registration in a responsible manner.

The Administrator does impose the following restrictions upon the DEA registration to be issued to Respondent:

1. Mr. Isaac shall have no involvement whatsoever with Bell Apothecary in any role including ownership, management, or as an employee.

VOL 56 ISS 122 JE 25 1991 UMI

2. For at least two years from the date on which the registration herein is issued, Respondent shall submit a log of all purchases of controlled substances made during the previous calendar quarter to the Special Agent in Charge of the DEA Philadelphia Field Division or his designee.

3. Respondent shall, by acceptance of a registration, consent to unannounced inspections of Bell Apothecary without an administrative inspection warrant. Such inspections shall be for the purpose of determining Respondent's compliance with both the terms of this order and all pertinent requirements of the Controlled Substance Act and the regulations thereunder.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 CFR 0.100(b), hereby ordered that the application for DEA registration submitted by Maryanne Marsilli Isaac, R.Ph., d/b/a Bell Apothecary, on November 1, 1988, for registration under the Controlled Substances Act be, and it hereby is, granted, subject to the conditions enumerated above. This order is effective June 25, 1991.

Dated: June 17, 1991.

Robert C. Bonner,

Administrator of Drug Enforcement.

[FR Doc. 91-14998 Filed 6-24-91; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 91-10]

D-Tek Enterprises; Revocation of Registration

On February 21, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to D-Tek Enterprises, Inc., (Respondent), 20602 Ramita Trail, Boca Raton, Florida 33433. The Order to Show Cause proposed to revoke Respondent's DEA Certificates of Registration. The statutory basis for the Order to Show Cause was that Respondent's continued registration would be inconsistent with the public interest as set forth in 21 U.S.C. 823(f) and 824(a). The specific grounds for that contention included Respondent's failure to meet the controlled substances recordkeeping, accountability and security requirements set forth in title 21, Code of Federal Regulations, parts 1301, 1304 and 1305, Respondent's failure to report a loss of controlled substances, and Respondent's false representation of its employees' authority to handle controlled substances.

On March 5, 1991, in response to the Order to Show Cause, Respondent, through its owner and president, Roy K. Slingo, submitted a written statement, together with supporting documents, which consisted of advertisements and letters of support written by representatives of some of the schools that worked with the Respondent company. In this statement, Mr. Slingo set forth objections to the allegations in the Order to Show Cause, and also stated that he submitted the statement in lieu of a request for a hearing, since be believed that it could "more clearly and thoroughly describe the details of the situation." However, Mr. Slingo also stated that he would be "willing" to attend a hearing should the administrative law judge presiding over the matter have "further questions" after reading the statement.

By letter dated March 15, 1991, the administrative law judge informed Mr. Slingo that under 21 CFR 1301.54, and as specified in the Order to Show Cause, the Respondent may file a written statement of position or request a hearing. The judge advised Mr. Slingo that if he did not intend to request a hearing, his statement with the attached documents and the agency investigative file, which formed the basis of the Order to Show Cause, would be forwarded to the Administrator, who, based on his review of these documents, would issue his final order. The administrative law judge directed Mr. Slingo to specifically request a hearing, if he so desired, on or before April 1, 1991. Otherwise, the judge would assume that Mr. Slingo had waived his opportunity for a hearing, and the investigative file and the statement submitted on behalf of Respondent would be forwarded to the Administrator for his consideration. See 21 CFR 1301.54 (d), (e).

No request for a hearing was filed on behalf of Respondent by Mr. Slingo or by any other person. By notice dated April 5, 1991, the administrative law judge subsequently assigned to the matter stated that Mr. Slingo had submitted a written statement in lieu of a request for a hearing under 21 CFR 1301.54(c), said statement to be considered in the entry of a final order in this matter.

The Administrator has considered the record in its entirety, including the investigative file and the written statement and documents submitted by Mr. Slingo. Pursuant to 21 CFR 1316.67, the Administrator hereby enters his final order in this matter based upon the findings of fact and conclusions of law as hereinafter set forth.

The Administrator finds that Respondent holds two DEA researcher registrations, one for Schedule I and the other for Schedules II-V. Under the authority of these registrations, Respondent trains dogs to detect controlled substances such as marijuana and cocaine. Respondent also operates a private drug deterrent program in which he contracts with local public school administrations to have dogs attempt to detect the presence of illicit drugs on school property. Mr. Slingo states that Respondent also educates students with respect to the dangers of drug abuse.

On October 20, 1989, DEA Investigators served a Notice of Inspection at the premises of the Respondent corporation. Mr. Slingo voluntarily signed the consent for inspection. The Investigators were provided Respondent's DEA order forms and distribution records of controlled substances to employees. A review of the order forms showed that Respondent had failed to record the number of packages of controlled substances received and the dates they were received, in violation of 21 CFR 1305.09(e). Further, the Investigators discovered that Respondent had failed to record all purchases of marijuana, a Schedule I controlled substance, on DEA order forms, in violation of 21 U.S.C. 827, 828, and 21 CFR 1305.03, which requires that all purchases of Schedules I and II controlled substances be so recorded. Additionally, Respondent had purchased marijuana from the Dade County School Board, which is not registered with the DEA to handle controlled substances. Under 21 CFR 1305.08, only a properly registered entity may fill order forms for Schedule I and II controlled substances.

The Investigators also observed during their inspection that both marijuana and cocaine were stored in an unlocked refrigerator. 21 CFR 1301.75 requires that all Schedule I and II controlled substances be kept in a securely locked, substantially constructed cabinet. Furthermore, Mr. Slingo admitted to the Investigators that Respondent's employees stored controlled substances in their homes, none of which were registered locations, in violation of 21 CFR 1301.23.

The Investigators also found that Respondent maintained no inventory of controlled substances, either initial or biannual, as required under 21 CFR 1304.12 and 1304.13. They also discovered that one of Respondent's employees had lost approximately two grams of cocaine, a Schedule II controlled substance, which Respondent failed to report to the DEA. 21 CFR 1301.74(c) requires a registrant to notify the DEA of any theft or significant loss of any controlled substance upon discovery of such theft or loss.

Finally, it was revealed to the Investigators that Mr. Slingo had issued employment identification cards to Respondent's employees which falsely represented their authority to handle controlled substances. These cards stated that Respondent's registration "entitles officially registered employees to confiscate, possess, hold and dispose of all schedules of drugs declared to be contraband and otherwise controlled by [the] Federal Controlled Substances Act." The Investigators advised Mr. Slingo during the inspection that Respondent's employees were not registrants under the Controlled Substances Act, and that Respondent's registration as a dog handler did not allow its employees to possess controlled substances other than to train dogs in drug detection.

During the inspection, Mr. Slingo stated to the Investigators that no one had ever explained to him or his wife, the vice-president of the Respondent corporation, the pertinent recordkeeping requirements under the Controlled Substances Act. However, on three separate occasions, in October and November of 1988, and in September of 1986, three different DEA Investigators had explained to Mr. and Mrs. Slingo the pertinent recordkeeping, accountability and security requirements, appropriate drug destruction procedures, and the reporting requirements for the theft or loss of controlled substances under the Controlled Substances Act. During the inspection on October 20, 1989, the DEA Investigators again explained these requirements to Mr. Slingo.

In his written statement, Mr. Slingo maintains that he was never "given instructions" regarding recordkeeping requirements, which ostensibly accounted for Respondent's noncompliance with these requirements. Additionally, he states that Respondent failed to keep records reflecting purchases of marijuana because Respondent did not in fact purchase marijuana; it was "given" to them by security personnel of the schools which hired Respondent. He also claims that he was never instructed regarding the reporting requirements of any significant theft or loss of controlled substances; thus, the employee's loss of controlled substances was not reported to the DEA. Mr. Slingo also admits that controlled substances were kept in a refrigerator on Respondent's premises, but that they were "subsequently removed and placed in the safe." Finally, Mr. Slingo states that he did not falsely represent his employees' authority to handle controlled substances, since it was "obvious" that Respondent's employees would be "carrying off these drugs off office premises." Indeed, Mr. Slingo believed the identification cards to be a "good idea."

Having duly considered the investigative file and Mr. Slingo's statement as well as the attachments in support of his statement, the Administrator finds that in light of Respondent's numerous recordkeeping, accountability, and security violations, the failure to properly report the significant loss of a controlled substance, and the false representation of the employees' authority to handle controlled substances as reflected in the identification cards, its continued registration is contrary to the public interest. Registrants always bear the responsibility to comply with all requirements under the Controlled Substances Act, and professed ignorance of these requirements is no defense. Even if it were, DEA reports show that DEA Investigators informed both Mr. Slingo and his wife of pertinent requirements under the Controlled Substances Act on three separate occasions, despite Mr. Slingo's statements to the contrary.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificates of Registration, PD0229244 and PD0228242, previously issued to D-Tek Corporation be, and they are hereby, revoked. It is further ordered that any pending applications for renewal of those applications be, and they are hereby, denied.

This order is effective July 25, 1991.

Dated: June 17, 1991.

Robert C. Bonner,

Administrator of Drug Enforcement.

[FR Doc. 91-14999 Filed 6-24-91; 8:45 am]

BILLING CODE 4410-09-M

Joseph H. Kennedy, III, M.D.; Revocation of Registration

On March 11, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Joseph H. Kennedy, III, M.D. (Respondent), 2904 Fox Run Court, Mobile, Alabama 36619, proposing to revoke his DEA Registration, AK2766676, issued to him at 492 Dixie Street, Sparta, Georgia 31087, and to deny any pending applications for renewal of such registration as a practitioner. The statutory basis for seeking the revocation of Respondent's DEA Certificate of Registration was that Dr. Kennedy lacked state authorization to practice medicine and that his continued registration was inconsistent with the public interest, as set forth in 21 U.S.C. 823(f).

The Order to Show Cause was sent to Dr. Kennedy by registered mail, return receipt requested. The return receipt indicates that the Order to Show Cause was received on March 14, 1991. More than thirty days have elapsed since the Order to Show Cause was received, and the Drug Enforcement Administration has received no response thereto. Pursuant to 21 CFR 1301.54(a) and 1301.54(d), Dr. Kennedy is deemed to have waived his opportunity for a hearing. Accordingly, the Administrator now enters his final order in this matter without a hearing and based upon the investigative file. 21 CFR 1301.57.

The Administrator finds that on or about April 6, 1987, Respondent had his privileges at the Lyster Army Hospital, Fort Rucker, Alabama summarily terminated for inappropriate behavior toward a female patient. On October 27, 1988, Respondent's medical license in the State of Kentucky was revoked. This decision was based on Respondent's unprofessional conduct, professional imcompetence and malpractice. Respondent also had his license to practice medicine in the State of Illinois suspended for an indefinite period for unprofessional conduct, professional incompetence and malpractice. Further, on July 28, 1988, the Hancock Memorial Hospital of Sparta, Georgia denied Respondent medical staff membership for misstatements and omissions on Respondent's application for privileges there.

The Administrator also finds that Respondent was charged with the felony offense of performing illegal abortions and engaging in the practice of medicine without a medical license. On April 26, 1989, he pled guilty to the misdemeanor offense of conspiracy to perform abortions without a medical license in the State of Tennessee.

Further, the Administrator finds that on April 16, 1990, Respondent's license to practice medicine in the State of New York was revoked for professional misconduct involving inappropriate sexual advances to three female patients and that his medical license in the State of Georgia was revoked in January, 1991. Therefore, Respondent is without authority to practice medicine in the State of Kentucky, Illinois, New

VOL 56 ISS 122 JE 25 1991 UMI

York and Georgia, the state in which he was last found.

State authorization to dispense controlled substances is a prerequisite of a practitioner under the Federal Controlled Substances Act. 21 U.S.C. 823(f). DEA has consistently held that when an applicant is without authority to handle controlled substances under the laws of the State in which he practices, or proposes to practice, DEA is without authority to issue a Federal registration. See, Emerson Emory, M.D., Docket No. 85-46, 51 FR 9543 (1986); Michael Alva Marshall, M.D., Docket No. 85-16, 51 FR 8046 (1986); Dennis Howard Harris, M.D., Docket No. 84-19, 49 FR 39930 (1984).

The Administrator concludes that since Dr. Kennedy is not authorized to practice medicine in Georgia, there is a lawful basis for the revocation of his DEA Certificate of Registration. Accordingly, the Administrator of the Drug Enforcement Adminsitration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AK2766876, previously issued to Joseph H. Kennedy, III, M.D., be and it hereby is, revoked. Any pending application for renewal of such registration shall be, and hereby is, denied. This order is effective July 25, 1991.

Dated: June 17, 1991.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information: The Agency of the Deparmtent issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions:

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

Employment Standards Administration.

Work Day Report.

1215-0168; ESA 92.

Quarterly.

Individuals or households; State or local governments; farms; businesses or other for profit; Federal agencies or employees; small businesses or other organizations.

52,000 respondents, 21,028 total hours; 26 minutes per response; 1 form.

Section 210A of the Immigration and Nationality Act requires employers of reportable workers in seasonal agricultural services through September 30, 1992, to certify such workers employment to the Federal Government. This information is used to determine the number of workers to be admitted to the U.S. to meet any shortage.

Work Experience and Career Exploration Programs.

1215-0121.

Biennially.

Individuals or households; State or local governments.

7 respondents; 13 recordkeepers; 129 total hours; 1 hour per response State educational agencies are required to file applications for approval of Work Experience and Career Exploration Programs which provide exceptions to the child labor regulations issued under the Fair Labor Standards Act. State educational agencies are also required to maintain certain records with respect to approved WECEP programs.

Employment and Training Administration.

Employment Service Program Reporting System.

1205-0240; ETA 9002A-C, VETS A&B, VETS 300.

Employment Service Program Reporting System is to provide data on State public employment service agency program activity and expenditures, including services to veterans, for use at the Federal level by the U.S. Employment Service and the Veterans Employment and Training Service in program administration and to provide reports to the President and Congress.

Extension

Employment Standards Administration.

Request for Medical Reports.

Asarco Wallace, ID; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on May 3, 1991, applicable to all workers of Asarco-Coeur Unit, Wallace, Idaho. The notice was published in the **Federal Register** on May 21, 1991 (56 FR 23302).

At the request of the State Agency, the Department reviewed its certification for workers of Asarco's Coeur Unit in Wallace, Idaho. Investigation findings show that Asarco's Assay Office and the Morning Shop were integrated with the production at the Coeur Unit and that a substantial amount of their activities was performed for the Coeur Unit of Asarco. Accordingly, when the Coeur Unit ceased operations, a reduction in activity and employment occurred at the Assay Office and the Morning Shop.

The notice applicable to TA-W-25,523 is hereby issued as follows: All workers of Asarco-Coeur Unit, Wallace, Idaho, who became totally or partially separated from employment on or after February 27, 1990 and all workers of the Assay Office, Wallace, Idaho and the Morning Shop, Wallace, Idaho who became totally or partially separated from employment on or after February 27, 1990 and before June 22, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC this 19th day of June 1991.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 91-15072 Filed 6-24-91; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-25, 363,TA-W-25, 364]

Robesonia, PA; Revised Determination on Reconsideration

On June 7, 1991, the Department issued an Affirmative Determination Regarding Application for Reconsideration for former workers of Gloray Knitting Mills, Inc., and Gloray Knitting Mills Retail Outlet in Robesonia, Pennsylvania.

The Gloray Knitting Mills plant produced men's sweaters. The plant had declining sales and production in 1990 and ceased operations in early 1991 along with the retail outlet. The retail outlet handled only domestic production.

Findings on reconsideration show that a major customer was not included in the survey. The customer, another manufacturer, accounted for a substantial portion of Gloray Knitting Mills' 1990 sales decline and was recently certified for trade adjustment assistance. In 1990 the men's sweater industry's imports to shipments ratio was over 300 percent. Also, in 1990, the International Trade Commission found injury to the domestic sweater industry because of dumping from Hong Kong, Korea and Taiwan.

Conclusion

After careful review of the additional facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with men's sweaters produced at Gloray Knitting Mills, Inc., Robesonia, Pennsylvania contributed importantly to the decline in sales or production and to the total or partial separation of workers at Gloray Knitting Mills, Robesonia, Pennsylvania. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Gloray Knitting Mills, Inc., Robesonia, Pennsylvania and Gloray Knitting Mills Retail Outlet, Robesonia, Pennsylvania who became totally or partially separated from employment on or after January 24, 1990 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 17th day of June 1991.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

Irwin Automotive/Takata, Inc., Dandridge, IN; Revised Determination on Reconsideration

On June 5, 1991, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of Irwin Automotive/Takata, Inc., Dandridge, Tennessee.

The Dandridge plant produces automobile seat trim—headrests,

VOL 56 ISS 122 JE 25 1991 UMI

armrests, jump seats etc. The plant had declining sales and production in fiscal year (FY) 1991 compared to FY 1990.

In 1990, Dandridge's production of armrests and headrests was moved to Mexico and imported back into the U.S. Also, jump seat production at Dandridge in 1990 was transferred to Mexico and is currently being imported into the U.S. The loss of this production accounted for a substantial portion of total production at Dandridge.

Further, all remaining production at Dandridge is scheduled to be transferred to Mexico and imported back into the U.S.

Substantial worker separations resulted from the loss of the armrest/headrest and the jump seat orders in 1990.

Conclusion

After careful review of the additional facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with automotive trim produced at Irwin Automotive/Takata, Inc., Dandridge, Tennessee contributed importantly to the decline in sales or production and to the total or partial separation of workers at Irwin Automotive/Takata, Inc., Dandridge, Tennessee. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Irwin Automotive/Takata, Inc., Dandridge, Tennessee who became totally or partially separated from employment on or after March 6, 1990 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 18th day of June 1991.

Robert O. Deslongchamps,

Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

BILLING CODE 4510-30-M

[TA-W-25,375]

Sun Plywood, Inc., North Bend, OR; Revised Determination on Reconsideration

On May 31, 1991, the Department issued an Affirmative Determination Regarding Application for Reconsideration for former workers of Sun Plywood, Inc., North Bend, Oregon.

The North Bend facility produced mainly plywood. The plant closed on July 17, 1990. Nearly all workers were laid off by August 1990.

No customer survey was conducted during the initial investigation since aggregate U.S. imports of softwood plywood and veneer were negligible during the period relevant to the petition.

New findings on reconsideration, however, show that Sun Plywood had two main customers that import products (wafer board and stand board) which compete with the plywood produced at Sun Plywood. Both customers reduced their purchases from Sun Plywood in 1990 and increased their imports. The worker group of one of the customers is currently under certification.

Conclusion

After careful review of the additional facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with the plywood produced at Sun Plywood, Inc., North Bend, Oregon contributed importantly to the decline in sales or production and to the total or partial separation of workers at Sun Plywood, Inc., North Bend, Oregon. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Sun Plywood, Inc., North Bend, Oregon who became totally or partially separated from employment on or after January 24, 1990 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 18th day of June 1991.

Robert O. Deslongchamps,

Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

Pension and Welfare Benefits Administration

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held on Thursday, July 11, 1991, in suite N-4437 AB, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington, DC 20210.

The purpose of the Sixty-Eighth meeting of the Secretary's ERISA Advisory Council which will begin at 9:30 a.m., is to review and provide input as to the desired scope and agenda being prepared by each of the Council's work group i.e., Enforcement; Retiree Medical Benefits; Small Business, and to invite public comment on any aspect of the administration of ERISA.

Members of the public are encouraged to file a written statement pertaining to any topic concerning ERISA by submitting 20 copies on or before July 8, 1991 to William E. Morrow, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, suite N-5677, 200 Constitution Avenue, NW., Washington, DC 20210. Individuals, or representatives of organizations wishing to address the Advisory Council should forward their request to the Executive Secretary or telephone (202) 523-8753. Oral presentations will be limited to ten minutes, but an extended statement may be submitted for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statement should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before July 8, 1991.

Signed at Washington, DC this 19 day of June, 1991.

David George Ball,

Assistant Secretary for Pension and Welfare Benefits Administration.

BILLING CODE 4510-29-M

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Working Group on Small Business of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9 a.m. Wednesday, July 10, 1991, in room S-4215 C, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington, DC 20210.

This Small Business Working Group was formed by the Advisory Council to study issues relating to Small Business for employee benefit plans covered by ERISA.

The purpose of the July 10 meeting is to develop the Working Group's specific agenda for presentation to and approval by the Advisory Council. The Working Group will also take testimony and or submissions from employee representatives, employer representatives and other interested individuals and groups regarding the subject matter.

Individuals, or representatives of organizations, wishing to address the Working Group should submit written requests on or before July 5, 1991, to William E. Morrow, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, suite N-5677, 200 Constitution Avenue, NW., Washington, DC 20210. Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statement should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before July 5, 1991.

Signed at Washington, DC this 19 day of June, 1991.

David George Ball,

Assistant Secretary for Pension and Welfare Benefits Administration.

BILLING CODE 4510-29-M

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Working Group on Retiree Medical Benefits of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 1 p.m. Wednesday, July 10, 1991, in room S-4215 C, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington, DC 20210.

This Retiree Medical Benefits Working Group was formed by the Advisory Council to study issues relating to Retiree Medical Benefits for employee benefit plans covered by ERISA.

The purpose of the July 10 meeting is to develop the Working Group's specific agenda for presentation to and approval by the Advisory Council. The Working Group will also take testimony and or submissions from employee representatives, employer representatives and other interested individuals and groups regarding the subject matter.

Individuals, or representatives of organizations, wishing to address the Working Group should submit written requests on or before July 5, 1991, to William E. Morrow, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, suite N-5677, 200 Constitution Avenue, NW., Washington, DC 20210. Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statement should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before July 5, 1991.

Signed at Washington, DC this 19 day of June, 1991.

David George Ball,

Assistant Secretary for Pension and Welfare Benefits Administration.

NATIONAL COMMUNICATIONS SYSTEM

Telecommunications Service Priority System Oversight Committee; Meeting

A meeting of the Telecommunications Service Priority System Oversight Committee will be held on Tuesday, July 9, 1991, from 9 a.m. to 2 p.m. The meeting will be held at the MITRE-Hayes Building, 7525 Colshire Dr., McLean, VA 27006. The agenda is as follows:

A. Committee Administration
B. Selection of Chair
C. Review/Discussion of By Laws
D. TSP Program Office Update
E. Review of Quarterly Report
F. Discussion of Future TSP Issues/ Scheduling of Next Meeting

The meeting will be open to the public. Any person desiring information about the meeting may telephone (703) 692-9274 or write the Manager, National Communications System, 701 S. Court House Rd., Arlington, VA 22204-2199.

Dennis I. Parsons,

Captain, USN, Assistant Manager, NCS Joint Secretariat.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Challenge/Advancement Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Challenge/Advancement Advisory Panel (Advancement Phase One Review Committee Section) to the National Council on the Arts will be held on July 10-11, 1991 from 9 a.m. – 5:30 p.m. in room M-07 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

Portions of this meeting will be open to the public on July 10 from 9 a.m. – 10 a.m. and July 11 from 4:30 p.m. – 5:30 p.m. The topics will be opening remarks

VOL 56 ISS 122 JE 25 1991 UMI

and introductions, overview of Advancement, and policy discussion.

The remaining portions of this meeting on July 10 from 10 a.m. – 5:30 p.m. and July 11 from 9 a.m. – 4:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman of June 5, 1991, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code.

Any interested persons may attend, as observers, meetings, or portions thereof, of advisory panels which are open to the public.

Members of the public attending an open session of a meeting will be permitted to participate in the panel's discussions at the discretion of the chairman of the panel if the chairman is a full-time Federal employee. If the chairman is not a full-time Federal employee, then public participation will be permitted at the chairman's discretion with the approval of the full-time Federal employee in attendance at the meeting, in compliance with this guidance.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Robbie McEwen, Acting Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Robbie McEwen,

Acting Advisory Committee Management Officer, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Extension.

2. The title of the information collection: 10 CFR part 150—Exemptions and Continued Regulatory Authority in Agreement States and in Offshore Waters under section 274.

3. The form number if applicable: Not applicable.

4. How often the collection is required: Reports are required as occasioned by the occurrence of specified events, such as the receipt or transfer of licensed radioactive material, or actual or attempted theft of licensed material. An annual statement of source material inventory is required.

5. Who will be required or asked to report: Agreement State licensees authorized to possess source or special nuclear material at certain types of facilities, or at any one time and location in greater than specified amounts.

6. An estimate of the number of responses: 63.

7. An estimate of the total number of hours needed to complete the requirement or request: 2.38 hours per response, for a total of 150 hours annually.

8. An indication of whether section 3504(h), Public Law 96–511 applies: Not applicable.

9. Abstract: 10 CFR part 150 provides certain exemptions from NRC regulations for persons in Agreement States. Part 150 also defines activities in Agreement States over which NRC regulatory authority continues, including certain information collection requirements.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Ronald Minsk, Paperwork Reduction Project (3150–0032), Office of Information and Regulatory Affairs, NEOB–3019, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395–3084.

The NRC Clearance Officer is Brenda Jo Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 13th day of June 1991.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

BILLING CODE 7590–01–M

[Docket Nos. 50–390 and 50–391]

Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The Nuclear Regulatory Commission (the Commission) is considering issuance of an extension of the latest construction completion dates specified in Construction Permit Nos. CPPR–91 and CPPR–92 issued to Tennessee Valley Authority (permittee) for the Watts Bar Nuclear Plant, Units 1 and 2. The facility is located at the permittee's site on the west branch of the Tennessee River approximately 50 miles northeast of Chattanooga, Tennessee.

Environmental Assessment

Identification of Proposed Action

The proposed action would extend the latest construction completion date of Construction Permit No. CPPR–91 to December 31, 1993 and the latest construction completion date of Construction Permit No. CPPR–92 to June 30, 1997. The proposed action is in response to the permittee's request dated May 16, 1991.

The Need for the Proposed Action

The proposed action is needed because the construction of the facility is not yet fully completed. The permittee states that completion of Unit 1 will continue to be delayed pending review and implementation of a comprehensive plan consisting of corrective action programs (CAPs), special projects (SPs), inspections, audits, and walkdowns to provide assurance that WBN Unit 1 is designed and constructed in accordance with regulatory requirements and TVA commitments. Since the time of the last extension request, TVA has been engaged in extensive efforts to resolve problems which this comprehensive program was designed to address as well as problems which were discovered in the course of implementing the plan. These efforts include inspections, document reviews, and where necessary, redesign and/or modification of affected structures, systems, and components.

In addition to the significant amount of work associated with these efforts, TVA has also recently halted Unit 1 construction activities in order to improve work control practices. The delays associated with the above efforts to ensure that WBN meets regulatory requirements and licensing commitments make it necessary for TVA to request an extension of the expiration date for Construction Permit No. CPPR–91 until December 31, 1993.

With regard to Unit 2, TVA is committed to applying lessons learned from the Unit 1 corrective programs to the Unit 2 completion of construction and startup efforts and appropriately staging construction activities. Given the activities described above and the resulting delays at WBN Unit 1, TVA requests an extension of the expiration date for Construction Permit No. CPPR–92 (Unit 2) until June 30, 1997.

Environmental Impacts of the Proposed Action

The environmental impacts associated with the construction of the facility have been previously discussed and evaluated in the staff's Final Environmental Statement (FES) issued on November 9, 1972 for the construction permit stage which covered construction of both units. The FES issued in December 1978 for the operating license stage addressed the environmental impacts of construction activities not addressed previously. These activities included: (1) Construction of the new transmission route for the Watts Bar—Volunteer 500 kV line, (2) construction of the settling pond for siltation control for construction runoff at a different location from that originally proposed in the Final Environmental Statement—Construction Permit (FES–CP), and (3) the relocation of the blowdown diffuser from the originally proposed site indicated in the FES–CP. The staff addressed the terrestrial and aquatic environmental impacts in the Final Environmental Statement—Operating License (FES–OL) and concluded that the assessment presented in the FES–CP remains valid.

The construction of Unit 1 is essentially 100 percent complete and Unit 2 is approximately 75 percent complete; therefore, most of the construction impacts discussed in the FES have already occurred. Since this action would only extend the period of construction as described in the FES, it does not involve any different impacts as described and analyzed in the original environmental impact statement. The proposed extension will not allow any work to be performed that is not already allowed by the existing construction permit. The extension will merely grant the permittee more time to complete construction in accordance with the previously approved construction permit. The activities related to the various corrective activities will result in additional workforce, being primarily engineering and technical personnel rather than construction workforce. At the present time, this workforce is basically dedicated to the completion of Unit 1. This increase will be temporary and will decline as the corrective activities are completed and Unit 1 approaches fuel loading. A large percentage of the additional workforce are contractors and consultants who do not live in the area and use only temporary quarters. While the current workforce level has caused a temporary, increased demand for services in the community and increased traffic on local roads, there are no major impacts due to the arrival of workers' families and due to demands for services necessary to support permanent residents (for example, housing and schools).

Based on the foregoing, the NRC staff has concluded that the proposed action would have no significant environmental impact. Since this action would only extend the period of construction activities described in the FES, it does not involve any different impacts or a significant change to those impacts described and analyzed in the original environmental impact statement. Consequently, an environmental impact statement addressing the proposed action is not required.

Alternatives Considered

A possible alternative to the proposed action would be to deny the request. Under this alternative, the permittee would not be able to complete construction of the facility. This would result in denial of the benefit of power production. This option would not eliminate the environmental impacts of construction already incurred.

If construction were halted and not completed, site redress activities would restore some small areas to their natural states. This would be a slight environmental benefit, but much

VOL 56 ISS 122 JE 25 1991 UMI

outweighed by the economic losses from denial of use of a facility that is nearly completed. Therefore, this alternative is rejected.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the FES for Watts Bar.

Agencies and Persons Contacted

The NRC staff reviewed the permittee's request and applicable documents referenced therein that support this extension. The NRC did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for this action. Based upon the environmental assessment, we conclude that this action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the request for extension dated May 16, 1991 which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the Local Public Document Room, Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

Dated at Rockville, Maryland this 18th day of June, 1991.

For the Nuclear Regulatory Commission.

Suzanne C. Black,

Acting Director, Project Directorate II–4, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 91–15097 Filed 6–24–91; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. STN 50–454, STN 50–455, STN 50–456, AND STN 50–457]

Commonwealth Edison Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulation Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF–37 and NPF–66, issued to Commonwealth Edison Company (the licensee), for operation of the Byron Station, Units 1 and 2, located in Ogle County, Illinois, and Facility Operating License Nos. NPF–72 and 77, issued to the licensee for operation of Braidwood Station, Units 1 and 2, located in Will County, Illinois.

By letter dated March 17, 1989, the licensee proposed to amend Technical Specification (TS) 4.5.2. to modify the existing surveillance requirements for venting of Emergency Core Cooling System (ECCS) discharge piping. A Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing on that request was published in the Federal Register on April 21, 1989 (54 FR 16177). By letter dated March 12, 1990, the licensee supplemented the amendment request by stating that only the ECCS pump casings and the discharge piping high points outside of containment will be vented at least once per 31 days.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By July 25, 1991, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room located at: For Byron, the Byron Public Library, 109 N. Franklin, P. O. Box 434, Byron, Illinois 61010; for Braidwood, the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity reequirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission,

Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Richard J. Barrett: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael I. Miller, Esquire, Sidley and Austin, One First National Plaza, Chicago, Illinois 60690, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated March 17, 1989 (published in the Federal Register on April 21, 1989 (54 FR 16177)) as supplemented on March 12, 1990, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room located at: For Byron, the Byron Public Library, 109 N. Franklin, P. O. Box 434, Byron, Illinois 61010; for Braidwood, the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Dated at Rockville, Maryland, this 17th day of June 1991.

For the Nuclear Regulatory Commission.

Richard J. Barrett,

Director, Project Directorate III–2, Division of Reactor Projects—III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 91–15093 Filed 6–24–91; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–278]

Philadelphia Electric Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed no Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–56, issued to Philadelphia Electric Company (the licensee), for operation of the Peach Bottom Atomic Power Station, Unit 3 located in Delta, York County, Pennsylvania.

The amendment would change sections 3.3.B.1 and 4.3.B.1 of the Peach Bottom Unit 3 Technical Specifications to allow operation with control rod 38–23 not coupled to its drive for the remainder of cycle 8, which is to be completed before October 30, 1991. During the repositioning of this rod, which is presently fully inserted and electrically disarmed, it would modify the surveillance requirements to require rod position verification by use of neutron instrumentation.

The amendment is being proposed on an exigent basis in accordance with 10 CFR 50.91(a)(6). The exigent circumstances are that the unit is presently restricted in power by approximately 4 percent of the electrical output due to restrictions associated with operation with control rod No. 38–23 being declared inoperable. This unit derating results in the need for replacement power during the summer months when electrical demand is at its highest. During May 1991, the Pennsylvania-New Jersey-Maryland Interconnection (PJM) electrical grid was placed in a maximum emergency generating situation on two consecutive days because of high regional temperatures. The potential for this emergency electrical generating situation to occur again during the remainder of the units' operating cycle is considered to be high. Therefore, the ability to return the unit to full generating capacity would provide additional assurance of power production availability on the PJM grid.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

a. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated. This amendment incorporates compensatory actions in the Technical Specifications to assure that even with an uncoupled rod the rod position is known, that no other uncoupled rods are withdrawn, and that scram performance remains intact.

b. The proposed amendment does not create the possibility of a new or different kind of accident from any previously evaluated. The compensatory measures included in the Technical Specification changes assure that no new or different kind of accident is possible.

c. The proposed amendment does not involve a significant reduction in the margin of safety as the limiting event is the [control rod drop accident] CRDA and all fuel limits stipulated in that analysis will be met when the compensatory measures included in Technical Specification changes are implemented.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of § 50.92(c) are satisfied. Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within fifteen (15) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination

VOL 56 ISS 122 JE 25 1991 UMI

unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By July 25, 1991, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room located at Government Publications Section, State Library of Pennsylvania, (Regional Depository) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary of the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition with requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiratioin of 30-days, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commisson, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Butler: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commisson, Washington, DC 20555, and to J. W. Durham, Sr., Esquire, Sr. V.P. and General Counsel, Philadelphia Electric Company, 2301 Market Street, S26-1, Philadelphia, Pennsylvania 19101, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respct to this action, see the application for amendment dated June 14, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room, Government Publications Section, State Library of Pennsylvania, (Regional Depository) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Dated at Rockville, Maryland, this 19th day of June 1991.

For the Nuclear Regulatory Commission.

Patrick D. Milano,

Project Manager, Project Directorate I-2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-460]

Washington Public Power Supply System Nuclear Project No. 1; Order Extending Construction Completion Date

Washington Public Power Supply System is the current holder of Construction Permit No. CPPR-134, issued by the Nuclear Regulatory Commission on December 23, 1975, for construction of WPPSS Nuclear Project No. 1 (WNP-1). On June 16, 1983, the construction completion date for WNP-1 was extended from January 1, 1982 to June 1, 1991. The facility is presently in a deferred construction status at the applicant's site on the Department of Energy's Hanford Reservation in Benton County, Washington, approximately eight miles north of Richland, Washington.

On April 18, 1991, as supplemented on May 22, 1991, the Washington Public Power Supply System (WPPSS or applicant) filed a request for another extension of the completion date. This extension has been requested because construction has been delayed by the following events and conditions:

1. The temporary lack of demand for the energy to be produced by WNP-1 (WNP-1 is presently included in the list of potential power resources necessary to meet the projected electrical demand growth in the Pacific Northwest in coming years);

2. The Bonneville Power Administration (BPA) request that WNP-1 be placed in a preserved condition for future potential power resource needs;

3. Regional power planning projections indicate that the earliest resumption of engineering, construction activities may be July 1993; and

4. The allowance of a 72-month construction period to complete WNP-1 and a margin of uncertainties such as those associated with regional load growth or time to start-up the project to full construction making a revised construction completion date of June 1, 2001.

WNP-1 is being maintained by WPPSS as a deferred plant pursuant to the Commission's Policy Statement on Deferred Plants, 52 FR 38077, October 14, 1987. Accordingly, the NRC staff has determined that WNP-1 is a deferred plant as defined by the Commission in the policy and that it is, therefore, subject to any applicable provisions of the policy set forth there.

Good cause has been shown for the delays; the causes were beyond the control of the applicant; and the requested extension is for a reasonable period, the bases for which are set forth above, and in the staff's evaluation of the request for extension.

Pursuant to 10 CFR 51.32, the Commission has determined that extending the construction completion date will have no significant impact on the environment (56 FR 27547 on June 14, 1991).

The NRC staff's safety evaluation of the request for extension of the construction permit is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room at the Richland Public Library, 955 Northgate Street, Richland, Washington 99352.

It Is Hereby Ordered That the latest completion date for Construction Permit No. CPPR-134 is extended from June 1, 1991 to June 1, 2001.

Date of Issuance: June 18, 1991.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Director, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-29316; File No. SR-NYSE-89-02]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Change Containing Proposals Recommended by the Market Regulation Review Committee of the New York Stock Exchange

I. Introduction

On February 24, 1989, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] and rule 19b-4 thereunder,[2] a proposed rule change containing proposals recommended by its Market Regulation Review Committee. On March 12, 1990 the Exchange filed Amendment No. 1 [3] to the proposed rule change. On December 21, 1990, the Exchange filed Amendment No. 2 to the proposed rule change.[4]

Noticed of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 27941, April 24, 1990), and by publication in the **Federal Register** (55 FR 18206, May 1, 1990). The Commission received two comments on the proposed rule change.[5]

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b-4 (1990).

[3] Amendment No. 1 to File No. SR-NYSE-89-02 withdrew certain provisions of the Exchange's original rule filing and resubmitted them in a separate rule filing in order to expedite the Commission's consideration of the Committee's recommendations. See File No. SR-NYSE-90-10. See also letter from Howard Kramer, Assistant Director, Division of Market Regulation, SEC, to Brian McNamara, Managing Director, Market Surveillance, NYSE, dated June 28, 1989.

[4] See letter from Brian M. McNamara, Managing Director, Market Surveillance, NYSE, to Mary N. Revell, Branch Chief, Division of Market Regulation, SEC, dated December 21, 1990. Amendment No. 2 to File No. SR-NYSE-89-02 makes several technical and conforming changes to the Exchange's original proposal, as well as deletes the proposed changes to NYSE rules 123A.65, .71, and .72. See also letter from Brian McNamara to Mary Revell, dated January 31, 1991, which made a minor editorial change to the NYSE's proposed booth wire policy.

[5] See infra note 7 and accompanying text. In an Information Memo dated August 24, 1987, the

This order approves the proposed rule change.

II. Discussion

A. Introduction

In December 1965, the NYSE's Board of Directors established the Market Regulation Review Committee ("Committee") to examine the structure of market trading regulation. The Committee was charged with reviewing existing regulations to enable the Exchange, in a manner consistent with maintaining market integrity and protecting investors, to compete more effectively with its current and future competitors, to provide additional intra-market trading opportunities for all Exchange market participants, and to eliminate requirements that may no longer serve a meaningful regulatory response.

The proposed rule change reflects the recommendations of the Committee.[6] The specific proposals fall within four broad categories, namely, "general auction market rules," "trading rules applicable to specialists," and "member proprietary and on-floor trading." In addition, the Exchange has proposed two new rules: an "exchange automated order routing systems rule (rule 123B)" and a "specialist booth wire policy."

The Commission received comment letters on the proposed rule change from two NYSE specialist firms, Corroon, Lichtenstein & Co. and Equitrade Partners.[7] The specialist commentators argued in favor of Commission approval of the proposed rule change. Specifically, Corroon, Lichtenstein & Co. and Equitrade Partners argued in favor of Commission approval of proposed amendments to NYSE Rules 104, 116, and 440B. These proposed amendments have been withdrawn by the Exchange and resubmitted in File No. SR–NYSE–90–10, however, which is still under Commission review.[8] Accordingly, these comments will be considered during the Commission's review of File No. SR–NYSE–90–10.

B. Commission Findings

The Commission has reviewed carefully the NYSE's proposed rule change and concludes that the proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, with sections 6(b)(5), 6(b)(8), 11(b), and 11A(a)(1) of the Act.[9] The Commission supports the NYSE's efforts to continue to review the structure of market trading regulation in response to changes in market structure. The Commission believes it important to market quality that the Exchange have a regulatory program that is tailored to the current market structure, especially in light of the significant role played by the NYSE as the largest securities market in the U.S.. The Commission agrees with the NYSE that the proposed rule change will be helpful in updating the NYSE market structure and trading rules and will further the purposes of the Act. The Commission's detailed discussion regarding the significant changes proposed by the NYSE follows:

C. General Auction Market Rules

1. Rule 61: Recognized Quotations

The Exchange proposes to amend NYSE Rule 61, which governs "recognized quotations," to clarify that bids or offers for oddlots (*i.e., for an amount less than 100 shares*) have no standing as recognized quotations in the trading crowd at a specialist post. The Exchange also proposes a second amendment to rule 61 that would change the execution procedures for an order that includes one or more trading units and an odd-lot.[10] The proposal would require the odd-lot portion of the order to be processed and executed by the Exchange's rule 124 odd-lot pricing system,[11] and would preclude it from being printed on the tape.

A third amendment to rule 61 would clarify that special offerings, exchange distributions and secondary distributions as specified in rules 391, 392 and 393,[12] and the printing of such transactions on the Tape, are not precluded by this rule. This amount recognizes that special distributions, due to their generally larger size and consequently greater market impact, require special handling and are often arranged outside of the regular market.

Because rule 55 establishes the standard unit of trading in stocks on the Exchange as 100 shares, the Commission believes it is logical to conform rule 61 to operate consistent with both the trading unit definition contained in rule 55 and to clarify that an order that includes an odd-lot can be sent to the specialist, but will be executed by the Exchange's odd-lot system. The Commission also believes that the amendment to rule 61 governing special distributions should dispel any potential confusion as to rule 61's application to the execution procedures codified in rules 391, 392, and 393, and should make it clear that such transactions may be effected and printed on the tape.

2. Rule 70: Below Bid—Above Best Offer

Rule 70 is a basic auction market rule which provides that when a bid is clearly established, no lower bid shall be made and conversely, when an offer is clearly established, no higher offer shall be made. The proposed change to this rule would retain this basic principle, while clarifying that any bid or offer that is accepted results in a binding trade.[13]

The proposed rule change also would clarify the long-standing Exchange policy that a bid which is at or above an offer results in a trade in an amount equal to the bid or the offer, whichever is the smaller amount. The same principle would apply when an offer is made at or below a bid.[14] The Exchange believes that this concept is necessary to the orderly functioning of the auction market because the absence of such a provision could create "locked markets."

The Commission believes that these revisions are appropriate clarifications to the traditional auction market principle, currently codified in rule 70, that only the highest bid and lowest offer shall have standing as recognized quotations. The Commission agrees with the Exchange that the revisions should operate to prevent the potential for "locked markets" that otherwise may occur in the absence of an explicit provision mandating automatic executions when bids and offers are crossed.

3. Rule 75: Disputes as to Bids and Offers

Rule 75 currently provides that disputes regarding bids or offers should be settled by the parties to the dispute, or if practicable by a vote of other members with knowledge of the transaction, or, if not settled by these means, then such disputes shall be settled by a Floor Official. This rule currently contains a presumption that disputes regarding the amount traded shall be settled by a Floor Official in favor of the smaller amount, with due allowance for the Floor Official to consider whether the member claiming the smaller amount actually had an order or orders totalling a larger amount.

The proposed rule change amends rule 75 to clarify that disputes as to bids and offers are to be settled by a Floor Official, if not settled by the parties to the dispute, and to clarify that disputes should not necessarily be settled in favor of the smaller amount. The rule also would be revised to provide that in settling a dispute, a Floor Official would rely primarily on the statements of any member who was not a party to the transaction, but would also take into account the size of the orders held by the parties to the disputed transaction, as well as such other facts as he deems relevant.

The Commission believes that the proposal to delete the current presumption in favor of the smaller sized bid or offer should provide for a more efficient resolution of trade disputes by removing an unnecessary presumption that may actually operate as an impediment to resolution of trade disputes. The Commission also believes that the amendment appropriately increases the level of oversight brought to the resolution of trade disputes by removing the membership voting procedure and replacing it with specified factors for Floor Official consideration.

4. Rule 76: "Crossing" Orders

Rule 76 provides that when a member is holding both a buy and a sell order in the same security, he must publicly bid and offer on behalf of both orders before he may cross the orders against each other to effect a trade. The purpose of this rule is to ensure that all orders are exposed to the trading Crowd, in order that members in the Crowd may have the opportunity to provide a better price to one side or the other of the proposed cross transaction. The Exchange believes that the principle of this rule is fundamental to the auction market and has reinforced it by clarifying that bids and offers must be clearly articulated in the trading Crowd before stock is crossed.

The Commission agrees with the Exchange that it is appropriate to require cross transactions to be clearly articulated prior to their execution so that orders represented in the trading Crowd are afforded sufficient opportunity to participate in the proposed cross transaction at prices better to one or both sides of the proposed trade. The Commission believes that the proposed amendment to rule 76 will operate to enhance order exposure and interaction in the Exchange's auction market, as well as increase pricing efficiency and opportunities for best execution of customer orders.

5. Rule 79A.10: Request to Make Better Bid or Offer

Rule 79A.10 currently requires that a floor broker, who is requested by his principal to bid or offer at the limit price of an order when that price is better than the current quotation, must do so or return the order. The proposed amendment would extend the coverage of the rule's bid/offer procedures to all members, including specialists, and would clarify that a member must bid or offer on behalf of an order when requested to do so. The provision that a member may return an order if he refuses, upon request, to make a bid or offer is proposed to be deleted. Accordingly, the proposed rule change would require any member when requested by his principal to bid or offer at the limit price of an order when that price is better than the current quotation to do so without discretion.

The Commission believes that the expansion of the rule's order handling procedures to include all Exchange members acting on behalf of a principal reflects appropriately the important agency function performed by specialists in handling limit orders on their books. The Commission further believes that the rule's expanded coverage over specialists should enhance the price discovery and execution mechanisms of the Exchange's auction market by increasing the opportunities for brokered limit orders to be executed between the current quotation. To the extent that more limit orders are executed between the current bid-ask spread, the amendment should enhance order interaction, market depth and liquidity and pricing efficiences, as well as benefit execution of public orders and promote competition among exchanges and other competing market centers.

D. Trading/Order Handling Rules Applicable to All Members Generally

1. Rule 13: Definition of Orders

The proposed rule change would clarify the Rule 13 definitions of an "at-the-opening-only" order and a "not held" order.[15] Additionally, the proposed rule change adds new rule 13.10 that would clarify that a specialist must accept all types of orders, except "not held" orders, unless Floor Official approval is obtained to decline to accept a particular type of order. If such approval were obtained, the specialist would be required to obtain cancellations of all other orders of that type that he had previously accepted. The Exchange believes that this clarification would help ensure that specialists fulfill their obligation to execute effectively all orders entrusted to them. The Exchange states that the requirement that a specialist must return all other orders of the same type previously accepted is intended to ensure that such orders do not disrupt the market and that they do not receive more favorable treatment than the subsequent orders of that type that are being returned.

Furthermore, the proposed rule change adds new rule 13.20, which is designed to clarify that, unless otherwise specified in the Rule, all members shall exercise "reasonable diligence" in the handling of any order entrusted them. The Exchange intends to reinforce the obligation of all members to handle each order entrusted to them according to the reasonable diligence standard. The Exchange recognizes, however, the difficulties members often encounter when handling a "switch order-

---

Exchange summarized the recommendations of the Market Regulation Review Committee, and requested its members and member organizations to comment on them. The Exchange states that no written comments were received in response to this Information Memo with regard to any rule change that is the subject of this order.

[6] The texts of the actual Exchange rules to be amended and complete descriptions of the proposed amendments are set forth in the Exchange's original filing and in Amendments No. 1 and 2 thereto, both of which are available for inspection at the Commission and at the principal office of the NYSE.

[7] See letter from George A. Corroon, Jr., Partner, Corroon, Lichtenstein & Co., to Jonathan G. Katz, Secretary, SEC, dated May 31, 1990, and letter from Robert M. Newman, Jr., Partner, Equitrade Partners, to Jonathan G. Katz, Secretary, SEC, dated June 11, 1990. The Corroon, Lichtenstein & Co. and Equitrade Partners comment letters also addressed File No. SR–NYSE–90–10. See *supra* note 3.

[8] See *supra* note 3.

[9] 15 U.S.C. 78f(b)(5), 78f(b)(8), 78k(b), and 78k–1(a)(1) (1988).

[10] The normal unit of trading in stocks is 100 shares. See NYSE rule 55.

[11] See Securities Exchange Act Release No. 27821 (May 2, 1990), 55 FR 27861 (order approving File No. SR–NYSE–90–08, amending Rule 124), and Securities Exchange Act Release No. 29037 (January 28, 1991), 56 FR 4680 (order approving File No. SR–NYSE–91–3, implementing a program that eliminates odd-lot differentials and floor brokerage charges).

[12] NYSE rules 391, 392, and 393 provide special order handling procedures designed to facilitate the execution of large blocks of stock which cannot be absorbed or supplied in the regular auction market within a reasonable time and at a reasonable price or prices.

[13] The same concept also is contained in rule 79, which states that all bids and offers which are made and accepted in accordance with rules 65 to 80 shall be binding. Accordingly, the rule change would delete rule 79 and consolidate it with this rule in order to clarify and simplify Exchange rules.

[14] For example, assuming that the market for a stock is 20 bid for 500 shares, with 500 shares offered at 20 and one-quarter. A member making a bid of 20 and one-quarter for 200 shares would be effecting a trade at that price for 200 shares.

[15] A "not held" order is defined under NYSE rule 13 as "a market or limited price order marked 'not held,' 'disregard tape,' 'take time,' or which bears any such qualifying notation." More generally, the instruction "not held" indicates that the customer has given the floor broker time and price discretion in executing the best possible trade but will not hold the broker responsible if the best deal is not obtained. Because sections 11 (a) and (b) of the Act, 15 U.S.C. 78k (a) and (b), and the rules adopted thereunder, generally restrict the exercise of investment discretion over agency orders by specialists, a specialist may not accept a not held order.

VOL 56 ISS 122 JE 25 1991 UMI

contingent order," which involves the simultaneous execution of orders in different securities at a stipulated price difference. Accordingly, the definition of a "switch order-contingent order" in rule 13 has been revised to provide that a member executing such an order may handle the order on a "best efforts" basis.

The Commission agrees with the Exchange that the clarifications to the definition of "at-the-opening-only" orders should help remove any misconceptions about when such orders are eligible for execution. Accordingly, the proposed rule change clarifies that while an "at-the-opening-only" order is eligible to be executed only on an opening trade, such an order is not cancelled if the stock opens with a quotation rather than a trade.

The Commission also agrees with the Exchange that "buy or sell on print" orders are appropriately classified as "not held" orders because brokers cannot guarantee execution at the designated "print" price. Classifying such orders as "not held" orders should serve to put customers on notice that they bear the price risk of an execution at a price other than the "print" price.

Similarly, the Commission believes that new rule 13.10 is an appropriate codification of the obligation of specialists to accept all types of orders, except "not held" orders, unless Floor Official approval is obtained to decline to accept a particular type of order. The Commission also believes that the requirement that the specialist obtain cancellations of all other orders [16] of a type that he had previously accepted if such approval were obtained, provides an equitable method for treating such orders and allows the specialist to maintain fair and orderly markets and attempt to keep his stock open for trading in violatile markets when the alternative of triggering large numbers of, for example, "stop" orders, could have a potentially "cascading" effect, especially in rapidly reclining markets. The additional requirement that a specialist notify all brokers who had previously entered "similarly defined" orders that their orders are no longer in effect and obtain cancellations ensures that market participants are aware that their orders may be cancelled, while preserving their access to the market through the alternative of limit orders placed on the specialist's book.

[16] The Exchange states that the rule's coverage is limited to stop orders, stop limit orders, and percentage orders as defined in rule 13. Accordingly, specialists will not be able to utilize new rule 13.10 to obtain relief from their continuing obligation to excute market and marketable limit orders.

The Commission believes that the proposed rule change's addition of new rule 13.20, which clarifies that, unless otherwise specified in the Rule, all members must exercise "reasonable diligence" in the handling of any order entrusted them is consistent with the fiduciary duties to which members are held when handling orders on an agency basis, including the duty to achieve a best execution for customer orders.[17] In addition, the Commission agrees with the Exchange that because of the difficulties members may encounter when handling a "switch order-contingent order," which involves the simultaneous execution of orders in different securities at a stipulated price difference, such orders are appropriately identified as orders that deserve to be handled on a "best efforts" basis.

2. Rule 60: Firm Quote Rule

The proposed rule change deletes the Exchange's existing Rule 60 in its entirety and replaces it with a new rule.[18] The proposal makes a number of wholesale changes to the rule, including reducing from four to two the number of quotation needs.

Among these is the proposal that, when quotes are disseminated and are firm, the specialist shall be deemed to be the responsible broker-dealer with respect to any bid or offer made available by the Exchange to quotation vendors. The Exchange believes that this amendment is appropriate because the specialist stands at the center of the auction market, and is therefore in the best position to be responsible for any quotation disseminated from the Floor. The Exchange states that the specialist's designation as the Exchange's responsible broker-dealer for NYSE-disseminated quotations would not relieve a member who had made the bid or offer being disseminated from the risk of any transaction effected upon such bid or offer.

The Exchange also is proposing to reduce the time period during which a quotation can be in the non-firm mode from 60 minutes to 30 minutes. Continuation of the non-firm mode for longer than 30 minutes would require a confirmation by the Floor Governor (or two Floor Officials, if a Floor Governor is not available) who made the initial determination that a non-firm mode was appropriate. The Exchange believes that the reduction of the time period during which a quotation may be non-firm is appropriate in order to help ensure that "firm" quotations can again be disseminated in as reasonable time as market conditions will allow.

The proposed rule change also makes other related changes to the Exchange's "firm quote rule." For example, the Exchange is proposing to amend rule 60 to codify policies regarding the specialist's responsibility to honor erroneous quotations that have been displayed for six minutes or more, subject to several exceptions as specified in the rule.

The Commission agrees with the Exchange that a reduced number of modes will be less confusing to market participants, while still accurately reflecting the condition of NYSE quotations. The Commission also agrees with the Exchange that the related reduction in the time period during which a quotation can be in the non-firm mode provides a more reasonable time period to ensure that "firm" quotations can again be disseminated as market conditions permit. The Commission believes these changes should more accurately reflect buying and selling interest on the Exchange, thereby improving market information. Accordingly, the Commission finds that the reduced number of modes and the reduced time period during which a quotation is in the non-firm mode are consistent with rule 11Ac1–1(b)(3) under the Act.[19]

The Commission further agrees with the Exchange that new Rule 60's requirement that the specialist be the responsible broker-dealer with respect to any bid or offer made available by the Exchange to quotation vendors appropriately designates the specialist as the responsible broker or dealer for reporting purposes for securities in which he is registered. Because the Exchange is continuing to hold the relevant member at risk for his or her

[17] For a description of a brokerage firm's best execution obligation, see SEC, Second Report on Bank Securities Activities: Comparative Regulatory Framework Regarding Brokerage-Type Services 97–98, 98 n.233 (February 3, 1977), as reprinted in Senate Comm. on Banking, Housing & Urb. Affrs., 95th Cong., 1st Sess., Report on Bank Securities Activities of the SEC 145, 251–52, 252 n.233 (Comm. Print 1977). See also SEC Advisory Committee on the Implementation of a Central Market System, Summary Report 13–14 (July 17, 1975); SEC, Status Report on the Development of National Market System, Securities Exchange Act Release No. 15671 (March 22, 1979), 44 FR 20360 [citing Restatement (Second) of Agency section 424 (1957)].

[18] Rule 60 is the Exchange's codification of the Commission's "firm quote rule," rule 11Ac1–1 under the Act, 17 CFR 240.11Ac1–1, which requires national securities exchanges and associations to establish procedures for collecting from their members bids, offers and quotation sizes with respect to reported securities, and for making such bids, offers and sizes available to quotation vendors. Rule 60 was adopted in 1978. See Securities Exchange Act Release No. 14931 (July 5, 1978), 43 FR 29073 [order approving File No. SR–NYSE–78–27].

[19] 17 CFR 240.11Ac1–1(b)(3) (1980).

disseminated quotations, the Commission finds rule 60's amended reporting obligations consistent with rule 11Ac1–1(b) (1) and (2) under the Act, [20] which establishes the general firm quote obligation. Additionally, the Commission finds that the Exchange's proposal to codify its policies regarding the specialist's responsibility to honor erroneous quotations that have been displayed for six minutes or more, subject to the rule's enumerated exceptions, is likewise consistent with the limited exceptions to rule 11Ac1–1(c)(3) under the Act [21] governing erroneous quotations.[22]

3. Rule 91: Taking or Supplying Securities Named in Order

Rule 91, reflecting a fundamental principle of agency law, provides that, except under specified conditions, a member cannot trade as principal with a customer's order. Rule 91.40 currently provides a procedure whereby a member organization may reject a trade with respect to an order that had been entered into the Exchange's DOT system and executed by the specialist if the specialist has an interest in the account. The proposed amendment to rule 91.40 would simply extend the rule's agency law principles to any NYSE electronic order routing system.

Because the rule currently applies only to orders routed through the Exchange's DOT system, the Commission believes it is important to extend rule 91's agency law principles to cover any NYSE electronic order routing system. The Commission finds that extending the rule's customer protections to all systematized orders will ensure that customers are not denied the benefits of this basic agency law principle because of its limitation to any one order processing system.

4. Rule 95: Discretionary Transactions; Rule 120: Discretion to Employees—Forbidden; Rule 123A: Miscellaneous Order Requirements

The Exchange is proposing three additional technical changes to the trading and order handling rules generally applicable to all members. First, the Exchange is proposing to delete rule 95's exceptions applicable to certain discretionary accounts, as well as make certain "housekeeping" changes to the rule. Rule 95 is intended to prevent members from exercising discretion over customer orders while on the trading Floor as to stock, price, volume or whether to buy or sell. Rule 95(b) currently contains two exceptions for other than joint accounts: If the discretionary transaction is executed by a member for a bona fide cash investment account, or for the account of any person who is unable to effect transactions for his own account due to illness, absence or similar circumstances. The Exchange believes that such exceptions are not appropriate in today's markets and is proposing to delete these two exceptions. Rule 95.10, which requires the reporting of any discretionary transaction effected pursuant to either of these two exceptions, would also be deleted. The Commission believes that deletion of the rule 95(b) exceptions serve to strengthen the rule by further limiting the authority of members to execute discretionary orders. The Commission also believes that the deletion of rule 95.10, as well as the change to rule 95.20, are appropriate "housekeeping" amendments that will cleanup the rule after the deletion of the two exceptions noted above.

Second, the Exchange is proposing to eliminate Rule 120 as unnecessary. Because Exchange Rule 54 contains the prohibition contained in rule 120, the Commission agrees with the Exchange that rule 120 is unnecessary.

Third, the Exchange is proposing certain technical changes that would update and streamline rule 123A's miscellaneous order handling provisions. The following proposed changes are largely of a "housekeeping" nature and would simply update and streamline the rule: (1) The odd-lot order routing provisions of rule 123A.22 would be revised to reflect the 9:30 a.m. opening of trading and to provide flexibility to the rule; (2) rule 123A.46, which details the procedures for executing orders in a group received by a specalist via the SuperDOT System, would be deleted and replaced by principles to be incorporated in new rule 123B, which is discussed below; (3) rule 123A.47, which pertains to the so-called "half point error guarantee," would be transposed to new rule 123B; (4) rules 123A .50 and .55, which are concerned with the confirmation of "good-till-cancelled" ("GTC") orders, would be deleted; (5) the order transmission and reporting provisions of rule 123A.60 would be deleted; and (6) rules 123A .75 and .80 would be combined into new section .75, which would authorize a broader format for orders and cancellations that would provide flexibility for further systems enhancements. The Commission likewise agrees with the Exchange that the proposed changes will update and streamline rule 123A. The Commission does not believe that any of the proposed changes should detract from the quality of the Exchange's auction markets.

5. Rule 128A: Publication of Transactions; Rule 128B: Publication of Changes, Corrections, Cancellations or Omissions and Verification of Transactions

The Exchange is proposing two changes to the rules governing the publication and correction of transactions. First, the Exchange is replacing rule 128A's current requirement that a seller most notify an Exchange "reporter" of a transaction with a modified requirement that a seller must report a sale "in such manner as to facilitate the printing of the trade on the Tape." The Commission agrees with the Exchange that the rule's modification is necessary to accommodate electronic books and other possible technology advances.

Second, the amendment to rule 128B.10 would require agreement of both the buyer and seller and Floor Official approval prior to publishing corrections on the Tape.[23] Rule 128B.12 also would be modified slightly to reflect that errors may arise from problems with systems, as well as mechanical and clerical problems. The Commission believes that the amended trade error procedures will bring an increased level of oversight to the correction of trade errors for publication on the Tape—regardless of the source of the problem.

E. Trading Rules Applicable to Specialists

1. Rule 94: Specialists' or Odd-Lot Dealers' Interest in Joint Accounts; Rule 104.16: Associate Specialists; Rule 104A.40: Short Sales; Rule 104A .50: LIFO Transactions

The Exchange also has proposed technical changes to several of its rules that govern specialist trading. For example, the Exchange is proposing to delete rule 104.16, regarding associate specialist, because such a category of membership no longer exists. An another example, the Exchange is proposing to eliminate rule 104A.40's cross-reference to rule 10a–1 under the Act [24] as unnecessary. The Commission

[20] 17 CFR 240.11Ac1–1(b) (1) and (2) (1990).

[21] 17 CFR 240.11Ac1–1(b)(3) (1990).

[22] The Commission intends to continue to discuss with the NYSE, however, whether six minutes, or some shorter period, is an appropriate standard.

[23] In a related change, the Exchange is proposing to delete rule 128B.11 in its entirety. A memorandum will be prepared by the Exchange indicating the exact procedures to be followed in reporting a change to the Tape. Such procedures may need to be filed with the Commission under section 19(b) of the Act.

[24] 17 CFR 240.10a–1 (1990).

VOL 56 ISS 122 JE 25 1991 UMI

agrees with the Exchange that these technical, non-substantive changes streamline the Exchange's rules and are consistent with the Exchange's charge of maintaining the integrity of its market.

2. Rule 104.17: Temporary Specialists

Rule 104.17 provides for the appointment of temporary specialists by a Floor Offical in the event of an emergency. The amendment to rule 104.17 would require Floor Governor approval, rather than Floor Official approval, to authorize the appointment of a temporary specialist. Because the appointment of temporary specialists is not a routine occurrence, the Commission believes that the proposed amendment to rule 104.17 brings an appropriate level of heightened oversight to such appointments.

3. Rule 115: Disclosure of Specialists' Orders Prohibited

As a general matter, rule 115 prohibits the disclosure of information by a specialist in regard to the orders on his book, except in certain limited circumstances. The Exchange is proposing to modify rule 115 to provide that a specialist may provide information about buying or selling interest in the market at or near the prevailing quotation in response to a market "probe" by a member acting in the normal course of business on the Floor, as well as to any other member who inquires, but may not disclose the identity of any buyer or seller unless expressly authorized to do so. At the same time, specialists would be prohibited from initiating the disclosure of such information, and thus could not favor certain Exchange members over others. In all other respects, the specialist would be required to maintain the confidentiality of the book. Accordingly, because the modification to rule 115 would permit the specialist to provide such information to all members of the Exchange, the Commission finds that the proposed amendment to rule 115 is consistent with section 11(b) of the Act [25] because it provides a mechanism for the fair and impartial disclosure of information by the specialist in a manner that is neither anti-competitive nor discriminatory.

F. Member Proprietary and On-Floor Trading

1. Rule 97: Limitation on Members' Trading Because of Block Positioning

Rule 97 is an anti-manipulative rule designed to limit member firms' trading for their own accounts for the remainder of a trading day during which they have positioned a block of stock. These limitations currently apply to a block transaction worth $200,000 or more. The Exchange is proposing to amend the rule's definition of "block" to provide that a block shall be a quantity of stock having a market value of $500,000 or more. The Exchange believes that the proposed revised market value is more relevant to block positioning/customer facilitation activity in today's markets.

The Commission notes that the current definition of a block was adopted in 1972, when the overall volume and size of block transactions were considerably smaller than they are today. The Commission agrees with the Exchange that the rule's higher dollar threshold is more relevant in today's markets, and that the current level is unnecessarily restrictive in this context.[26]

2. Rule 112.10: Orders Initiated "Off the Floor"

Rule 112.10(a) requires that proprietary orders of a member organization or any member, allied member, or approved person in such organization or officer or employee thereof must be sent to the Floor through a clearing firm's order room or other facilities regularly used for transmission of public customers' orders to the Floor. Rule 112.10(b) provides that after one of the persons specified in rule 112.10(a) learns about a trade of 5,000 shares or more, no off-Floor order for the account of a person specified in rule 112.10(a) may be sent to the Floor for two minutes following the print of the trade on the Tape. Rule 112.10(b) also contains a number of exceptions to the requirements of both rules 112.10(a) and 112.10(b).

The Exchange is proposing to amend rule 112.10(b) to eliminate the prohibition noted above against sending an off-Floor order to the Floor for two minutes following a print of 5,000 shares or more on the Tape. In the Exchange's view, the regulatory concerns that rule 112.10(b) purports to address are more properly addressed in today's markets by the Exchange's front-running policies, which reflect a consensus among the self-regulatory organizations regarding trading to take advantage of material non-public information regarding impending market transactions. A specific reference to the front-running policies is proposed to be added to rule 112.20, which is discussed below.

The Commission notes that this provision in rule 112.10(b) was adopted prior to the adoption of the Exchange's policies prohibiting "front-running" in specified contexts.[27] The Commission believes that the Exchange's front-running policies are the proper mechanism to address concerns regarding member trading to take advantage of material non-public information regarding impending market transactions. Accordingly, the Commission finds that the amendment to rule 112.10(b) (and member reliance on the Exchange's existing front-running policies) promotes conduct consistent with just and equitable principles of trade, and will not in any way detract from the Exchange's ability to detect and prosecute front-running violations or otherwise fraudulent or manipulative conduct.

3. Rule 112.20: "on the Floor" and "Off the Floor"

NYSE rule 112.20 establishes certain order routing prohibitions, and, as a general matter, rule 112.20(a) defines "on Floor" as meaning the trading Floor and specified adjacent premises. Rule 112.20(b) currently provides that certain transactions shall be deemed to be "on Floor" transactions, and therefore subject to the restrictions imposed on Competitive Traders. The transactions specified in rule 112.20(b) principally relate to entry of orders off the Floor following a conversation with a member on the Floor. Rule 112.20(b) also specifies that a transaction initiated off the Floor by a Competitive Trader who had been on the Floor earlier that day will be deemed to be an on-Floor order.

The Exchange is proposing to amend rule 112.20's definitions and order routing prohibitions by rescinding current rule 112.20(b), and replacing it with new rules 112.20 (b), (c), and (d). The Exchange believes that the critical determination as to whether an order is to be deemed "on Floor" or "off Floor" is whether an order is transmitted to the Floor through an order room or other facility regularly used for the transmission of public orders to the Floor, where a time-stamped record of the order is maintained. In the Exchange's view, an order that is so transmitted should be deemed to be an off-Floor order, even if that order is entered following a conversation with a member on the Floor. New rule 112.20(b) provides that a member on the Floor will be deemed to be initiating an off-Floor order if the order is transmitted from the Floor and routed through a clearing firm's order room, where a time-stamped record of the order is maintained, before the order is re-transmitted to the Floor.[28] Proposed rule 112.10(b) also would transpose from current rule 112.20(a) the principle that an off-Floor order for an account in which a member has an interest is to be treated as an on-Floor order if it is executed by the member who initiated it.

The Exchange believes that proposed rule 112.20(b) provides a practical means for a member on the Floor to enter an order for his own account without having to physically leave the Floor to do so, which is presently the case. The Exchange does not believe it would be appropriate for an order entered pursuant to proposed rule 112.20(b) to be deemed an "on Floor" order because the member initiating the order is not seizing an immediate trading opportunity available to him by virtue of his presence on the Floor, but rather must arrange for the order to be routed through a clearing firm's order room and then re-transmitted to another member on the Floor for execution. The Exchange believes, therefore, that such an order should be most appropriately viewed as an off-Floor order.

New rule 112.20(c) provides that any order entered by a member organization following a conversation with a member on the Floor for any account in which it, or any member, allied member, or approved person in such organization or officer or employee thereof, is directly or indirectly interested, or for any discretionary account serviced by the member organization, would be deemed to be an off-Floor order, provided the order is transmitted to the Floor through an order room or other facility regularly used for the transmission of public orders to the Floor, where a time-stamped record of the order would be maintained. The order also would be deemed to be an off-Floor order if an exception from the order room transmission requirement is available under rule 112.10(b). The Exchange exects that proposed new rule 112.20(c) will facilitate routine market "probe" conversations between a member on the Floor and an "upstairs" organization, but will not result in increasing a member organization's trading advantages over non-members.

Finally, new rule 112.20(d) states that members shall not trade in contravention of any Exchange policy against the frontrunning of block transactions.[29]

The Commission finds that the amendments to rule 112.20 (b) and (c) are consistent with the Act in that they reflect more accurately the status of on and off-floor orders. The Commission agrees with the NYSE that, in today's market environment of rapid dissemination of market information, it makes little sense to force a member to walk off the floor to route an order "upstairs" so it can be considered an off-floor to route an order "upstairs" so it can be considered an off-floor order. Indeed, under current NYSE rules, a non-member customer can have direct telephone access to a member's floor booth. The proposed NYSE requirement—that of routing an on-floor order upstairs and then back down to the floor—will continue to prevent any undue advantage of floor immediacy from accruing to orders designated as off-floor.[30]

Finally, the Commission also believes that the amendment to NYSE rule 112.20(d) promotes conduct consistent with just and equitable principles of trade by explicitly incorporating the frontrunning policy into rules governing competitive trader conduct.

G. Exchange Automated Order Routing Systems Rule—Rule 123B

The Exchange is proposing to adopt new rule 123B to codify all the policies and procedures applicable to Exchange trading systems under one umbrella rule. The majority of these policies and procedures are already in place and have been separately filed with the Commission over the years as policies of the Exchange.

First, new rule 123B(a) describes the general features of the Exchange's SuperDOT System, and generally authorizes the Exchange to establish the size and types of orders eligible for transmission through SuperDOT.[31] Second, subject to order size parameters established by the Exchange, NYSE rule 123B(b) establishes the Exchange's policies governing eight separate aspects of systematized orders on the Exchange.[32] Third, rule 123B(c) authorizes the Exchange to establish reporting and comparison procedures utilizing universal contra designations

Fourth, rule 123B(d) would provide that a specialist is required to execute all orders he receives by means of Exchange automated order routing systems in accordance with NYSE auction market procedures, unless the Rule itself specifies other procedures, unless the Rule itself specifies other procedures. Rule 123B(d) also would make clear that the specialist must expose systematized orders to the trading Crowd, and must follow Exchange "crossing" procedures before buying or selling stock for his own account. Additionally, rule 123B(d) makes clear that all systematized orders, regardless of size, that are routed to a specialist are "held" orders, and that a specialist may be deemed to have "missed the market" if any such order is not executed against prevailing contra side interest in the market at the time he receives the order.

In the Exchange's view, the commitment to traditional auction market principles stated in proposed

---

[25] Section 11(b) of the Act provides in pertinent part: "It shall be unlawful for a specialist or an official of an exchange to disclose information in regard to orders placed with such specialist which is not available to all members of the exchange, to any person other than an official of the exchange, a representative of the Commission, or a specialist who may be acting for such specialist: Provided, however, that the Commission, by rule, may require disclosure to all members of the exchange of all orders placed with specialists, under such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors." 15 U.S.C. 78k(b) (1988).

[26] The NYSE reports that the average size of a block traded on the Exchange in the first quarter of 1990 was 23,600 shares. The average share traded on the NYSE was valued at $35.24 during the same time period. This translates into an average dollar value of $831,864 per block trade. The Commission believes that rule 97's amended $500,000 threshold will more than adequately capture the block trades within the rule's proscriptions without unnecessarily burdening the cutomer facilitation market.

[27] See Securities Exchange Act Release No. 25233 (December 30, 1987) 53 FR 296 (immediate effectiveness of File No. SR–NYSE–87–36), and Securities Exchange Act Release No. 27047 (July 19, 1989), 54 FR 31131 (order approving File No. SR–NYSE–88–34).

[28] Under the proposed rule change, however, an off-Floor order for an account in which a member has an interest is to be treated as an on-Floor order if it is executed by the member who initiated it. NYSE rule 112.20(b).

[29] See supra note 25 and accompanying text.

[30] The interpretation of "off the floor" contained in the amendments to rule 112.20 only applies to rule 112 and does not govern or control the meaning of "off the floor" for purposes of Exchange Act rule 11a2–2(T) (the "effect versus execute" rule).

[31] New rule 123B(a) also establishes the Exchange's authority to modify the operational aspects of SuperDOT. The Commission notes that in its exercise of this authority, the Exchange must comply with section 19 of the Act, 15 U.S.C. 78s.

[32] More specifically, rule 123B(b)(1) codifies the Exchange's commission policy with respect to specialist floor brokerage functions. Rule 123B(b)(2) merely incorporates the existing "half point error guarantee" provisions of current rule 123A.47. Rule 123B(b)(3) governs specialist responsibilities with respect to the reporting of stopped stock. Rule 123B(b)(4) regulates member booth support systems located on the Floor of the Exchange. Rule 123B(b)(5) publishes the standards governing when the Exchange's Individual Investor Express Delivery Service ("IIED Service") will be activated, as well as eligibility for this service. Rule 123B(b)(6) governs specialist responsibilities with respect to request status reporting. Rules 123B(b)(7) establishes a requirement for the immediate reporting of eligible market orders where the Exchange displays the best quotation of the Intermarket Trading System and where the quotation is the minimum variation of trading. Finally, rule 123B(b)(8) publishes the Exchange's so-called "active stock feature" order handling procedures for systematized orders.

VOL 56 ISS 122 JE 25 1991 UMI

rule 123B(d) reflects a more appropriate means than those currently specified in rule 123A.46 for the pricing of orders received by the specialist in a group, as well as for the pricing of all systematized orders generally. The Exchange believes that the pricing procedures stated in current rule 123A.46 are somewhat arbitrary and cumbersome in practical application, and that auction market order exposure will likely result in executions at prices that accurately reflect prevailing market conditions when orders, including orders in a group, are received by the specialist.

Finally, new rule 123B(e) would codify an Exchange policy, rooted in article II, section 6 of the Exchange's Constitution, that the Exchange shall not be liable for any loss sustained by a member or member organization resulting from the use of an NYSE automated order routing system. Rule 123B(e) also would codify a general principle that any loss sustained by an entering member organization pertaining to an order, that does not appear on the SuperDOT system's "Merged Order and Report Log" will be absorbed by that member organization. If an order does appear on the "Merged Order and Report Log" and was designated for a particular specialists's post, any loss pertaining to that order will be absorbed by the specialist. The Exchange believes that proposed rule 123B(e) provides appropriate guidance to members and member organizations as to apportionment of any losses that may be sustained as to orders entered into the NYSE's automated order routing systems.

Given the increasing proliferation of automated order processing systems at the Exchange, the Commission believes it is proper for the Exchange to articulate in published standards the fundamental operational aspects of those systems, especially in the area of order executions. Moreover, the Commission finds it beneficial that the Exchange clarify specialist responsibilities with respect to handling orders via automated systems. In addition, the Commission believes it important to the quality of customer executions for the Exchange's automated order processing systems to preserve the opportunity for obtaining a superior execution at a price between displayed quotations. The Commission believes the Exchange's rule accomplishes this, and, accordingly, the Commission finds that adoption of the Exchange's "umbrella" automated order processing rule is consistent with brokers' fiduciary duties to obtain a best execution for customer orders and the protection of investors and the maintenance of fair and orderly markets on national securities exchanges.

Additionally, the Commission finds that the procedures contained in rule 123B (b) and (c), which clarify member responsibilities in the areas of specialist commissions, errors in trade reporting, the reporting of transactions in "stopped" stock, member booth support systems located on the Floor of the Exchange, operation of the Exchange's IIED Service, request status reporting, and other reporting and order handling features of Exchange automated order processing systems, should enable the Exchange to operate these systems more efficiently. Accordingly, the Commission finds the adoption of rules 123B (b) and (c) are consistent with section 11A of the Act,[53] because they encourage the use of new data processing and communication techniques to facilitate economically efficient executions of securities transactions.

Furthermore, the Commission notes that the Exchange's liability disclaimer for member losses resulting from the use of an NYSE automated order routing system, and its related policy governing the apportionment of losses among members and member organizations for member losses sustained for orders entered into NYSE's automated order processing systems, are both limited in their scope to losses sustained by members and member organizations. Accordingly, because these rules do not extend to customer related losses, the Commission finds the liability disclaimer and loss apportionment provisions of new rule 123B(e) are consistent with sections 6(b)(5) and 11A of the Act,[54] because these liability rules generally protect investors and the public interest and encourage the use of new data processing and communication techniques to facilitate economically efficient executions of securities transactions.

H. Specialist Booth Wire Policy

Current NYSE rules permit a specialist unit to have a telephone line installed at its stock trading post to permit it to communicate with its off-floor office or clearing firm (a "post wire"). The post wire may not be used, however, to transmit orders to the floor for the purchase or sale of securities.[55] Current NYSE rules also permit a member or a member organization to maintain a telephone line at its floor booth location to permit it to communicate from the Exchange floor with non-member customers located off the floor (a "booth wire").[56] The Exchange, however, has never adopted a formal policy with respect to specialists' use of booth wires maintained by members or member organizations.

The Exchange is proposing to adopt such a policy, which will provide standards governing the use of specialists of booth wires located on the trading floor. Specialists would be allowed to use a booth wire in the following two situations. First, under the proposed specialist booth wire policy, a specialist member organization would be authorized to have its own booth wire only if it does a public business in a non-speciality stock, in which case a booth wire could be used for such business. Second, a specialist unit that does not have public customers would not be permitted to have its own booth wire, but would be permitted to use a booth wire assigned to a member organization in order to communicate with that member organization's upstairs trading desk.

The specialist booth wire policy states specifically the conditions under which a specialist may communicate by means of his or her own booth wire or a booth wire assigned to another member or member organization.[57] A specialist would not be permitted to accept a specialty stock order, or a modification to an order already in his or her possession, over his or her own booth wire or the booth wire of another member. Further, a specialist would not be permitted to initiate a booth wire conversation with a particular member organization if he or she does not have an order in his or her possession from that organization. A specialist may initiate booth wire communications, or respond to request for a conversation, with a particular member organization if he or she has an order in his or her possession from that organization; he or she may not initiate such a conversation, however, if he or she has ordered on the same side of the market from more than one member organization. A specialist would be permitted to engage in a conversation with an upstairs trading desk of another member organization over that organization's booth wire only for the purpose of discussing general market conditions or known buying and selling interest in a particular stock or stocks. A specialist may not favor any member or member organization in engaging in both wire conversations, and must make himself or herself available to respond to requests for booth wire conversations as impartially as possible. A specialist who does not act impartially in responding to requests for booth wire communications will be deemed to be acting in contravention of just and equitable principles of trade.

The Exchange believes that the proposed policy strikes an appropriate balance between, on the one hand, the interest of "upstairs" employees of a member organization in occasionally discussing with a specialist general market conditions relating to an order they have left with him or her, and, on the other hand, concerns that specialists act in a fair and impartial manner at all times to all member organizations without favoring any particular member organization in discussing market conditions that may affect the execution of orders.

The Commission believes that approval of the NYSE's booth wire policy strikes an appropriate balance between the competing concerns of specialists discussing with employees of "upstairs" member organizations market conditions related to orders placed with specialists and the fair and impartial execution of such orders. The Commission believes that it is reasonable to permit specialist units to communicate from the Exchange Floor with the upstairs trading desks of member organizations. By allowing such communications links, the Exchange enables specialists to perform their important market making functions more effectively on the NYSE Floor. At the same time, the Commission believes that the NYSE's prohibition against the use of such communication links to transmit to the floor orders for the purchase or sale of their specialty stocks is reasonable in view of the crucial role specialists have in maintaining the stability of the market. In this connection, the Commission believes that the NYSE's general prohibition against specialists initiating conversations with upstairs members and the related requirement that specialists act fairly and impartially in all communications carried over a booth wire ensures that specialist booth wire communications are not conducted inequitably. Accordingly, the Commission finds that the Exchange's specialist booth wire policy is consistent with sections 6(b)(5), 6(b)(8), and 11A(a)(1)(C)(ii),[58] which respectively require the rules of a national securities exchange to promote just and equitable principles of trade, to remove impediments to a free and open market, to protect investors and the public interest, to not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, and to assure fair competition among brokers and dealers.

III. Conclusion

The Commission has reviewed carefully the Exchange's proposed rule change and concludes, for the above stated reasons, that the proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange. The Commission believes that the proposals developed by the Exchange's Market Regulation Review Committee balance appropriately the competing concerns of various Exchange constituencies in a manner consistent with just and equitable principles of trade. Given the significant role played by the NYSE as a primary market and the dynamic nature of competitive forces shaping the national market system, the Commission supports strongly the NYSE's important efforts to review the structure of market trading regulation in order to have an efficient and meaningful regulatory program in effect.

Accordingly, based upon the aforementioned factors, the Commission finds that the Exchange's proposed rule change relating to recommendations by its Market Regulation Review Committee is consistent with sections 6(b)(5), 6(b)(8), 11(b), and 11A(a)(1) of the Act [59] and the rules and regulations thereunder applicable to a national securities exchange.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[60] that the proposed rule change (File No. SR-NYSE-89-02) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[61]

Dated: June 17, 1991.

Margaret H. McFarland,

Deputy Secretary.

[File No. 1-9201]

Issuer Delisting; Application to Withdraw From Listing and Registration (Dense-Pac Microsystems, Inc., Common Stock, No Par Value)

June 19, 1991.

Dense-Pac Microsystems, Inc. ("Company"), has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 and rule 12d2-2(d) promulgated thereunder to withdraw the above specified security from listing and registration on the Boston Stock Exchange ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The company desires to voluntarily withdraw its Common Stock from listing on the BSE because there has been limited trading of its Common Stock on such Exchange and because the Company does not want to continue to incur the costs to maintain the listing. The Company's Common Stock is currently quoted by National Association of Securities Dealers Automated Quotations System ("NASDAQ") and is traded in the over-the-counter market.

Any interested person may, on or before July 11, 1991 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 91-15011 Filed 6-24-91; 8:45 am]

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Information Collection Under Expedited Review by the Office of Management and Budget.

AGENCY: Tennessee Valley Authority.

VOL 56 ISS 122 JE 25 1991 UMI

ACTION: Notice of request for expedited review by the Office of Management and Budget [OMB] of information collection.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), as amended by Public Law 99-591.

Expedited review by OMB has been requested as described below. Because of the time frame in which OMB has been asked to act on this submission, any comments and recommendations for the proposed information collection should be provided directly to the OMB Desk Officer, Mr. Ron Minsk, by telephone at (202) 395-3084 or by FAX at telephone (202) 395-7285.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 1101 Market Street (EB 4B), Chattanooga, TN 37402-2801; (615) 751-2523.

Type of Request: Regular submission.

Title of Information Collection: Recreational Benefits of Navigation Locks.

Frequency of Use: On occasion.

Type of Affected Public: Individuals or households.

Small Businesses or Organizations Affected: No.

Federal Budget Functional Category Code: 452.

Estimated Number of Annual Responses: 700.

Estimated Total Annual Burden Hours: 233.

Estimated Average Burden Hours Per Response: .33.

Need For and Use of Information: The Recreational Benefits of Navigation Locks survey will obtain information required for completion of a benefit/cost study to be used in evaluating the economic feasibility of constructing newer, larger locks at Watts Bar and Chickamauga Dams on the Tennessee River.

Additional Information: It is essential that information be obtained on recreational use of the current navigation locks at Watts Bar and Chickamauga Dams. The locks, which were designed and constructed in the 1930s and which are operated by the U.S. Army Corps of Engineers, are scheduled for maintenance and will be closed to commercial and recreational use for the period from July 15, 1991 through August 23, 1991.

Because this closure will affect traffic on the river for six (6) weeks of the summer, the season of the most intensive recreational use of the reservoirs, postponing the survey until the 1992 recreation season will increase the cost of the survey and will delay completion of the benefit/cost study. The benefit/cost study is currently scheduled for completion in the spring of 1992. By May 1992 the project is planned to be reviewed and evaluated to determine the feasibility of constructing new locks at Chickamauga and Watts Bar dams. Delaying the recreational benefits survey until 1992 will result in a delay of up to one (1) year in completing the benefit/cost study and the subsequent project review and evaluation.

Therefore, OMB has been requested to review and approve this information collection on an expedited basis. OMB approval has been requested by no later than July 5, 1991. We are also publishing with this notice a copy of the Standard Form 83 (Request for OMB Review), the supporting statement, and the proposed survey instrument.

Louis S. Grande,

Vice President, Information Services, Senior Agency Official.

OMB SUPPORTING STATEMENT RECREATION ECONOMIC IMPACTS ASSOCIATED WITH NEW LOCKS AT WATTS BAR AND CHICKAMAUGA DAMS

Section A. Justification

A1. Circumstances that Make the Collection of Information Necessary

The provision of a system for navigation was a responsibility established for the Tennessee Valley Authority (TVA) by an Act of Congress in 1933 (16 U.S.C. 831j). In discharging that responsibility TVA has constructed a series of locks and dams encompassing approximately 650 miles of the Tennessee River and its tributaries. Newer, larger locks have been constructed in the lower part of the system and recently an effort has begun to evaluate the need for new locks in the upper part of the river system. In particular the locks at Watts Bar and Chickamauga Dams are being evaluated to determine the economic feasibility of constructing new locks. The current locks were designed and constructed in the 1930s.

As a part of evaluating the economic feasibility of new locks at Watts Bar and Chickamauga Dams, TVA is conducting a benefit/cost study according to procedures from the 1983 Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies published by the U.S. Water Resources Council. The document states that the preferred method of estimating recreation benefits is by contingent valuation or travel cost. The proposed questionnaire will provide us information to determine values using both methods and compare the results.

The locks, which are operated by the U.S. Army Corps of Engineers, are scheduled for maintenance and will be closed to commercial and recreational users for the period from July 15, 1991 through August 23, 1991. Because this closure will affect traffic on the river for six (6) weeks of the summer, the season of the most intensive recreational use of the reservoirs, postponing the survey until the 1992 recreation season will increase the cost of the survey and will delay completion of the benefit/cost study.

The benefit/cost study is currently scheduled for completion in the spring of 1992. By May 1992 the project is planned to be reviewed and evaluated to determine the feasibility of constructing new locks at Chickamauga and Watts Bar dams. Delaying the recreational benefits survey until 1992 will result in a delay of up to one (1) year in completing the benefit/cost study and the subsequent project review and evaluation. Because the locks will be closed to the public beginning July 15 sampling needs to start no later than mid June and continue through July 14.

A2. Use and Users of the Information

The specific objective of Watts Bar and Chickamauga locks survey is to determine the economic benefits attributable to the recreation users of the locks under current and future conditions in an effort to assign recreation benefits to the new lock system. This will allow TVA staff to accurately evaluate a portion of the benefits to the new locks and to gain knowledge on the importance of locks for recreation navigation.

Survey data will be collected through personal interview of one (1) person in each pleasure boat utilizing the lock at the survey site. Data will be computerized and analyzed during July through August and the final report is due November 30. Travel cost will be calculated using the Rocky Mountain Station Travel Cost Model developed by the U.S. Forest Service. The model includes correlation analysis of the most promising variables as well as tests for collinearity. The contingent valuation method is a mean net willingness to pay value and includes analysis of variance.

A3. Use of Information Technology To Reduce Burden

The responses will be recorded on the survey instrument by the interviewer.

This method imposes the least burden on the respondents.

A4. Efforts To Identify Duplication

The U.S. Army Corps of Engineers (USACE) from the Nashville District and the national Waterways Experiment Station were contacted to determine if this type of study had been conducted by USACE. To their knowledge, recreation benefits of locks have not been studied. This type of study has never been conducted on any of the TVA reservoirs.

A5. Why Similar Information Cannot Be Used

As described above, no similar information is available.

A6. Efforts to Minimize the Burden on Small Businesses

The respondents to this survey will be individuals using the waterway for recreational purposes.

A7. Consequences of Less Frequent Data Collection

This information collection is a one-time activity.

A8. Circumstances that Require Data Collection Procedures Inconsistent with 5 CFR 1320.6

This information collection will be conducted in a manner consistent with the guidelines in 5 CFR 1320.6.

A9. Efforts to Consult with Persons Outside of TVA on the Data Collection

We spoke with Scott Jackson, Recreation Researcher, USACE Waterways Experiment Station, Vicksburg, Mississippi ((601) 634-2105), and Cliff Reinert, USACE Nashville District ((615) 736-5026) to determine if they had done studies of recreation benefits of locks.

A10. Assurances of Confidentiality

The responses to this survey are voluntary. Respondents will not be asked to provide their names during the course of the interview. Although the completed survey instruments will be used only by program personnel, disclosures of information may be made as required by law.

A11. Justification for Questions of a Sensitive Nature

There are no questions of a sensitive nature.

A12. Estimate of the Annual Cost of the Data Collection

The cost to collect, analyze, and report the data is $50,340 as estimated by 3D/Environmental Services, Inc. (3D/ESI), the company awarded the contract. It is estimated there is an additional cost to TVA of about $6,000 to write and publish the Request for Proposals and to coordinate with 3D/ESI. These costs include all applicable overheads and travel.

A13. Estimates of the Burden of Information Collection

The total estimated burden hours is 233 hours. This is based on surveying approximately 500 lock users and 200 nonlock users. It is estimated by 3D/ESI that the administration of the questionnaire will average 20 minutes per interview. This is based on previous experience using a questionnaire of similar length.

According to USACE records, the population of boating parties at both locks is about 7800 per year. The population of nonlock users is undefined but assumed to be larger that the population of lock users. Random exit surveys will be conducted at marinas in the surrounding area until 200 nonlock users are interviewed. The nonlock users will be asked questions from the same questionnaire as the lock users. However, this population is being sampled only to make general comparisons to the lock user population and not to make statistical inferences between the two populations.

A14. Changes in Burden

This is a new information collection and is a one-time activity. There is no change in the burden.

A15. Publication of Results for Statistical Use

There are no plans to publish the results of this information collection for statistical purposes.

Section B—Collections of Information Employing Statistical Methods

This information collection does not employ statistical methods.

Draft

Survey Instrument

Starting Time _____ _____
Interviewer _____ _____
Date _____ _____
Location _____ _____

Excuse me. I'm from _____, and I'm doing a study on the needs of boaters on the lakes of the Tennessee River. The T.V.A. wants to know how they can improve your boating experiences, and it's extremely important that we get your personal feelings about boating in this area.

Required Burden Estimate Statement (Pursuant to 5 CFR 1320.21)

Public reporting burden for this collection of information is estimated to average 20 minutes per interview. If you have any comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, please send them to the agency clearance officer, Tennessee Valley Authority, 1101 Market Street (EB 4B), Chattanooga, TN 37402; and to the Office of Management and Budget, Paperwork Reduction Project (3316-____), Washington, DC 20503.

Can I take a few minutes of your time to ask you some questions? (If they refuse, respond appropriately—see handout. If they still refuse, be sure to record it on the refusal sheet.)

Thank you!

First, I want to tell you that any information I collect will be kept completely confidential. That means that we'll use the data as a group and won't be reporting anyone's questionnaire by itself. There will be no way that anyone will be able to find out what you answered on the questionnaire.

1. How many people including yourself are on your boat today? ____ people.

2. What activities, for example skiing, fishing, or sightseeing, etc., are you participating in today?

_____

3. Which of these activities is the most important? (Circle one above.)

4. At what Marina or ramp did you put your boat in the water?

_____

5. How many miles did you drive to get from your home to that put in point? _____ miles

6. How long did the drive take you? _____ hours

7. Was coming to the river the main reason you took this trip away from home?
___ yes ___ no

8. Have you visited or are you going to visit any other lakes on this trip?
___ no ___ yes—which ones
_____
_____

9. How many days will you be away from home on this trip? _____ days

10. How much of this time will you spend boating? _____ days/hours (circle)

11. In the last 12 months, how many trips have you taken to this area to go boating?
_____ trips

The next few questions concern the amount of money that will be your share of the total amount spent on this trip.

12. About how much will you personally spend on transportation for this trip?
$_____

13. About how much will you personally spend on food for this trip? $_____

14. About how much will you personally spend on boat fuel and other recreation supplies, such as film, suntan lotion, or fishing tackle, etc., for this trip? $_____

15. About how much will you personally spend on overnight accommodations for this trip? $_____

Add 4 items above. ***$_____ *** total cost.

I now want to ask you some questions about the locks here on the Tennessee River.

16. Was the presence of this lock a positive factor, negative factor, or not a factor, in your

VOL 56 ISS 122 JE 25 1991 UMI

decision to come to this part of the Tennessee River?
___ not a factor
___ positive—in what way?
___
___ negative—in what way?
___

17. Has the presence of the lock affected the type of boat or other recreational equipment you've purchased?
___ no
___ yes—in what way?
___

18. How many times will you pass through a lock on this boating trip? (Can pass through same lock more than once.) ___ lockages

19. Have you been through these locks before?
___ no
___ yes—In the past, on average, how long have you been delayed each day waiting at the locks? ___ hours/minutes (circle)

20. How long do you think you'll have to wait today to get through all the locks? ___ hours/minutes (circle)

Next, I'd like to ask you some hypothetical questions about your trip and the effects of lock use on it. Assume the trip you are on now became more expensive. Perhaps due to increased travel costs or something, but lock conditions were unchanged. You said your share of the total cost of this trip was $_____ *** total cost from above ***

21. If it would have cost you $_____ (20% of cost) more, would you have come on this trip?
___ Protest—will not answer. Record why?
___
___ Yes (go to 21a.)
___ No—work between 0 and 20% to find the highest acceptable value. Split the difference in half until you reach the nearest $1 (less than $10) or the nearest $5 (greater than $10). $___

21a. If it would have cost you $___ (50% of cost) more, would you have come on this trip?
___ Yes (Go to 21b.)
___ No—work between 20 and 50% to find the highest acceptable value. Split the difference in half until you reach the nearest $1 (less than $10) or the nearest $5 (greater than $10). $___

21b. If it would have cost you $_____ (100% of cost) more, would you have come on this trip?
___ Yes (Go to 21c.)
___ No—work between 50 and 100% to find the highest acceptable value. Split the difference in half until you reach the nearest $1 (less than $10) or the nearest $5 (greater than $10). $_____

21c. Keep going until you receive a negative answer. Use 100% increments. Work between last 2 bids to find highest acceptable value. $_____
After last bid.

22. So adding this to your current trip expenses means that $_____ *** total cost + last bid *** is the highest amount that you personally would pay to come on this trip?
___ No—repeat bids for personal value
___ Yes

23. Now, suppose you had a schedule of locking times so that you could plan for, or avoid delays. How much, if any, more than *** total cost + last bid *** would you pay to come on this trip? $_____

24. Now suppose you knew you'd only have to wait ½ as long as you do now to go through the locks on this trip. How much, if any, more than *** total cost + last bid *** would you pay to come on this trip?
$_____

25. Now suppose you could be guaranteed of never having to wait to enter the locks. How much, if any, more than *** total cost + last bid *** would you pay to come on this trip? $_____

26. Now suppose that you knew you would have to wait twice as long to enter the locks. How much, if any, less than *** total cost + last bid *** would you pay to come on this trip? $_____

Lastly, may I get some general information about you?

27. Observe gender. ___ male ___ female

28. What is your age? ___ years old

29. What town or city do you live in? (Prompt for complete information.)
City
___
County
___
State
___
Zip Code
___

30. Do you live inside or outside of town?
___ inside ___ outside

31. What do you do for a living?
___
___

32. Can you tell me how many years of school you completed? ___ years

33. Would you please give a ballpark figure of your annual family income before taxes?
$_____

That's all the questions I have. Thank you very much for your participation.

Ending time _____

Type of boat
___ Runabout
___ Cabin cruiser
___ Houseboat
___ Bass boat
___ Pontoon boat
___ Sail boat

Environmental Assessment; Phosphate Development Works, AC

AGENCY: Tennessee Valley Authority.

ACTION: Environmental Assessment for demolition of Phosphate Development Works [PDW].

SUMMARY: The Tennessee Valley Authority (TVA) and the U.S. Army are proposing the demolition of the Phosphate Development Works (PDW) located on the TVA Reservation in Muscle Shoals, Alabama. The facility is currently owned by the Army, but the land will be returned to TVA. An Environmental Assessment (EA), in accordance with the National Environmental Policy Act, has been prepared.

DATES: TVA will consider all relevant comments received by July 25, 1991 before a final decision is made on the proposal.

ADDRESSES: Any comments on this proposal should be addressed to M. Paul Schmierbach, Manager, Environmental Quality, Tennessee Valley Authority, 400 W. Summit Hill Drive, SPB 2P, Knoxville, Tennessee 37902–1499.

FOR FURTHER INFORMATION CONTACT: For additional information on this action or for a copy of the EA, call Sam H. Calhoun, Manager of Environmental Services, Tennessee Valley Authority, (205) 386–2010 in Muscle Shoals, Alabama.

SUPPLEMENTARY INFORMATION: The PDW was authorized by the Secretary of the Army in 1950 to produce methyldichlorophosphineoxide (DC), an intermediate chemical used in the production of the nerve agent GB. In July 1951, limited production began and continued intermittently for several years. The PDW has been in layaway from 1963 until the present except that in 1987, several railcars of DC from the Rocky Mountain Arsenal in Colorado were purified in a small temporary purification plant onsite and shipped to another Army facility. The Army has no further plans for the PDW. The PDW consists of a 63-acre site with various-sized buildings and associated storage tanks and piping.

The present condition of the PDW facility is poor, with buildings and equipment in a deteriorated state. Considerable expense would be required to rehabilitate the plant to a useful condition.

TVA's and the Army's plan is to clean up the site, demolish and sell for salvage unneeded facilities, and return areas to grass, trees, and other vegetation so the site would be suitable for a variety of future uses. All asbestos will be removed in accordance with regulatory requirements and sent to a permitted landfill. Other solid wastes will be sent to a local landfill.

Dated: June 17, 1991.

M. Paul Schmierbach,

Manager, Environmental Quality.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE–91–24]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before July 5, 1991.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–10), Petition Docket No. 26587, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Miss Jean Casciano, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–9683.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on June 20, 1991.

Annette Pitts,

Acting Manager, Program Management Staff, Office of the Chief Counsel.

Petitions for Exemption

Docket No.: 26587.
Petitioner: World Jet Aircraft International.
Sections of the FAR Affected: Section 9309(b) of the Nonaddition Rule under the Airport Noise and Capacity Act of 1990.
Description of Relief Sought: To allow petitioner to transport a Boeing 707 from Israel to Shermon Clinton Airport, in Burnsflat, Oklahoma, with a maintenance stop in Ft. Lauderdale, FL, where the aircraft will be used in developing Stage 3 hushkits for Boeing 707.

unemployment compensation and income tax refunds). We use the information to insure that the income is being properly reported by the recipients on their returns.

Respondents: State and local governments, Federal agencies or employees.

Estimated Number of Respondents: 4,717.

Estimated Burden Hours Per Respondent: 12 minutes.

Frequency of Response: Annually.

Estimated Total Reporting Burden: 8,769,877 hours.

OMB Number: 1545-0184.

Form Number: IRS Form 4797.

Type of Review: Revision.

Title: Sales of business property.

Description: Form 4797 is used by taxpayers to report sales, exchanges, or involuntary conversions of assets, other than capital assets, and involuntary conversations of capital assets held more than one year. It is also used to compute ordinary income from recapture and the recapture of prior year section 1231 losses.

Respondents: Individuals or households, farms, businesses or other for-profit.

Estimated Number of Respondents/ Recordkeepers: 1,398,388.

Estimated Burden Hours Per Respondent/Recordkeepers:

Recordkeeping 30 hrs., 51 min.

Learning about the law or the form 11 hrs., 22 min.

Preparing the form 17 hrs., 2 min.

Copying, assembling, and sending the form to IRS 1 hr., 20 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 84,621,113 hours.

OMB Number: 1545-1081.

Form Number: IRS Form 8809.

Type of Review: Revision.

Title: Request for Extension of Time to File Information Returns.

Description: Form 8809 is used to request an extension of time to file certain information returns. It will be used by IRS to process requests expeditiously and to track from year-to-year those who repeatedly ask for an extension.

Respondents: Individuals or households, State and local governments, farms, businesses or other for-profit, Federal agencies or employees, non-profit institutions, small businesses or organizations.

Estimated Number of Respondents: 45,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping 36 min.

Learning about the law or the form 14 min.

Preparing the form 48 min.

Copying, assembling, and sending the form to the IRS 28 min.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 93,600 hours.

OMB Number: 1545-1091.

Form Number: IRS Form 8810.

Type of Review: Revision.

Title: Corporate Passive Activity Loss and Credit Limitations.

Description: Under section 469, losses and credits from passive activities, to the extent they exceed passive income (or in the case of credits, the tax attributable to net passive income), are not allowed. Form 8810 is used by personal service corporations and closely held corporations to figure the passive activity loss and credits allowed and the amount of loss and credit to be reported on their tax return.

Respondents: Businesses and other for-profit.

Estimated Number of Respondents/ Recordkeepers: 100,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping 25 hrs., 21 min.

Learning about the law or the form 5 hrs., 22 min.

Preparing and sending the form to IRS 6 hrs., 1 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 3,673,000 hours.

Clearance Officer: Garrick Shear (202) 535-4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Matters To Be Added and Withdrawn From Consideration at an Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the following matter will be added to the agenda for consideration at the open meeting of the Board of Directors of the Federal Deposit Insurance Corporation scheduled to be held at 2:00 p.m. on Tuesday, June 25, 1991, in the Board Room on the sixth floor of the FDIC Building located at 550-17th Street, NW., Washington, DC:

Memorandum and resolution re: FDIC Appointment of FDIC as Receiver of Insured State Depository Institutions.

At that same meeting, the following matter will be withdrawn from consideration:

Memorandum re: Changes to the Section 19 Policy Statement and Guidelines.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Deputy Executive Secretary of the Corporation, at (202) 898-6757.

Dated: June 20, 1991.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

June 20, 1991

TIME AND DATE: 2:00 p.m., Thursday, June 27, 1991.

PLACE: Room 600, 1730 K Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. *Lanham Coal Company, Inc.*, Docket No. KENT 89-186. (Issues include whether the judge erred in finding that Lanham violated 30 CFR § 77.1710(g) and that the Secretary did not abuse her discretion by citing Lanham rather than an independent contractor for the alleged violation).
2. *Lang Brothers, Inc.*, Docket No. WEVA 90-58. (Issues include whether the judge erred in finding that the gas well cleaning and plugging operation of Lang Brothers is subject to the jurisdiction of the Mine Act and that Lang Brothers is an independent contractor-operator under the Mine Act, 30 USC § 801 *et seq.*).

Any person attending this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR § 2706.150(a)(3) and § 2706.160(d).

CONTACT PERSON FOR MORE INFORMATION Jean Ellen (202) 653-5629/ (202) 708-9300 for TDD Relay, 1-800-877-8339 for toll free.

Jean H. Ellen,

Agenda Clerk.

BILLING CODE 6735-01-M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 10:00 a.m., Friday, June 28, 1991.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda

Because of its routine nature, no substantive discussion of the following item is anticipated. This matter will be voted on without discussion unless a member of the Board requests that the item be moved to the discussion agenda.

1. Proposal to modify and clarify the Federal Reserve Board's risk-based capital guidelines. (Proposed earlier for public comment; Docket No. R-0700)

Discussion Agenda

2. Proposed 1992 Federal Reserve Board budget guideline.
3. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: June 21, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

OFFICE OF THE INSPECTOR GENERAL OVERSIGHT COMMITTEE NOTICE

TIME AND DATE: A meeting of the Board of Directors Office of the Inspector General Oversight Committee will be held on July 9, 1991. The meeting will commence at 9:30 a.m.

PLACE: Hyatt Regency Washington, 525 New Jersey Avenue, NW., The Bryce Room, Washington, DC 20001, (202) 737-1234.

STATUS OF MEETING: Open [A portion of the meeting will be closed, pursuant to the following vote by a majority of the Board of Directors, to discuss personnel-related and personal matters as authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. 552b(c) (2) and (6)], and the corresponding regulations of the Legal Services Corporation [45 C.F.R. Sections 1622.5 (a) and (e)].

Board Member, Vote

Howard Dana, Jr.—Yes
J. Blakeley Hall—Yes
Jo Betts Love—Yes
Penny L. Pullen—Yes
Thomas D. Rath—Yes
Basile Uddo—Yes
George W. Wittgraf—Yes
Jeanine E. Wolbeck—Yes

A portion of the meeting will be closed to preserve the applicants' personal privacy and to discuss strictly internal personnel rules and practices. Specifically, the Committee will interview candidates for the position of Inspector General in the closed session. Additionally, the Committee may resolve to recommend certain candidates interviewed by the Committee to the Board of Directors for further consideration by the Board of Directors for the position of Inspector General.

MATTERS TO BE CONSIDERED:

Open Session:

1. Approval of Agenda.
2. Approval of Minutes of June 3, 1991 Meeting.

Closed Session:

3. Interview of Applicants for the Position of Inspector General of the Legal Services Corporation and Consider and/or Settle on Possible Recommendation to the Board of Directors Regarding Applicants to be Considered by the Board of Directors for Position of Inspector General.

CONTACT PERSON FOR INFORMATION: Patricia D. Batie, Executive Office, (202) 863-1839.

Date issued: June 21, 1991.

Limited Partnership Roll-Up Transactions

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Securities and Exchange Commission ("Commission") today is publishing for comment proposed rules intended to enhance the quality and readability of information provided to investors in connection with limited partnership roll-up transactions. The proposals would heighten the disclosure requirements with respect to, among other matters, conflicts of interest and fairness of a roll-up transaction, similar to those governing going private transactions. Enhanced disclosure regarding the reasons for proposing the roll-up, alternatives considered by the general partner, valuation methods used and pro forma financial information also would be called for. Information relating to security holders' appraisal and dissenters' rights, changes in voting rights, and rights to a limited partnership list would be required as well. Because a roll-up transaction often has different effects and risks as between investors in the subject limited partnerships, the proposed rules would require delivery of individual partnership prospectus supplements setting forth partnership specific information along with the proxy statement/prospectus to investors in each such partnership. Technical amendments to the business combination registration statements under the Securities Act of 1933, Forms S-4 and F-4, also are being proposed.

Further, the Commission proposes to establish a minimum proxy solicitation period of 60-calendar days prior to a limited partners' meeting at which a roll-up transaction will be submitted to a vote, or 60-calendar days prior to the earliest date on which partnership action could be taken by consent. If, under applicable state law, the maximum period permitted for giving notice is less than 60 calendar days, the state law maximum notice period would apply. A 60-calendar day offering period also is proposed for roll-ups structured as exchange offers subject to the Williams Act.

Additionally, the Commission is concurrently publishing a companion release [1] that sets forth the Commission's interpretive views of existing disclosure requirements applicable to both limited partnership roll-up transactions and initial public offerings of limited partnership units.

DATES: Comments should be received on or before August 9, 1991.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street, NW, Mail Stop 6-10, Washington, DC 20549. Comment letters should refer to File No. S7-21-91. All comment letters received will be available for public inspection and copying in the Commission's Public Reference Room, 450 5th Street, NW, Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Michael L. Hermsen or Meredith B. Cross at (202) 272-2573, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street, NW, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment proposed new subpart 900 of Regulation S-K [2] and technical revisions to Forms S-4 and F-4 under the Securities Act of 1933 ("Securities Act"), [3] the registration forms generally used in roll-up transactions. These proposals would be applicable to registration forms filed with the Commission in connection with limited partnership roll-up transactions, as defined in the rule proposals. The Commission also is proposing a minimum 60-calendar day solicitation or offering period for roll-up transactions.

I. Executive Summary

Roll-ups have created considerable controversy. Critics have questioned the abuses which have occurred in roll-up transactions and the fundamental fairness of the transactions. [4] Some of the more serious questions raised deal with the methods used to value the securities issuable in exchange for investors' limited partnership interests, the use of differential fees paid to broker-dealers in the solicitation process, [5] and the general partner's fiduciary duties to the limited partners, including its potential conflicts of interest and lack of independence in structuring and negotiating the terms of a transaction. Critics have questioned the potential overreaching by the general partners inherent in the increased benefits accruing to them in most roll-up transactions, including payments for general partnership interests and changes in compensation arrangements. These criticisms have been voiced in investor complaints to the Commission and Congressional hearings on roll-ups of limited partnerships. [6]

When a roll-up is proposed, investors are concerned that because of a limited resale market, a limited partner may find itself forced to exchange its limited partnership interest for a significantly different security in an entirely new entity. Changes in the new entity's borrowing policies, business plan, investment objectives, term of existence and the voting rights of investors frequently result in the investor holding a fundamentally different investment. Limited partners objecting to a roll-up transaction have especially criticized the absence of any legal or equitable alternative to the transaction and the "cram down" effect on objecting partners.

In light of these significant criticisms, the Commission has been re-examining the adequacy of the rules and regulations applicable to roll-ups. A number of specific suggestions made by investors and commenters to improve the quality of the information provided to investors require new rules. [7]

One main criticism not addressed under the current rules and regulations is that the requirements do not address the complexities involved in combining a number of different entities. Uncertainties arise when combinations of entities, other than those contemplated in the pro forma financial statements or the fairness opinions for example, are permitted to consummate the transaction. Valuation problems arise when trying to allocate interests among two or more entities. Investors in one partnership may not have sufficient historical information concerning the business plan or other historical aspects of all partnerships subject to a roll-up to make an informed investment decision. Another criticism is that the disclosure does not adequately and clearly address the changed terms of an investment and the different, material detriments, benefits and effects to be felt by the investors, both limited partners and general partners, in each of the various partnerships subject to a roll-up. The combined effect of all of these changes may substantially increase the risks of the investment.

The rules and amendments proposed today are intended to enhance the substance of the information provided to investors to allow them to assess both the merits of the proposed transaction and the general partner's compliance with its fiduciary duties to the limited partners. These proposals include new disclosure requirements and codify interpretive positions of existing disclosure requirements. The Commission invites suggestions on the appropriateness and necessity of the rules as proposed and also on whether there are actions that the Commission should take to assure that limited partners are provided full, fair and comprehensible disclosure sufficient to make an informed decision as to the merits of the roll-up transaction and the consistency of the transaction with the general partner's duties under state law.

II. Proposed Disclosure Requirements for Roll-up Transactions

A. Introduction

The proposed rules generally apply to roll-up transactions that are subject to registration under the Securities Act. The Commission is not proposing a new registration form or disclosure schedule for roll-up transactions. Instead, the applicable registration forms [8] would be amended to require roll-up transaction documents to include the information set forth in the new rules in addition to the information otherwise required. To the extent the disclosure requirements of the registration forms or disclosure schedules and the proposed rules address the same subject, the specific requirements applicable to roll-ups would control.

B. Definitions

1. "Roll-up Transaction"

"Roll-up transaction" [9] is defined broadly to include a variety of transactions involving the combination or reorganization of limited partnerships or similar entities and the issuance of new securities. While the definition does not include an "effects" test, these transactions usually change significantly the character of an investment in a limited partnership or similar entity, such as a real estate investment trust. The definition includes a "typical" roll-up transaction such as a merger of two or more finite-life limited partnerships into a new partnership, corporation or real estate investment trust in which limited partners will receive a new security in a successor entity that has different compensation arrangements with the general partner and different investment and/or distribution policies. These policy differences often include, for example, changing from a finite to an infinite-life entity, allowing proceeds to be reinvested in the partnership rather than distributing such proceeds to investors, or changing substantially the stated investment objectives of a partnership. The reorganization of a single partnership into corporate form also would constitute a roll-up transaction under the proposed definition since this restructuring, similar to a "typical" roll-up, involves the issuance of new securities having substantially different rights and investment risks as compared to the subject partnership.

Further, as proposed, compliance with the enhanced disclosure would be required whether or not objecting investors have the ability to "opt out" of the transaction either because the securities of either the entity subject to the transaction or the resultant entity are publicly traded or because such investors 'have dissenters' or appraisal rights to receive the fair value for their investment. Comment is requested on whether the definition should be narrowed to exclude transactions where:

(1) The subject limited partnership interests are listed on a national exchange or traded in the National Association of Securities Dealers, Inc. Automated Quotation System ("NASDAQ");

(2) The limited partner is entitled to dissenters' or appraisal rights, by law, under the terms of the partnership agreement, or the roll-up;

(3) The limited partner does not have an exchange or NASDAQ traded security and is not being offered an exchange or NASDAQ traded security;

(4) The successor issuer has substantially the same business plan, and investment and/or distribution policies and offers limited partners of the subject partnership a security with substantially the same rights as their current security; or

(5) The transaction relates solely to a single partnership reorganization.

Alternatively, comment is requested on the appropriateness of a limited exclusion from some but not all of the proposed disclosure requirements. Commenters favoring this approach should specifically identify which disclosure requirements would be within this limited exclusion and fully discuss the bases for their position.

Commenters also should address the appropriateness of broadening the proposed definition to include other types of transactions that involve one or more amendments to the partnership's governing instruments but not the issuance of a new security. These amendments may include (a) a change in voting rights to increase the percentage needed to approve a proposal, such as requiring 66⅔% vote to remove the general partner; and (b) a material change in the partnership's liquidation policy to permit the reinvestment of proceeds received from the sale or refinancing of assets rather than distributing such proceeds to limited partners.

2. Other Defined Terms

Other terms defined in the new rules include "general partner," [10]

[9] Proposed Item 901(c).

[10] Proposed Item 901(a).

VOL 56 ISS 122 JE 25 1991 UMI

"sponsor," [11] "partnership" [12] and "successor." [13] These definitions are designed to simplify the text of the disclosure items while requiring information about all relevant parties. For example, the term "sponsor" would refer to the person proposing a roll-up transaction whereas "general partner" refers to the person responsible under state law for managing the business and affairs of a limited partnership subject to the transaction. While the sponsor and general partner may be the same person in affiliated roll-up transactions, this would not be the case in third-party transactions.

The roll-up transaction rules would apply to the specified transactions if any of the entities proposed to be rolled-up is a "partnership" as defined in the rules. Roll-up transactions generally have involved entities formed for specific limited purposes that under federal tax laws are not taxed at the entity level and pass through income or loss to their investors. Because these attributes, especially the entity's federal income tax status, are not solely dependent on its legal form under state law, the proposed definition of "partnership" is intentionally broad. As proposed, the term would include any partnership, trust, real estate investment trust ("REIT"), [14] or any other similar entity that is not an association taxed as a corporation under federal tax law. [15] Commenters are specifically requested to address whether the definition covers all entities, regardless of their legal form, having attributes similar to a limited partnership that should be subject to the enhanced roll-up disclosure requirements. Comment also is requested as to whether certain entities encompassed within the definition should be excluded; if so, the basis for such view should be provided.

The proposed rules define "successor" to mean the partnership, corporation, real estate investment trust or other entity that exists after completion of a roll-up transaction. Under this definition, the successor would be the issuer of the securities being offered to investors in the roll-up transaction.

[11] Proposed Item 901(d).

[12] Proposed Item 901(b).

[13] Proposed Item 901(e).

[14] The term "real estate investment trust" is defined in I.R.C. section 856.

[15] For example, in a combination of REITs to form a new corporation, the REITs would be deemed to be "partnerships" (whether in corporate, partnership or trust form) and subject to the heightened roll-up disclosure requirements.

C. Proposed Additional Disclosure Requirements

1. General

The proposed disclosure for roll-up transactions will be in addition to that currently required under the Commission's existing rules and regulations. Issuers engaged in a roll-up transaction must comply with the proposed disclosure items discussed below as well as the instructions and disclosure items set forth in the business combination registration forms.

In many instances, the disclosure required under the proposed rules also would be required under existing rules. The proposed rules are intended to codify existing interpretations and make clear the specific information that must be provided in a roll-up transaction to assure that investors are able to understand the disclosure document and evaluate the merits of the transaction.

The proposed disclosure items do not change the existing rules regarding the circumstances under which information about the issuer and subject partnership may be incorporated by reference into the registration statement. Therefore, for example, if the subject partnership is a real estate entity, property information may continue to be incorporated by reference to the extent permitted by the applicable registration form. [16]

2. Individual Partnership Supplements

In most roll-up transactions, two or more partnerships will be combined to form a new partnership, corporation, real estate investment trust or other entity. Depending upon the circumstances of each partnership, the roll-up transaction may have significantly different effects on investors in the partnerships. [17] However, investors may not fully appreciate the important differences when the effects of the roll-up transaction are described for all partnerships together in one disclosure document.

To address these concerns and facilitate an investor's ability to judge the merits of a roll-up transaction, the disclosure documents consist of two parts. The basic disclosure document continues to contain a detailed discussion of all information material to the roll-up transaction. The proposed rules require a separate disclosure supplement for each partnership. [18] The supplement does not serve as a summary of the roll-up transaction for investors in the partnership but, rather, highlights the most significant effects of the roll-up to investors in each partnership. The proposed supplement also is not a substitute for clear disclosure in the basic disclosure document of differing effects on particular partnerships otherwise required under the existing and proposed rules. [19] Under the proposal, the investor would receive the basic disclosure document, plus the supplement applicable to his specific partnership. The investor would not receive the supplements prepared with respect to other partnerships.

The supplement describes any material risks, adverse effects or benefits of the roll-up transaction that may affect investors in the partnership differently from investors in other partnerships. [20] The supplement also would be required to include a discussion of whether the sponsor reasonably believes the roll-up transaction is fair or unfair to investors in the particular partnership. [21] In order

[16] See General Instruction C.2. to Form S-4 and F-4.

[17] Examples of roll-up transactions that would have different effects on investors include: (i) Combining partnerships that do not use debt to purchase assets with partnerships that do use debt; (ii) combining partnerships that invest in different types of assets (*e.g.*, commercial office buildings and residential apartment buildings); (iii) combining partnerships that hold significant cash or other liquid assets with partnerships that have little or no liquid assets; (iv) combining partnerships that are making cash distributions to limited partners with partnerships that are not making distributions; and (v) combining partnerships that are classified as "publicly traded partnerships" under 7704 of the Internal Revenue Code with partnerships that are not so classified.

[18] Proposed Item 902.

[19] See proposed Item 904.

[20] Proposed Item 904, "Effects of the Roll-Up Transaction," requires the principal disclosure document to include a discussion of the effects of the roll-up transaction on investors in each partnership, including the potential risks, adverse effects and benefits of the roll-up transaction. See section II.C.4. *infra* for a discussion of the disclosure required by proposed Item 904. The supplement required by Item 902 would highlight those effects discussed in response to Item 904 that may be different for investors in the partnership covered by the supplement.

[21] Proposed Item 909 requires the principal disclosure document to include a discussion of the sponsor's views concerning the fairness or unfairness of the roll-up transaction for investors in each partnership. See section II.C.8. *infra* for a discussion of the disclosure required by proposed Item 909. Proposed Item 902 requires the supplement to include a statement of the sponsor's reasonable belief as to the fairness of the roll-up transaction for investors in the particular partnership and a discussion of any material differences in the overall fairness analysis applicable to the partnership. The supplement would refer investors to the appropriate section in the principal disclosure document for the complete Item 909 discussion.

to illustrate the financial statement effects of the roll-up transaction on the particular partnership, the supplement includes pro forma financial statements based upon a combination of partnerships that produces the lowest amount of cash flow from operations, [22] further adjusted to include the partnership. [23] These pro forma financial statements would be accompanied by a brief discussion of the material changes to such statements caused by the inclusion of the partnership therein.

In addition, when two or more partnerships are to be combined, interests in the successor typically are allocated among investors in the various partnerships according to a dollar value assigned to each partnership. While the basic disclosure document explains the method of allocating the interests and shows the value assigned to each partnership, the level of detail that would be necessary in a combined presentation to enable investors in each individual partnership to thoroughly understand and evaluate the methods used to value their partnership, would further complicate an already unwieldy document. Therefore, the value assigned to the partnership for purposes of allocating interests in the successor is explained narratively in the supplement and illustrated in a table showing each principal component of the calculation of the partnership's value.

The Commission requests comment on whether other information should be required to be included in the supplement, such as financial statements of the partnership or additional information concerning the business of the partnership. The Commission also requests comment on whether it may be appropriate in some cases to permit more than one partnership to be included in a supplement, such as when the effects of a roll-up transaction would be substantially the same for groups of partnerships proposed to be included. Finally, the Commission proposes that the supplement be provided as an attachment to the disclosure document only to investors in the partnership covered by the particular supplement.

[22] Proposed Item 915, "Pro Forma Financial Statements; Selected Financial Data," requires pro forma financial statements (before adjustments to include the partnership covered by the supplement) to be included in the principal disclosure document. See section II.C.10. *infra* for a discussion of the information required by proposed Item 915.

[23] This requirement would apply only if (i) the roll-up transaction may be completed with a combination of partnerships other than all partnerships proposed to be included and (ii) the partnership covered by the supplement is not already included in the pro forma financial statements required by proposed Item 915. However, the Commission requests comment on whether each supplement should be provided to investors in all partnerships proposed to be included in the roll-up transaction so that investors may compare the effects of the transaction on the various partnerships.

3. Summary

In response to concerns raised about the readability of roll-up transaction disclosure documents, the proposed rules include a specific requirement to provide a clear, concise and comprehensible summary of the roll-up transaction. Although such a summary currently is required under the existing rules, [24] the new rules are intended to improve the summary disclosure provided to investors by requiring specific items to be addressed in the summary. In general, the summary must present a "snapshot" description of the most significant aspects of a roll-up transaction. Under the proposed rules, [25] the summary must contain a summary description of the material terms of the roll-up transaction. The summary also must describe each of the following items and the effects thereof arising in connection with the roll-up transaction, as well as any other material terms or consequences of the roll-up transaction:

- Changes in limited partner voting rights;
- Changes in the successor's business plans or investment policies;
- Changes in management compensation;
- Changes in the form of ownership interest of management in the successor;
- Conflicts of interest of the general partner;
- Likely trading market discount of securities to be received in the roll-up transaction;
- Valuation methods used to allocate securities in the successor to investors in the partnerships;
- The general partner's beliefs concerning whether the transaction is fair or unfair to investors in each partnership;
- Any "fairness" opinion concerning the roll-up transaction, including whether the opinion covers all possible combinations of partnerships, and whether any firm declined to provide a "fairness" opinion;
- Alternatives to the roll-up transaction considered by the general partner, as well as the alternatives to continue or liquidate the partnerships whether or not considered by the general partner;
- Investors' rights to exercise dissenters' or appraisal rights;
- Investors' rights to obtain a list of limited partners; and
- If affiliates of the general partner or the sponsor may participate in the successor's business or receive compensation from the successor, an organizational chart showing the relationships between such persons.

[24] See rule 421(b) of Regulation C (17 CFR 230.421(b)) and Item 503(a) of Regulation S-K (17 CFR 229.503(a)).

[25] Proposed Item 903.

Comment is requested as to whether other information in addition to or in lieu of that required by the proposed rule should be included in the summary. Commenters should specifically describe any suggested additional disclosure requirements and/or any items believed unnecessary, as well as the reasons therefor.

4. Effects of the Roll-up Transaction

a. *General requirements.* Because roll-up transactions typically involve important risks and adverse effects for investors and benefits for sponsors, the disclosure document must contain a clear description of the effects of the transaction. Although under the current disclosure rules roll-up transaction disclosure documents include a description of the effects of the transaction, concerns have been raised about the adequacy of such disclosure. In order to clarify and make more specific the disclosure requirements in this area, the proposed rules include specific disclosure requirements concerning the effects of the roll-up transaction. [26]

The proposed rules would require both a brief description of each material effect of the roll-up transaction on investors in each partnership, including, without limitation, the potential risks, adverse effects and benefits of the transaction, and a complete description of each material change affected by the transaction. These changes include such matters as the compensation and cash distribution arrangements, limited partner voting rights and fiduciary duties of the general partner. If any effect would be different for investors in any of the partnerships, such differences would be discussed. As more fully discussed below, specific effects that must be described are included in the proposed rules. The proposed rules would require each effect to be quantified to the extent possible. For example, under the proposed rules, if cost savings resulting from combined partnership administration is described as a potential benefit of the roll-up transaction, the disclosure would include the amount of the cost savings and a comparison of the amount to the costs of the roll-up transaction. The proposed rules also require a description of each potential benefit for the sponsor arising from the roll-up transaction.

b. *Changes in general partner compensation and distribution*

[26] Proposed Item 904.

VOL 56 ISS 122 JE 25 1991 UMI

arrangements. A principal concern raised by commenters about roll-up transactions is a lack of adequate disclosure concerning the compensation to be paid to the sponsor and its affiliates after the roll-up transaction. Commenters are concerned that investors are unable to understand the nature of the compensation to be paid, the conflicts of interest presented by the compensation and the changes in the compensation brought about by the roll-up transaction. The proposed rules would address this concern by requiring specific information about the compensation payable to the sponsor (or others) after the roll-up transaction and a comparison of the compensation to that paid before the transaction.[27]

The proposed rules first would require a description of each item of compensation (including reimbursement of expenses and cash distributions) payable by the successor after the roll-up transaction to the sponsor and its affiliates or to any other person that will be an affiliate of the successor.[28] Also, the material conflicts of interest presented by the proposed compensation and cash distribution structure, and the steps proposed by the sponsor to resolve such conflicts would be identified by the sponsor.[29]

Second, a comparison of the compensation paid by each partnership before the roll-up transaction and proposed to be paid by the successor after the roll-up transaction would be required. The narrative discussion would be illustrated in a table that shows the actual amounts of compensation paid to the sponsor or its affiliates by the partnerships for the last three fiscal years and the amounts that would have been paid if the new compensation structure had been in effect.[30] If any proposed changes in the business or operations of the successor after the roll-up transaction would change materially the compensation and distributions that would have been paid from that shown in the table, any such changes and the effects thereof would be described.

The Commission proposes that the comparative compensation table be presented in the principal disclosure document on a combined basis for all partnerships proposed to be included. Individual partnership comparative compensation information would be included in the separate partnership supplements. However, comment is requested concerning whether other comparative compensation information should be required such as information for different combinations of partnerships.

c. *Changes in voting and other rights of and duties owed to investors.* Roll-up transactions often involve important changes in the rights of investors and the duties owed by the sponsor to investors. For example, in many roll-up transactions, the governing instruments of the successor require a greater vote to remove the sponsor than would be required under the partnership agreements of the partnerships to be included in the roll-up transaction. Commenters have expressed concerns that the disclosure contained in roll-up transaction documents does not adequately inform investors about these important changes.

In response to these concerns, the proposed rules specifically require a description of each material difference between the rights of investors and the duties owed to investors before and after the roll-up transaction. The comparison would discuss the provisions of the relevant governing instruments and applicable state law.[31] To the extent practicable, this information should be illustrated in a table.

d. *Changes in investment policies and business plan.* Critics have complained that the effects of changes in significant investment policies, such as permitting the reinvestment of proceeds received from asset sales or refinancings or permitting leverage, are not adequately described in roll-up disclosure documents. The new rules address this concern by requiring a description of each material change in the investment policies and business plans of the successor and the effects on investors of such changes.[32]

In many roll-up transactions, the sponsors state that in the future the successor may sell assets owned by the partnerships and purchase new assets with the proceeds. Such asset sales and purchases often are identified as a potential benefit of the roll-up transaction because they may result in growth of the assets of the partnership. However, disclosure documents for roll-up transactions frequently do not provide specific disclosure about such proposed sales and purchases.

Under the proposed rules, specific disclosure would be required about the plans of the sponsor (or other person that will control the successor) with respect to material asset sales or purchases, borrowings or other extraordinary transactions involving the assets and/or liabilities of the partnerships or the successor.[33] The proposed rules would require a statement as to whether or not specific assets have been identified for sale, financing, refinancing or purchase and, if so, a description of the proposed transaction.[34]

e. *Changes in limited partner cash distribution policies.* In order to enhance an investor's understanding of the effects of a roll-up, the proposed rules require a description of the cash distribution policies of the successor and a comparison of such policies to those of the partnerships to be rolled-up This description would cover cash distributions from operations and from capital transactions, such as sales or refinancings of properties.[35]

f. *Trading market discount of securities.* A principal concern raised by investors relates to the significant discount at which securities received in roll-up transactions trade in the secondary markets. The proposed rules would require the disclosure document to make clear the likelihood of such a discount. In addition, the effects on investors of this trading discount in relation to changes in the successor's cash distribution policies would be highlighted.[36] Comment is requested on whether disclosure of historical trading prices of securities issued in other roll-up transactions would provide helpful information or whether such information likely would confuse or mislead investors.

5. Background, Reasons and Alternatives

a. *Background of the partnerships.* In roll-up transactions that involve bringing together two or more partnerships, investors may have no previous knowledge of the other partnerships that are proposed to be joined with their partnership. In order to provide investors with a more complete understanding of the partnerships that might be included in the roll-up

[27] Proposed Item 904(c).

[28] Proposed Item 904(c). Compensation payable by the successor to a previously unaffiliated general partner would be included in the disclosure required by this proposed Item.

[29] Proposed Item 904(c). For example, if the sponsor would receive compensation from an asset sale only if made before a specified date, the sponsor's interest in selling the asset at a time that may not be in the best interests of the investors would be described.

[30] Proposed Item 904(c).

[31] Proposed Item 904(b).

[32] Proposed Item 904(e).

[33] Proposed Item 904(e). The disclosure required by this proposed Item is comparable to that required by Item 5 of Schedule 13E-3 (17 CFR 240.13e-100).

[34] Proposed Item 904(e).

[35] Proposed Item 904(d).

[36] Proposed Item 904(f).

transaction, the proposed rules require a brief description of the background of each of the partnerships.[37] For example, the disclosure document would provide information about the partnerships' original investment objective(s), the amount of capital raised from investors and whether all funds raised had been invested as originally planned. Further, the document would state for each partnership whether the partnership has achieved its original investment objective(s). Finally, disclosure regarding defaults on mortgage debt and property foreclosures would be required.

b. *Background of, reasons for and alternatives to the transaction.* Roll-up transactions may include significant benefits for the general partner or sponsor. Concerns have been raised that the disclosure provided may not enable investors to assess the reasons for the roll-up transaction or alternatives considered by the sponsor or available to investors. The proposed rules require more detailed disclosure of this background information.

First, the proposed rules require information about any discussions that the sponsor has had in the past two years with any other persons about an extraordinary transaction involving the partnerships.[38] This disclosure should assist investors in evaluating whether other opportunities that might have been beneficial to investors had been presented to the general partner or may otherwise be available. Comment is requested on whether the two year period should be longer, such as five years or shorter, such as one year.

Second, the proposed rules require the sponsor to explain its reasons for proposing the roll-up transaction generally, and, specifically, its reasons for choosing the particular structure of the transaction and the successor.[39] Under this disclosure item, information would be provided, for example, about why the transaction is structured as an exchange offer, merger or other transaction; why the successor is structured as a partnership, corporation or other entity; or why a holding company structure is used.[40] Disclosure of this type of information is intended to provide investors with a basis upon which to evaluate the sponsor's reasons for proposing and structuring the roll-up transaction. If the roll-up transaction is proposed by someone other than the general partner or its affiliates, the proposed rules require the general partner to state whether it recommends the transaction and its reasons therefor.[41] In this situation, the disclosure concerning the reasons for the structure of the transaction and the successor would be provided by the sponsor proposing the roll-up transaction.

Third, under the proposed rules, each alternative to the roll-up transaction would be described.[42] This disclosure would include a description of each alternative considered by the general partner and liquidation or continuation of the partnership even if not considered by the general partner. The general partner would be required to state why it rejected each alternative considered by it. If no consideration was given to liquidation or continuation of the partnership, the general partner would be required to explain why it did not consider those alternatives.

6. Fairness of the Roll-up Transaction

As previously discussed, a roll-up transaction often provides significant benefits to a general partner and/or sponsor. Since a general partner typically negotiates the transaction on behalf of itself as well as the limited partners, roll-ups give rise to serious conflicts between the interests of the general partner and those of investors. Investors in turn may find it difficult to evaluate whether the general partner has reasonably considered their interests. This difficulty may be more pronounced in multiple partnership roll-up transactions because the transaction may have different effects on investors in different partnerships or may be completed with many different combinations of partnerships.[43]

As more fully described below, the proposed rules address these concerns by requiring (i) a complete description of each potential conflict of interest presented by the roll-up transaction, (ii) a statement by the general partner as to whether or not it reasonably believes the roll-up transaction is fair or unfair to investors in each partnership, specifically addressing each possible combination of partnerships, and (iii) a discussion of the bases for the sponsor's beliefs, including a comparison of the roll-up transaction to alternatives.[44]

a. *Conflicts of interest.* With respect to conflicts of interest, the proposed rules require a description of the terms of the transaction that present a potential for a material conflict between the general partner's interests and the interests of investors.[45] Under this proposed rule, the disclosure would specifically describe the terms of the transaction that present the potential conflict and nature of the conflict.[46] Additionally, the disclosure document must include a description of the general partner's fiduciary duties and a statement as to whether the general partner reasonably believes it has satisfied such duties.

Second, the proposed rules require the general partner to state whether or not a representative has been retained to represent the investors in the negotiations of the roll-up transaction.[47] If no such representative has been engaged, a description of the reasons for not engaging such a representative and the risks to investors arising from such lack of representation would be called for. If a representative has been retained, the proposed rules require specific information about the representative's qualifications, the terms of its engagement, its experience in transactions similar to the roll-up transaction and its past dealings with the general partner, sponsor or their affiliates.[48] Finally, the proposed rules require the actions taken by the representative on behalf of investors in each of the partnerships to be described. Comment is requested on the adequacy of the proposed requirement to fully inform investors as to the potential

[37] Proposed Item 908 (b) and (c).

[38] Proposed Item 908(a). The disclosure required by this proposed Item would be comparable to that required by Item 3(a)(2) of Schedule 13E-3.

[39] Proposed Item 907.

[40] For example, if the sponsor considered the level of control granted to the general partner of a limited partnership under state law in deciding to structure the successor as a limited partnership, that should be noted in response to proposed Item 907.

[41] Proposed Item 907(a).

[42] Proposed Item 907 (b)(2) and (b)(3).

[43] Moreover, even though "fairness" opinions often are obtained from investment bankers in roll-up transactions, such opinions may not cover all possible combinations of partnerships. See section II.C.7. *infra* for a discussion of the disclosure required by proposed Item 910.

[44] Proposed Item 909.

[45] Proposed Item 908.

[46] For example, if the general partner will receive a cash payment as a result of the roll-up transaction that it would not receive without the roll-up transaction, the disclosure would identify the amount of the payment and indicate that the general partner has an interest in proposing the roll-up transaction because it will receive the cash payment only if the roll-up transaction is completed.

[47] Proposed Item 908(b)(1).

[48] The information required by proposed Item 908(b)(2) would be comparable to that required about third parties providing reports, opinions and appraisals under Item 9(b) (1)–(4) of Schedule 13E-3. However, the proposed Item requires specific additional information, such as: (i) A brief description of any other transaction similar to the roll-up transaction in which the representative has served in a similar capacity within the past five years; (ii) a statement as to whether or not investors were consulted in the selection of the representative; and (iii) a description of the terms of the engagement of the representative, including, but not limited to, who will be responsible for paying its fees and whether the fees are contingent upon the outcome of the roll-up transaction.

VOL 56 ISS 122 JE 25 1991 UMI

conflicts of interest. Commenters also should address whether there are additional or different requirements that should be included.

b. *Fairness.* The proposed rules require the general partner to state whether or not it reasonably believes the roll-up transaction is fair or unfair to investors in each partnership.[49] This requirement parallels the disclosure required by those engaging in going private transactions subject to Rule 13e–3. If the roll-up transaction may be completed with different combinations of partnerships, this statement would address the fairness or unfairness of the various possible combinations.

Second, the general partner would be required to discuss the weight given to specific terms of the roll-up transaction listed in the proposed rules as well as any other material terms of the transaction.[50] The specific terms required to be discussed would include: (i) The form and amount of consideration to be received by investors and the sponsor in the roll-up transaction, (ii) the methods used to determine such consideration, and (iii) the compensation to be paid to the sponsor in the future.

Third, the general partner would be required to discuss the weight given in its determination to each alternative considered by it.[51] This proposed rule also specifically requires a comparison of the consideration to be received by investors in the roll-up transaction to the consideration that would be received by investors in each partnership as a result of a liquidation of the partnership. In addition, the proposed rule requires the general partner to discuss the weight given to continuing the partnership in its present form.

The comparisons required by the proposed rules may involve significant uncertainties with respect to both the value assigned to the consideration to be received in the roll-up transaction and the value that might be obtained pursuant to the various alternatives. Accordingly, the proposed rules require a discussion of any material uncertainties involved in the values used in the comparisons.[52] For example, if the securities received in the roll-up transaction may trade at a price substantially below the value assigned in the transaction, the disclosure would note this and indicate what value the general partner has assigned to the securities for purposes of the comparison.[53] Similarly, if the general partner based the possible liquidation value upon values assigned to the assets of the partnerships by appraisers, and the general partner believes that in a liquidation the assets would sell for substantially less than the appraised values, this should be disclosed.

The Commission is proposing the requirement to compare the consideration to be received in the roll-up transaction to the consideration that might be received pursuant to alternatives (particularly liquidation) in response to specific concerns raised by commenters. The Commission specifically requests comment as to whether such comparisons would provide helpful disclosure and whether any additional standards should govern such comparisons.[54] Commenters also should address whether a comparison of the exchange value, liquidation value and trading price may prove misleading or confusing. Comment also is requested on alternative valuation disclosure that should be required.

Fourth, under the proposed rules, the general partner would be required to state whether its beliefs as to the fairness of the roll-up transaction are based, in whole or in part, on any report, opinion or appraisal obtained from a third party.[55] If the general partner has relied on any of those documents, the proposed rules would call for a description of any material uncertainties known to the general partner which has affected or is reasonably likely to affect the conclusions in such reports, opinions or appraisals. For example, in a multiple partnership roll-up transaction, a "fairness" opinion obtained from an investment banker may not address the fairness of all possible combinations of partnerships or the fairness to investors in each partnership. If a general partner's beliefs as to fairness are based upon such an opinion, the disclosure under the proposed rules would specifically note those material items not addressed in the fairness opinion. Similarly, if appraisals of assets are relied on and the general partner is aware that the bases for the appraisals have changed materially subsequent to the date of the appraisals, the general partner would be required to describe such changes and their possible effects on the conclusions of the appraisers.[56]

7. Reports, Opinions and Appraisals

Under the current rules, information concerning reports, opinions and appraisals obtained from outside parties that are materially related to the roll-up transaction is not specifically required to be included in the disclosure document (except in certain "going private transactions")[57] unless the report, opinion or appraisal otherwise is referred to in the disclosure document.[58] If the disclosure document refers to such a report, opinion or appraisal, then specific information must be provided.[59]

In light of the concerns raised about a general partner's conflicts of interest and the valuation methods used in roll-up transactions, the proposed rules require the disclosure document for a roll-up transaction to identify each report, opinion or appraisal obtained from an outside party that is materially related to the transaction.[60] Such reports, opinions and appraisals would include those relied upon by the sponsor or others in the roll-up transaction, as well as any other material reports, opinions or appraisals not relied upon, such as reports prepared by investment bankers concerning alternatives to the roll-up transaction that were not pursued by the sponsor.

The proposed rules require specific information about the reports, opinions or appraisals. Such information generally would include that currently required for all reports, opinions or appraisals referenced in a disclosure document,[61] as well as specific additional information.

[49] Proposed Item 909 (a) and (b)(2).
[50] Instructions 3 and 4 to Proposed Item 909.
[51] Proposed Item 909(b)(1).
[52] Proposed Item 909(b).

[53] If the sponsor believes that the securities will trade at a substantial discount, the sponsor should consider whether it reasonably should use the value assigned to the securities in the roll-up transaction for purposes of comparing such value to the value that might be obtained from alternatives, or instead should use the expected discounted value of the securities for the comparison. If in that situation the sponsor does not use a discounted value, the effect of the likely discount on the comparison should be disclosed.

[54] As proposed, Item 909 does not mandate specific valuation methods. For example, liquidation value may be determined in any manner selected by the sponsor provided the method and any material uncertainties concerning the method are clearly explained.

[55] Proposed Item 909(e). All reports, opinion or appraisals obtained in connection with the roll-up transaction would be described in accordance with the disclosure requirements of proposed Item 910. See section II.C.7. *infra* for a discussion of the disclosures required by proposed Item 910.

[56] For example, in a real estate transaction, if market conditions in a relevant real estate market have changed since the date of the real estate appraisals in a manner that may affect the value of a property, proposed Item 909(e) would require disclosure of such changes and their possible effect on the appraised value of the relevant properties.

[57] See Item 9 of Schedule 13E–3.

[58] See Item 4(b) of Form S–4.

[59] *Id.*

[60] Proposed Item 910(a).

[61] Item 4(b) of Form S–4 requires registrants to furnish the information required by Item 9(b) (1) through (6) of Schedule 13E–3 with respect to all reports, opinions or appraisals referred to in the prospectus. Such information generally consists of: (i) The identity and qualifications of the outside

Continued

For fairness opinions, specific information would be required[62] as to whether or not the opinion addresses: (i) The fairness to investors in each partnership, and (ii) the fairness of each possible combination of partnerships. If all combinations of partnerships are not addressed in the fairness opinion, the proposed rules would require a list of all combinations that are not covered by the opinion. In addition, in that situation, the disclosure document would identify the person that determined which combinations would be considered and include a description of that person's reasons for the selection of combinations. When all combinations of partnerships are not covered by the fairness opinion, the proposed rules require a clear statement in the disclosure document to alert investors that if the roll-up transaction is completed with a combination of partnerships not covered by the opinion, no fairness opinion will apply to the roll-up transaction.

In order to assist investors in considering any fairness opinion obtained in the roll-up transaction, the proposed rules also require the sponsor or the general partner to describe any contacts with investment banks or financial advisers who declined to provide an opinion concerning the fairness of the roll-up transaction.[63] Such disclosure would include the identity of the firm, the actions taken by it, its conclusions and its reasons for not providing an opinion. Comment is requested on whether an exception to this disclosure requirement should be provided for such matters as preliminary contacts in connection with retaining a firm to provide a fairness opinion and, if so, the standards that would govern such an exception.

For appraisals of assets, the proposed rules[64] would require the following specific information:

- A description of the valuation approaches considered and used by the appraiser, and the reasons the particular valuation approaches were used;
- A tabular presentation of the value of each separately appraised asset under each valuation approach considered by the appraiser, identifying the appraised value assigned by the appraiser;
- An identification of all material assumptions used by the appraiser. If different assumptions were used for different assets, the differences would be identified and the reasons therefor described;
- The date as of which the appraisals were prepared, and a statement as to whether or not the appraisals will be updated in the event that there are material changes in the conditions upon which the appraisals were based or if the roll-up transaction is not completed a specified period of time; and
- If the appraisals will not be updated, a description of any events that have occurred or conditions that have changed that the sponsor reasonably believes may have caused a material change in the value of any of the assets since the date of the appraisals.

These proposed specific information requirements for appraisals are intended to provide investors all relevant information for purposes of evaluating the methods used and the conclusions reached by the appraisers. The Commission requests comment as to whether these or other specific information requirements would elicit useful information for investors.

Under the proposed rules, "summaries" of appraisals prepared by the appraisers would not be included in the disclosure document provided to investors.[65] Instead, the information required by the proposed rules is intended to include all relevant information ordinarily included in such summaries. Both the "summaries" and the complete appraisals would be filed as an exhibit with the Commission.

Finally, for all reports, opinions or appraisals described under the proposed rules, the general partner would be required to state in the disclosure document that upon request the general partner will promptly transmit the report, opinion or appraisal to a limited partner or his representative.[66] As proposed, these documents would be made available without charge to the investors. All such reports, opinions and appraisals used in a roll-up transaction registered under the Securities Act would be filed with the Commission as an exhibit.

8. Federal Income Tax Consequences

Roll-up transactions usually involve important federal income tax consequences for investors. The tax consequences arise both in connection with the roll-up transaction itself and in an ongoing investment in the successor. Moreover, in multiple partnership roll-up transactions, the tax consequences may be different for investors in the different partnerships. However, disclosure documents for roll-up transactions often include long, complex discussions of the potential tax consequences that may not be understandable for investors. Such discussions often consist of a repetition of the entire legal opinion provided by tax counsel.

In order to provide more useful disclosure for investors, the proposed rules would require a clear and concise summary description of each material federal income tax consequence of (i) the roll-up transaction for investors in each partnership and (ii) an investment in the successor.[67] If investors in any of the partnerships are expected to have materially different tax consequences, the differences would be noted briefly, and the investor would be referred to the individual partnership supplement for a complete description of the differences. To the extent that investors in one or more of the partnerships are expected to incur federal income tax liabilities as a result of the roll-up transaction, the amount of the expected liabilities for investors in each partnership would be set forth in a table.

Inclusion of the "long-form" tax opinion in the disclosure document would not be responsive to these disclosure requirements. Under the proposed approach, the roll-up document would include only a clear, concise and understandable description of the material federal income tax consequences. The "long-form" tax opinion would be filed as an exhibit to the registration statement and made available to investors upon request or included as an appendix to the prospectus. Comment is requested on whether there are alternative approaches that would provide investors with understandable tax disclosure.

9. Summary Information Concerning Partnership Properties

Partnerships involved in roll-up transactions ordinarily own one or more

party; (ii) the method of selection of the outside party; (iii) past or proposed relationships between the outside party and the sponsor and its affiliates; (iv) if the opinion relates to the fairness of the consideration, whether the issuer or affiliate determined the amount of the consideration, or whether the outside party recommended such amount; and (v) a summary of the report, opinion or appraisal including the procedures followed, the findings and recommendations, instructions received from the issuer or affiliate and any limitations imposed by the issuer or affiliate on the scope of the investigation.

[62] Proposed Item 910(b)(1).
[63] Proposed Item 910(a).
[64] Proposed Item 915(b)(2).

[65] See Instruction 3 to proposed Item 910. In roll-up transactions, "summaries" of the appraisals, which are prepared by the appraisers, often are included as an appendix to the disclosure document provided to investors. However, the summaries may not provide the sort of information about the appraisals (in a manner understandable for investors) that is helpful to an evaluation of the appraisals. The elimination of the "summaries" of the appraisals from the disclosure documents may reduce significantly the length of such documents.

[66] Proposed Item 910(d).

[67] Proposed Item 916. As stated in the Interpretive Release, if there are material federal income tax consequences with respect to which counsel is unable to opine, each such consequence must be prominently disclosed.

specific properties that comprise the material business of such partnerships. Under the current rules, disclosure documents for roll-up transactions are required to include specific detailed information concerning the properties owned by each of the partnerships.[69] In order to provide a more readable presentation of property information in roll-up transactions, the proposed rules require specific summary information concerning the properties and other assets owned by each partnership.[69] This information would be in addition to that otherwise required to be included or incorporated by reference in the registration statement.

The proposed item includes specific information requirements concerning properties owned by partnerships engaged in real estate or oil and gas operations. For example, for real estate partnerships, summary descriptions of each partnership's properties would include occupancy, lease and mortgage financing information. The summary information required for oil and gas partnerships would include such matters as a description of each property and the nature of the partnership's interest, productive wells expressed separately for oil and gas, and production history of the properties, including average sales prices and average production costs. For partnerships engaged in other businesses, information comparable to that proposed to be required for real estate or oil and gas partnerships would be required. Comment is requested concerning whether the summary information proposed to be required would be useful to investors in evaluating the properties owned by the partnerships subject to a roll-up. Commenters favoring other or additional summary information requirements should specifically describe the information that should be included.

10. Financial Information

Investors considering a roll-up transaction may have little, if any, information about other partnerships participating in the transaction. The proposed rules require that specified financial information, including financial statements of the successor, summary financial information for each partnership participating in the transaction, and pro forma financial information be provided to investors.[70]

Under existing requirements, the disclosure document must contain audited financial statements prepared in accordance with Regulation S-X.[71] The proposals do not change this requirement.

In addition to the usual selected financial data [72] for each partnership participating in the transaction, the proposed rule specifies other financial information that must be provided for each partnership. This information includes, among other items, net increase or decrease in cash and cash equivalents, net cash provided by operating activities, cash distributions; and per unit data for net income, book value, appraised value and distributions. Comment is requested on the specific disclosure items and whether there are additional items which should be required to be disclosed.

In addition to historical financial information, the rule sets forth two new pro forma financial information requirements. First, information would be provided under at least two different sets of assumptions: (i) Participation in the roll-up by all partnerships and (ii) participation in the roll-up by those partnerships that on a combined basis have the lowest combined net cash provided by operating activities [73] (called "worst case participation"). Second, a pro forma statement of cash flows would be required. After a roll-up, the value of the successor's securities is based on the trading market for securities of entities operating in the same industry. This value generally is based on a multiple of operating cash flow and a factor for the market's expectations of the likelihood of the continuation of that cash flow. Comment is requested on whether the proposed pro forma financial statements would provide useful information to investors in evaluating roll-ups.

11. Other Information

In addition to the proposed disclosure requirements discussed above, the proposed rules also would require more detailed disclosure regarding the expenses of the roll-up, including identifying the persons responsible for paying the expenses.[74] If the expenses are to be allocated among the partnerships subject to the transaction, additional disclosure about the allocation method will be required.

Disclosure regarding the sources and dollar amount of funds to finance the transaction will be required.[75] If the partnerships subject to the transaction will finance the roll-up, either with available cash, asset sales or mortgaging of assets, detailed disclosure will be required to fully inform investors of this fact.

III. Proposed Establishment of a Minimum Roll-Up Solicitation or Tender Offer Period

Questions have been raised as to whether the Commission's rules operate to deny limited partners sufficient time to fully consider the information provided in roll-up disclosure documents. A bill has been introduced in the U.S. House of Representatives that would fix a 60-day minimum period for roll-up related proxy and tender offer solicitations.[76] Congressional sponsors and other advocates of this initiative contend that general partners or their affiliates often file non-public preliminary proxy materials with the Commission before announcing to investors that a roll-up is contemplated. Investors complain that, once they do receive the frequently voluminous roll-up documents following staff review,[77] they have little or no opportunity to read and arrive at an understanding of the complex disclosure contained therein.[78]

In light of the importance of Congressional and investor concerns, the Commission is proposing to require that roll-up disclosure documents be distributed to investors at least 60 calendar days in advance of a meeting, or the earliest date of partnership action by consent.[79] If, under applicable state law, the maximum period permitted for giving notice is less than 60 calendar days, the state law maximum notice period would apply. A 60-calendar day offering period also is proposed with respect to a roll-up transaction structured as an exchange offer and subject to the tender offer regulatory provisions.

Whether or not investors have sufficient notice of an impending roll-up currently is a function of overlapping federal and state regulation of the solicitation process, with timing requirements dictated in the first instance by the states and, in some cases, by the markets. Roll-up proxy material generally is mailed to securityholders at least 20 days before the vote in accordance with the partnership agreement and any applicable state law governing notice of the meeting to which the proxy material relates.[80] Minimum time periods thus established vary, depending on the type of meeting called and the manner in which the proxy materials are transmitted.

Federal securities law also affects the length of the roll-up solicitation period. Under some circumstances, a combined proxy statement and prospectus must be mailed within a fixed number of days before the securityholders' meeting.[81] If the roll-up is a going private transaction under Rule 13e-3 under the Exchange Act, the disclosure documents must be mailed at least 20 calendar days before the vote is taken.[82] Comment is sought on whether a 60-day period is necessary or appropriate to enable limited partners to evaluate fully a roll-up transaction disclosure document in connection with both contested and uncontested roll-up solicitations. If commenters believe this period should be longer, such as 90 days, or shorter, such as 45 days, a clear and concise explanation should be provided. Comment also is requested on whether the minimum period should apply to the proxy statements of other persons and whether the minimum period should apply to additional solicitation materials.

IV. Cost-Benefit Analysis

While some additional costs to registrants may result from the proposals, such costs may be outweighed by the benefits resulting from the amended disclosure requirements which are intended to enhance the ability of securityholders to analyze limited partnership roll-up transactions. The proposals have been formulated against the template of evolving state partnership law and would not subject additional persons to filing requirements. To evaluate the benefits and costs associated with the proposed amendments of Forms S-4 and F-4, Rule 14a-6, Rule 14c-2 and Rule 14e-1, and proposed new subpart 900 of Regulation S-K, the Commission requests commenters to provide views and data as to the costs and benefits associated with amending the disclosure requirements.

V. Summary of the Initial Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis ("IRFA") in accordance with 5 U.S.C. 603 regarding proposed subpart 900 of Regulation S-K and the amendments to Form S-4 and F-4 and Rules 14a-6, 14c-2 and 14e-1. The IRFA indicates that the proposed amendments and rules could impose some additional costs on small registrants, but would affect small registrants in the same manner as other registrants. The proposed amendments and rules, however, are designed to minimize these costs to the greatest extent possible while enhancing the ability of securityholders to analyze limited partnership roll-up transactions. A copy of the IRFA may be obtained from Michael L. Hermsen, Special Counsel, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Mail Stop 7-6, Washington, D.C. 20549, (202) 272-2573.

VI. General Request for Comments

Any interested persons wishing to submit written comments on the proposed rules that are the subject of this release, to suggest additional changes, or to submit comments on other matters that might have an impact on the proposals contained herein, are requested to do so. Commenters are requested to address both whether the proposals will enhance the quality and readability of roll-up disclosure documents in providing protection to investors and whether the proposals are practicable for registrants. The Commission further requests comment on any competitive burdens that might result from adoption of the proposed rules. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 19(a) of the Securities Act and section 23(a) of the Exchange Act.[83]

VII. Statutory Bases

The amendments to Regulation S-K and Forms S-4 and F-4 are being proposed pursuant to sections 6, 7, 8, 10 and 19 of the Securities Act of 1933, as amended (15 U.S.C. 77f, 77g, 77h, 77j, 77s).

The amendments to Rule 14a-6, Rule 14c-2 and Rule 14e-1 are being proposed pursuant to sections 14(a), 14(c), 14(e) and 23(a) of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78n(a), 78n(c), 78n(e), 78w(a)).

List of Subjects in 17 CFR Parts 229, 230 and 240

Reporting and recordkeeping requirements, Securities.

VIII. Text of Proposed Amendments

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER THE SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S-K.

1. The authority citation for part 229 continues to read, in part, as follows:

Authority: 15 U.S.C. 77e, 77f, 77g, 77h, 77j, 77k, 77s, 77aa(25), 77aa(26), 77ddd, 77eee, 77ggg, 77hhh, 77jjj, 77nnn, 77sss, 78l, 78m, 78n, 78o, 78w, 80a-8, 80a-30, 80a-37, 80b-11, unless otherwise noted.

2. By amending part 229 to add a new subpart 229.900 to read as follows:

Subpart 229.900—Roll-up Transactions

Sec.

229.901 (Item 901) Definitions.
229.902 (Item 902) Individual partnership supplements.
229.903 (Item 903) Summary.
229.904 (Item 904) Effects of the roll-up transaction.

Subpart 229.900—Roll-up Transactions

Notes: A. This subpart imposes disclosure requirements in addition to the disclosure requirements otherwise applicable to any filing with the Commission in connection with the transaction. To the extent that the disclosure requirements of this subpart are inconsistent with the disclosure requirements of any such forms or schedules, the requirements of this subpart are controlling.

B. If a material change occurs in the information required by this subpart prior to consummation of the transaction, the registrant shall file with the Commission in accordance with applicable rules and disseminate promptly disclosure of such change in a manner reasonably calculated to inform security holders of such change and to permit them to consider the information.

§ 229.901 (Item 901) Definitions.

For the purposes of this subpart 229.900:

(a) *General partner* means the person responsible under state law for managing or directing the management of the business and affairs of a partnership that is the subject of a roll-up transaction including, but not limited to, a general partner, board of directors, board of trustees, or other person having a fiduciary duty to such partnership.

(b) *Partnership* means any:

(1) Partnership;

(2) Trust;

(3) Real estate investment trust as defined in I.R.C. § 856; or

(4) Other similar entity that is not an association taxed as a corporation under subchapter C of the I.R.C.

(c) *Roll-up transaction* means any transaction or series of transactions that directly or indirectly involves the combination or reorganization of one or more partnerships into a new entity and either:

(1) The offer or sale of securities by the new or acquiring entity to one or more limited partners of the partnerships to be combined or reorganized; or

(2) The acquisition of the new or acquiring entity's securities by the partnerships being combined or reorganized.

(d) *Sponsor* means the person proposing the roll-up transaction.

(e) *Successor* means the surviving entity after completion of the roll-up transaction.

§ 229.902 (Item 902) Individual partnership supplements.

Notes: (1) If two or more partnerships are proposed to be included in the roll-up transaction, provide the information specified in this Item (§ 229.902) in a separate supplement to the disclosure document for each partnership. Such separate supplement shall be filed as part of the registration statement. Further, the separate supplement shall be attached to and delivered with the prospectus.

(2) The purpose of the separate supplement is to highlight in one place the important differences in the effects of the roll-up transaction for investors in the particular partnership. The supplement required by this Item (§ 229.902) should not include a summary of all important information about the roll-up transaction, which must be included in the principal disclosure document in response to Item 903 of this subpart (§ 229.903). In addition, notwithstanding the requirements of this Item (§ 229.902), the description of the effects of the roll-up transaction included in the principal disclosure document pursuant to Item 904 of this subpart (§ 229.904) must identify clearly any effects that may be different for investors in any of the partnerships proposed to be included in the roll-up transaction.

(a) The separate supplement required by this Item (§ 229.902), which shall be filed as part of the registration or proxy statement, shall include the following:

(1) A description of each material effect of the roll-up transaction, including federal income tax consequences, that may affect investors in the partnership differently from investors in other partnerships, with appropriate cross references to the discussion of effects of the roll-up transaction required in the principal disclosure document pursuant Items 904 and 916 of this subpart (§ 229.904 and § 229.916).

(2) A statement concerning whether the general partner reasonably believes that the roll-up transaction is fair or unfair to investors in the partnership, with appropriate cross references to the discussion of the fairness of the roll-up transaction required in the principal disclosure document pursuant to Item 909 of this subpart (§ 229.909). If there are material differences between the fairness analysis for the partnership and for the other partnerships, such differences should be described in the supplement.

(3) A narrative description of the method of calculating the value of the partnership and allocating interests in the successor to the partnership, and a table showing such calculation and allocation. Such table shall include:

(i) The appraised value of each separately appraised asset held by the partnership, or, if no appraisals were obtained, the value assigned to each material asset for purposes of the valuation of the partnership;

(ii) Any liabilities to which each of such assets is subject;

(iii) Cash and cash equivalent assets held by the partnership;

(iv) Other assets held by the partnership;

(v) Other liabilities of the partnership;

(vi) The value assigned to the partnership;

(vii) The value assigned to the partnership per interest held by holders of interests in the partnership (on an equivalent interest basis, such as per $1,000 original investment);

(viii) The aggregate number of interests in the successor to be allocated to the partnership and the percentage of the total interests of the successor;

(ix) The number of interests in the successor to be allocated to investors in the partnership for each interest held by such investors (on an equivalent interest basis, such as per $1,000 original investment); and

(x) The value assigned to the general partner's interest in the partnership, and the number of interests in the successor or other consideration to be allocated in the roll-up transaction to the general partner for such general partnership interest.

(4) A description of any components of the calculation of the value of the partnership for purposes of allocating interests in the roll-up transaction that may be more or less favorable for investors in the partnership than for investors in other partnerships.

(5) The amounts of compensation paid to the general partner and its affiliates by the partnership for the last three fiscal years and the amounts that would have been paid if the compensation structure to be in effect after the roll-up transaction had been in effect during such period.

(6)(i) The "worst case" participation pro forma financial statements included in the principal disclosure document in response to Item 915(c)(ii) of this subpart (§ 229.915(c)(ii)), further adjusted to include the partnership, unless the partnership is included in such financial statements. If the partnership is so included, briefly describe the contents of such statements and provide a cross reference to the appropriate section in the disclosure document.

(ii) A narrative discussion of the material items in such pro forma financial statements, addressing specifically any material changes to the pro forma financial statements resulting from the addition of the partnership to the combination of partnerships covered thereby.

(7) An appropriate cross reference to selected financial information concerning the partnership included in the principal disclosure document in response to Item 915 of this subpart (§ 229.915).

§ 229.903 (Item 903) Summary.

(a) Provide in the forepart of the disclosure document a clear, concise and comprehensible summary of the roll-up transaction.

(b) The summary required by paragraph (a) of this Item (§ 229.903) shall include a summary description of each of the following items, as well as any other material terms or consequences of the roll-up transaction necessary to an understanding of such transaction:

(1) Each material risk and effect on investors, including, but not limited to:

(i) Changes in the business plan, voting rights, form of ownership interest or management compensation;

(ii) The general partner's conflicts of interest in connection with the roll-up transaction and in connection with the successor's future operations; and

(iii) The likelihood that securities received by investors in the roll-up transaction will trade at prices substantially below the value assigned to such securities in the roll-up transaction;

(2) The material terms of the roll-up transaction, including the valuation method used to allocate securities in the successor to investors in the partnerships;

(3) Whether the general partner reasonably believes that the roll-up transaction is fair or unfair to investors in each partnership, including a brief discussion of the bases for such belief;

(4) Any opinion from an outside party concerning the fairness of the roll-up transaction, including whether the opinion addresses the fairness of all possible combinations of partnerships, and whether any outside party declined to provide an opinion concerning the fairness of the roll-up transaction;

(5) Any material effects of the roll-up transaction that may be different for investors in any of the partnerships;

(6) Alternatives to the roll-up transaction considered by the general partner, as well as the alternatives to liquidate or continue the partnerships whether or not considered by the general partner;

(7) Rights of investors to exercise dissenters' or appraisal rights or similar rights and to obtain a list of investors in the partnership in which the investor holds an interest; and

(8) If any affiliates of the general partner or the sponsor may participate in the business of the successor or receive compensation from the successor, an organizational chart showing the relationships between the general partner, the sponsor and their affiliates.

Instruction to Item 903. The description of the material risks of the roll-up transaction required by paragraph (b)(1) of this Item (§ 229.903) must be presented first in the summary.

§ 229.904 (Item 904) Effects of the roll-up transaction.

(a) *General requirements*—(1) *Brief description of effects.* Provide a brief description of each material effect of the roll-up transaction on investors in each partnership, including, but not limited to, the potential risks, adverse effects and benefits of the roll-up transaction for investors and for the general partner. State whether any of such effects may be different for investors in any partnership and, if so, identify the partnership(s) for which the effect may be different and describe such differences. Each effect shall be quantified to the extent practicable. Such description shall address all material effects of the roll-up transaction including, but not limited to, each of the effects described in response to paragraphs (b), (c), (d), (e) and (f) of this Item (§ 229.904), and shall be included in the forepart of the disclosure document immediately following the summary required pursuant to Item 903 of the subpart (§ 229.903).

(2) *Complete description of effects.* Provide a complete description of each material effect of the roll-up transaction under appropriate captions in the disclosure document. The effects required to be described include, but are not limited to, each of the items set forth in paragraphs (b), (c), (d), (e) and (f) of this Item (§ 229.904).

(b) *Changes in voting and other limited partner rights; changes in duties owed by the general partner.* (1) Describe each material difference in the voting and other rights of investors in each partnership subject to the transaction and the voting and other rights of investors in the successor under the partnerships' and the successor's governing instruments and under applicable law.

(2) Describe each material difference in the duties owed by the general partner in each partnership and the duties owed by the general partner of the successor to investors in the successor under the partnerships' and the successors' governing instruments and under applicable law.

(c) *Changes in general partner compensation and distribution arrangements.* (1)(i) Describe each item of compensation (including reimbursement of expenses) payable by the successor after the roll-up transaction to the general partner and its affiliates or to any affiliate of the successor. Compare such compensation to the compensation currently payable to the general partner and its affiliates by each partnership and describe the effects of the change(s) in compensation arrangements.

(ii) Describe each instance in which cash or other distributions may be made by the successor to the general partner and its affiliates or to any affiliate of the successor. Compare such distributions to the distributions currently paid or payable to the general partner and its affiliates by each partnership and describe the effects of the change(s) in distribution arrangements. If distributions similar to those currently paid or payable by any partnership to the general partner or its affiliates will not be made by the successor, state whether or not other compensation arrangements with the successor described in response to paragraph (c)(1)(i) of this Item (§ 229.904) (e.g., incentive fees payable upon sale of a property) will, in effect, replace such distributions.

(2) Describe the material conflicts that may arise between the interests of the sponsor or general partner and the interests of investors in the successor as a result of the compensation and distribution arrangements described in response to paragraph (c)(1) of this Item (§ 229.904) and describe any steps that will be taken to resolve any such conflicts.

(3) Provide a table demonstrating the changes in compensation and distributions setting forth among other things:

(i) The actual amounts of compensation and distributions paid by the partnerships on a combined basis to the general partner and its affiliates for the partnerships' last three fiscal years

and most recently ended interim periods; and

(ii) The amounts of compensation and distributions that would have been paid if the compensation and distributions structure to be in effect after the roll-up transaction had been in effect during such period.

(4) If any proposed change(s) in the business or operations of the successor after the roll-up transaction would change materially the compensation and distributions that would have been paid by the successor from that shown in the table in response to paragraph (c)(3)(ii) of this Item (§ 229.904) (e.g., if properties will be sold after the roll-up transaction and no properties were sold during the period covered by the table), describe such changes and the effects thereof on the compensation and distributions to be paid by the successor.

(d) *Changes in limited partner cash distribution policies.* Describe any provisions in the governing instruments of the successor and any policies of the general partner of the successor relating to distributions to investors of cash from operations or from the sale, financing or refinancing of assets. Compare such provisions and policies to those of each of the partnerships and describe the effects of any change(s) in such provisions or policies.

(e) *Changes in investment policies and business plan.* (1) Describe each material investment policy of the successor. Compare such investment policies to the investment policies of each of the partnerships and describe the effects of any change(s) in such policies.

(2) Describe any plans of the general partner, sponsor or of any person who will be an affiliate of the successor with respect to:

(i) A sale of any material assets of the partnerships;

(ii) A purchase of any material assets;

(iii) Borrowings; and

(iv) Any extraordinary transaction involving the assets and/or liabilities of the partnerships or the successor.

(3)(i) State whether or not specific assets have been identified for sale, financing, refinancing or purchase following the roll-up transaction.

(ii) If specific assets have been so identified, describe the assets and the proposed transaction.

(f) *Trading market discount of securities.* (1) Describe the likelihood that securities of the successor received by investors in the roll-up transaction will trade in the securities markets at a price substantially below the value assigned to such securities in the roll-up transaction and the value of the assets of the successor.

(2) Describe the effects on investors of the trading market discount described in response to paragraph (f)(1) of this Item (§ 229.904), including the effect of such discount in relation to any change in the successor's investment policies to permit the reinvestment of proceeds from the sale of assets rather than distributing such proceeds to investors.

Instructions to Item 904. (1) The requirement to quantify the effects of the roll-up transaction shall include, but not be limited to:

(i) If cost savings resulting from combined administration of the partnerships is identified as a potential benefit of the roll-up transaction, the amount of cost savings and a comparison of such amount to the costs of the roll-up transaction; and

(ii) If there may be a material conflict of interest of the sponsor or general partner arising from its receipt of significant payments or other consideration as a result of the roll-up transaction, the amount of such payments and other consideration to be obtained in the roll-up transaction and a comparison of such amounts to the amounts to which the sponsor or general partner would be entitled without the roll-up transaction.

(2) To the extent practicable, the effects described in response to this Item (§ 229.904) should be illustrated in tables or other readily understandable forms. For example, the benefits to the general partner may be illustrated in a table that compares on a before and after basis, the fees and compensation payable to the sponsor or the general partner, the rights of investors to remove the sponsor or the general partner and the duties owed to investors by the sponsor or the general partner.

§ 229.906 (Item 905) Allocation of roll-up consideration.

(a) Describe in detail the method used to allocate interests in the successor to investors in the partnerships and the reasons why such method was used.

(b) Provide a table showing the calculation of the valuation of each partnership and the allocation of interests in the successor to investors. Such table shall include for each partnership:

(1) The value assigned to each significant type of asset of the partnership (e.g., real estate net of mortgage debt, cash and cash equivalents, and net other assets) and the total value assigned to the partnership;

(2) The total value assigned to all partnerships;

(3) The aggregate amount of interests in the successor to be allocated to each partnership and the percentage of the total amount of all such interests represented thereby; and

(4) The amount of interests of the successor to be issued to investors per interest held in each partnership (on an equivalent interest basis, such as per $1,000 invested).

(c) If interests in the successor will be allocated to the general partner in exchange for its general partner interest or otherwise or if the general partner will receive other consideration in connection with the roll-up transaction, describe in detail the method used to allocate interests in the successor to the general partner or to determine the amount of consideration payable to the general partner and the reasons such method(s) was used.

§ 229.908 (Item 906) Background of the roll-up transaction.

(a) Provide a summary of the background of the transaction. The summary should address those matters material to investors including a description of any contacts or negotiations that have occurred within the past two years between the general partner and any other person concerning the acquisition of interests in the partnerships (including, but not limited to, interests owned by the general partner or sponsor), a combination of the partnerships or any other extraordinary transaction involving the partnerships.

(b) Provide a brief description of the background of each partnership, including, but not limited to, the following:

(1) The extent to which net proceeds from the original offering of interests have been invested, including the amount not yet invested; and

(2) The partnership's investment objectives, and whether the partnership has achieved its investment objectives.

(c) Discuss whether the general partner (including any affiliated person materially dependent on the general partner's compensation arrangement with the partnership) or any partnership during the past 12 months has experienced or is likely to experience any material adverse financial developments. If so, describe such developments and the effect of the transaction on such matters.

§ 229.907 (Item 907) Reasons for and alternatives to the roll-up transaction.

(a)(1) Describe the reasons for proposing the roll-up transaction and whether the general partner initiated the roll-up transaction.

(2) State whether the general partner recommends the roll-up transaction, and briefly describe the reasons for such recommendation, if different from the reasons discussed in Item 909 of this subpart (§ 229.909).

(3) Describe the reasons for the structure of the transaction and for undertaking the transaction at this time.

(b)(1) Describe each alternative to the roll-up transaction considered by the sponsor or general partner and the reasons for proposing the roll-up transaction rather than any of the alternatives considered.

(2) If not described in response to paragraph (b)(1) of this Item (§ 229.907), describe the following potential alternatives to the roll-up transaction:

(i) Liquidation of the partnerships; and

(ii) Continuation of the partnerships.

(3) With respect to liquidation of the partnerships, describe the procedures required to accomplish liquidation, the effects of liquidation and the material risks and benefits that likely would arise in connection with liquidation.

(4) If the general partner did not consider liquidation or continuation of the partnerships as possible alternatives to the roll-up transaction, provide a statement to that effect and describe the reasons such alternatives were not considered.

§ 229.909 (Item 909) Conflicts of interests.

(a)(1) Describe the general partner's fiduciary duties to each partnership subject to the roll-up transaction and each actual or potential material conflict of interest between the general partner and the investors relating to the roll-up transaction.

(2) State whether the general partner reasonably believes it has satisfied such fiduciary duties.

(b)(1) State whether the general partner has retained any person to represent the investors in negotiating the terms of the roll-up transaction. If no such representative has been retained, describe the reasons therefor and any conflicts of interest and risks arising from the absence of separate representation.

(2) If a person has been retained to represent the investors, provide the following information:

(i) The name of the representative;

(ii) A brief description of the representative's qualifications, including a brief description of any other transaction similar to the roll-up transaction in which the representative has served in a similar capacity within the past five years;

(iii) A description of the method used to select the representative, including a statement as to whether or not any investors were consulted in the selection of the representative and, if so, the names of such investors;

(iv) A description of the scope and terms of the engagement of the representative, including, but not limited to, who will be responsible for paying the representative's fees and whether the fees are contingent upon the outcome of the roll-up transaction;

(v) A description of any material relationship that has existed within the past two years or is mutually understood to be contemplated between the representative and the general partner, sponsor, any affiliate of the general partner or sponsor, and any other person having a material interest in the roll-up transaction. If the relationship is with the general partner, sponsor, or any of their affiliates, describe any compensation received or to be received as a result of such relationship;

(vi) A description of actions taken by the representative on behalf of investors; and

(vii) A description of the fiduciary duties or other legal obligations of the representative to investors in each of the partnerships.

§ 229.909 (Item 909) Fairness of the transaction.

(a) State whether the general partner reasonably believes that the roll-up transaction is fair or unfair to investors.

(b) Provide a detailed discussion of the reasons for the general partner's belief disclosed in response to paragraph (a) of this Item (§ 229.909), and, to the extent practicable, the weight assigned to each such reason. This discussion must:

(1) Compare the roll-up transaction to each of the alternatives identified in response to Item 907 of this subpart (§ 229.907), including liquidation and continuation of the partnership; and

(2) Highlight any material differences among the partnerships (e.g., different types of assets or different investment objectives) relating to the fairness of the transaction.

(c) The belief stated in response to paragraph (a) of this Item (§ 229.909) must address the fairness of the roll-up transaction to investors in each of the partnerships and as a whole. If the roll-up transaction may be completed with a combination of partnerships consisting of less than all partnerships, the belief stated in response to paragraph (a) of this Item (§ 229.909) must address each possible combination of partnerships.

(d) Describe any factors known to the general partner that may affect materially the value of the consideration to be received by investors in the roll-up transaction, the values assigned to the partnerships for purposes of the comparisons to alternatives required by paragraph (b) of this Item (§ 229.909) and the fairness of the transaction to investors.

(e) State whether the general partner's statements in response to paragraphs (a) and (b) of this Item (§ 229.909) are based, in whole or in part, on any report, opinion or appraisal described in response to Item 910 of this Subpart (§ 229.910). If so, describe any material uncertainties known to the general partner that relate to the conclusions in any such report, opinion or appraisal including, but not limited to, developments or trends that have affected or are reasonably likely to affect materially such conclusions.

Instructions to Item 909. (1) Conclusory statements will not be considered sufficient disclosure in response to this Item (§ 229.909).

(2) Consideration should be given to presenting comparative numerical data as to the value of the consideration being received by investors, liquidation value and other values in a tabular format.

(3) The reasons which are important in determining the fairness of a transaction to security holders and the weight, if any, which should be given to them in a particular context will vary. Such reasons will include, among others, whether the consideration offered to investors constitutes fair value in relation to:

(i) current market prices, if any;

(ii) historical market prices, if any;

(iii) going concern value;

(iv) liquidation value; and

(v) any report, opinion or appraisal described in Item 910 of this subpart (§ 229.910).

(4) The discussion concerning fairness should specifically address material terms of the transaction including whether the consideration offered to investors constitutes fair value in relation to:

(i) The form and amount of consideration to be received by investors and the sponsor in the roll-up transaction;

(ii) The methods used to determine such consideration; and

(iii) The compensation to be paid to the sponsor in the future.

§ 229.910 (Item 910) Reports, opinions and appraisals.

(a) *All material reports, opinions or appraisals.* Identify and summarize each report, opinion or appraisal from an outside party which is materially related to the roll-up transaction.

(b)(1) *Fairness opinions.* If the report, opinion or appraisal relates to the fairness of the roll-up transaction to investors in the partnerships;

(i) State whether or not the report, opinion or appraisal addresses the fairness of the roll-up transaction as a whole and to investors in each partnership;

(ii) State whether or not the report, opinion or appraisal addresses the fairness of all possible combinations of partnerships in the roll-up transaction. If

VOL 56 ISS 122 JE 25 1991 UMI

VOL 56 ISS 122 JE 25 1991 UMI

all possible combinations are not addressed:

(A) Identify the combinations that are not addressed;

(B) Identify the person that determined which combinations would be addressed and state the reasons for the selection of the combinations; and

(C) State that if the roll-up transaction is completed with a combination of partnerships not addressed, no report, opinion or appraisal concerning the fairness of the roll-up transaction will have been obtained.

(2) *Appraisals.* If the report, opinion or appraisal consists of an appraisal of the assets of the partnerships:

(i) Set forth in tabular form the appraised value of each asset separately appraised by the appraiser.

(ii) If the appraiser considered different valuation approaches in preparing its appraisals, briefly describe each of the valuation approaches and the reasons the particular valuation approach was selected. Set forth in tabular form the value of each asset under each valuation approach considered by the appraiser, identifying the valuation approach used by the appraiser in determining the appraised value.

(iii) Identify all material assumptions used by the appraiser in preparing the appraisals. If different assumptions were used for different assets, identify such differences and briefly describe the reasons therefor and the effects thereof.

(iv) Identify the date as of which the appraisals were prepared and state whether the appraisals will be updated in the event that there are material changes in the conditions upon which the appraisals were based and/or if the roll-up transaction is not completed within a specified period of time.

(v) Describe any events that have occurred or conditions that have changed since the date of the appraisals that may have caused a material change in the value of any of the assets appraised and the effects thereof.

(c) *All material reports, opinions or appraisals.* With respect to each report, opinion or appraisal identified in response to paragraph (a) of this Item (§ 229.910):

(i) Identify the person who prepared the report, opinion or appraisal;

(ii) Briefly describe the qualifications of such person;

(iii) Describe the method of selection of such person;

(iv) Describe any material relationships between:

(A) Such person and its affiliates, and

(B) The general partner, sponsor, the successor or any of their affiliates, which existed during the past two years or is mutually understood to be contemplated and any compensation received or to be received as a result of such relationship.

(v) If such report, opinion or appraisal relates to the fairness of the consideration, state whether the general partner, sponsor or any of their affiliates determined the amount of consideration to be paid or whether the outside party recommended the amount of consideration to be paid; and

(vi) Describe the procedures followed, the findings and recommendations, any instructions received from the general partner, the sponsor, the successor or any of their affiliates, and any limitation imposed by the general partner, the sponsor,the successor or any of their affiliates on the scope of the investigation.

(d) *All material reports, opinions or appraisals.* Provide a statement to the effect that upon receipt of a written or oral request a copy of any such report, opinion or appraisal shall be promptly transmitted without charge to each investor in a partnership subject to the transaction or a representative of such investor who has been so designated in writing. The statement also must include the name, address and telephone number of the person to whom investors should make their request.

(e)(1) *Fairness opinions.* Describe any contacts in connection with the roll-up transaction between the sponsor or the general partner and any outside party with respect to the preparation by such party of an opinion concerning the fairness of the roll-up transaction; provided, however, that no description is required pursuant to this paragraph of contacts with respect to opinions described in response to paragraph (b)(1) of this Item (§ 229.910(b)(1)).

(2) The description of contacts with any outside party required by paragraph (e)(1) of this Item (§ 229.910) shall include the following:

(i) The identity of each such party;

(ii) Any actions taken by such party in connection with its preparation of an opinion concerning the fairness of the roll-up transaction;

(iii) Any conclusions reached by such party concerning the fairness of the roll-up transaction; and

(iv) Any reasons such party did not render an opinion concerning the fairness of the roll-up transaction.

Instructions to Item 910. (1) The reports, opinions and appraisals required to be identified in response to paragraph (a) of this Item (§ 229.910) include any reports, opinions and appraisals which materially relate to the roll-up transaction whether or not relied upon, such as reports or opinions regarding alternatives to the roll-up transaction whether or not the alternatives were rejected.

(2) The information called for by paragraph (c) of this Item (§ 229.910) should be given with respect to the firm which provides the report, opinion or appraisal rather than the employees of such firm who prepared it.

(3) With respect to appraisals, a summary prepared by the appraisers should not be included in lieu of the description of the appraisals required by paragraph (b)(2) of this Item (§ 229.910). A clear and concise summary description of the appraisals is required.

§ 229.911 (Item 911) Source and amount of funds.

(a)(1) State the source and total amount of funds or other consideration to be used by the sponsor or successor in the transaction.

(2) If all or any of the consideration to be used by the sponsor or successor in the transaction is expected to be, directly or indirectly, provided by any partnership, state the amount to be provided by each partnership and the sources of capital to finance such amount; or

(3) If all or any of the consideration to be used by the sponsor or successor in the transaction is expected to be, directly or indirectly borrowed:

(i) Provide a summary of each loan agreement containing the identity of the parties, the term, the collateral, the stated and effective interest rates, and other material terms or conditions; and

(ii) Briefly describe any plans or arrangements to finance or repay such borrowings, or, if no plans or arrangements have been made, make a statement to that effect.

Instruction to Item 911. If the source of all or any part of the funds is a loan made in the ordinary course of business by a bank as defined by section 3(a)(6) of the Securities Exchange Act of 1934 and section 13(d) or 14(d) of the Securities Exchange Act of 1934 is applicable to the transaction, the name of such bank shall not be available to the public if the person filing the statement so requests in writing and files such request, naming such bank, with the Secretary of the Commission.

§ 229.912 (Item 912) Transactional expenses.

Provide an itemized statement of all material expenses incurred or estimated to be incurred in connection with the transaction, including, but not limited to, filing fees, legal, financial advisory, accounting, and appraisal fees, solicitation expenses, and printing costs. Identify the persons responsible for paying any or all of such expenses. State whether or not any partnership subject to the transaction will be directly or indirectly responsible for any or all of such expenses, and, if so, whether the partnership will be responsible whether or not it participates in the transaction. If more than one partnership is subject to the transaction, describe the method to be used in allocating the expenses among the partnerships.

§ 229.913 (Item 913) Other provisions of the transaction.

(a) State whether or not appraisal rights are provided under applicable state law or under the partnership's governing instruments or will be voluntarily accorded by the successor (or affiliated persons) or the general partner of the partnership (or any affiliate of the general partner) in connection with the transaction, and, if so, summarize such appraisal rights. If appraisal rights will not be available to objecting security holders, briefly describe any similar rights which may be available.

(b) If any provision has been made by the successor (or affiliated persons) or the general partner of the partnership (or any affiliate of the general partner) to allow security holders to obtain access to the books and records of the partnership or affiliate or to obtain counsel or appraisal services at the expense of the successor, the general partner, the partnership or any affiliate of such persons, describe such provision.

(c) Discuss the security holders' rights under federal and state law to obtain a partnership's list of security holders.

§ 229.914 (Item 914) Summary information concerning partnership properties and other assets.

(a) If any partnership is a real estate entity of the type described in General Instruction A to Form S–11 (17 CFR 239.18), provide summary information concerning each property owned by each such partnership, including, but not limited to, the following:

(1) A description of the property, including the date of construction and the date of any material improvements, and a description of any known environmental problems involving the property;

(2) The occupancy percentage as of the end of the most recently completed fiscal quarter;

(3) The identity of each tenant occupying more than ten percent of gross leasable area, the amount of area leased by each such tenant, the percentage of the total gross leasable area leased by each such tenant, the current base annual rent of each such tenant and the expiration date of the lease of each such tenant; and

(4) A description of any indebtedness to which the property is subject, including the interest rate, maturity date and principal balance as of the end of the most recently completed fiscal quarter.

(b) If any partnership is engaged in oil and gas operations as defined in Rule 4–10(a)(1) of Regulation S–X (17 CFR 210.4–10(a)(1)), provide summary information concerning the properties owned by each such partnership (and on a pro forma basis when appropriate) in accordance with Item 102 of Regulation S–K (§ 229.102) and data about its oil and gas operations in accordance with Industry Guide 2 (§ 229.801(b)) under the Securities Act of 1933, including, but not limited to, the following:

(1) A description of the partnership's property including its location and the nature of the partnership's interests.

(2) The total number of productive wells expressed separately for oil and gas (as gross and net oil wells and gross and net gas wells) and the total gross and net developed acreage assigned to productive sells. Undeveloped acreage owned, if any, should be described separately.

(3) The production history of the properties should be described including recent data on the average sales prices of oil and gas and the average production (lifting) costs per unit of production of the properties.

Note: Other information required by Industry Guide 2 (§ 229.801(b)), such as drilling activity, present activities, and delivery commitments should be provided where appropriate. Further, the exemption of limited partnerships from the provisions of Industry Guide 2, set out in the preamble to Guide 2, is inapplicable in the case of roll-up transactions or other business combinations.

(c) If any partnership is engaged in a business other than those described in paragraphs (a) and (b) of this Item (§ 229.914), provide summary information concerning each material asset of each such partnership comparable to that required by paragraphs (a) and (b) of this Item (§ 229.914).

§ 229.915 (Item 915) Pro forma financial statements; selected financial data.

(a) Include audited and interim financial statements of the successor meeting the requirements of Regulation S–X (17 CFR 210), as well as financial information prepared in accordance with Rule 3–05 (17 CFR 210.3–05) and Article 11 of Regulation S–X (17 CFR 210.11) with respect to transactions other than that pursuant to which the securities being registered are to be issued.

(b) In addition to the information required by Item 301 Regulation S–K, Selected Financial Data (§ 229.301), and Item 302 of Regulation S–K, Supplementary Financial Information (§ 229.302), for each partnership participating in a roll-up transaction provide: Ratio of earnings to fixed charges, cash, assets at both book value and appraised value, other assets, other liabilities, general and limited partners' equity, net increase (decrease) in cash and cash equivalents, net cash provided by operating activities, distributions; and per unit data for net income (loss), book value, appraised value, and distributions. Additional information should be provided if material to an understanding of each partnership participating in a roll-up transaction.

(c) Provide pro forma financial information (including oil and gas reserves and cash flow disclosure, if appropriate), assuming:

(1) All partnerships participate in the roll-up transaction; and

(2) "Worst case" participation as defined paragraph (d) of this Item (§ 229.915).

Such pro forma financial statements shall disclose the effect of the roll-up transaction on the successor's:

(i) Balance sheet as of the most recent fiscal year end and the latest interim balance sheet;

(ii) Statement of income (with separate line items to reflect income (loss) before and after the roll-up expenses and payments), earnings per share amounts, and ratio of earnings to fixed charges for the most recent fiscal year and the latest interim period;

(iii) Statement of cash flows for the most recent fiscal year and the latest interim period; and

(iv) Book value per share as of the most recent fiscal year end and as of the latest interim balance sheet date.

(d) For purposes of this subpart (§ 229.900), the term "worst case" participation means the participation in a roll-up transaction of those partnerships that on a combined basis have the lowest combined net cash provided by operating activities for the last fiscal year of such partnerships, *provided* participation by such partnerships satisfies any conditions to consummation of the roll-up transaction. If the combination of all partnerships proposed to be included in a roll-up transaction results in such lowest combined net cash provided by operating activities, this shall be noted and no separate "worst case" participation pro forma financial statements are required.

Instruction to Item 915. Notwithstanding the provisions of this Item (§ 229.915), any or all of the information required by paragraph (c) of this Item (§ 229.915) that is not material

for the exercise of prudent judgment in regard to the matter to be acted upon may be omitted.

§ 229.916 (Item 916) Federal income tax consequences.

(a) Provide a brief, clear and understandable summary of counsel's opinion of the material federal income tax consequences of the roll-up transaction and an investment in the successor. Such summary must address the consequences with respect to which counsel has opined, has not been asked to opine or is unable to opine. If any of the material federal income tax consequences are not expected to be the same for investors in all partnerships, the differences shall be noted, with a cross-reference to the description of such differences in the supplement required by Item 902 of this subpart (§ 229.902).

(b) State that the opinion of counsel has been filed with the Commission either as an appendix to the prospectus or as an exhibit to the registration statement. If filed as an exhibit to the registration statement, include a statement that the general partner or sponsor will provide upon written or oral request, without charge to each person to whom a prospectus is delivered, a copy of the opinion of counsel. The opinion of counsel may be provided to the representative of a security holder who has been so designated in writing.

(c) If investors in any partnership are expected to incur federal income tax liabilities as a result of the roll-up transaction, present in a table the amount of such expected liabilities for investors in each partnership (on an equivalent interest basis, such as per $1,000 invested).

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

3. The authority citation for part 239 continues to read, in part, as follows:

Authority: The Securities Act of 1933, 15 U.S.C. 77a, *et seq.*, unless otherwise noted. * * *

§ 239.25 [Amended]

4. By amending Form S–4 (17 CFR 239.25) by adding General Instruction I to read as follows:

Note: Form S–4 does not appear in the Code of Federal Regulations.

Form S–4

* * * * *

General Instructions

* * * * *

I. *Roll-Up Transactions.*

1. If securities to be registered on this Form will be issued in a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)), then the disclosure provisions of subpart 229.900 of Regulation S–K (17 CFR 229.900) shall apply to the transaction in addition to the provisions of this Form.

2. If securities to be registered on this Form will be issued in a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)), the prospectus must be distributed to investors no later than the lesser of 60 calendar days prior to the date on which action is to be taken or the maximum number of days permitted for giving notice under applicable state law.

§ 239.34 [Amended]

5. By amending Form F–4 (17 CFR 239.34) by adding General Instruction G to read as follows:

Note: Form F–4 does not appear in the Code of Federal Regulations.

Form F–4

* * * * *

General Instructions

* * * * *

G. *Roll-Up Transactions.*

1. If securities to be registered on this Form will be issued in a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)), then the disclosure provisions of subpart 229.900 of Regulation S–K (17 CFR 229.900) shall apply to the transaction in addition to the provisions of this Form.

2. If securities to be registered on this Form will be issued in a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)), the prospectus must be distributed to investors no later than the lesser of 60 calendar days prior to the date on which action is to be taken or the maximum number of days permitted for giving notice under applicable state law.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

6. The authority citation for part 240 continues to read, in part, as follows:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 79q, 79t, 80a–29, 80a–37, unless otherwise noted.

7. By amending § 240.14a–6 (17 CFR 240.14a–6) by adding new paragraph (m) to read as follows:

§ 240.14a–6 Filing requirements.

* * * * *

(m) *Roll-up transactions.* If a transaction is a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)) and is registered on Form S–4 (17 CFR 229.25) or Form F–4 (17 CFR 229.34), the proxy statement of the sponsor or the general partner as defined in Item 901(d) and Item 901(a), respectively, of Regulation S–K (17 CFR 229.901) must be distributed to investors no later than the lesser of 60 calendar days prior to the date on which the meeting of security holders is held or action is taken, or the maximum number of days permitted for giving notice under applicable state law.

8. By amending § 240.14c–2 (17 CFR 240.14c–2) by adding new paragraph (c) to read as follows:

§ 240.14c–2 Distribution of information statement.

* * * * *

(c) If a transaction is a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)) and is registered on Form S–4 (17 CFR 229.25) or Form F–4 (17 CFR 229.34), the information statement must be distributed to investors no later than the lesser of 60 calendar days prior to the date on which the meeting of security holders is held or action is taken, or the maximum number of days permitted for giving notice under applicable state law.

9. By amending § 240.14e–1 (17 CFR 240.14e–1) by revising paragraph (a) to read as follows:

§ 240.14e–1 Unlawful tender offer practices.

* * * * *

(a) Hold such tender offer open for less than twenty business days from the date such tender offer is first published or sent to security holders; provided, however, that if the tender offer involves a roll-up transaction as defined in Item 901(c) of Regulation S–K (17 CFR 229.901(c)) and the securities being offered are registered on Form S–4 (17 CFR 229.25) or Form F–4 (17 CFR 229.34), the offer shall not be open for less than sixty calendar days from the date the tender offer is first published or sent to security holders;

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 231 and 241

[Release Nos. 33–6900; 34–29314]

Limited Partnership Reorganizations and Public Offerings of Limited Partnership Interests

AGENCY: Securities and Exchange Commission.

ACTION: Interpretive release.

SUMMARY: The Commission today is announcing the publication of a release setting forth its views concerning existing disclosure requirements applicable to limited partnership roll-up transactions and initial public offerings of limited partnership units and other similar securities. These interpretations are necessary in order to address the concerns that have been expressed recently by investors, Congress and other interested parties. The intended effect of this release is that registrants will provide investors with clear, concise and understandable disclosure of material information about these transactions and offerings.

EFFECTIVE DATE: June 17, 1991.

FOR FURTHER INFORMATION CONTACT: Michael L. Hermsen, Amy S. Bowerman, or Meredith B. Cross at (202) 272–2573, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: Serious concerns have been expressed about the complexity and length of prospectuses, proxy statements and other disclosure documents used in connection with roll-ups of limited partnerships. This interpretive release addresses the application of current requirements to roll-ups and offerings of limited partnership interests and the companion release proposes rule revisions.[1] Together, these releases are intended to improve the overall quality and readability of disclosure documents used in roll-up transactions. This release also sets forth the Commission's views on the application of existing disclosure requirements to initial offerings of limited partnership interests. This release emphasizes the risks of investing in a limited partnership and the restrictions that state partnership laws and limited partnership agreements place on investor rights in an effort to assure that investors are apprised of the risks and limited rights often associated with an investment in a limited partnership. Finally, this release sets forth the Commission's views as to the application of disclosure requirements to registration statements of real estate investment trusts as well as non-real estate limited partnership offerings.

I. Background

Since January 1, 1985, 68 roll-ups involving two or more entities have been registered with the Commission. These roll-ups have involved approximately 1,600 entities, 1.2 million investors and an aggregate exchange value of $7.1 billion.

In a roll-up transaction, a sponsor consolidates two or more public or private limited partnerships or other pass-through investment vehicles into a single entity, or reorganizes a single partnership. In most cases, the roll-up transaction results in a conversion of a limited partner's interest from a finite-life to an infinite-life interest.

While roll-up transactions can be structured in different ways, these transactions typically are accomplished through a merger of the existing entities into a successor entity.[2] Investors in the existing entities receive an interest, usually equity, in the successor entity. The successor generally is either a newly formed corporation or limited partnership. Before a sponsor may proceed with a roll-up/merger, it must receive approval of the transaction from a requisite number of limited partners in each limited partnership, most often the holders of a majority of the outstanding limited partnership interests. Whereas the securities of the existing entities for the most part are thinly traded in the pink sheet secondary markets or not traded at all, the securities of the successor entity often are listed on the New York Stock Exchange, the American Stock Exchange or traded on the National Association of Securities Dealers' ("NASD's") Automated Quotation system.

Roll-ups have created considerable controversy and have generated a variety of criticisms, many of which were highlighted in a series of Congressional hearings on limited partnership roll-ups. Criticisms have focused primarily on issues relating to the fairness of the transactions and the general partners' conflicts of interest, as well as the inadequacy of the disclosure. The fairness of the methods used to value the securities issuable in exchange for investors' limited partnership interests has been questioned. Another area of concern has been the significant discount at which the price of the security received in the roll-up trades in the secondary market.

Serious issues have been raised with respect to general partners' fiduciary duties to the limited partners, including their potential conflicts of interest and lack of independence in structuring and negotiating the terms of a transaction. Critics have questioned the potential overreaching by the general partners inherent in the increased benefits, in terms of compensation, ownership interests and dilution of investors' voting rights, accruing to them in most roll-up transactions. These increased benefits typically include payments for general partnership interests and changes in compensation arrangements.

Additional complaints have been raised with respect to fundamental changes that a roll-up may bring about in the future operations of the successor entity. These changes frequently relate to the entity's borrowing policies, business plan, investment objectives, intended term of existence and voting rights of investors. Limited partners objecting to a roll-up transaction have especially criticized the absence of any legal or equitable alternative to the transaction. The "cram down" effect on objecting partners is perceived as unfair.

Investors may have acquired limited partnership interests for several reasons. A principal reason may have been the expectation of the pass-through of tax benefits,[3] accompanied by the safety of limited liability. When a roll-up is proposed, investors, despite the disclosures in the original offering document, have been surprised to discover how limited their rights are under state laws and the partnership agreements. Many of the state law protections afforded corporate shareholders are not provided to limited partners.

---

[1] The companion release publishes for comment proposed rules applicable to limited partnership roll-up transactions and is being issued concurrently by the Commission. See Securities Act Release No. 33–6900 (June 17, 1991).

[2] A roll-up may also be effected through an exchange offer. Unlike a merger, an exchange offer will not compel a limited partner to give up his original investment, even if a majority of the other limited partners in the partnership choose to participate in the roll-up. Approximately 11% of the roll-ups have been conducted as exchange offers, less so in more recent years.

[3] Prior to major revisions to the federal tax code beginning in 1984, limited partnerships afforded individual investors the opportunity to invest and to receive substantially the same tax treatment and cash distributions as a direct investment in the asset itself would have provided.

Various changes in the tax code since 1984 have reduced or eliminated the tax shelter and other tax benefits of an investment in a limited partnership. At the same time, industries that have principally relied on the partnership format for raising capital, such as oil and gas and real estate, have suffered substantially. As a result, many limited partnership interests have lost much of their value.

Investors also have complained about the comprehensibility and sufficiency of the disclosure provided in connection with roll-ups. The Commission has undertaken three initiatives to address the perceived problems. First, the Division of Corporation Finance ("Division") has incorporated into its review and comment process a number of disclosure suggestions made by commenters and participants in these transactions.[4]

Second, the Commission is, in this release, setting forth its views of existing disclosure requirements applicable to limited partnership roll-up transactions and initial public offerings of limited partnership units. This release is intended to assist registrants in assuring that investors are provided clear, concise and understandable disclosure about these transactions and offerings.

Third, the Commission is proposing amendments to its rules to enhance the clarity, as well as the substance, of the disclosures provided to investors in connection with roll-ups. The Commission also is reviewing its requirements applicable to partnership offerings to assess the need for any amendments.

The NASD recently has proposed to amend its rules to prohibit member brokers and investment advisers from receiving differential compensation in connection with roll-up transactions.[5] Pending public comment on and Commission approval of the NASD's proposed rule change, prominent disclosure is required of such arrangements, as well as the potential conflicts of interest inherent in this fee structure.[6]

[4] In December 1989, one participant, Liquidity Fund, provided to the staff a number of helpful suggestions to provide clearer disclosures about the material effects to investors that will result if the transaction is approved. These suggestions focused on the disclosure of the material differences in the legal rights, obligations and duties of the parties to the roll-up and the impact of the changes in investment objectives on the limited partners.

[5] Securities Exchange Act Release No. 28236 (May 23, 1991), 56 FR 24436 (May 30, 1991). The comment period ends June 14, 1991.

[6] Recommendations by broker-dealers to their customers in connection with securities to be issued in roll-up transactions also have raised concerns involving customer suitability. The receipt of fees tied to the number of "yes" votes obtained may conflict with the duty of broker-dealers, in recommending to customers the purchase, sale, or exchange of securities, to have a reasonable basis to believe that the recommendation is suitable for each customer based on his or her security holdings and financial situation and needs. [See NASD Rules of Fair Practice, Art. III, Section 2, NASD Manual (CCH) ¶2152]. Moreover, a broker-dealer's failure specifically to disclose to customers the existence of this conflict may violate the general antifraud provisions of the federal securities laws, particularly where the firm has a preexisting customer relationship with the investors it solicits.

[7] See Rule 421 of Regulation C (17 CFR 230.421). Registrants also are reminded that effectiveness of a registration statement may be denied or a stop order issued when there has not been a bona fide effort to present information in a reasonably clear, concise and readable manner. See Rule 461(b)(1) of Regulation C (17 CFR 230.461(b)(1)); see also, In the Matter of Franchard Corporation, 42 S.E.C. 163 (1964).

II. Interpretive Guidance

A. Presentation of Information

1. Readability

The primary purpose of the disclosure requirements of the federal securities laws is to provide the investing public with clear, comprehensible and complete information regarding the issuer, security, offering transaction and the risks of the investment. In view of the complexity of roll-up transactions and the risks of a limited partnership investment, meticulous care should be taken to assure that investors are provided with clear, concise and understandable disclosure as required by the rules of the Commission.[7] Legalistic, overly complex presentation and inattention to understandability often make the substance of the disclosure difficult to understand. Further, documents frequently contain vague "boiler plate" explanations that are imprecise and readily subject to differing interpretations. Disclosure of complex matters, such as compensation arrangements and partnership distributions, frequently is copied directly from the partnership and other agreements without any clear and concise explanation of the provisions. Disclosures are often repeated in different sections of the document. Such repetition often increases the sheer size of the prospectus, overwhelming the reader, without enhancing the quality of the information.

While these problems are troublesome in connection with any disclosure document, they are particularly acute in offerings directed primarily towards retail investors. Registrants are advised that where partnership and roll-up transactions are filed and they have not undertaken to present the required information in a clear, comprehensible manner, the staff will advise the registrant that the document cannot be processed until it is so written.

To address these problems, registrants are reminded that information should be presented in clear, concise paragraphs and sentences. To the extent practicable, information should be presented in short explanatory sentences and "bullet" lists.

Consistent with existing requirements, important terms should be defined in a glossary section located in the back of the prospectus. Frequent reliance on defined terms as a primary means of explaining information in the body of the prospectus should be avoided. Rather, defined terms should be used in conjunction with a simple and clearly understandable textual description of their meaning in order for the reader to easily grasp the information being conveyed. For example, when the defined term Net Cash from Operations is used in a prospectus, it should be accompanied by a simple explanation such as "which is defined in the Partnership Agreement to mean generally the partnership's cash flow from operations." This allows the detailed definition to remain in the glossary but provides sufficient information for a reader to more easily understand the disclosure being presented.

Legal and business terminology should be avoided. Registrants should not presume that the investor understands the import of terms such as "best-efforts," "minimum-maximum offering," "dissenters' or appraisal rights." These terms, when used, should be clearly explained.

2. Captions and Headings

Caption and subheading titles should be descriptive of the substance of the disclosure included in the section.[8] For example, the title of the risk factor discussing the limited market for the securities should reflect the lack of liquidity or the inability to resell, rather than simply being titled Liquidity or Secondary Market.

3. Format of Prospectus [9]

There should be a uniform and systematic structure to a prospectus. The headings used in the summary section should correspond to the headings of the various sections in the body of the prospectus. The table of contents should contain these major headings as well as subheadings.

a. Cover Page.[10] Prospectus cover pages now contain significant amounts of text that result in obscuring the information intended to be highlighted by being placed on the cover page. As a result, it has become difficult to understand at the outset what the offering or transaction is about.[11] The cover page should be in plain English and contain a brief description of the purpose of the offering or the transaction. The most significant adverse effects should be highlighted through the use of a concise list of bullet-type statements. For example, in the case of an offering that presented risks because of a lack of control, substantial fees, leverage, limited voting rights, lack of a secondary market and lack of diversification, the cover page could include a list indicating:

- Total Reliance on General Partner
- Authorization of Substantial Fees to the General Partner and its Affiliates
- Leverage
- Limited Voting Rights of Investors
- Inability to Resell or Dispose of the Units Except at a Substantial Discount From the Per Unit Price
- Lack of Asset Diversification

A practice has developed in limited partnership offerings of setting arbitrary offering amount goals that bear no relationship to the number of securities that ultimately will be sold. Specifically, an offering frequently has a very low minimum goal to break escrow and two significantly higher maximum amounts. This practice may cause confusion in evaluating the current offering and the success of the sponsor's prior offerings. Therefore, the offering terms should refer only to the minimum amount to break escrow and the maximum amount to be offered.

In addition, prospective investors may not fully appreciate the different investment risks that will result from the amount actually raised. Therefore, the offering amount set forth on the top of the cover page should be the minimum amount needed to break escrow. The risk factor disclosure also should be based on the minimum amount. If the minimum amount is met and escrow is broken, the offering amount and other disclosures should be updated to reflect any material changes including investment and business risks that are presented by the offering at that point in time. This will enable an investor to appreciate fully the nature of an investment in the particular partnership at the time that his or her investment decision is made.

b. Table of Contents. A "reasonably detailed table of contents" with specific page references is currently required in all prospectuses.[12] The headings that appear in the table of contents should be consistent and correspond to those used in the body of the prospectus. The table of contents should follow the cover page of the prospectus.

c. Summary.[13] In light of the complex nature of disclosure documents for roll-up transactions and limited partnership offerings, a summary is required.

The summary section should provide investors with a clear, concise and coherent "snapshot" description of the most significant aspects of a roll-up transaction or a partnership offering. However, more often than not, summaries randomly repeat the text of prospectuses. This protracted and confusing structure fails to provide the intended brief overview of the salient aspects of the transaction.

The information that should be included in the summary will vary with each transaction or offering. Issuers should carefully consider and identify the aspects of an offering that are the most significant and determine how best to highlight those points in a clear, concise and understandable manner. The summary for a roll-up transaction generally should include: the name and a description of the entities proposed to be included in the roll-up transaction; a brief description of the roll-up transaction; investor voting rights and the most significant changes in the voting rights, such as the addition of a supermajority provision to remove the general partner; changes in the business plan, the form of ownership interest or management compensation; the general partner's conflicts of interest; the likelihood that the securities received in the roll-up transaction will trade at a substantial discount to the exchange value; the material terms of the roll-up transaction, including the valuation method used to allocate securities in the successor; dissenters' or appraisal rights; investor rights to a limited partner list; any report, opinion or appraisal referred to in the prospectus; the background and reasons for the transaction; risk factors and adverse effects of the roll-up transaction; and, intended benefits of the roll-up transaction. While readers should be cross referenced to the more detailed discussion on the matters covered in the summary, cross references without a short descriptive discussion of the matter should be avoided.

d. Risk Factors.[14] The discussion of investment and business risks associated with the roll-up transaction or limited partnership offering should be short and concise and organized in a careful and logical fashion. Risks of a similar nature should be grouped together so they may be understood in context. For example, risks associated with the business in which the partnership intends to engage should be discussed together. These risks would include, if applicable, risks associated with particular properties, the lack of regulatory approval and the existence of environmental problems. Likewise, investment risks generally should be grouped. These risks would include, if applicable, the lack of liquidity of an investment, limitations on the rights of the limited partners and an enumeration of the rights of the general partner. The risks should be explained clearly, and where one risk is heightened by the nature of the investment, this should be clearly stated. For example, in an initial offering of limited partnership interests where there is not expected to be a liquid secondary market, and where the limited partners may be bound by a vote of a majority of other partners to a substantially changed investment (through merger, the partnership agreement or in other ways), that should be disclosed. In the case of a roll-up that increases the vote necessary to remove the general partner, and thereby substantially changes the business plan of the entity or permits the general partner wide discretion in selecting properties and taking on leverage, clear disclosures should be provided of the enhanced risks introduced by the broader discretion given to the general partner and the reduced ability to remove the general partner.

The risks should appear in order of their materiality to an investor. The most significant risks may warrant bullet disclosure on the cover page of the prospectus. While readers should be cross referenced to the more detailed discussion on the matters determined to be risks, cross references without a short description of the risks should be avoided.

[8] See Rule 421(b) of Regulation C (17 CFR 230.421(b)).

[9] See Industry Guide 5, Item 801(c) of Regulation S-K (17 CFR 229.801(c)) and Industry Guide 6, Item 801(d) of Regulation S-K (17 CFR 229.801(d)).

[10] See Item 501(c) of Regulation S-K (17 CFR 229.501(c)), Item 1 to Industry Guide 5, Item 801(e) of Regulation S-K (17 CFR 229.801(e)) and Item 1 to Industry Guide 4, Item 801(d) of Regulation S-K (17 CFR 229.801(d)).

[11] Industry Guide 4 requires specific information to be included on the cover page of a prospectus relating to the offering of interests in oil and gas programs. This release is not meant to change the disclosure requirements as they relate to these offerings. Rather, it is intended to enhance the requirements by providing guidance concerning the presentation of information on the cover page and in the prospectus.

[12] Item 502(g) of Regulation S-K (17 CFR 229.502(g)).

[13] See Item 503(a) of Regulation S-K (17 CFR 229.503(a)) and Item 3 to Industry Guide 5, Item 801(e) of Regulation S-K (17 CFR 229.801(e)).

[14] See Item 503(c) of Regulation S-K (17 CFR 229.503(c)) and Item 7 to Industry Guide 5, Item 801(e) of Regulation S-K (17 CFR 229.801(e)) and Item 2 to Industry Guide 4, Item 801(d) of Regulation S-K (17 CFR 229.801(d)).

VOL
56
ISS

1991
UMI

In a roll-up transaction, the risks posed by the particular transaction generally should be discussed before the risks that are inherent in an investment in a partnership or other generic risks.

e. Income Tax Considerations.[16] The use of a long form tax opinion filed as an exhibit to the registration statement is encouraged. Whether a long form opinion is filed as an exhibit or is included as an appendix, the prospectus should prominently set forth a brief, clear and understandable summary of the material income tax aspects of the roll-up transaction or partnership offering. This section should disclose the material tax aspects upon which counsel is unable to opine. Where counsel is unable to opine on material tax aspects, the prospectus should include a risk factor. If a roll-up transaction is taxable to an investor, risk factor treatment should be afforded.

f. Prior Performance.[16] In an initial offering of limited partnership units, the sponsor must provide prior performance information in a narrative and tabular format. The sponsor must present this information in a clear and concise format easily understood by the intended reader. This information must accurately reflect the general partner's ability to offer and manage this program.

In preparing a prospectus, a sponsor should not take line headings from the guide if they are inapplicable or do not accurately reflect the nature of the information. Line entries that are not self-explanatory should be clarified. For example, use of the caption "other" is inappropriate if the entry consists of only a single category of information. When possible, the table should use more descriptive headings (*i.e.*, return of capital). Also, if the line item contains more than one category of information, the presentation should be broken down into various components to the extent material.

B. Quality of Disclosure

The following discussion sets forth the Commission's interpretive views of existing substantive disclosure requirements. The discussion separately presents interpretive views that are applicable to roll-up transactions, interpretive views applicable to both roll-up transactions and limited partnership offerings and interpretive views applicable solely to limited partnerships offerings. These interpretations are intended to result in a clearer presentation of the benefits and detriments of a roll-up transaction or an investment in a particular limited partnership. In each instance, the items may be of such material significance to an investment decision as to warrant summary treatment in the forepart of the prospectus.

1. Roll-Up Transactions

a. *Effects on Different Partnerships.*[17] Roll-up transactions frequently involve combining two or more partnerships that may be affected quite differently by the transaction. Investors in each partnership must be provided information from which to evaluate the potential risks, adverse effects and merits of the roll-up transaction for their particular partnership interests. This disclosure should highlight the materially different effects for their partnership vis-a-vis the other entities involved. Disclosure of different effects should not be "buried" in parenthetical references. For example, it would not be considered adequate to describe a benefit in the following format: "Investors in the partnerships (except Partnership A) should benefit from the ability to sell their interests." When different effects are noted, the name of each partnership that may experience the effect should be included.

b. *Effects of Participation in a Roll-Up by Less Than All Partnerships.*[18] Another feature of roll-up transactions is that, even if one or more partnerships do not consent, the transactions often may be completed with the partnerships that do consent. In a transaction in which numerous partnerships are asked to participate, it is possible that the successor may be formed through many different combinations of partnerships. This creates serious uncertainties about the possible business prospects and financial condition of the successor. In that situation, these uncertainties about the effects of the roll-up transaction should be addressed in the disclosure document.

In addition, if a "fairness opinion" is obtained, the description of the opinion should make clear what partnership combinations it addresses. The description also should disclose whether the opinion addresses whether the transaction is fair to investors in each of the partnerships and, if it does not, why not. If (i) no fairness opinion is obtained, (ii) the fairness opinion does not address all possible combinations, or (iii) the fairness opinion does not reach the fairness of the transaction to the limited partners of each partnership, clear and prominent disclosure of the lack of a fairness opinion on all, or a part, of the transactions in question should be made. Particularly in the case where a fairness opinion on some part of the transaction is obtained, the disclosure should be clear as to those aspects of the transaction, and those partnership interests not covered by the fairness opinion.

c. *Allocation of Interests in the Successor.*[19] A roll-up transaction includes the issuance of interests in the successor to the limited partners and general partner of the partnerships. Accordingly, the method used to allocate the interests is a critical term of the transaction and must be thoroughly explained and illustrated in an understandable manner. This disclosure should include the reasons why this method was selected, what other methods were considered, why they were rejected and a complete description of how assets of the partnerships and the interests of the general partner were valued for purposes of the allocation, including any material assumptions, limitations or qualifications. For example, if the general partner will receive interests in the successor in exchange for previously "subordinated" rights to payments from the partnerships, the method used to determine the value of such rights should be explained. If the method differs among partnerships, the reason and effects of the method used to allocate interests in the successor on the different partnerships also should be highlighted and described.

d. Trading Market. In light of the history of a substantial difference between trading value of the securities issued in roll-up transactions and the exchange value, roll-up transaction disclosure documents should include prominent disclosure of the likelihood that the securities will trade at a price substantially below the value assigned in the transaction. This information should be presented on the cover page and in the risk factors section. The effect on the trading price of the payment of previously subordinated fees or expenses to the general partner should also be discussed. Other factors, such as the successor entity's cash distribution policy, that likely will affect the trading price should be discussed as well.

[16] See Item 4(a)(6) to Form S-4 (17 CFR 239.25), Item 12 and Appendix I to Industry Guide 5, Item 801(e) of Regulation S-K (17 CFR 229.801(e)) and Item 14 to Industry Guide 4, Item 801(d) of Regulation S-K (17 CFR 229.801(d)).

e. Reports, Opinions and Appraisals.[20] If a report, opinion or appraisal is referred to in a roll-up proxy statement/prospectus, Form S-4 requires that the information requested by Item 9(b) (1) through (8) of Schedule 13E-3 be provided. Also, the complete, and not summary, report, opinion or appraisal must be filed as an exhibit to the registration statement.

If a negative opinion was rendered by an investment banker or financial advisor concerning the fairness of the roll-up, or an investment banker or financial advisor refused to render a favorable opinion, this must be disclosed. Failure to provide adequate disclosure of this information would constitute a material omission under the anti-fraud provisions of the securities laws.[21]

2. Roll-Up Transactions and Limited Partnership Offerings

a. Application of Guide 5.[22] While Industry Guide 5 ("Guide") by its terms applies only to the "Preparation of Registration Statements Relating to Interests in Real Estate Limited Partnerships," the requirements contained in the Guide should be considered, as appropriate, in the preparation of registration statements for real estate investment trusts and for all other limited partnership offerings. The Guide addresses disclosure concerns that are applicable to all offerings of limited partnership units, e.g., conflicts of interest, risk factors, compensation and summary of limited partnership agreement.

The requirements contained in the Guide that are relevant to all limited partnership offerings also should be considered, as appropriate, in the preparation of disclosure documents for roll-up transactions. Many of the disclosure concerns, such as conflicts of interest, investment objectives and fiduciary responsibilities, are pertinent to roll-up transactions.

b. Compensation to General Partner and its Affiliates.[23] The description of compensation and fee arrangements in primary offerings by limited partnerships frequently is complicated and obscure. The use of tables as a means of simplifying the disclosure is encouraged. The description of compensation arrangements between the partnership, general partner and its affiliates should give investors a clear understanding of the nature and amount of compensation that may be paid. Commonly, there are categories of compensation to be earned by the general partner. The disclosure document should make clear the distinctions among categories, including the level of potential compensation. The extent to which a general partner may affect the nature of the compensation by undertaking different transactions should be made clear. For example, a general partner might receive a given percentage of operating income (i.e., from rents, etc.) and a different percentage for sales of properties or refinancings. The distinction should be made clear, as well as the potential for the general partner to affect the categories of compensation. Both a narrative and tabular presentation of this information is recommended.

In the narrative presentation, the maximum amount that may be paid in each category of fees or compensation should be prominently disclosed. The tabular numeric presentation of this information should be based on this maximum amount.

Where an issuer states that there are ceilings on certain categories of fees or expenses, the issuer should also state whether the fees or expenses may be recovered by reclassifying them under a different category.

In addition, in a roll-up transaction, the issuer should compare the nature and level of compensation to be paid by the new entity to that paid by the old. To provide for clearer disclosure, registrants should present changes in the structure of fees and other compensation payable to the general partner in a tabular format, and should include specific quantification of such changes, where practicable. Further, the disclosure documents should include textual and numerical disclosure of the fees and other expenses payable to the general partner, affiliates and others solely because of the roll-up transaction.

A pro forma presentation of the compensation and fees proposed to be paid in the new entity should be presented using the historical pro forma financial statements. Where changes in the business plan may result in higher compensation than that shown in the pro forma presentation based on historical activities, the disclosure should address the potential for greater fees than shown in the pro formas and outline the potential differences. Where a compensation ceiling is fixed for a specified time period, the issuer also should set forth a pro forma presentation of the compensation and fees without giving effect to the ceiling.

c. Conflicts of Interest.[24] Many of these transactions or offerings are complicated by the number of affiliated entities involved in the transaction or in the business operations of the entities. Where affiliates of the general partner may participate in the offering or the issuer's business activities, an organizational chart showing the relationship between the general partner and its affiliates in the forepart of the prospectus should facilitate investor understanding of the relationships among such entities.

Registrants should describe concisely the potential conflicts of interest that are present and should identify clearly the transactions and relationships that give rise to such conflicts. The description should address the benefits and detriments that may be realized by the limited partners, the general partner and its affiliates, and any other parties that are subject to a conflict. A description of the procedures used or to be used to minimize the potential conflicts should be provided.

d. Fiduciary Responsibility of the General Partner.[25] Prospectuses are required to identify and explain the nature of the general partner's fiduciary duties to the limited partners. Where the partnership agreement modifies the state-law fiduciary duty standards, the registration statement should compare the state-law fiduciary duty standards with the standards as modified by the partnership agreement. The disclosure also should address the reasons for modifying the duties and the specific benefits and detriments to both the general partner and limited partners from each modification. A tabular presentation of this information should facilitate investor understanding.

A clear description of the limited partners' legal rights and remedies should be provided. Similarly, a clear explanation of defenses available to the general partner, such as the business judgment rule, also should be set forth.

In a roll-up transaction, the issuer also should provide a comparison of the general partner's fiduciary duty standards in the new entity to those in the existing entities. This comparison would describe the fiduciary duty standards in the existing entities, the new entity and, where the new entity is

formed under a different jurisdiction, the material differences between the fiduciary duty standards in the old and new jurisdictions.

e. Management.[36] Information about management's business experience is material to an investor's evaluation of an offering and determination of whether to invest in the issuer. While this is true in any offering, it is especially significant when investors must rely largely on the individual expertise and business acumen of the general partner or other adviser to select and operate the properties to be acquired, and realize the stated investment objectives. Where the history of the officers and directors either individually or as a whole is inconsistent with the express or implied assertion that the partnership will benefit from their management, additional disclosure in support of this assertion should be provided. In the discussion of the business experience of officers and directors, where job titles do not indicate clearly the nature of the person's former duties or where job titles may give a misleading impression of the individual's experience, additional disclosure should be provided in order to clarify the nature of the individual's duties.

f. Investment Objectives and Policies.[37] The investment objective of an offering should be clearly and concisely set forth. This discussion must be consistent with other disclosures. For example, where a document describes the possible use of high leverage and an income investment objective, the disclosure would have to address how the business plan relying on high leverage would still permit an income objective.

Further, there must be a reasonable basis to support a stated objective. In this regard, consideration must be given to the effect that conditions or trends in the economy, such as the recent conditions in the real estate industry, may have on the likelihood that a stated investment objective will be realized within the stated anticipated term of the partnership.

Where a general partner may amend the investment objectives of the partnership without the vote of the limited partners, the disclosure document should make clear that, in essence, the investment objectives are those defined by the general partner from time to time. In such cases, lengthy descriptions of a partnership's investment objectives may obscure the fact that the investor is, in essence, buying an interest in an entity with unlimited investment objectives. The document should disclose the general partner's present plans while making clear that these may be totally recast. The document should set forth a description of the factors to be considered by the general partner in making such a change.

Where a partnership agreement permits the partnership to engage in joint ventures, disclosure should be made of those activities that the partnership may engage in through a joint venture that it could not otherwise undertake. For example, where the partnership agreement precludes the purchase of properties under construction, the ability of the partnership to purchase such properties through a joint venture should be disclosed. In such case, the risks and business implications of such activities should be clearly stated.

Recently, several issuers have disclosed in their prospectuses that the general partner, as part of its analysis of prospective property acquisitions, "will retain a national accounting firm to perform certain agreed-upon procedures related to the general partner's financial forecast with respect to each property acquisition" and that "[s]uch procedures will not constitute an examination of the forecast in accordance with standards established by the American Institute of Certified Public Accountants." Disclosure of an independent accountant's involvement with prospective financial statements or forecasts should be limited to circumstances in which the accountant has performed, in accordance with standards issued by the American Institute of Certified Public Accountants, an "examination" of prospective statements that are presented in the prospectus. Disclosure of "agreed-upon procedures" performed or to be performed by an accountant is inappropriate under all circumstances.[38]

In a roll-up transaction, the material effects flowing from the changed investment objectives and policies should be disclosed clearly. For example, most limited partnerships, before a roll-up, are expected to have a finite life, at the end of which they will dissolve and distribute their assets. After a roll-up, the surviving entity will be operated as an ongoing business with no obligation to make distributions or to dissolve. Therefore, while an investor was expecting annual cash distributions and proceeds from the sale of assets and the dissolution of the partnership after a seven to ten year period, the investor will receive dividends when declared by the successor and will be dependent upon the securities markets in order to liquidate his investment.

In addition, most limited partnerships before a roll-up are not publicly traded, so the value of the investment is extremely difficult to determine. After a roll-up, the value of the investment is based on the market for securities of entities operating in a specific industry. This value generally is based on a multiple of operating cash flow and a factor for the market's expectation of the likelihood of the continuation of that cash flow, rather than the appraised value of the underlying assets.

g. Summary of Partnership Agreement.[39] The issuer should identify and discuss the voting and other material rights of the limited partners under the partnership agreement. This discussion should include, but not be limited to, the right to call meetings, vote upon extraordinary transactions such as mergers and consolidations, obtain a copy of the list of partners, receive appraisal or dissenter's rights, inspect partnership books and records, remove and replace the general partner, compel dissolution or liquidation or amend the partnership agreement.

The voting rights of limited partners should be specifically set forth in this section. Such description should include the rights limited partners have to vote on any matter, the vote of limited partners necessary to approve any proposal and the rights of limited partners to submit a proposal to the vote of limited partners.

Any limitations or conditions (including those under state law) that the general partner may place on the exercise of these rights should be explained. If limited partners are not afforded the foregoing rights or if the partnership agreement restricts the rights that limited partners otherwise would have enjoyed under state law, this information should be disclosed. In addition, the issuer should characterize the extent of discretion retained by the general partner with regard to the operations of the partnership.

In addition to the foregoing, the issuer in a roll-up transaction should clearly compare the rights of the limited partners under the new partnership agreement or governing instruments with the rights of the limited partners under the existing partnership agreements. If limited partners will be affected differently depending on the partnership entity in which they have invested in, a partnership by partnership comparison must be made. If the new entity will be formed in a different jurisdiction, the differences in the rights under the respective state laws should also be described. A similar comparison of the actions that the general partner may take under the new partnership agreement with the actions that the general partner may take under the existing partnership agreements should also be provided.

h. Distributions and Allocations.[40] This section is often too complex for the investor to understand. In order to enhance investor understanding of this section, the narrative text should include shortened definitions of terms that are fully defined in the glossary. This will enable readers to gain a general understanding of the nature of the distributions and allocations without having to refer constantly to the glossary.

It is often unclear whether the distributions represent a return of investors' capital or a return on investors' capital. Whenever cash distributions are discussed on a historical basis, the disclosure should make clear the nature of the distribution. When distributions are discussed on a prospective basis, the disclosure also should make clear, to the extent known, the nature of the distribution.

Limited partnership prospectuses often disclose that limited partners will have a "priority" or "preferred" return on distributions made by the partnership. These descriptive terms should not be used if the right of limited partners to receive their distributions is in any way contingent. More often than not, even though limited partners are purportedly given a "preferred right" to a specified percentage of cash distributions, this right may only be invoked after substantial operating fees and expenses have been paid to the general partner. The disclosure should make clear that, if true, the "priority" or "preferred" distribution follows and does not preclude payments to the general partner. The disclosure should give a sense of the size of such payments to the general partner as well. In the rare circumstance where the right is not contingent and limited partners are guaranteed a priority return, consideration should be given as to whether a separate security exists.[41]

i. Sales Literature.[42] Registrants are reminded of the obligation, in Item 19D of the Guide, to submit all sales literature to the staff of the Commission supplementally prior to its use. This obligation is not extinguished once a registration statement is declared effective. Registrants must continue to submit all sales literature to the staff. Sales literature includes all material used in connection with the sale of the units, whether or not it is prepared by the general partner or its affiliates.

Registrants are also reminded that sales material should present a balanced discussion of both risk and reward and the contents of the literature should be consistent with the prospectus.

3. Limited Partnership Offerings

a. Estimated Use of Proceeds.[43] A principal problem with the presentation of the issuer's estimated use of proceeds in a limited partnership offering is the lack of prominent disclosure concerning the amount that will actually be invested in the business of the partnership. It is often the case in limited partnership offerings that a substantial percentage of the original investment will pay the expenses of the offering and fees to the general partner and its affiliates. The difference between the amounts provided by investors and the amounts expected to be actually invested in assets is of obvious significance to potential investors.

Accordingly, prominent disclosure should be made of the percentage of an investment that will actually be available for investment after the deduction of all front-end fees, commissions, expenses and compensation. This information should be presented in the narrative disclosure before the estimated use of proceeds table. Additionally, it is suggested that the bottom line of the use of proceeds table should reflect this amount. Cover page disclosure of this percentage should also be made in order to place the amount offered in its proper context.

b. Prior Performance.[44] In partnership offerings, the general partner is required to discuss the "track record" or prior performance of other programs sponsored by the general partner. A problem arising with greater frequency is what information is necessary when a general partner was a sponsor of a prior program, but has been removed from that program. Prior performance information should be provided for the period during which that person was the general partner. If the results (*i.e.* final sales of properties) for such a program did not meet expectations or the original investment objectives of the program, a person who was a general partner for any part of the operating period should provide information concerning the adverse developments experienced by that prior program.

The prior performance tabular information should reflect whether prior programs have been able to achieve their stated objectives. Adverse developments contained in the tables should be addressed in detail in the narrative section. The narrative section should be updated whenever the tabular information is updated.

Tabular information should be provided for all programs which have had a closing or have closed within the time period specified by the applicable table. If a program has had a closing and has begun operations, prior performance information should be provided for that program.

With regard to Table III of the Guide, the amount of cash generated from operations should be calculated based on the definition of operating cash flow from the Statement of Cash Flows prepared in accordance with Financial Accounting Standard ("FAS") 95. If the amount in the table differs from the amount that would be reflected in the Statement of Cash Flows, a footnote should be included reconciling the difference. Also with regard to Table III, a footnote should be included that explains how those programs experiencing operating deficiencies are being funded. Typically such deficiencies are built into the program during its first years of operations. However, continuing deficiencies can represent an adverse development that requires additional disclosure. Finally, if a program was designed to provide tax credits to investors, specific line items should be included in both parts of the table that disclose the amount of tax

VOL 56 ISS 122 JE 25 1991 UMI

credits that have been provided to investors.

III. UPDATING OF INFORMATION [35]

Issuers engaged in real estate offerings traditionally have updated prospectuses by means of supplements attached to the basic prospectus. This practice may result in a confusing, disjointed and lengthy disclosure document. In these circumstances, it often is left to the investor to discern not only which information has or has not been modified or superceded, but the substance of the change as well. Material information that ordinarily would appear in the forepart of a prospectus may be spread out in different documents. Moreover, other information in the initial prospectus, such a risk factors or investment objectives, may not be updated in a clear and concise manner. Therefore, just as in the case of non-real estate offering documents, when the document becomes confusing, a post-effective amendment containing a reprinted prospectus will be required. Where a supplement is used, consideration should be given to including an updated summary section as part of the supplement.

IV. MATCHING SERVICES AND CROSSING ARRANGEMENTS

There appears to have been a recent increase in the number of limited partnerships or real estate investment trusts attempting to create an alternative secondary market for their security interests. The most common method used has been a form of matching service, crossing arrangement or some other such liquidity enhancement plan through which a person wishing to sell an equity interest will be matched with someone who is seeking to buy an equity interest. This service often is created to supplement or work in conjunction with a dividend reinvestment plan. Usually, the general partner, advisor or one of their affiliates structures the arrangement and facilitates the matching of potential buyers and sellers. In certain circumstances, services provided by affiliated entities or their associated persons pursuant to a matching service or crossing arrangement could subject such persons to the broker-dealer registration requirement of Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act"). [36]

If the general partner, advisor or one of their affiliates is involved in the crossing arrangement, the sale of securities through the arrangement is an offer or sale by the issuer for purposes of section 2(3) [37] and section 5 [38] of the Securities Act. Therefore, the issuer must register under section 5 of that Act a good faith estimate of the number of shares expected to be purchased through the arrangement. The issuer also must undertake to keep the registration statement "evergreen" during the existence of the arrangement. This treatment is similar to that accorded employee stock purchase plans and dividend reinvestment plans for determining whether registration is required under the Securities Act. [39]

RIN 3235-AD63

Regulation of Securityholder Communications

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Securities and Exchange Commission is proposing several amendments to its proxy rules under section 14(a) of the Securities Exchange Act of 1934 ("Exchange Act") [1] that would facilitate securityholder communications in furtherance of the goal of informed proxy voting, and would reduce the costs of compliance with the proxy rules for all persons engaged in a proxy solicitation. These proposals constitute the first in a series of possible rulemaking initiatives relating to the proxy solicitation process that are expected to arise from the Commission's ongoing proxy review.

First, the Commission is proposing a new exemption from all proxy rules but the antifraud provisions that would cover solicitations by any "disinterested" person, to be defined as a person who wishes to solicit in regard to any matter subject to action by securityholders, but who has no material economic interest in that matter and who is not seeking authority to act as a proxy for securityholders.

Second, the Commission is proposing to amend the proxy rules to limit the types of proxy soliciting material that would be required to be filed in preliminary form to the proxy statement and form of proxy.

Third, the proposed amendments would provide that all proxy material, whether in preliminary or definitive form, would be public upon filing with the Commission.

Fourth, amendments to Rule 14a-7 [2] are being proposed to add information to the securityholder list that currently must be provided by the registrant to a requesting securityholder, and to shift the election of whether to provide the list or to mail from the registrant to that securityholder. Comment is sought on the proposed alternative of leaving the election with the registrant, on the condition that it bear the costs of mailing the requestor's soliciting materials to securityholders if it chooses to mail rather than to provide the list.

DATES: Comments should be received on or before August 9, 1991.

ADDRESSES: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7-XX-91. All comment letters will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Catherine Dixon, Division of Corporation Finance, at (202) 272-3097, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

I. Executive Summary

In recent years, securityholders have sought a more active participatory role in the governance of public issuers. Prompted by actions of management, state legislatures, and courts having the intent or effect of limiting securityholder voting rights, as well as governmentally imposed fiduciary voting obligations and the practical difficulties attendant to divestiture of sometimes substantial portfolio securities holdings, individual and institutional investors alike have focused increasingly on their rights and obligations to cast informed proxy votes. Both institutional and individual securityholders have undertaken to influence issuer decisionmaking through a variety of means in the proxy solicitation context, including discussion with other securityholders and direct dialogue with boards of directors and management. As securityholders' awareness of the rights and responsibilities of ownership has heightened, there has been a growing public focus on the Commission's proxy rules and their impact upon the process of inter-securityholder communication, in particular on the ability of securityholders to take issue with management through the proxy voting process.

During its review of limited partnership "roll-up" transactions,[3] the Commission has learned of substantial investor concern regarding the restraints and costs imposed by the proxy rules on collective action by individual investors in limited partnerships who wish to respond to what they perceive as unfair transactions.[4] Among the principal impediments investors have cited are the need to comply with the entire panoply of proxy disclosure and filing requirements simply to communicate lawfully any objections to a proposed roll-up to more than 10 other limited partners;[5] the difficulty limited partners encounter in obtaining a list of securityholders from the general partner to facilitate such communications;[6] and the lack of sufficient time to enable investors to evaluate and comprehend the often complex roll-up disclosure documents.[7]

For more than a year,[8] the Commission has been engaged in a

[8] Chairman Richard C. Breeden formally announced the commencement of the Commission's proxy review project in a speech to the Council of Institutional Investors in April 1990. See Remarks of Richard C. Breeden, Chairman, U.S. Securities and Exchange Commission, Council of Institutional Investors Annual Meeting (Wash., DC, April 2, 1990).

VOL 56 ISS 122 JE 25 1991 UMI

comprehensive review of the current efficacy of the federal proxy rules as applied to all registrants in light of such recent developments as the significant change in securityholder demographics resulting in a concentration of institutional equity ownership and voting power, and increasing securityholder activism with respect to matters of corporate or partnership governance. This review encompasses, but is not limited to, the significant number of letters received by the Commission that either propose or oppose revision of the existing proxy system.[9]

Proposals for change in the current proxy regulatory scheme, submitted to the Commission by the California Public Employees Retirement System ("CalPERS"), the United Shareholders Association ("USA"), and other shareholder organizations, as well as by individuals such as Elmer Johnson, a former corporate general counsel, manifest a strong concern that the Commission's proxy filing and disclosure requirements function to restrict unduly securityholder communications not only with one another, but also with the issuer's management and board of directors as well as third-party sources of proxy voting information unaffiliated with any person participating in a particular solicitation.[10] Such diverse entities or persons as the American Bar Association's Subcommittee on Tender Offers and Proxy Solicitations, the United Mineworkers of America, and the American Corporate Counsel Association to varying degrees share this concern. Conversely, organizations such as The Business Roundtable, the American Society of Corporate Secretaries and the Business Council of New York object to modification of the proxy rules to address these concerns, arguing that the recent success of securityholders in achieving their corporate governance goals through the proxy system attests to the adequacy of the federal proxy rules in protecting securityholder voting rights.

Recognizing the fundamental importance of the securityholder franchise, Congress granted the Commission very broad authority to regulate proxy solicitations pursuant to section 14(a) of the Exchange Act:

> It shall be unlawful for any person, by use of the mails or by any means or instrumentality of interstate commerce or of any facility of a national securities exchange or otherwise, in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors, to solicit or to permit the use of his name to solicit any proxy or consent or authorization in respect of any security (other than an exempted security) registered pursuant to section 12 of this title.

This sweeping grant of regulatory authority was based on a strong Congressional belief that:

> (F)air corporate suffrage is an important right that should attach to every equity security bought on a public exchange." * * * For this reason, the proposed bill (resulting in section 14(a)) gives the Commission * * * the power to control the conditions under which proxies may be solicited with a view to preventing the recurrence of abuses which have frustrated the free exercise of the voting rights of stockholders."[11]

The Commission's review of its proxy rules and the voting process those rules overlay is focused principally on three basic questions:

(1) Do the rules unnecessarily restrict or interfere with the ability of securityholders to communicate among themselves, or with management?

(2) Do the rules impose unnecessary costs on the registrant and soliciting persons?

(3) Are there securityholder interests that are not adequately addressed under the current rules?

The issues being considered within this review are diverse and wide-ranging. Some raise substantial policy questions, whereas others are quite technical in nature and focus on the efficiency of the proxy and voting processes. The proposals made today are intended to facilitate securityholder communications, and to reduce the costs of compliance with the proxy rules for all persons engaged in a solicitation, registrants as well as securityholders, consistent with the protection of investors. If adopted, these proposals would reduce substantially the costs and restraints cited by limited partners as impairing their ability effectively to express opposition to roll-up transactions they consider to be unfair.

A new exemption from the proxy filing and disclosure requirements is proposed that would cover a "disinterested" person's communication with, or other form of solicitation of, securityholders with respect to a matter to be acted upon by such securityholders pursuant to a solicitation of proxies, consents or authorizations. A "disinterested" person would be defined as a securityholder or other person who has no material economic interest (other than as a securityholder) in the matter subject to securityholder action, provided that no form of proxy, consent or authorization is sought either by such person or on its behalf. Thus, for example, a limited partner who receives a proxy statement and form of proxy from a general partner soliciting a proxy to approve a roll-up may communicate his or her objections freely to other limited partners without having to comply with the proxy filing and disclosure

---

[9] All but two of the more than 40 submissions to the Commission are in the form of letters addressed to the Commission or staff of the Division of Corporation Finance. These submissions have been made available to the public in File No. 4-353. Two of the submissions are cast as formal rulemaking petitions pursuant to Commission Rule of Practice 4 (17 CFR 201.4): The Petition of the United Shareholders Association, dated and filed March 20, 1990 ("USA Petition"), and a letter from Fidelity Management & Research Co. to Linda C. Quinn, dated July 16, 1990, and filed July 25, 1990 ("Fidelity Letter"). More than 500 letters have been submitted by individual USA members in support of the organization's petition. The Commission also has considered, in the course of its review, various legislative proposals for revision of the proxy system introduced during the present and previous sessions of Congress, as well as ideas for proxy reform propounded by members of the academic and legal communities.

[10] See Commission Public File No. 4-353.

[11] H.R. Rep. No. 1383, 73d Cong., 2d Sess. 13-14 (1934). See also S. Rep. No. 1455, 73d Cong., 2d Sess. 77 (1934) (emphasis added) (mindful that securityholders are entitled to information and a voice in the "major policy decisions" made pursuant to the proxy voting process, "the committee recommends that the solicitation and issuance of proxies be left to regulation by the Commission"). See *Mills* v. *Electric Auto-Lite Co.*, 396 U.S. 375, 381 (1970); *J.I. Case* v. *Borak*, 377 U.S. 426, 431-32 (1964). Other federal courts have construed expansively the Commission's Section 14(a) authority. See, e.g., *SEC* v. *Transamerica*, 163 F.2d 511, 516 (3d Cir. 1947)("(I)t was the intent of Congress to require fair opportunity for the operation of corporate suffrage. The control of great corporations by a very few persons was the abuse at which Congress struck in enacting Section 14(a)."), cert. denied, 332 U.S. 847 (1968); *Greater Iowa Corp.* v. *McLendon*, 378 F.2d 783, 787 (8th Cir. 1967) (in construing scope of Section 14(a), the court opined that "(w)e are aware that historically it is extremely difficult to oust entrenched management or even to challenge directors to account for their managerial responsibilities. We think dissenting securityholders have (an) absolute right to challenge entrenched management and to question entrenched management's stewardship (through the proxy process). No arbitrary blocks or barriers should be raised by the courts in exercising this phase of corporate suffrage."). Indeed, as the Court of Appeals for the D.C. Circuit emphasized, the "clear import of the language, legislative history and administration of section 14(a) is that its overriding purpose is to assure to corporate shareholders the ability to exercise their right—some would say their duty—to control the important decisions which affect them in their capacity as stockholders and owners of the corporation." *Medical Comm. for Human Rights* v. *SEC*, 432 F.2d 659, 680-81 (DC Cir. 1970), vacated as moot, 404 U.S. 403 (1971). Almost 20 years later, this court clearly recognized the statutory authority vested in the Commission to regulate the proxy solicitation process, and Congress's intention that this authority encompass the power to regulate disclosure and the conditions under which proxies are solicited. See *SEC* v. *The Business Roundtable*, 905 F.2d 406 (D.C. Cir. 1990)(holding, however, that this section 14(a) authority could not support Commission Rule 19c-4 (17 CFR 240.19c-4)).

requirements. Consistent with the investor protection goal of section 14(a), however, this exemption would not insulate any solicitation from the antifraud prohibitions of Rule 14a-9.[12] Comment is sought on alternatives to facilitate securityholder communications while maintaining a public record of the otherwise exempted solicitation effort.

The Commission in addition is proposing to amend its proxy rules to extend the type of solicitation material not subject to a preliminary filing requirement to encompass all proxy soliciting materials, other than those proxy statements and forms of proxy not already permitted to be filed solely in definitive form. The proposed amendments also would provide that all proxy materials, whether in preliminary or definitive form, would be public upon filing. These proposed changes are intended to provide greater ease of communication with securityholders by registrants and soliciting securityholders alike, and to reduce compliance and timing costs for both.

Finally, the Commission proposes today to amend Rule 14a-7 to permit the person making a request for a securityholder list under the rule, rather than the registrant, to elect whether, at his or her own expense, to obtain the list subject to prescribed limitations on the scope of its use, or to have the registrant mail the requestor's soliciting materials. The proposed amendments to Rule 14a-7 further would expand the required stockholder list information to include both the number of securities held by identified holders, and certain specified information regarding beneficial ownership to the extent such information is reasonably available to the registrant. Comment is solicited on an alternative version of the proposed amendment that, while leaving the election with the registrant, would impose the cost of mailing on the registrant.

A. The Existing Proxy Regulatory Framework

Any solicitation of proxies in respect of securities registered pursuant to section 12 of the Exchange Act [13] or issued by an investment company registered under the Investment Company Act of 1940 [14] is subject to the filing and disclosure requirements of the Commission's proxy rules.[15] As defined by the Commission, the term "solicitation" encompasses not only a request that a shareholder execute a proxy, but also "(t)he furnishing of a form of proxy or other communication to securityholders under circumstances reasonably calculated to result in the procurement, withholding or revocation of a proxy." [16] Thus, the proxy rules apply to any person seeking to influence the voting of proxies, regardless of whether the person is seeking authorization to act as a proxy. Both the courts and the Commission have construed this necessarily fact-intensive test broadly to bring within the ambit of the proxy rules any communication that, under the totality of relevant circumstances, is considered "part of a continuous plan ending in a solicitation and which prepare(s) the way for its success." [17]

Rule 14a-3(a) [18] bars commencement of any solicitation covered by the proxy rules until shareholders receive a written proxy statement containing the information prescribed by Schedule 14A.[19] Except with respect to proxy statements filed on behalf of registrants that address only specified routine, or "plain vanilla," matters,[20] Rule 14a-6(a) requires that the proxy statement, together with the form of proxy and any other soliciting material to be furnished concurrently to shareholders, be filed in preliminary form with the Commission at least ten days before transmittal to shareholders. In recognition of the timing problems presented by these filing and dissemination requirements where there are opposing solicitations or other third-party actions that could affect the outcome of a solicitation, Rules 14a-11(d) [21] and 14a-12 [22] authorize solicitations before proxy statement delivery in connection with contested election and other, non-election solicitations, respectively. These solicitations nevertheless remain subject to a five-business day preliminary filing requirement.[23]

Exemptions from application of the filing and disclosure requirements of the proxy rules, but not from the antifraud provisions of Rule 14a-9, have been adopted by the Commission for non-issuer solicitations directed to 10 or fewer persons,[24] and for proxy voting advice rendered in the ordinary course of business by financial advisers to persons with whom the adviser has a prior business relationship.[25] Other exemptions have been promulgated for solicitations of beneficial owners by record owners, solicitations by beneficial owners with regard to their securities, solicitations in a public offering (other than Rule 145

transactions), solicitations subject to the Bankruptcy Code or Public Utility Holding Company Act of 1935,[26] and certain "tombstone" advertisements as to the availability of a proxy statement.[27]

The proxy rules do not impose a filing obligation on securityholders who simply communicate mutual concerns regarding the issuer's affairs prior to a formal proxy solicitation, so long as the communications are not reasonably calculated to "prepar(e) the way" for a solicitation.[28] However, the uncertainty generated by expansive judicial and administrative interpretations of the term "solicitation" and the perceived narrowness of the regulatory exceptions to that definition are believed by many to deter constructive information-sharing, both among securityholders and between registrants and their securityholders.[29] Critics cite by way of example the difficulty of assessing potential proxy liability stemming from inter-investor discussions of opposition to management proposals, particularly in the context of an impending partnership roll-up, or support for Rule 14a–8 [30] proposals presented by other securityholders in the registrant's proxy statement.[31]

II. Proposed New Rules and Amendments

Some have urged the Commission to address concerns regarding the broad scope of the present "solicitation" definition by promulgating a more precise regulatory standard that would define regulated soliciting activity by reference to such criteria as the timing, purpose and subject matter of a particular securityholder communication, and the communicator's relationship to a participant. However, the Commission and the courts traditionally have weighed these factors in what is necessarily a case-by-case analysis that does not lend itself well to a bright-line test.[32] Whether a particular communication should be deemed part of a solicitation turns on "the purpose for which the communication was published—*i.e.*, whether the purpose was to influence the shareholders' decisions," as evidenced by the substance of the communications and the circumstances under which they were transmitted.[33] This determination can be made only in light of such objective factors as the content of the communication itself, the audience to which it is directed, its timing with respect to a proxy solicitation, and the connection or common interest, if any, between the communicators and the soliciting parties.[34]

The Commission is proposing a new exemption that would promote the communication of material information to securityholders through removal of the prescribed proxy filing and disclosure obligations, while retaining the antifraud protections of Rule 14a–9, for those who wish to solicit on any matter subject to action by securityholders, but who do not seek the authorization to act as a proxy for, or obtain a consent or authorization from, such securityholders. All proxy disclosure and filing requirements would continue to apply to solicitations by the registrant and other persons seeking the power to act by proxy, consent or authorization, or who otherwise have a material economic interest in the outcome of a solicitation other than merely as a securityholder of the registrant.

To streamline the solicitation process, reduce costs and minimize timing concerns consistent with the protection of securityholders, the proposals in addition would eliminate the preliminary filing requirements for soliciting materials, other than the required written proxy statement and any form of proxy. All soliciting material would continue to be filed with the Commission in definitive form. The current exemption from filing proxy statements in preliminary form for "plain vanilla" registrant proxy statements would remain unchanged.

Also proposed as a means of facilitating securityholder communication in furtherance of the Commission's statutory duty to assure informed proxy voting decisions is an amendment to Rule 14a–7 that would render more meaningful the securityholder information contained in securityholder lists, and would make such lists more readily accessible to soliciting securityholders.

A. *"Disinterested Person" Exemption*

The new exemption to be embodied in proposed Rule 14a–2(b)(1) would apply to a "disinterested" person's communications with, or other forms of solicitation of, securityholders with respect to any matter subject to securityholder action pursuant to a solicitation of securityholder proxies, consents or authorizations. To qualify as "disinterested" within the meaning of the proposed exemption, a person must not: (1) Have a "material economic interest" in the outcome of the solicitation; (2) seek the power, either directly or indirectly, to act as a proxy on behalf of a securityholder; or (3) furnish or otherwise request a consent or authorization of a securityholder for delivery to the registrant. Any person acting on behalf of a person who does not meet the requirements of proposed Rule 14a–2(b)(1) likewise would not be entitled to claim disinterested status.

Examples of relationships that would give rise to a presumption that a disqualifying "material economic interest" exists would be outlined in a note to proposed Rule 14a–2(b)(1). Securities ownership in any person engaged in the solicitation of proxies, consents or authorizations alone would not constitute such an interest, unless the amount of securities owned gave rise to affiliate status.[35] Nor would mere employment by the registrant or by any person soliciting in opposition to a registrant's management, other than in the capacity of officer or director, ordinarily establish the requisite interest. On the other hand, a material economic interest would be imputed under the proposed rule to persons proposing an alternative transaction who solicit against a merger or other extraordinary transaction approved by the registrant's board of directors.[36] Similarly, a person who receives any commission, fee or other form of remuneration for preparation or transmission of a communication from any person involved or otherwise interested in the outcome of a matter subject to securityholder action, except a recipient of such communication, would be ineligible to rely upon the proposed exemption.[37] To illustrate, this exemption would not apply to a money manager or broker-dealer who is directly or indirectly induced by any person soliciting proxies, consents or authorizations, whether it be the registrant or an insurgent, to express support for a particular position to beneficial owners of the registrant's securities in exchange for the award or withdrawal of business. Nor would it apply to a person deemed to have a material economic interest in an investment company, such as the fund's investment adviser.[38]

In addition to not having a material economic interest, a person claiming "disinterested" status under the proposed exemption could not seek directly the power to act for a securityholder of the registrant, whether through a request for that holder's proxy to vote its securities, or the provision of the securityholder's consent or authorization for delivery to the registrant. Nor would a person be considered disinterested within the meaning of the proposed exemption if he sought to evade proxy filing and disclosure requirements by soliciting indirectly through another person the power to act on behalf of a securityholder. Moreover, any person who purports to engage in an exempt solicitation with respect to a particular meeting or subject matter of securityholder action pursuant to proposed Rule 14a–2(b)(1) could not continue to rely on the proposed exemption through the assertion of a change in purpose or intent should he subsequently solicit authority to act on behalf of securityholders concerning the same meeting or subject matter. Because the earlier solicitation would not qualify for exempt treatment under such circumstances, any failure to comply with the full panoply of the proxy rules as to that solicitation would be deemed a proxy violation.

As proposed, the amended rule would permit a securityholder that has procured the inclusion of a proposal in the registrant's proxy statement pursuant to Rule 14a–8 to rely on the disinterested person exemption, provided this securityholder was not soliciting its own form of proxy and had no material economic interest in the outcome of the vote. Inclusion of the securityholder's proposal in the registrant's form of proxy would not constitute a solicitation by the proponent of the power to act for other securityholders. The Commission requests comment on whether a securityholder whose Rule 14a–8 proposal is carried in the registrant's proxy statement should fall outside the ambit of the proposed exemption and be required to comply fully with all proxy filing and disclosure requirements.

Like the solicitations exempted by the existing provisions of Rule 14a–2(b), solicitations exempt from the proxy disclosure and filing provisions under the proposed rule would be subject to the Rule 14a–9 requirement that the communications in question not be materially false or misleading. This proposed exemption otherwise would not restrict in any manner either the medium [39] or content of a communication with securityholders.

Along with "disinterested" securityholders, there would be other categories of persons or entities eligible to rely on the proposed exemption. One such category would encompass organizations or associations comprised of securityholders or issuers that exchange information with members regarding such matters of common concern as proxy voting positions or views on corporate governance policy. Another category would be providers of shareholder advisory services,[40] including organizations offering proxy voting information or recommendations, to the extent these providers do not receive a fee, commission or other form of consideration from any client conditional upon the disposition of the vote. Comment is requested on the appropriateness of coverage of each of the above categories, indicating whether and under what circumstances the interest of one member in a solicitation should disqualify the group from relying on the exemption. In particular, comment is requested as to whether the proposed exemption should be available only to securityholders.

Proposed Rule 14a–2(b)(1) is intended to achieve an appropriate balance between securityholders' interest in gaining access to reliable, truthful information that would facilitate voting decisionmaking, and the countervailing need to ensure that all materials disseminated to securityholders that may influence their vote will be free of fraud. Commenters are requested to address whether the proposed exemption would strike the desired balance. What activities that would be exempted by the new rule should be subject to some or all of the Commission's proxy rules, and why? Are there alternative, more appropriate means of facilitating securityholder communications?

Some have contended that all securityholders, including those not directly solicited, should be aware of and have access to the soliciting statements of any person engaged in a solicitation. Both securityholders and registrants, they argue, would be better served by requiring all soliciting efforts to be disclosed to the public, thereby providing more information to the securityholder body and permitting the substance of the solicitations to be reviewed by and responded to by the other persons involved in the solicitations.

Under the current proxy rules, a person engaged in a solicitation is not required to solicit all securityholders.[41]

[36] See Example (b) to Note, Proposed Rule 14a–2(b)(1).

[37] See Example (d) to Note, Proposed Rule 14a–2(b)(1).

[38] Paragraph (c) of the Note to proposed Rule 14a–2(b)(1) would specifically state that an "interested person" of an investment company registered under the Investment Company Act of 1940 ("Investment Company Act") could not claim to be a disinterested person. See section 2(a)(19) of the Investment Company Act (15 U.S.C. 80a–2(a)(19)). Interested persons include, among others, an investment company's investment adviser, principal underwriter, and legal counsel, any broker-dealer, and any "affiliated person" of the investment company, its investment adviser or principal underwriter. See section 2(a)(3) of the Investment Company Act (15 U.S.C 80a–2(a)(3)).

[39] Permissible communication methods under the proposed exemption thus would include, but would not be limited to, direct written communications with shareholders, whether by letter, newspaper advertisements or other print media. Also covered would be scripts of speeches or presentations made to the public at large or specifically to shareholders through broadcast or other electronic media, such as television, radio or video. See Rule 14a–6(h) (17 CFR 240.14a–6(h)).

[40] One such organization is the Investor Responsibility Research Center, a non-profit organization that furnishes analyses of general or specific proxy proposals to clients, but do not render voting advice. For-profit organizations that provide such analyses, as well as proxy voting advice, to clients include Institutional Shareholders Services, Inc. and Analysis Group.

[41] As discussed *supra* at n. 15, even where no proxies are solicited in respect of an annual or other securityholders' meeting, the registrant must file and disseminate an information statement on Schedule 14C with disclosure substantially equivalent to that mandated in Schedule 14A.

VOL 56 ISS 122 JE 25 1991 UMI

However, the required public filing of all soliciting materials, together with the mandated proxy statement, makes publicly available extensive information concerning the solicitation. Oral solicitations are permitted, and generally are not subject to any filing requirement,[45] except for the mandated proxy statement.

The Commission requests comment on an alternative to proposed Rule 14a–2(b)(1) that would permit disinterested persons, who by definition would not be seeking a proxy, to engage in a solicitation without having to prepare a proxy statement, provided that all written materials used in the solicitation are filed with or submitted to the Commission, or otherwise made publicly available at the time they are first used to solicit. If this approach were followed, should a proxy statement be required to be filed with the Commission for public notice purposes, but not required to be distributed to securityholders? Should a more limited form of notice identifying the person engaged in the solicitation, the size of the solicitation and a brief description of the substance of the solicitation be required? Would such an approach lead to greater reliance on oral rather than written solicitation, and if so, what additional safeguards should be imposed by the rules?

B. Preliminary Filing and Staff Review of Proxy Solicitation Materials

1. Background

As noted, Rule 14a–6 requires, with narrow exceptions for certain registrant "plain vanilla" soliciting materials, that proxy statements and additional proxy soliciting materials relating to contested solicitations be filed in non-public, preliminary form with the Commission prior to delivery to shareholders.[46] Similarly, present Rules 14a–11(e) and 14a–12 require that solicitation materials disseminated in advance of the written proxy statement be filed in preliminary form five business days in advance of dissemination.[47] Additional soliciting material issued after dissemination of a proxy statement, as well as personal soliciting material committed to writing, are subject to two and five business day preliminary filing requirements, respectively.[48] Finally, Schedules 14B, while filed in definitive form, must be on file with the Commission five business days prior to the commencement of an insurgent's solicitation with respect to an election contest.[49] Pursuant to Rule 14a–6(f),[47] all preliminary proxy materials are not available for public inspection until definitive copies are filed.

The Commission is proposing to eliminate preliminary filing requirements with respect to all soliciting materials and Schedules 14B, other than the proxy statement and form of proxy (unless currently permitted to be filed only in definitive form). Instead, all soliciting materials would be filed with, or mailed for filing to, the Commission simultaneously with their use.[50] Moreover, the Commission proposes to eliminate the non-public filing status of the remaining preliminary proxy materials.

The Commission's imposition by rule of a pre-dissemination filing requirement, particularly with respect to election contests, has been challenged as unnecessary to protect shareholders from false or misleading statements and disruptive of the solicitation process. The USA Petition asserts that this requirement violates the First Amendment's guarantee of free speech, even if proxy solicitation material is considered commercial speech, since the regulatory scheme is more extensive than necessary.[51] While the ABA endorses the concept of preliminary staff review of proxy soliciting materials containing relevant financial information, it contends that "soliciting materials relating to election contests may not require preliminary review because they are subject to the adverse party's scrutiny."[52] NL Industries ("NL") likewise advocates elimination of the preliminary filing review procedure, but only in contested situations. Such reform is necessary, in its estimation, to minimize the advantage afforded management by the 1967 amendment to Rule 14a–6 dispensing with preliminary review of certain "plain vanilla" filings.[53] CalPERS has challenged on fairness grounds preliminary staff review of independent securityholder soliciting materials in support of Rule 14a–8 proposals included in management's proxy materials, arguing that registrant materials containing these proposals are not subject to such review.[54]

Finally, the preliminary review process has been the object of considerable debate in Congressional hearings. Witnesses affiliated with management and insurgent groups alike have criticized the process as interfering unduly with effective communication with shareholders.[55]

2. Proposed Amendments

The Commission is proposing to amend Rules 14a–11 and 14a–12 to eliminate the requirement that proxy soliciting materials permitted to be disseminated prior to the furnishing of the proxy statement must be filed in preliminary form five business days before delivery to securityholders; such materials thus would be required to be filed only in definitive form.[56] With respect to contested solicitations relating to the election of directors subject to Rule 14a–11, the Commission is proposing to eliminate the requirement that an insurgent's Schedule 14B be on file prior to commencement of a solicitation subject to the rule. Specifically, the Schedule 14B would be required to be on file within five business days following the commencement of a Rule 14a–11 solicitation or the filing of the preliminary proxy statement, whichever is earlier. As discussed, these amendments are intended to streamline the solicitation process by reducing costs and alleviating timing concerns for all persons engaged in a solicitation, while assuring that full and fair disclosure is made to facilitate informed securityholder voting.

Comment is requested on the costs and benefits of the proposed approach. Should the requirement for filing Schedules 14B be eliminated, with the disclosure called for by that schedule to appear in the proxy statement? Commenters also should discuss whether Rule 14a–12 should be amended to permit its use in connection with any solicitation.

The Commission also is proposing to amend Rule 14a–6 to allow all "additional" soliciting materials, or material used subsequent to dissemination of the written proxy statement,[57] to be filed only in definitive form at the time of dissemination. Personal solicitation materials subject to Rules 14a–6(d) and 14a–6(h) similarly would be required to be filed only in definitive form at the time of their dissemination or other use.[58] Commenters should address whether pre-filing and review of such materials are needed.

The proposed rules would not rescind existing preliminary filing and staff review requirements relating to the written proxy statement and form of proxy. As in the case of roll-ups, proxy statements may be subject to extensive staff review and comment where they involve complex transactions, or transactions that affect substantially the rights of shareholders or limited partners. In addition, the proxy statement and form of proxy are subject to numerous technical and compliance requirements that could affect the validity of the proxy and therefore lead to disenfranchisement of securityholders, particularly with respect to issues arising under Rule 14a–4 or state-law issues as to which the staff would seek additional disclosure during the review and comment process. Where proxy statements are required to disclose financial information, including audited financial statements, the staff often provides detailed accounting comments. The Commission is soliciting comment, however, as to whether there are additional classes of proxy statements that appropriately could be excluded from the preliminary filing and review process. Commenters also are requested to address the fundamental question whether preliminary filing should be required in any case. In the event preliminary filing of proxy statements is not required, what would be the effect on the process of post-dissemination review should the Commission adopt a procedure, similar to the tender offer model, under which the staff comments on materials contemporaneously with the use thereof by registrants or insurgents to solicit securityholder proxies?

Although the proposals would not dispense with preliminary filing of the written proxy statement or form of proxy, the proposed amendments would eliminate the non-public treatment of preliminary proxy statements. Under the proposed approach, preliminary proxy materials would be treated in a manner similar to registration statements required by section 5 of the Securities Act of 1933.[59] Accordingly, the preliminary filing requirement would permit the use of the preliminary form of the proxy statement, but would bar the transmittal or use of the form of proxy during the ten-day period or a shorter period in the case of earlier clearance. The Commission requests comment on the likelihood that soliciting persons would choose to make the general distribution of the proxy statement following staff review and clearance of the form of proxy.

Specific comment is sought with respect to the appropriateness of eliminating preliminary filing and confidential treatment of proxy statements and other soliciting materials, alone or in combination, in the context of the following types of solicitations.

a. *Election Contests and Other Contested Solicitations.* Contested solicitations relating to the election of directors or proposals sponsored by management or shareholders are argued by some to present the most obvious case for elimination of preliminary filing and review requirements, since the adversarial nature of the transaction itself is believed to serve as a policing mechanism. Prompt and effective communication of opposing views is critical to success in such solicitations, and the parties frequently regard the Commission's review processes as favoring one side over the other. Counsel for the competing camps may be in the best position to monitor not only the adequacy and truthfulness of its client's materials, in order to avoid the undesirable consequences of a court or Commission finding that the materials are misleading, but also the opponent's materials. A well-established private right of action under the proxy rules,[60] coupled with the threat of Commission enforcement action, poses a significant deterrent to misconduct given judicial sensitivity to challenges that proxy materials may have been materially false or misleading.[60]

Others have argued, however, that the preliminary review process exerts a beneficial "calming" effect on participants when emotions in a proxy contest become heated, and thus prevents the dissemination of materials that contain objectionable statements. Election contests often present the most difficult issues relating to bona fide nominees, the form of proxy and the scope of discretionary authority permissible under the proxy rules, and thus often engender significant staff comments on these issues. Commenters are invited to address the merits of each of the opposing arguments.

b. *Securityholder Proposals Subject to Rule 14a–8.* The Commission in addition is considering whether non-exempt shareholder soliciting material in support of proposals included in management's proxy materials pursuant to Rule 14a–8 should be subject to

---

[45] While there is no obligation to commit oral solicitations or instructions to writing, Rule 14a–6(d) (17 CFR 14a–6(d)) mandates that, if so committed, such written material or instructions be filed at least five calendar days before their delivery to persons who will conduct the personal soliciting program.

[46] Under Rule 14a–6(a) (17 CFR 240.14a–6(a)), proxy statements must be on file 10 calendar days prior to the dissemination of definitive materials, unless the staff by delegated authority accelerates the period. Additional soliciting materials must be on file two business days prior to dissemination pursuant to Rule 14a–6(b) (17 CFR 240.14a–6(b)). No preliminary filings are required with respect to speeches, press releases or scripts. Rule 14a–6(h) (17 CFR 240.14a–6(h)).

[47] Materials disseminated in advance of the proxy statement must be on file five business days prior to dissemination, unless accelerated. Rule 14a–11(e) (17 CFR 240.14a–11(e)) (election contests) and Rule 14a–12(b) (17 CFR 240.14a–12(b)) (other).

[48] Additional soliciting material is any material "relating to the same meeting or subject matter furnished to security holders subsequent to the proxy statement * * *," which material must be filed with the Commission at least two business days prior to dissemination to security holders. Rule 14a–6(b). Personal solicitation material generally consists of written material or instructions that form the basis of a program of personal, typically oral solicitation of securityholders, and must be filed with the Commission at least five calendar days before use. Rule 14a–6(d).

[49] 17 CFR 240.14a–102. While an insurgent's Schedule 14B must be on file five business days prior to dissemination of any contested soliciting material relating to the election of directors, the registrant only need file its Schedules 14B within five business days after a dissemination subject to the rule. See Rule 14a–11(c) (17 CFR 240.14a–11(c)).

[47] 17 CFR 240.14a–6(f).

[50] This is consistent with current filing requirements for definitive materials. See, e.g., Rule 14a–6(c) (17 CFR 240.14a–6(c)).

[51] *USA Petition, supra,* at 30, citing *Central Hudson Gas & Electric Corp.* v. *Public Service Commission,* 447 U.S. 557 (1980).

preliminary filing and review by the staff regardless of whether the solicitation is opposed by management. One correspondent has pointed to perceived inequities created by the 1987 amendments to Rule 14a–8, which enable an issuer to comment in opposition to a shareholder proposal incorporated in management materials, yet compel any proponent who wishes to solicit independently to file separate soliciting materials in preliminary form and wait 10 days before dissemination.[86] While seeking comment on this issue, the Commission recognizes that solicitations in support of a Rule 14a–8 proposal normally would be exempt under the proposed "disinterested person" exemption unless the securityholder proponent sent out its own proxy. Thus, in light of the proposed disinterested person exemption, solicitations in support of a Rule 14a–8 proposal may be subject to filing requirements in the uncommon situation where a Rule 14a–8 proponent would seek power from other securityholders to act as proxies, or otherwise would have a disqualifying financial interest in the solicitation.

Commenters' views are requested as to the relative costs and benefits of adding proponent soliciting materials to the category of "plain vanilla" filings contained in Rule 14a–6(a). Should a distinction be drawn in this regard between the proponent's proxy statement and any additional soliciting materials that may be circulated?

c. Mergers and Other Extraordinary Transactions. Mergers, acquisitions and other extraordinary transactions submitted to a securityholder vote generally have significant implications for securityholders, as illustrated by limited partnership roll-ups typically characterized by the imposition of supermajority vote requirements for removal of management, management conflicts of interest arising from substantial increases in compensation and other benefits accruing to the roll-up sponsors and their affiliates as a result of the roll-up, and the absence of state-law dissenters' rights. Detailed, understandable proxy disclosure therefore normally is required of the terms of a proposed extraordinary transaction, and its effects on securityholders' rights, coupled with the interest of management in its consummation, to enable securityholders to formulate informed voting decisions. Given the resulting complexity of this disclosure, which often includes historic and in many instances pro forma financial statements along with the extensive information mandated with respect to the rights of securityholders and the interests of management, some have argued that preliminary proxy filing and staff review requirements applicable to solicitations in connection with mergers, acquisitions and other extraordinary transactions involving corporations and limited partnerships, including registered exchange tender offers, would be appropriate. In many cases, these proxy statements are part of a registration statement filed in accordance with section 5 of the Securities Act of 1933.

Comment is sought as to whether there are securityholder interests that would override the benefits attendant to pre-dissemination filing and staff review. Should non-exempt solicitations in opposition to a merger proposal likewise be subject to preliminary filing and staff review requirements?

C. Access to Lists of Securityholders

An important concern raised by holders of corporate equity and limited partnership interests alike is the difficulty often encountered in obtaining access to securityholder lists that would permit the solicitation of fellow investors on matters subject to a securityholder vote. The ability to reach other securityholders is a key factor in effective communication with securityholders by any other securityholder who may wish to engage in a proxy solicitation. The Commission is proposing to amend Rule 14a–7 to eliminate the registrant's existing choice to mail a requesting securityholder's proxy materials rather than produce a securityholder list upon request, and to transfer that choice to the requesting securityholder. Moreover, the proposed amendment would expand the scope of the list to encompass the names, addresses and securities holdings of both record and non-objecting beneficial owners ("NOBOs") or consenting beneficial owners ("COBOs").[91]

By vesting in the registrant discretion to withhold a securityholder list through the exercise of its right to mail, Rule 14a–7 in its present form operates to confer on the registrant's management significant control over the timing and effectiveness of a securityholder's solicitation. Soliciting securityholders generally prefer use of a securityholder list to permit them to control the timing of their solicitation, and to identify and communicate directly with other securityholders. Since the choice of whether to produce a list or mail under current Rule 14a–7 resides exclusively with the registrant, those securityholders who wish to employ the list to conduct a personal solicitation normally must pursue in the courts any state statutory or common-law rights thereto.[92] Added delay and cost typically associated with seeking a state-law judicial remedy under the often significant time constraints of a proxy solicitation undermine the ability of the soliciting person to provide securityholders with information bearing on their proxy voting decision.[93]

[86] CalPERS Letter, *supra*, at 21

[91] Under the Commission's shareholder communications rules, brokers, banks and other recordholders of stock for beneficial owners must compile a NOBO list at an issuer's request. See Rule 14b–1(c) (17 CFR 240.14b–1(c)). Bank recordholders also must include the names of COBOs, or those persons holding securities in bank customer accounts opened before December 28, 1986, who consent to disclosure of their beneficial ownership of the issuer's securities. See Rule 14b–2(a) (17 CFR 240.14b–2(a)). In 1978, the Commission indicated that "the question of non-issuer access to securities position listings * * * is best addressed in the context of the Commission's tender offer and proxy rules rather than in general provisions such as (then) proposed Rule 17Ad–6." Exchange Act Release No. 16448 (Dec. 20, 1979).

[92] CalPERS Letter, *supra*, at 8 (this state pension fund was advised by a portfolio company that the only means of obtaining a list would be through litigation). The likelihood of the issuer's election to mail forces soliciting securityholders to rely principally on state law to secure a list. See *Aranow, supra*, at 8, 26–28; Black, *supra*, at 842; Division of Corporation Finance Proxy Rules Reference Book at 109 (1989).

[93] A significant number of the ABA commenters point out that, while stockholder lists are generally available under state law, they often can be obtained only "after court challenges involving considerable costs and delays * * *." ABA Letter, *supra*, at 23 (citations omitted). See, e.g., *Sadler v. NCR Corp.*, 928 F.2d 48, 49 (2d Cir. 1991) (period of approximately two months elapsed between securityholder demand for list to permit direct communication with securityholders in ongoing joint proxy contest and tender offer, and federal appellate court's resolution of issue on the merits on registrant's appeal from district court's order that list of securityholders, including NOBOs, be provided to requesting securityholders). See *supra* n. 62. Other recent contests for control of public companies have been characterized by litigation, commenced either by the requesting insurgent/offeror or a resistant issuer, arising from issuer refusals to provide a securityholder list to a challenger. See, e.g., *Gramercy Realty Associates v. Firecom, Inc.*, No. 09510/91 (N.Y. Sup. Ct., Order entered June 11, 1991) (court granted insurgents' application for order directing issuer to produce stockholder list and other corporate documents under New York law; action filed on May 8 following issuer's denial of April 29 demand for list and other documents); *Sears, Roebuck & Co. v. Monks*, No. 9975/91 (N.Y. Sup. Ct., Cplt. filed March 13, 1991) (action by issuer for declaratory judgment that insurgent seeking single board seat not entitled to list under New York law; dismissed without prejudice following election of management's slate at annual meeting); *Schneider, S.A. v. Square D Co.*, No. 11988 (Del. Ch., Cplt. filed March 8, 1991) (insurgent/offeror sued for stockholder list and related materials in furtherance of combined proxy solicitation and tender offer; stipulated settlement

Continued

In this regard, little progress appears to have been made since the Commission sought public comment in 1977 on whether it "(s)hould amend the proxy rules to require issuers to furnish shareholders with shareholder lists upon request."[94] Responding in the affirmative to this question, one commentator aptly described securityholders' recurring dilemma in testimony before the Commission:

> Of course, the shareholder has a theoretical right to a shareholder list under state law, but * * * management uses corporate funds to fight these requests routinely. And unless the court is extremely expeditious, by the time you get the shareholder list under state law, you may have lost a lot of valuable time.[95]

Similar concerns prompted the Commission's Tender Offer Advisory Committee to recommend in 1983 that the proxy (and tender offer) rules be amended to compel prompt registrant provision to any person who has announced a proxy contest (or tender offer), at his expense, of a shareholder list and clearinghouse security position listings within five calendar days.[96] In 1984, the Commission endorsed this recommendation in testimony before Congress.[97] Since that time, the increasing prevalence of supermajority voting provisions in the corporate and limited partnership sectors (roll-ups) has made expeditious access to a list of both record and beneficial holders of even greater importance to an insurgent.[98]

Pursuant to its section 14(a) mandate to safeguard the securityholder franchise by assuring its effective exercise through the proxy voting process, the Commission is proposing to permit the requesting securityholder to decide whether it prefers access to a securityholder list or a registrant mailing of the requestor's soliciting materials. More specifically, at the written request of any holder of securities entitled to vote on the subject matter or meeting that forms the basis for an actual or intended solicitation, registrants that are soliciting or intend to solicit proxies with respect to the same subject or meeting would be required under the proposed amendment either to mail the requestor's proxy soliciting materials in accordance with Rule 14a–7(b), or, at the requestor's option, to provide the latter, pursuant to proposed Rule 14a–7(c), within five business days of receipt of such request with a reasonably current list of the names, addresses and, by contrast with the existing rule, security positions of each securityholder thus identified. As under the present rule, the requesting securityholder would be obligated to defray reasonable expenses incurred by the registrant in mailing or furnishing the list.

The proposed amendment would specify that the list could be used solely for the purpose of engaging in a solicitation of securityholders with respect to the subject matter or meeting for which the registrant is soliciting or intends to solicit. The types of permissible solicitations would include those exempt from the filing and disclosure requirements of the proxy rules under Rule 14a–2(b). However, if the registrant has actually commenced a solicitation, a list obtained pursuant to Rule 14a–7 could also be used for the purpose of communicating with other securityholders in response to the solicitation, even though the communication may not constitute a solicitation; for example, to "test the waters" or gauge the interest of other securityholders in determining whether to mount a solicitation in opposition to the registrant's management. The requestor would be required to represent that it will use the information solely for such purposes and will maintain the confidentiality of the information. Failure to abide by either representation would constitute a violation of the proxy rules.

Commenters should discuss the relative costs and benefits to both registrants and securityholders of the proposed change in regulatory approach, particularly with respect to shifting to the requesting securityholder the right to elect a securityholder list and conduct its own mailing, and the requirement that the amount of securities held by each securityholder be disclosed in the list. Does the five-business-day compliance period afford registrants sufficient time to respond to a securityholder's request? Discuss the propriety of limiting a requesting securityholder's use to the stated purpose, and any mechanisms for enforcing any such limitation. Should a minimum share ownership and/or holding period requirement, similar to that set forth in Rule 14a–8, be imposed? Should access to a securityholder list be limited to recordholders, or should it be expanded to cover beneficial owners?

To ensure that the securityholder list is reasonably current, should the list include all updating materials such as daily transfer sheets that are in or come into the possession of the registrant throughout the pendency of a

entered into two days later mandated list production); *Rabinovitz v. Instron Corp.*, MA 91–10039 (D. Mass., Cplt. filed March 28, 1991) (insurgent sued for injunctive relief, alleging violations of Regulation 14A and seeking production of NOBO list under state law; court ordered issuer to commence preparation of list pending decision on merits, list thereafter furnished pursuant to stipulated settlement on April 4, 1991); *Cede & Co. and Calvary Partners, LP v. Dixon Electronics, Inc.*, CA No. 11880 (Del. Ch., Cplt. filed Dec. 7, 1990) (insurgent sued to obtain list in connection with related proxy contest and tender offer; following stipulated settlement and order requiring issuer production of list, insurgent renewed request for injunctive relief on ground that issuer failed to comply with order to turn over NOBO list; pursuant to settlement reached in early January 1991, issuer agreed to adjourn meeting for seven days and to stipulate that all proxies received by insurgent prior to new meeting date would be valid); *First City Diversified, Inc. v. Armstrong World Indus., Inc.*, No. 90–1376 (E.D. Pa., March 7, 1990) (ordering issuer to provide list to insurgents under Pennsylvania law, while enjoining use thereof to communicate with securityholders on proposed charter amendments pending further order), *rev'd*, No. 1138 (3d Cir., April 3, 1990) (overturning lower court's order, finding that erroneous as a matter of law). Limited partners seeking access to a list of limited partners similarly have been compelled to resort to the courts when general partners have refused to supply the list upon request. See Bigelow Testimony, *supra*, at 7 (limited partner testified that "I found that even after I had paid approximately $1,500.00 to receive a list of investors to which we are entitled without any equivocation by the partnership agreement it still took 4 months and a law suit with additional expense to merely get an investor list."); see also *supra* n. 6 and accompanying text.

[94] See Exchange Act Release No. 13901 (Aug. 29, 1977) (42 FR 44660) ("(s)hould the Commission amend its proxy rules to require issuers to provide shareholders with shareholder lists upon request? If so, under what circumstances and subject to what conditions should shareholder lists be provided?").

[95] Testimony of Melvin A. Eisenberg, Professor of Law, UCLA-Berkeley, Public Hearing Before the Securities and Exchange Commission, In re Re-examination of Rules Relating to Shareholder Participation in Corporate Electoral Process and Corporate Governance Generally, at Tr. 1637 (Los Angeles, California, Oct. 14, 1977) (97–693). See Division of Corporation Finance, Securities and Exchange Commission, Staff Report on Corporate Accountability to the Senate Committee on Banking, Housing and Urban Affairs, 96th Cong., 2d Sess. 127–28 (Comm. Print 1980). In this report, the staff suggested that "(i)t may be appropriate * * * to give staff consideration to requiring (shareholder) access to the list, in certain circumstances, as opposed to giving the choice to the issuer. This would address the concerns of others (such as Professor Eisenberg) who thought Rule 14a–7 should be amended to give the shareholder, rather than the issuer, the option of obtaining a list or having management mail the material."). *Id.* at 129–30 (footnote omitted).

Shad, Chairman, Securities and Exchange Commission, Hearing Before the Subcommittee on Telecommunications, Consumer Protection and Finance of the House Energy and Commerce Committee at 18 (March 28, 1984).

[97] See *ibid.*

[98] For example, the Court of Appeals for the Second Circuit highlighted the significant adverse impact of NCR's 80% requirement, which had the effect of treating non-votes as "no" votes. In imposing the requirement that the issuer prepare and turn over a NOBO list to AT&T, the insurgent, the court stated that to deny the insurgent the opportunity to solicit beneficial holders was contrary to the equal access purpose of the New York foreign corporation list statute. *NCR Corp.*, 928 F.2d at 53.

VOL 56 ISS 122 JE 25 1991 UMI

solicitation? Should a breakdown of all depositary institution lists (CEDE breakdowns) be mandated? Discuss the appropriateness of requiring the registrant to supply the list, upon request, in the form of a magnetic computer tape and any related computer data processing as would be necessary for the requestor to make use of the tape, alone or in conjunction with a printout of the tape for verification purposes.

Unlike current Rule 14a–7, the securityholder list contemplated under the revised rule would include the prescribed identifying information not only for all recordholders, as now required, but also in specified circumstances for all beneficial owners who do not object (or who consent) to disclosure of such information in connection with the preparation for requesting registrants of lists of NOBOs (and/or COBOs) by brokers, dealers and banks in accordance with the Commission's shareholder communications rules.[69] Even though the federal proxy rules and applicable state-law voting requirements operate to require registrants to mail their written proxy statements indirectly to beneficial owners through the medium of the recordholders, rather than directly in reliance upon the NOBO (and/or COBO) list, registrants nevertheless may use this list to engage in personal solicitations of beneficial owners. The proposed amendments would extend to soliciting securityholders the same ability to communicate with beneficial owners.[70]

Under the proposed rules, beneficial ownership information would be mandated upon a securityholder's request where that information is either in the possession of, or reasonably available to, the registrant. As noted, the requesting securityholder would be required to use the beneficial ownership information solely to solicit or communicate with other securityholders and would be required to maintain the confidentiality of the information. If the registrant had not obtained the NOBO and/or COBO list at the time the request is received, the requestor would be required to share the costs of reimbursing brokers, dealers, banks and other recordholders imposed on the registrant by section 14a–12(b)(5).[71]

Comment is requested on the necessity or appropriateness of the proposal to require disclosure of NOBO (and COBO) information in securityholder lists. Is it necessary or appropriate to require a registrant to procure the preparation of a list containing such information if none has been obtained? Under what circumstances is a NOBO list "reasonably obtainable"? [72] Should the securityholder who obtains a list of beneficial owners be required to mail proxy materials though the recordholders, similar to the requirement imposed on the registrant by Rule 14a–13(b)?

The Commission is considering a possible alternative to the proposed revision that would leave vested in the registrant the decision to mail if it bears the cost of mailing a qualified requestor's soliciting materials. Commenters should address the costs and benefits of this alternative.

Like the current rule, the proposed amendment would provide a securityholder the right to a list or a mailing only where the registrant is soliciting or intends to solicit on the same subject matter or for the same meeting. It does not provide a general right to the securityholder list, but seeks to define the conditions for the solicitation of proxies pursuant to section 14(a) of the Exchange Act. The Commission is of the opinion that the Supreme Court's decision in *CTS Corp.* v. *Dynamics Corp. of America*,[73] does not affect the appropriateness of the Commission's proposal to adopt these amendments to Rule 14a–7. The Commission requests commenters' views on the appropriateness of the Commission's proposal.

III. Request for Comment

Any interested persons wishing to submit written comments on the proposed revisions to the Commission's proxy rules, as well as on other matters that might have an impact on the proposals contained herein, are requested to do so. The Commission also requests comment on whether the proposed rules, if adopted, would have an adverse effect on competition or would impose a burden on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a) of the Exchange Act.[74]

IV. Cost-Benefit Analysis

To evaluate the benefits and cost associated with the proposed amendments to Exchange Act Rules 14a–2(b), 14a–6, 14a–7, 14a–11 and 14a–12, the Commission requests commenters to provide views and data as to the costs and benefits associated with amending the filing requirements for proxy soliciting materials. The proposed "disinterested person" exemption, along with the proposed elimination of requirements to file preliminary proxy statements in specified circumstances should reduce some costs for those soliciting persons who meet the requirements of the proposed amendments.

The Commission also requests that commenters provide views and data concerning the costs and benefits of amending the securityholder list provision embodied in Rule 14a–7. The proposed modification of Rule 14a–7 may impose some additional costs on registrants.

Comments also are requested on the effects of all proposals on the costs to be incurred by small entities.

V. Initial Regulatory Flexibility Act Analysis

The initial regulatory flexibility analysis concerns proposed amendments to Exchange Act Rules 14a–2(b),[75] 14a–6,[76] 14a–7,[77] 14a–11[78] and 14a–12.[79] The analysis has been prepared by the Commission in accordance with The Regulatory Flexibility Act.[80]

A. Reasons for and Objectives of the Proposals

A proposed amendment to Rule 14a–2(b)(1) would create a new exemption for solicitations by persons not seeking authority to act as a proxy for securityholders. The objective of this amendment is to provide an exemption from all proxy rules except the antifraud provision, Rule 14a–9, to "disinterested" persons, or persons who do not have a material economic interest in the outcome of a matter subject to securityholder action pursuant to a solicitation of proxies, consents or authorizations, other than as a securityholder, and who do not seek a form of proxy, consent or authorization from securityholders to vote their shares as proxies.

Proposed amendments to Rules 14a–11 and 14a–12 would eliminate the requirement that pre-proxy statement solicitation materials be filed in preliminary, non-public form five business days in advance of dissemination, and would require only that such soliciting materials be filed with the Commission in definitive form contemporaneously with their dissemination to securityholders, and that the soliciting party simultaneously file a Schedule 14B. The purpose of the amendments is to reduce the costs and other burdens incurred by persons engaged in non-exempt solicitations, subject to the Rule 14a–9 proscriptions against false and misleading statements, in connection with solicitations currently permitted before the written proxy statement and form of proxy are filed with the Commission and disseminated to shareholders.

Currently, all proxy statements and forms of proxy are required to be filed in preliminary, non-public form with the Commission pursuant to Rule 14a–6. The proposed amendments to this rule, if adopted, would reduce the instances in which proxy soliciting material would be required to be filed in preliminary form and further would eliminate the confidential treatment of all proxy materials, whether filed in preliminary or definitive form. The objective of the proposed amendments is to enhance disclosure of material information to securityholders while decreasing burdens on registrants and other soliciting persons associated with the filing of preliminary proxy material. The proposed amendments also are intended to reduce administrative costs incurred by the Commission in processing this material.

A proposed amendment to Rule 14a–7 would require registrants to provide securityholders, upon written request and the satisfaction of certain conditions, copies of its list of securityholder names, addresses and position listings, as well as any list of non-objecting or consenting beneficial owners where reasonably obtainable. At the option of the requesting securityholder, rather than of the registrant as under the current rule, the requestor could direct the registrant to mail its materials to securityholders at the requestor's expense. The purpose of this amendment is to facilitate dissemination of material information to securityholders by reducing the expense and delay requestors typically encounter in obtaining a securityholder list.

B. Legal Basis

The proposed amendments would be promulgated pursuant to Sections 14 [81] and 23(a) [82] of the Exchange Act.

C. Small Entities Subject to the Rules

The proposed amendments would affect proxy filing and other requirements for registrants, including investment companies, and soliciting securityholders. Rule 0–10 [83] under the Exchange Act provides that a "small business," for purposes of the Regulatory Flexibility Act, includes a registrant other than an investment company that had total assets of $5 million or less as of the end of its most recent fiscal year. For purposes of the Regulatory Flexibility Act, an investment company is a "small business" if it has net assets of $50 million or less as of the end of its most recent fiscal year.[84]

The proposed amendments to the proxy rules would apply to proxy solicitations or information statements of issuers with securities either registered pursuant to section 12(g) of the Exchange Act [85] or listed on a national securities exchange pursuant to section 12(b) of that Act,[86] the Commission is aware that some of these exempt small entities that are publicly traded register their securities and are subject to the proxy rules. In addition, fewer than 50 small entities have securities listed on a national securities exchange. The Commission estimates that, in all, between 1,400 and 1,800 of the approximately 10,500 issuers that are registered under section 12 and are subject to the proxy rules have total assets not exceeding $5 million.

The Commission further estimates that the proposed amendments would apply to 3,200 registrants that are management investment companies, of which approximately half have net assets of $50 million or less.

D. Reporting, Recordkeeping and Other Compliance Requirements

The proposed amendments to Rules 14a–2(b), 14a–6, 14a–7, 14a–11 and 14a–12 would not result in any significant increase in reporting, recordkeeping or compliance requirements. The proposed amendments to reduce or eliminate the preliminary filing requirements, and to eliminate non-public filing of all proxy soliciting materials, would result in a net diminution of reporting and other compliance requirements for all entities that qualify for the exclusion.

E. Overlapping or Conflicting Federal Rules

The proposed rules would not duplicate or conflict with any existing rule provisions.

F. Significant Alternatives

The proposed amendments to Rules 14a–6, 14a–7, 14a–11 and 14a–12 are expected to benefit all registrants or other persons subject to the proxy rules, regardless of size, by diminishing filing burdens under certain circumstances. One significant alternative to the proposed amendments could be different or simplified requirements for small entities. Such requirements for small entities could include the elimination of the filing requirements for small entities with respect to additional categories of preliminary proxy material. Alternatively, small entities or other persons could be exempted altogether from all requirements to file preliminary proxy materials. However, such elimination of filing requirements for small entities or exemption of small entities would not be consistent with the Commission's statutory mandate to require adequate disclosure to voting

---

[69] In the past, the Commission has considered amending Rule 14a–7 (and 14d–5 with respect to tender offers [17 CFR 240.14d–5]) to provide securityholder access, albeit at the issuer's continued option, to NOBO lists in a proxy or tender offer solicitation context. See Exchange Act Release No. 22533 at n.17 (Oct. 15, 1985) (50 FR 42672); Exchange Act Release No. 20021 at n.16 (July 28, 1983) (48 FR 35082). No rulemaking action was taken.

[70] See Brown, The Shareholder Communication Rules and the Securities and Exchange Commission: An Exercise in Regulatory Utility or Futility?, 13 J. Corp. Law 663, 775–78 (1988) ("Without an effective means of communication [with NOBOs], insurgents may be unable to induce beneficial owners to return proxies. The difficulty could prove outcome determinative. Moreover, denying insurgents the ability to communicate directly not only provides management with an advantage in any contest, but also works to the disadvantage of shareholders by denying them timely information"). Beneficial ownership information may be particularly critical to an insurgent's ability to wage a successful proxy fight in light of the growing phenomenon of corporate and limited partnership (roll-up) supermajority provisions that render of vital importance each beneficial owner's vote. See, e.g., *NCR Corp.*, 928 F.2d at 53.

[71] 17 CFR 240.14a–13(b).

[72] Cf. NCR Corp., 928 F.2d at 52 (in holding that New York law required the registrant to prepare a NOBO list where not otherwise procured by or in the possession of registrant, the Second Circuit noted that compilation of beneficial ownership information is a relatively simple, mechanical task that may take only a few days).

[73] 481 U.S. 69 (1987). *Cf. Sadler* v. *NCR Corp.*, 928 F.2d at 55 (in determining whether New York's foreign corporation list statute was unconstitutional as applied to a Maryland corporation, the court stated that "[a]ccess to stockholder lists is a recognized exception to the internal affairs doctrine as a matter of corporate law and conflicts of law * * *.")

securityholders. Another alternative could be the adoption of performance rather than design standards with respect to the preparation and filing of proxy materials by small entities. The adoption of such performance standards would not be consistent with the Commission's statutory mandate to require adequate disclosure to voting securityholders. With respect to an alternative revision of Rule 14a–7 to those proposed, the Commission has requested and will consider comment on that alternative, which would afford registrants the continued option to mail or provide the list to a requesting securityholder, but would require any registrant that elected to mail the requestor's proxy soliciting materials to bear the costs of mailing.

C. Solicitation of Comments

The Commission encourages the submission of written comments with respect to any aspect of this initial regulatory flexibility analysis. Such written comments will be considered in the preparation of the final regulatory flexibility analysis, if the proposed rule is adopted. Persons wishing to submit written comments should file them with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comment letters should refer to File No. S7–2291. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

VI. Statutory Basis

The amendments to the proxy rules are being proposed by the Commission pursuant to sections 14 and 23(a) of the Securities Exchange Act of 1934.

Lists of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

VII. Text of Proposals

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for part 240 continues to read, in part, as follows:

Authority: 15 U.S.C. 77c, 77d, 77s, 78c, 78d, 78i, 78j, 78l, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 79q, 79t, 80a–29, 80a–37, unless otherwise noted.

2. By amending § 240.14a–2 to redesignate paragraphs (b)(1) and (b)(2) as paragraphs (b)(2) and (b)(3), respectively, and by adding a new paragraph (b)(1) to read as follows:

§ 240.14a–2 Solicitations to which §§ 240.14a–3 to 240.14a–14 apply.

* * * * *

(b) * * *

(1) Any solicitation by or on behalf of a person who:

(i) Does not have, and is not acting on behalf of a person who has, a material economic interest in the matters to be acted upon, other than as a securityholder of the registrant;

(ii) Does not seek, and is not acting on behalf of a person who seeks, either directly or indirectly through representatives, the power to act as a proxy for a security holder; and

(iii) Does not furnish or otherwise request, and is not acting on behalf of a person who furnishes or requests, a consent or authorization of a security holder for delivery to the registrant.

Note: The following are some examples of persons who will be deemed to have a material economic interest in the matters to be acted upon other than as a security holder of the registrant within the meaning of paragraph (b)(1) of this section, or to be acting on behalf of such a person within the meaning of this paragraph:

(a) The registrant, an affiliate of the registrant, and any officer or director of the registrant or of an affiliate of the registrant, or any persons serving in a similar capacity;

(b) An affiliate of a person who does not qualify for an exemption under this paragraph, any officer or director of such person, or any person serving in a similar capacity;

(c) An "interested person" of an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 et seq.), as that term is defined in section 2(a)(19) of the 1940 Act (15 U.S.C. 80a–2(a)(19)); or

(d) Any person who receives compensation from, directly or indirectly, any of the foregoing.

* * * * *

3. By amending § 240.14a–6 to remove paragraphs (b) and (f) and to redesignate paragraphs (c) through (e) and paragraphs (g) through (*l*) as paragraphs (b) through (d) and paragraphs (e) through (j); revise the caption to newly redesignated paragraph (b); revise newly redesignated paragraphs (c), (d), and (f); and in newly redesignated paragraph (i) remove the reference to "paragraph (j)" and replace it with "paragraph (h)" to read as follows:

§ 240.14a–6 Filing requirements.

* * * * *

(b) *Definitive proxy statement and other soliciting materials* * * *

(c) *Personal solicitation materials.* If the solicitation is to be made in whole or in part by personal solicitation, eight copies of all written instructions or other material which discusses or reviews, or comments upon the merits of, any matter to be acted upon and which is furnished to the persons making the actual solicitation for their use directly or indirectly in connection with the solicitation shall be filed with, or mailed for filing to, the Commission by the person on whose behalf the solicitation is made not later than the date any such material is first sent or given to such individuals.

(d) *Release dates.* All preliminary material filed pursuant to paragraph (a) of this section shall be accompanied by a statement of the date on which definitive copies thereof filed pursuant to paragraph (b) of this section are intended to be released to security holders. All definitive material filed pursuant to paragraph (b) of this section shall be accompanied by a statement of the date on which copies of such material have been released to security holders, or, if not released, the date on which copies thereof are intended to be released. All material filed pursuant to paragraph (c) of this section shall be accompanied by a statement of the date on which copies thereof have been released to the individual who will make the actual solicitation or if not released, the date on which copies thereof are intended to be released.

* * * * *

(f) *Speeches, press releases and scripts.* Notwithstanding the provisions of paragraph (a) of this section, copies of soliciting material in the form of speeches, press releases and radio or television scripts may, but need not, be filed with the Commission prior to use or publication. Definitive copies, however, shall be filed with, or mailed for filing to, the Commission as required by paragraph (b) of this section not later than the date such material is used or published. The provisions of paragraph (a) of this section shall apply, however, to any reprints or reproductions of all or any part of such material.

* * * * *

4. By amending § 240.14a–7 to revise paragraph (c) and to add new paragraph (d) to read as follows:

§ 240.14a–7 Mailing communications for security holders.

* * * * *

(c) In lieu of performing the acts specified in paragraphs (a) and (b) of this section, the registrant shall, at the security holder's option, furnish to such security holder in such form requested by the security holder as is available to the registrant without undue burden or expense, a reasonably current list of the names, addresses and security positions of such of the holders of record specified in paragraph (a)(1) of this section as the security holder shall designate, and a list of the names and addresses of such of the bankers, brokers or other persons specified in paragraph (a)(2) of this section as the security holder shall designate, together with a statement of the approximate number of beneficial owners solicited or to be solicited through each such banker, broker or other person and a schedule of the handling and mailing costs of each such banker, broker or other person if such schedule has been supplied to the registrant, as well as any other information relating to the names, addresses and security positions of beneficial owners, including a list specified in § 240.14a–13(b) as requested by the security holder, and is in the possession of or reasonably available to the registrant; *provided, however,* that if the registrant had not already compiled such a list of beneficial owners, the security holder shall reimburse the registrant for one-half or other proportionate amount, depending on the number of requests for such information received by the registrant from security holders, of the costs incurred by the registrant pursuant to § 240.14a–13(b)(5). The foregoing information shall be furnished within five business days of receipt of the request of the security holder or at daily or other reasonable intervals as it becomes reasonably available to the registrant.

(d)(1) The security holder shall not use the information furnished by the registrant pursuant to paragraph (c) of this section for any purpose, other than:

(i) To solicit other security holders with respect to the same subject matter or meeting for which the registrant is soliciting or intends to solicit; or

(ii) To communicate with other security holders with respect to a solicitation commenced by the registrant.

(2) The security holder shall not disclose such information to any person other than an employee or agent to the extent necessary to effectuate the communication or solicitation.

(3) The request referred to in paragraph (c) of this section shall contain a representation that the foregoing information will be used solely for the purposes specified in paragraph (d)(1) of this section and will remain confidential.

5. By amending § 240.14a–11 to remove paragraph (c)(2) and redesignate paragraphs (c)(3) through (c)(6) as paragraphs (c)(2) through (c)(5); revise paragraphs (c)(1), (e) and (g); in newly redesignated paragraph (c)(3) remove the reference to "paragraph (c)(3)"; and remove the last sentence in paragraph (f) to read as follows:

§ 240.14a–11 Special provisions applicable to election contests.

* * * * *

(c) *Filing of information required by Schedule 14B.* (1) No later than five business days following the commencement of a solicitation subject to this section or upon the filing of a preliminary proxy statement pursuant to § 240.14a–6(a) relating to such a solicitation, whichever is earlier, a statement in triplicate containing the information specified by Schedule 14B shall be filed with the Commission and with each national securities exchange upon which any security of the registrant is listed and registered, by and on behalf of each participant in such solicitation, other than the registrant.

* * * * *

(e) *Solicitations prior to furnishing required written proxy statement; filing requirements.* Eight copies of any soliciting material proposed to be sent or given to security holders prior to the furnishing of the written proxy statement required by § 240.14a–3(a) shall be filed with, or mailed for filing to, the Commission no later than the date such material is sent or given to any security holders. Three copies of such material shall at the same time be filed with, or mailed for filing to, each national securities exchange upon which any class of securities of the registrant is listed and registered.

* * * * *

(g) *Application of § 240.14a–6.* The provisions of paragraphs (b), (c), (d), and (e) of § 240.14a–6 shall apply to the extent pertinent, to soliciting material subject to paragraphs (e) and (f) of this section.

6. By amending § 240.14a–12 to revise paragraph (b) to read as follows:

§ 240.14a–12 Solicitation Prior to Furnishing Required Proxy Statement.

* * * * *

(b) Eight copies of any soliciting material proposed to be sent or given to security holders prior to the furnishing of a written proxy statement required by Rule 14a–3(a) (§ 240.14a–3(a)) shall be filed with, or mailed for filing to, the Commission no later than the date such material is sent or given to any security holders. Three copies of such material shall at the same time be filed with, or mailed for filing to, each national securities exchange upon which any class of securities of the registrant is listed and registered.

Dated: June 17, 1991

By the Commission.

Department of State

Office of Protocol

Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1990; Notice

VOL 56 ISS 122 JE 25 1991 UMI

DEPARTMENT OF STATE

Office of Protocol

[Public Notice 1416]

Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1990

The Department of State submits the following comprehensive listing of the statements which, as required by law, Federal employees filed with their employing agencies during calendar year 1990 concerning gifts received from foreign government sources. The compilation includes reports of both tangible gifts and gifts of travel or travel expenses of more than minimal value, as defined by statute.

Publication of this listing in the Federal Register is required by section 7342(f) of Title 5, United States Code, as added by section 515 (a)(1) of the Foreign Relations Authorization Act, Fiscal Year 1978 (Pub. L. 95-105, August 17, 1977, 91 Stat. 865).

Dated: June 12, 1991.

Jean Selin,

Under Secretary for Management.

AGENCY—EXECUTIVE OFFICE OF THE PRESIDENT

Report of Tangible Gifts—All Gifts Received From Foreign Officials Over Minimum Dollars—Jan. 1 thru Dec. 31, 1990

Name and title of recipient	Gift, date of acceptance, estimated value and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance
President and First Lady	Photograph: Album. A leather photograph album, gold-stamped "presented to the President and Mrs. George H. W. Bush by the Diplomatic Corps of Washington, DC Christmas 1990". Archives, Foreign. Recd: Dec. 21, 1990. Est. value: $205.	His Excellency Jose Luis Fernandes Lopes, Ambassador of the Republic of Cape Verde, Cape Verde.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Multiple items. A wood panel, depicting a circular design of vari-colored woods, 46" Sq. A wooden candy dish with lid, 6" diam. and a wooden beaded necklace. Archives, Foreign Recd: Oct. 25, 1990. Est. value: $1550.	His Excellency General Andre-Dieudonne Kolingba, President of the Central African Republic, Central African Republic.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Household: crystal. 14 crystal wine goblets, each engraved "GHB," by Moser. Archives, Foreign. recd: Nov. 17, 1990. Est. value: $300.	His Excellency and Mrs. Vaclav Havel, President, Czech and Slovak Federal, Czechoslovakia.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Book: "Codex Vyssehradensis," an illustrated volume on the Coronation of the First King of Czechoslovakia and the Codex Key; both are reproductions. Archives, Foreign. Recd: Nov. 17, 1990. Est. value: $550.	His Excellency Vaclav Havel, President Czech and Slovak Federal, Czechoslovakia.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Assortment. 1) Sculpture. Three crystal birds suspended over black base, entitled "Atlantique," edition 950, by Daum France; Approx. 36" high, 16" diam. 2) Porcelainware. A set of 12 Demitasse cups and saucers, a black and gold tree design on blue background with silver trim, by Limoges 1990, in a fitted vinyl case. Archives, Foreign. Recd: July 9, 1990. Est. Value: $7200.	His Excellency Francois Mitterrand, President of the French Republic, France.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Consumables: 12 bottles of German Wine, 1977 through 1988 vintage. Accepted by other agency for official use. Recd: Jan. 4, 1990. Est. value: $260.	His Excellency Dr. Helmut Kohl, Chancellor of the Federal Republic of Germany, Federal Republic of Germany.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Assortment: 1) A reproduction of a letter by President Jefferson addressed to Greek Academic Adamantios Korais, dated Oct. 31, 1823, in a leather folio stamped with Greek Cross. 2) Book, "The Greek Museums," by Ekdotike Athenon, 1975, Athens; inscribed 3) a sterling silver handhammered reproduction of a vessel, 16th Cent. B.C., designed as a duck. Archives, Foreign. Recd: June 6, 1990. Est Value: $450.	His Excellency Constantine Mitsotakis, Prime Minister of Greece and Mrs. Mitsotakis, Greece.	Non-acceptance would cause embarrasement to donor and U.S. Government.

AGENCY—EXECUTIVE OFFICE OF THE PRESIDENT—Continued

Report of Tangible Gifts—All Gifts Received From Foreign Officials Over Minimum Dollars—Jan. 1 thru Dec. 31, 1990

Name and title of recipient	Gift, date of acceptance, estimated value and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance
President and First Lady	Assortment: 1) Painting of two brightly colored birds, oil on masonite, by Geener Armand, 1989; Displayed in bright goldleaf frame; Image: 8" x 10"; overall: 14⅛" x 16⅛"; 2) a Domed wooden box with turtleshell veneer; 7⅛" x 4⅛" x 3". 3) a Large painting of a Haitien house with French-costumed soldiers outside; oil on canvas, by Ely Jecques; Image: 24" x 30"; in gold-distressed wood frame; 29" x 35". Archives, Foreign. Rec'd: May 29, 1990. Est. value: $210.	Her Excellency Ertha Pascal Trouillot, President of the Republic of Haiti, Haiti.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Household: Porcelain tea service for twelve, made by Herend, bouquet green pattern, Government transfer. Rec'd: Oct. 16, 1990. Est. value: $973.	His Excellency Jozsph Antall, Prime Minister Republic of Hungary, Hungary.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Artwork: A multicolored striped and diamond patterned wall hanging, red-fringed on one end only. Wool blend. 43" x 75". Archives, Foreign. Rec'd: Dec. 21, 1990. Est. value: $400.	His Excellency and Mrs. Mohamed Bellkhayat, Ambassador of the Kingdom of Morocco.	Non-acceptance would cause embarrasement to donor and U.S. Government.
President and First Lady	Flowers: Large arrangement of lilies, tulips, quince, etc., in reproduction Chinese urn style container; accepted by other agency for official use. Consumables: "Cheese spread and beef stick"; perishable. Household: A leaded crystal footed bowl by Rogaska of Yugoslavia, limited edition titled "Georgian Centrpiece. 11½" H., 12" diam; Achivse, Foreign. United States Delegation to the 43rd Annual Meeting of the International Whaling Commission, Reykjavik, May 22–31, 1991

Representative

John Knauss, United States Commissioner and Under Secretary of Commerce for Oceans and Atmosphere, Department of Commerce

Alternate Representative

Sylvia Earle, Deputy United States Commissioner and Chief Scientist, National Oceanic and Atmospheric Administration, Department of Commerce

Advisers

James Brennan, Deputy General Counsel, National Oceanic and Atmospheric Administration,Department of Commerce
Kevin Chu, Office of Oceans Affairs, Bureau of Oceans and International Environmental and Scientific Affairs, Department of State
Melinda Chandler, Office of Legal Affairs, Department of State
Anne Crichton, Office of the Solicitor, Department of the Interior
Becky Rootes, Office of International Affairs, National Marine Fisheries Services, National Oceanic and Atmospheric Administration, Department of Commerce
Michael Tillman, Deputy Assistant Administrator, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce

Private Sector Advisers

Nancy Azzam, Windstar Foundation, Golden Valley, Minnesota
Barbara Britten, American Cetacean Society, Arlington, Virginia
Nancy Devos, Animal Protection Institute of America, Washington DC
William E. Evans, Dean, Texas A&M University, Galveston, Texas
John Prescott, American Association of Zoological Parks and Aquariums, Boston, Massachusetts
Burton Rexford, Chairman, Alaska Eskimo Whaling Commission

United States Delegation to the Chemicals Group and Management Committee, 16th Joint Meeting, Organization for Economic Cooperation and Development (OECD), Paris, May 28–30, 1991

Representative

Linda J. Fisher, Assistant Administrator for Pesticides and Toxic Substances, Environmental Protection Agency

Alternate Representative

Breck Milroy, Office of Environmental Protection, Bureau of Oceans and International Environmental and Scientific Affairs, Department of State

Advisers

Charles Auer, Existing Chemicals Assessment Division, Office of Toxic Substances, Environmental Protection Agency
Paul Campanella, Chemical Control Division, Environmental Protection Agency
David Ogden, Office of International Activities, Environmental Protection Agency
Appropriate USOECD Mission Officer, Paris

Private Sector Advisers

Thomas Farmer, Prather, Seeger, Doolittle and Farmer, Washington, DC
Polly Hoppin, Conservation Foundation/ World Wildlife Fund, Washington, DC
Kenneth Murray, Exxon Chemical Corporation, Linden, NJ

Aid to Families with Dependent Children At-Risk Child Care Program

AGENCY: Family Support Administration (FSA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule implements section 5081 of the Omnibus Budget Reconciliation Act of 1990 (OBRA 90), Public Law 101–508, which adds section 402(i) to the Social Security Act (the Act) to create a child care program for low-income, working families, who are not receiving Aid to Families with Dependent Children (AFDC).

This optional program permits States to provide child care to low-income families who are not receiving AFDC, need child care in order to work, and would otherwise be at risk of becoming eligible for AFDC.

This proposed rule also amends § 255.4(c)(2) to clarify that for the purpose of child care provided under section 402(g) of the Act applicable standards of State and local law are standards that are generally applicable to care of a particular type in the State or local jurisdiction regardless of the source of payment for the care.

DATES: Interested persons and agencies are invited to submit written comments concerning these proposed regulations no later than 60 days from date of publication in the **Federal Register**.

ADDRESSES: Comments should be submitted in writing (facsimile transmissions will not be accepted) to the Assistant Secretary for Children and Families, Attention: Mary Ann Higgins, OFA/JTF, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC 20447, or delivered to the Administration For Children and Families, Office of Family Assistance, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC between 8 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during the same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Mary Ann Higgins, Administration For Children and Families, Office of Family Assistance, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC 20447, telephone (202) 401–9294.

SUPPLEMENTARY INFORMATION:

Background

As a result of the growing needs of children and families, on April 15, 1991 the Secretary of Health and Human Services Louis W. Sullivan, M.D., announced the merger of three operating divisions within the Department of Health and Human Services. The merger combines the programs and resources of the Family Support Administration, the Office of Human Development Services and the Maternal and Child Health Block Grant. The consolidation of these agencies formed the Administration for Children and Families (ACF). Under the direction of Assistant Secretary Jo Anne B. Barnhart, ACF will become a single agency to effectively coordinate programs for children and families. ACF will also provide the States, communities and the Congress a single agency, at the federal level, to contact for concerns or issues pertaining to welfare of children and families.

The child care needs of low-income families are addressed by a number of programs administered by the Administration For Children and Families (ACF). In the past three years, the scope of ACF-administered child care programs has broadened to address the child care needs of increasingly larger segments of the population. ACF's programs reflect a growing awareness of the needs of, and commitment to, the family.

Child care needs were first addressed for working families who receive AFDC benefits. A portion of the child care expenses was deducted from the family's earnings when calculating the amount of the family's AFDC grant. Later, the Family Support Act of 1988 guaranteed necessary child care for working AFDC recipients and for AFDC recipients in approved education or training activities (including the Job Opportunities and Basic Skills Training (JOBS) Program). In addition to recognizing the need for child care during training activities to obtain employment, the Family Support Act of 1988 addressed the need for child care during a 12-month transition period following the end of eligibility for AFDC. These child care measures were primarily designed for families already welfare dependent.

In OBRA 90, Congress established two new child care programs: Child care for low-income working families in need of such care and otherwise at risk of becoming eligible for AFDC (the At-Risk Child Care program) and the Child Care and Development Block Grant program. Congress also amended the Earned Income Credit to assist the working poor in caring for their children.

At-Risk Child Care

In enacting the At-Risk Child Care program, Congress recognized that providing child care to low-income working families could enable such families to avoid welfare dependency. A State could also use the At-Risk Child Care program if it decides that the transition to economic independence and self-sufficiency for former AFDC families takes longer than provided for under the Transitional Child Care provisions in the Family Support Act. The State could also use the program for some categories of needy families who are not eligible for the Transitional Child Care program.

States will be able to provide care directly, by use of purchase of service contracts or vouchers, by providing cash or vouchers directly to the family, by reimbursing the family, and using other arrangements as the State agency deems appropriate.

The President signed OBRA 90 into law on November 5, 1990. However, the provisions regarding At-Risk Child Care were effective October 1, 1990. The Family Support Administration (FSA) issued guidance (Action Transmittal CC–FSA–AT–90–1 dated December 19, 1990) to States on how to apply to operate an At-Risk Child Care program prior to the issuance of final regulations. As of April 1, 1991, 19 States have applied to operate At-Risk Child Care programs.

Child Care and Development Block Grant

The other child care program authorized by OBRA 90, the Child Care and Development Block Grant (CCDBG), is intended to provide child care services for low-income families and to increase the availability, affordability, and quality of child care and development services. A total of $2.5 billion is authorized for that block grant for fiscal years 1991–1993, and such sums as may be necessary for fiscal years 1994 and 1995. Funding in the amount of $732 million will become available in September, 1991. Regulations will be issued for the CCDBG program.

Earned Income Credit

Although the Earned Income Credit (EIC) program is not administered by the Administration for Children and Families, it is an additional program to assist the working poor that needs to be considered as an important step toward increasing family self-sufficiency. It was created by Congress in 1975 and greatly expanded in OBRA 90. The EIC is a refundable tax credit provided to low-income families with children in which a parent works. In 1991, families are eligible if their incomes are below $20,264, an amount that is indexed to inflation each year. Even families earning too little to pay taxes receive the credit if they file a federal income tax return. The EIC can help families make the transition from welfare to work by boosting their work-related income. It serves as an important resource for families that receive public assistance while working at low wage jobs. For families that have worked their way off welfare, the EIC can make the family's take-home pay compare more favorably with the welfare check it once received. Families can also receive EIC throughout the year in their regular paychecks by filing a W–5 form with their employer. In this way, families can use the money to meet ongoing needs of their children. Changes to the EIC enacted in OBRA 90 guarantee that EIC benefits will not count as income when eligibility and benefit levels are determined for many other federally supported programs, making the advantage to working families still receiving benefits even greater.

A major goal in developing regulations for At-Risk Child Care is to provide policies that are consistent with other child care administered by ACF whenever possible.

Regulatory Procedures

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be performed for any "major rule." A major rule is one that:

—Has an annual effect on the national economy of $100 million or more;

—Results in a major increase in costs or prices for consumers, any industries, any government agencies, or any geographic region; or

—Has significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because this program will have an annual effect on the economy of $100 million or more, per discussion with the Office of Management and Budget (OMB), the regulation is considered a major rule. The analysis required by Executive Order 12291 will be included in the final rule.

Paperwork Reduction Act

Certain sections of these proposed regulations contain information collection requirements which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35). The title, description, and respondent description of the information collection requirements are shown below with an estimate of the annual reporting and recordkeeping burdens. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Description of Respondents: State agencies.

ESTIMATED ANNUAL REPORTING AND RECORDKEEPING BURDEN

Section	Annual number of respondents	Annual frequency	Average burden per response	Annual burden hours
45 CFR 257.21:				
Existing	XXX	XXX	XXX	XXX
Proposed	54	.5	50	1,350
45 CFR 257.50:				
Existing	XXX	XXX	XXX	XXX
Proposed	54	1	50	2,700
45 CFR 257.60:				
Existing	XXX	XXX	XXX	XXX
Proposed	54	4	1.125	243

Total Existing Burden Hours: XXX
Total Proposed Burden Hours: 4293
Total Difference: +4293

As required by section 3504(h) of the Paperwork Reduction Act of 1980, ACF has submitted a copy of this proposed rule to OMB for its review of these information collection requirements. Other organizations and individuals desiring to submit comments regarding this burden estimate or any aspect of the information collection requirements, including suggestions for reducing the burdens, should direct them to the Administration for Children and Families, Office of Family Assistance, (address above) and to the Office of Information and Regulatory Affairs, OMB, room 3208, New Executive Office Building, Washington, DC 20503, Attn: Laura Oliven, Desk Officer for ACF.

Regulatory Flexibility Act

The Secretary certifies, under 5 U.S.C. 605(b), enacted by Public Law 96–354, the Regulatory Flexibility Act, that this regulation, if promulgated, will not result in a significant impact on a substantial number of small entities because it primarily affects State governments and individuals. Certain small entities, such as providers of child care services, could receive a positive benefit from this program, but regulatory flexibility analyses are required for adverse impacts only.

Therefore, a regulatory flexibility analysis as provided in Public Law 96–354, the Regulatory Flexibility Act, is not required. This regulation is issued under the authority of section 1102 of the Social Security Act.

Federalism and Family Effects

Following is the assessment of this action using the criteria and principles set forth in Executive Orders 12606 and 12612.

Analysis Required by Executive Order 12612 on Federalism

If a policy leads to Federal control over traditional State responsibilities or decreases the ability of States to make policy decisions with respect to its own functions, that policy is determined to have a significant federalism effect.

Section 5081 of OBRA 90 provides States with the option of providing a program of child care for low income working families who are at risk of becoming eligible for AFDC. The proposed regulations give States broad

VOL
56
ISS
122
JE
25
1991
UMI

flexibility in defining who is eligible for the program, in choosing methods of providing care, and in establishing sliding fee scales.

Child care provided under section 402(i) of the Act must meet applicable standards of State and local law. This language is the same as in section 402(g) of the Act which provides child care for AFDC recipients who are working or in approved training or education and former recipients eligible for Transitional Child Care. In these regulations we clarify that applicable standards are licensing or regulatory requirements that are generally applicable to care of a particular type regardless of the source of funding for the care. This means that for child care under title IV–A a State may not reject a parent's choice of child care provider because that provider does not meet licensing or regulatory standards for that particular type of care if those standards are not generally applicable to care of that type.

This policy does not decrease a State's ability to set standards for child care in general. It does not set national standards. As described above it does limit a State's ability to deny a parent's choice of provider in those limited cases where the State has set separate standards for publicly-funded child care. However, rather than substituting Federal policymaking for State policymaking, we propose to empower parents with decisionmaking over who should care for their children. This is consistent with another principle enunciated in Executive Order 12812 which says that "Policies of the national government should recognize the responsibility of—and should encourage opportunities for—individuals, families, neighborhoods, local governments, and private associations to achieve their personal, social, and economic objectives through cooperative effort."

Therefore, on balance, we do not believe this regulation has a significant federalism effect.

Analysis Required by Executive Order 12606 on the Family

The At-Risk Child Care Program is expected to have an overall beneficial family impact. This analysis discusses that impact in terms of the criteria in Executive Order 12606.

(a) The objective of the At-Risk Child Care Program is to provide child care to low-income families who are not currently AFDC recipients, who need care to accept or maintain employment, and who are at risk of becoming AFDC-eligible. The goals of economic independence and prevention of welfare dependency are promoted through continued employment resulting in more secure families.

The At-Risk Child Care program may provide financial aid to both the single parent and the two-parent family, if such care is necessary for employment, and thus self-sufficiency. This increase in self-sufficiency will help strengthen families and ameliorate the erosive effects of poverty.

(b) The At-Risk Child Care program provides significant support for parents' authority and right to nurture and supervise their children in affordable child care settings, which will enable parents to continue to work to achieve self-sufficiency.

Parents will continue to have maximum control and supervision of their children as they would have in any working family. The choice of child care providers is with the parent. Non-family providers are subject to State or local requirements of registration, certification, or licensing. However, this will not affect parents' ability to choose the kind of care with which they are most comfortable.

(c) At-Risk Child Care does not substitute governmental activity for any of the functions of the family. Parental responsibility for the support of children is fostered by the At-Risk Child Care program because it assures parental choice of caregivers and the parents' ability to work and provide for the family. Furthermore the family will contribute to the cost of care based on the family's ability to pay, in accordance with a sliding fee scale formula established by the State IV–A agency.

(d) The At-Risk Child Care program is not specifically designed to increase or decrease the family's earnings. However, since child care provided with At-Risk Child Care funds will permit families to accept or maintain employment, we expect the overall effect will be to increase family earnings by increasing employment opportunities.

(e) The At-Risk Child Care program shall be made available through non-Federal levels of government, i.e., States and localities. The Federal Government will not intrude upon family autonomy or decisions.

(f) The At-Risk Child Care program reinforces the notion that the strength of the American family is important to the Nation's economy. Targeting families, who would otherwise be at risk of becoming welfare dependent, with financial assistance for child care, sends the message that families attempting to maintain economic independence from welfare is a concern for all levels of the government.

(g) The emphasis on self-sufficiency in the At-Risk Child Care program will send a positive message to young people. The message is that those striving to maintain economic independence from welfare can get help from society to do so.

The preamble discussion generally follows the sequence of the proposed regulations, with the exception that the description of conforming changes to the existing regulations is last, whereas the conforming changes precede the At-Risk Child Care sections in the proposed regulations.

PART 257—AT-RISK CHILD CARE PROGRAM

Purpose (§ 257.0 of the Proposed Regulations)

This section describes the purposes of the At-Risk Child Care program. States may provide child care to low income families in accordance with the regulations in this part to allow such families to work and thereby avoid receiving AFDC.

State IV–A Agency Administration (§ 257.10 of the Proposed Regulations)

Section 5081 of OBRA 90 amends the Act to add the At-Risk Child Care program at section 402(i). As part of title IV–A of the Act, the "State agency" referred to in section 402(i) is the single State agency as provided at section 402(a)(3) of the Act. Under longstanding Federal policy regarding the concept of "single State agency," the State IV–A agency must maintain overall responsibility for the design and operation of the program and may not delegate to other than its own officials functions involving discretion in overall administration or supervision of the program (see 45 CFR 205.100).

For child care provided under section 402(g) of the Act, this has meant that, operationally, a State IV–A agency could have another entity perform such non-discretionary functions as providing information to individuals seeking child care, issuing the payment to the child care provider, and collecting fees in accordance with the sliding fee schedule established by the State IV–A agency.

However, eligibility determinations must be made by the IV–A agency. Child care under section 402(g) of the Act is guaranteed to those meeting the statutory requirements, i.e., to employed AFDC recipients, to AFDC recipients in approved education or training programs, and to former AFDC recipients who are working and meet the requirements at section 402(g). Therefore, because such care is a guarantee and eligibility for child care under section 402(g) is inextricably linked to either current or past receipt of AFDC, the determination of eligibility for child care under section 402(g) remains a discretionary decision with the State IV–A agency.

One of the goals of child care provided under section 402(i) is to prevent families from needing AFDC by providing child care so that they can work. Child care is not guaranteed, and eligible families will not be AFDC recipients, although it is possible that they might be former recipients. Therefore, questions have arisen about whether the State IV–A agency could have another entity determine eligibility for At-Risk Child Care.

At § 257.10(c) we propose to allow the State IV–A agency to enter into contracts or agreements with other entities to perform administrative functions, including the determination of eligibility, and provide services under the At-Risk Child Care programs.

We believe that there are significant differences in child care provided under section 402(i) which distinguish it from the other programs under title IV–A. First, as cited above, eligible individuals are not AFDC recipients by definition. Therefore, there is not an immediate connection to the State IV–A agency. In fact, many eligible individuals might not avail themselves of child care services under section 402(i) if it meant going to the welfare office. If preventing the need for welfare is one of the goals of this program, requiring a family to go to the welfare office to obtain services might be counterproductive. Second, At-Risk Child Care is not guaranteed, and, therefore, the protections that must be afforded by the State IV–A agency do not apply. Third, it would be consistent with the statement of the OBRA 90 conferees that "States will have maximum flexibility in determining how these new grant funds are used." H.R. Rep. No. 964, 101st Cong., 2nd Sess. 822, reprinted in 1990 U.S. Code Cong. & Admin. News 2374, 2627.

The proposal to allow the State IV–A agency to contract or enter into an agreement with another entity for certain functions related to the At-Risk Child Care Program does not relieve the State IV–A agency of its overall responsibility for administering the program. Therefore, the proposed regulations at § 257.10(b) enumerate the functions that the State IV–A agency must perform. Chief among these is the issuance of all policies, rules, and regulations, including the criteria for eligibility, governing the program. An entity performing functions related to the At-Risk Child Care program must do so in accordance with the policies, rules, and regulations issued by the State IV–A agency.

A principal purpose of the single State agency provision is to assure that there is a central point of responsibility in the State, i.e., the State IV–A agency, with adequate legal authority, to which the Federal Government can look to account for the expenditure of Federal funds under the program. Therefore, while we have proposed broad contracting authority for State IV–A agencies in carrying out the At-Risk Child Care program, it should be clear that the Administration For Children and Families will hold the State IV–A agency responsible for the proper and efficient administration of the program and will take any necessary compliance or disallowance actions against the State IV–A agency.

Requirement For A State At-Risk Child Care Plan (§ 257.20 of the Proposed Regulations)

The At-Risk Child Care program is authorized under a new section of the Social Security Act, 402(i), and therefore is not part of the title IV–A (AFDC) plan which is covered in section 402(a) of the Act. Although section 402(i) does not specifically address whether a plan is needed regarding the At-Risk Child Care program, we propose that At-Risk Child Care be covered by a plan for two reasons. First, child care is matchable under section 403 of the Act which provides that payments are made to States under approved plans. Secondly, we do not believe the Secretary could fulfill his statutory obligations unless a State plan which specified how the State would meet the requirements of section 402(i) of the Act is required. Section 1102 of the Act requires that the Secretary establish rules "necessary to the efficient administration of the functions" with which the Secretary is charged under the Act.

We propose to have the At-Risk Child Care Plan submitted as an amendment to the State Supportive Services Plan under parts 255 and 256. We believe that this approach will lessen the administrative burden on the States for several reasons. The State Supportive Services Plan is the plan under which a State provides supportive services for JOBS participants and child care for employed AFDC recipients, for participants in approved education and training activities (including JOBS), and for individuals who lose eligibility for AFDC due to employment (i.e., Transitional Child Care). The State IV–A agency is responsible for administering child care provided under both sections 402(g) and 402(i) of the Act and is, therefore, responsible for submitting both plans. Several of the provisions in the two sections of the Act are the same. These include the methods of payment that States may adopt, the requirement to establish local market rates and to define sliding fee scales, and to coordinate with other child care programs. These provisions would have to be incorporated into both State Plans.

We intend to develop a State plan preprint for the At-Risk Child Care program which will be submitted for approval to the Office of Management and Budget. To the extent possible, we plan to do this by modifying the existing State preprint for Supportive Services to reflect the provisions of At-Risk Child Care.

By considering the At-Risk Child Care program to be part of the State Supportive Services Plan, there will be some additional burden on the States. This arises from the requirement that biennial updates of the State Supportive Services Plan must be submitted to HHS. However, we believe that this slight burden is justified by two points. First, States must update local market rates under the provisions of § 255.1(i) which will result in updating local market rates for child care under section 402(i) also since we have defined local market rates at § 257.63 the same as the provisions under § 255.4. The revised plan will provide a vehicle for doing this. Second, after an initial three-year plan, State Plans under the Child Care and Development Block Grant Act of 1990 must also all be submitted biennially. This means that, beginning in FY 1995, State Supportive Services plans and Child Care and Development Block Grant plans will be on the same schedule for submission to HHS. Incorporating the provisions of At-Risk Child Care into the existing State Supportive Services Plan so that all plans revised and submitted simultaneously will thus facilitate coordination of child care within States.

Submission of the At-Risk Child Care Plan

The At-Risk Child Care program provisions under section 5081 were effective October 1, 1990. In order to provide initial guidance to States so that they could begin to provide At-Risk Child Care promptly if they so chose, FSA issued an Action Transmittal (CC–FSA–AT–90–1 dated December 19, 1990) describing how States could apply for FY 1991 funds. Applications for FY 1991 funds are approved on an interim basis pending issuance of final regulations. An approved interim application will remain in effect until the Secretary acts on a State's plan that is submitted on

VOL
56
ISS
122
JE
25
1991
UMI

the approved preprint. At § 257.20(c) we propose to require States operating an At-Risk Child Care program under an approved interim application to submit an amendment during the quarter following the quarter in which the preprint is issued. We recognize that States may have to make some operational modifications as a result of the final regulations and are giving States some flexibility as to exactly when they submit the plan to conform to the final regulations. Since we are considering the At-Risk Child Care Plan to be an amendment to the State Supportive Services Plan, the effective date of the amendment may not be earlier than the first day of the quarter in which it is submitted.

For States that are not operating an At-Risk Child Care program at the time the final regulations are published, we propose the following. The State may submit an amendment to the State Supportive Services Plan at any time to implement a program. As an amendment to the State Supportive Services Plan, the effective date may not be earlier than the first day of the calendar quarter in which an approvable plan is submitted. However, a State is entitled to its "maximum grant" (as defined at § 257.60(c)) for the year. For example, suppose a State's limitation for FY 1992 is $1 million, and for FY 1993 is $1.5 million. It submits an amendment on March 1, 1993, to begin operating an At-Risk Child Care program. The effective date of the amendment may not be earlier than January 1, 1993. The State is entitled to its maximum grant of $2.5 million dollars upon approval of the plan; however, it may not claim expenditures for any period prior to January 1, 1993.

State Plan Content (§ 257.21 of the Proposed Regulation)

The regulation at § 257.21 lists the information that we propose to require in the At-Risk Child Care Plan, which will be part of the State Supportive Services plan described at § 257.20. We will provide preprint pages that will be part of the State Supportive Services Plan. The preprint will guide States in submitting the At-Risk Child Care Plan and will expedite review. It will also provide a basis for comparison of State programs.

In general, the proposed content of the At-Risk Child Care Plan reflects provisions that are described in other parts of this proposed regulation, and, therefore, it is not necessary to describe them here. For example, § 257.21(b)(2) of the proposed plan regulation requires the State to define "low income," which is described in the proposed regulation at § 257.30(a)(1) and discussed in the preamble to that section. However, there are a few additional provisions that we elaborate on here.

The first is the requirement at § 257.21(d) of the proposed regulations that the State describe its priorities for providing At-Risk Child Care. This requirement is based on the statutory provision at section 402(i)(6)(B)(ii) of the Act that the State submit as part of its annual report "the criteria applied in determining eligibility or priority for receiving services." We believe that a State cannot report on its priorities in the annual report if it has not established priorities, and that this is so fundamental to the operation of the program that it should be incorporated in the State At-Risk Child Care Plan. However, as we discuss more fully in the preamble to § 257.50 on Reporting Requirements, we will consider the State to have reported on this provision by submitting the State's priorities in the State Plan, and will not require this information in the Annual Report.

The second is the proposed regulation at § 257.21(f) that a State list the political subdivisions in which the At-Risk Child Care program is offered, if not available statewide. Unlike the provisions of sections 402(a) and 402(g) of the Act which must be available statewide, the At-Risk Child Care program under section 402(i) of the Act is optional to the State, allows the State to set priorities for services, and is subject to a cap on the amount of Federal funds available to reimburse the State for its expenditure. We, therefore, believe that a State need not offer the program statewide. However, the State must list in its State Plan where it will be available.

Eligibility (§ 257.30 of the Proposed Regulations)

Section 402(i)(1) of the Act provides, "Each State agency may, to the extent that it determines that resources are available, provide child care * * * to any low-income family that the State determines is not receiving aid under the State plan approved under this part; needs such care in order to work; and would be at risk of becoming eligible for aid under the State plan approved under this part if such care were not provided."

Low Income

The proposed regulations at § 257.30(a)(1) give States the flexibility to define the low income requirement of the program. States may wish to consider developing (or adopting) an income test that not only allows for variations in family size or the number of children in the family needing care, but also serves as a common standard for other child care services the State may provide.

A number of Federal programs, including the Community Services Block Grant and Head Start, use the HHS poverty income guidelines, or a percentage of them, as eligibility criteria. As they are commonly understood indicators of low-income, States may wish to consider using them for the At-Risk Child Care program.

The 1991 poverty income guideline for the 50 States and the District of Columbia for a family of 2 is $8,680; for each additional member, it adds $2,280. The 1991 poverty guideline for Alaska for a family of 2 is $11,110; for each additional member, it adds $2,820. The 1991 poverty guideline for Hawaii for a family of 2 is $10,210; for each additional member, it adds $2,600. These guidelines were published in the **Federal Register** on February 20, 1991 (56 FR 6859), and States are referred to the **Federal Register** for additional information about the guidelines.

Another possibility is to adopt the standard for eligible families established by the State for the Child Care and Development Block Grant. Section 658P(4)(B) of the Child Care and Development Block Grant Act of 1990 provides that the State's standard for income of an eligible family cannot exceed 75 percent of the State median income for a family of the same size.

A State's definition of low income must be provided in its At-Risk Child Care Plan, as required at § 257.21(b)(2).

At risk of Becoming Eligible for AFDC

Besides having low income, a family must be "at risk" of becoming eligible for AFDC. While some have argued that "low income" is synonymous with being "at risk" of becoming eligible for AFDC, and that, therefore, there should be no additional condition of eligibility, we believe that Congress intended to establish another test for eligibility. First, the construction of OBRA 90 suggests that from the broad category of "any low income family," the State must make a further determination that the individual meets three criteria: (1) Not receiving AFDC; (2) needs the care in order to work; and (3) at risk of becoming eligible for AFDC if such care were not provided. Furthermore, we believe that requiring the State to define "at risk" other than in terms of income alone is appropriate because of the additional language in the Act at section 402(i)(6)(B)(ii) on the annual report which requires the State to include "the criteria applied in determining eligibility or priority for receiving services, * * *" A State's definition of "at risk" could be used as a basis for establishing such criteria.

However, in keeping with our goal of State flexibility, we propose to allow States to define "at risk" in their State At-Risk Child Care Plan. The following definitions of "at risk" are offered only as examples that States may want to consider: (1) A family not eligible for Transitional Child Care because it was not receiving AFDC three of the previous six months; (2) a family whose eligibility for Transitional Child Care has expired because of the 12-month limit; (3) a family not receiving AFDC because the State has a time-limited Unemployed Parent (AFDC–UP) program and the family obtains employment during the period of non-receipt of aid; or (4) a family who is eligible for, but elects not to receive AFDC, because its earnings would have resulted in only a minimum payment.

We propose not to require States to limit eligibility for At-Risk Child Care to only those families who otherwise would qualify for AFDC, but for the receipt of At-Risk Child Care. We do this because we believe that it is in keeping with the purpose of At-Risk Child Care to avoid welfare dependence whenever possible. For example, requiring a family to meet the AFDC resource limit (such as the $1000 limitation on resources) might make a family ineligible for At-Risk Child Care.

We also considered whether there were any factors that were so fundamental to receiving AFDC that a family could not be "at risk" of receiving AFDC if it did not meet them. For example, we considered whether there would have to be a child meeting the definition of "dependent child" in section 406 of the Act. While there clearly must be a child in the family who needs care, in keeping with our goal of State flexibility, we propose allowing the State to decide if it will require that the child meet the definition of "dependent child."

Thus, a State may adopt any or all of the eligibility criteria for AFDC if it so specifies in its State At-Risk Child Care Plan. For example, it could require that there be at least one "dependent child," or it could require a family to meet the limits on resources.

In Order to Work

We propose to define "in order to work" as "to accept employment or remain employed." This is consistent with section 402(g)(1)(A)(i)(I) of the Act and the implementing regulations at § 255.2. This definition clarifies that child care under section 402(i) is related to actual employment and not to education or training activities that would be necessary in order for an individual to work at some future point in time. In contrast, section 658P(4) of the Child Care and Development Block Grant Act of 1990 specifically provides that child care is available so that a parent or parents can work or attend a job training or educational program.

The proposed regulations at § 257.30(c) allow States the flexibility to provide child care under this section for up to two weeks for families in which an individual has a bona fide job offer but is waiting to begin the employment if child care arrangements would otherwise be lost. Additionally, States may provide child care for up to one month when an individual is between jobs and child care arrangements would otherwise be lost. For example, if an individual accepts a new job and there is a break between the end of the previous employment and the beginning of the subsequent job, and child care arrangements would be lost if the child were taken out during this break, the State may pay for care for up to one month. These provisions are included to ensure that child care is not lost, and continuity of care is provided, so that a family can continue to be self-sufficient. The State must describe its policies on providing care before and during gaps in employment in its State At-Risk Child Care Plan, as provided at § 257.21(l).

Age of an Eligible Child

Under the proposed regulations at § 257.30(b) the State may provide care to any child who is under the age of 13. The State may also provide care to a child who is age 13 or above and is physically or mentally incapable of self-care or who is under court supervision. Age thirteen is consistent with the limits for child care under section 402(g) of the Act as established in the regulations at § 255.2 and § 256.2. It is also consistent with the limit established for the Dependent Care Tax Credit as amended by section 703(a) of the Family Support Act and the limit for child care under section 658P of the Child Care and Development Block Grant Act of 1990.

For children who are eligible for At-Risk Child Care because they are physically incapable of caring for themselves or are under court supervision, we propose at § 257.30(b) to use the upper age limit as defined for a dependent child at section 2.2B of the State IV–A plan (i.e., under age 18 or up to age 19). This proposal is also consistent with the upper age limit for such child care provided under section 402(g), because eligibility for child care under section 402(g) is limited to dependent children requiring such care, or in the case of Transitional Child Care, children who, if needy, would be dependent.

Fee Requirement (§ 257.31 of the Proposed Regulations)

Section 402(i)(3)(A) of the Act requires the State agency to establish a sliding fee formula for the purpose of calculating a family's contribution for At-Risk Child Care. The proposed regulations at § 257.31 provide States with flexibility in determining the formula for calculating these fees.

For example, as these statutory requirements are the same as the statutory requirements for a sliding fee scale for transitional child care under section 402(g) of the Act, the State may elect to adopt its existing Transitional Child Care scale. As an alternative, it could modify the existing sliding fee scale for Transitional Child Care to provide for a higher income cutoff. This might also be an opportunity for a State that has had the same sliding fee scale in place since the implementation of Transitional Child Care to review the existing scale to determine its effectiveness.

As with Transitional Child Care, we propose at § 257.31(b) to require that all recipients of benefits under this Part make some contribution. In establishing this requirement for individuals just getting off AFDC under Transitional Child Care, we recognized that the contribution from those with the lowest income levels might be no more than a token amount. However, we considered it essential to establish the transitional nature of the benefits and to develop recipient responsibility for self-support.

We believe that the reasons for having a copayment requirement for At-Risk Child Care are the same. Making a copayment, even a token amount, reinforces the sense of responsibility in parents for the care and support of their children. Assuming the cost of child care by increments will enable the family to achieve self-sufficiency gradually.

Section 402(i)(4)(B) of the Act provides that the value of any child care provided or arranged (or any amount received as payment for such care or reimbursement for costs incurred for the care) may not be claimed as an employment-related expense for purposes of the credit under section 21 of the Internal Revenue Code of 1986. However, contributions made by a family toward the cost of care pursuant to the State's sliding fee scale may be eligible for the Dependent Care Tax Credit under section 21 of the Internal Revenue Code of 1986.

Methods of Providing Child Care (§ 257.40 of the Proposed Regulations)

Section 402(i)(2) of the Act provides States with a number of methods to provide child care. These are the same methods that are provided in section 402(g) of the Act for child care for AFDC recipients and former AFDC recipients eligible for Transitional Child Care. Specifically, the State IV–A agency may:

(1) Provide the care itself;

(2) Arrange care through public or private providers by use of purchase of service contracts or vouchers;

(3) Provide cash or vouchers in advance to the caretaker relative so that the child care costs may be prepaid;

(4) Reimburse the caretaker relative for child care expenses incurred; or

(5) Adopt such other arrangements as the State IV–A agency deems appropriate.

The fundamental principle of the right of the parent to choose appropriate child care is discussed in the preamble to the proposed regulations at § 257.41 concerning applicable standards of State and local law.

To insure that each parent does have choice, we propose in § 257.40(b) to require that the State have at least one method of payment by which self-arranged child care can be paid. This requirement is consistent with requirements under parts 255 and 256. Of the four methods specified in § 257.40(a) we believe that two can most effectively be used to ensure parental choice, and we strongly urge that States adopt at least one of these methods. These are providing the parents with cash or vouchers in advance or reimbursing the caretaker relative for child expenses incurred. We elaborate on these below.

Vouchers

Many States are using some form of a voucher/certificate system for child care delivery. This system can encourage parental choice regarding the selection of a provider, while ensuring that the selected provider receives the child care payment from the State IV–A agency (or its agent). In the case of transitional child care or At-Risk child care, the parent's contribution must still be paid by the parent. Vouchers/certificates can increase the parents' responsibility and choice compared to methods in which the State IV–A agency (or its agent) makes payments directly to the child care provider through purchase of service or a contractual arrangement. In order for the voucher/certificate method to afford such choice, it must be possible for the parent to easily obtain it, for the provider to receive timely payment for services rendered, and for the parent to use it with any provider.

By October 1, 1992, any State which receives funds under the Child Care and Development Block Grant Act of 1990 must have procedures in place to provide parents with certificates with which they can arrange for child care. We expect that States will actively explore ways in which a certificate system could be used for At-Risk Child Care as well.

Direct Payments to the Caretaker Relative

The State IV–A agency (or its agent) may pay the caretaker relative directly either by providing payment in advance or through reimbursement. This method of payment maximizes parental choice and responsibility for child care.

Coordination

Section 5081(d) of the OBRA 1990 amends section 402(g) of the Act to provide that activities under section 402(i) must be coordinated with existing early childhood education programs in the State, including Head Start programs and preschool programs funded under chapter 1 of the Education Consolidation and Improvement Act of 1981, and school and nonprofit child care programs (including community-based organizations receiving funds designated for preschool programs for disabled children).

We believe that coordination in planning and delivery of services is essential to prevent duplication, to assure that child care services are available to the maximum number of eligible families, and to provide a viable range of child care options for parents.

One goal of a coordinated service delivery system is to create a fabric of seamless service. Seamless service means providing eligible parents access to and payment for child care services and programs which bridge and supplement the parents' child care needs, even as eligibility changes over time; this is done without the necessity of changing the child care provider. In addition, such a coordinated service delivery system could create a complete day of service for an eligible child when programs do not last for the entire day (e.g., child care services before and after a Head Start class).

Definitions, administrative procedures, and provider eligibility rules which are as consistent as possible should ease the administrative burden on the State and local organizations. They should also enable smooth transitions for families as their situations change over time.

Since States will be required to submit biennial updates of their plans, we expect the coordination specified in this section to be carried out on an ongoing, rather than a one-time, basis.

The proposed regulation at § 257.40(d) contains the requirement to coordinate. In addition to the agencies listed in section 402(g) of the Act, we have added existing child care resource and referral agencies based on the regulations at § 255.9(b). We believe that, as with AFDC child care and Transitional Child Care, this will assist the State IV–A agency to identify potential resources and minimize duplication of effort.

Child Care Standards (§ 257.41 of the Proposed Regulations)

Section 402(i)(5)(E) of the Act provides that Federal financial participation (FFP) is only available for child care that meets applicable standards of State and local law. In the proposed regulations at § 257.41(a)(1), we have added Tribal law because child care may be provided on an Indian reservation, and if Tribal standards exist, they are the applicable standards. In the absence of Tribal standards, State standards would apply unless Tribal areas are excepted under State law.

Applicable Standards

We propose to add a provision at § 257.41(a)(2) to define applicable standards as standards that are generally applicable to care of a particular type in a State, local area, or Indian reservation, regardless of the source of payment for the care. As a similar definition is proposed for addition to the existing regulations at § 256.4(c)(2), this definition of applicable standards applies to all child care funded under title IV–A.

Child care for which there are no applicable standards, i.e., no licensing or regulatory requirements set by the State or locality that specifically regulates child care, is legal care. Under section 402(i) of the Act, such care is available for use by low income working families who need care in order to work and are at risk of becoming eligible for AFDC. For example, if a State does not regulate family day care providers caring for less than three children, such care is legal, and, if the caretaker relative selects that provider, the State must pay for the care. In addition, if a provider is exempt from child care licensing requirements for reasons other than the source of payment, e.g., a sectarian child care center, such care would be legal because there are no applicable standards. Child care for which there are no standards will not be affected by this proposed regulation.

In addition, child care standards that are generally applicable are unaffected by this proposed regulation. Child care provided under section 402(i) is subject to any standard mandated in any law or regulation of the State or locality that generally applies to care of the same type in the State or locality, e.g. center care, group family day care, family day care, and in-home care. For example, we know that all States have child care licensure laws that include standards which address health and safety conditions and other aspects of care provided at child care centers. Since these are standards that have general applicability, they apply to title IV–A child care.

However, some States impose child care standards and regulations on publicly-funded child care that are not applicable to privately purchased care. The question has arisen whether, under title IV–A, a State may deny payment for child care which violates no general child care requirements in the State, but which does not meet an additional set of requirements which apply only to publicly-funded care. The proposed regulation at § 257.41 precludes this. For child care funded under title IV–A, applicable standards include only those that are generally applicable to care of a particular type. A State may not set separate standards which apply only to title IV–A-funded care. If a State has standards which affect only publicly-funded care, and a caregiver of that type of care does not meet them, for title IV–A purposes (under both sections 402 (g) and (i)) that care is still "legal," and the State must pay for that care.

In proposing this policy, we believe that "parental choice" must be a paramount consideration. Just as it is crucial for JOBS participants who attend mandatory work and training activities and former recipients who are eligible for Transitional Child Care to have choice and control over who will take care of their children when the parents must be away from them, it is crucial for families eligible for the At-Risk Child Care program to have choice also. By definition, these families need the care in order to work, or otherwise they would likely become eligible for AFDC. Therefore, it is appropriate that they have the same access to the care provider of their choice that we propose families receiving child care under 402(g) have. Furthermore, it would be antithetical to our overall goal of supporting the family in its quest to remain independent and self-sufficient to interfere in so personal and critical a decision as who will take care of one's children.

Registration

Under section 402(i)(5)(c) of the Act, FFP is available for payments made to a provider (other than an individual caring for members of his/her own family) only if the child care provider is licensed, regulated, or registered. The proposed regulations at § 257.41(a), as discussed previously, address child care licensing and regulatory requirements. Section 257.41(b) of the proposed regulations addresses the requirement for registration.

Although there is no discussion in the legislative history, we think Congress intended the At-Risk Child Care registration requirement to be an alternative to child care licensing and regulatory standards, not another form of them. To interpret the provision otherwise would mean Congress was mandating that States set licensing and regulatory standards for all child care. It is unlikely Congress would do this without an explicit provision. We see the registration requirement as being similar to the registration requirement in section 658E(c)(2)(E) of the Child Care and Development Block Grant Act of 1990. In that provision, the requirement is intended to provide the State with basic information about unlicensed providers so that the State can pay the provider and can furnish the provider with information on training, technical assistance, regulatory requirements, and other topics.

Therefore, in § 257.41(b)(2) we propose that registration procedures must (1) only collect information necessary for the State to pay providers or furnish information to providers; (2) facilitate appropriate and prompt payment to providers; (3) allow providers to register with the State or locality after selection by the parent; (4) be simple and timely; and (5) not exclude or have the effect of excluding any categories of child care providers.

In keeping with our goal of State flexibility, we do not propose to define exactly what constitutes registration. We expect that registration of providers for the At-Risk Child Care program to be a simple process, such as giving the State or locality the provider's name and mailing address. States or localities may also require providers to supply additional information, such as birth date or other identifying data needed to facilitate appropriate payment to the provider, and to allow the State or locality to disseminate information to the provider.

If States wish to require providers to meet standards, such standards must be set as part of the State's licensing and regulatory standards rather than as part of the At-Risk Child Care registration process which is intended only for information exchange with unlicensed and unregulated providers. Some States already have "registration" procedures, either on a mandatory or a voluntary basis. Such procedures may meet the requirements for registration that apply to At-Risk Child Care as described in § 257.41(b) if they are designed only to collect or exchange basic information. However, if a State's registration requirements include standards, they are considered licensing and regulatory requirements, and they do not meet the requirements of § 257.41(b). The State will have to adopt modified registration procedures for unlicensed or unregulated care provided under section 402(i) of the Act.

We propose at § 257.41(b)(1) to require registration before any payment under the At-Risk Child Care program is made. This proposal makes registration under the At-Risk Child Care program consistent with the registration requirement in the Child Care and Development Block Grant of 1990 and will allow States to design compatible procedures. As previously discussed, we expect registration of providers to be a simple process which will facilitate appropriate and prompt payments. Payments must be timely so that providers are not effectively discouraged from offering child care services. Although we are not regulating a time frame between request for registration and payment, States must ensure that it is a reasonable period. Section 257.21(h) of the proposed regulations requires States to specify this time frame in their At-Risk Child Care plans.

We propose to ask States to describe their registration procedures in the State At-Risk Child Care plan at § 257.21(h).

Parental Access

Section 402(i)(5)(C)(ii) of the Act provides that FFP is only available for amounts paid for child care to the extent that the provider of the care allows parental access. We propose to incorporate this provision at § 257.41(c).

We believe that parental access to children within the care setting enhances parental choice and involvement. Parents are concerned about health, safety, and quality of care their children receive; parental access allows them to identify problems and safeguard their children. Moreover, parental access promotes continuity of care between home and the provider.

VOL 56 ISS 122 JE 25 1991 UMI

Reporting Requirements (§ 257.50 of the Proposed Regulations)

Section 402(i)(6) of the Act requires that, beginning with fiscal year (FY) 1993, each State prepare and transmit to the Secretary an annual report on the activities of the State carried out with funds made available under section 403(n) of the Act. Section 402(i)(6)(B) describes the content of the report. It is to contain information on: (1) The number of children served and the average cost, by type of service; (2) the State's licensing and regulatory (including registration) requirements; and, (3) its enforcement policies and practices in effect which apply to child care providers. Section 257.50(a) of the proposed regulations contains the State reporting requirements.

Section 402(i)(6)(B)(ii) of the Act requires information about the criteria applied in determining eligibility or priority for receiving services, and sliding fee schedules. However, as described in § 257.21, we propose to collect that information as part of the State At-Risk Child Care Plan that the State submits in order to provide services. We believe that such information is so fundamental to the way in which the State operates its program that it should be contained in the State Plan. Since we propose to require such information in the State Plan, we do not propose to collect it again in the annual report submitted by the State. This will not affect the ability of the Secretary to report to Congress because the Administration For Children and Families will have copies of the approved State Plans from which to gather the information. Furthermore, it will not affect public review of the information or requests for such information by any interested public agency, because the State Supportive Services Plan is also a public document which can be accessed. We further believe that such an approach is consistent with the statutory provision at section 402(i)(6)(C) of the Act that the Secretary ensure that compliance with the reporting requirements not be unduly burdensome on the States.

Section 402(i)(6)(A)(iii) of the Act requires that the Secretary annually compile and submit to Congress the State reports. In order for the Secretary to comply with this provision, we propose to require States to submit their reports to the Secretary no later than 90 days after the end of the Federal fiscal year for which they are reporting. This provision is contained in § 257.50(b).

Section 402(i)(6)(A)(ii) of the Act requires that the State make available for public inspection within the State copies of each report and provide a copy of each report, on request, to any interested public agency. The proposed regulations at § 257.50(c) contain this provision.

Section 402(i)(6)(C) of the Act requires the Secretary to issue uniform reporting requirements within twelve months after the date of the enactment of the subsection, or by November 5, 1991, for use by States in preparing the information required. To insure that compliance with the statutory requirements is not unduly burdensome on the States, the Department intends to look at existing reporting requirements for child care provided under section 402(g) of the Act and the requirements for reporting under the new Child Care and Development Block Grant in developing these uniform reporting requirements.

Availability of Funding (§ 257.60 of the Proposed Regulations)

Section 403(n)(2)(B) of the Act establishes an annual limitation on the amount of funds appropriated for title IV–A that may be paid to States for expenditures made under the At-Risk Child Care program. Federal funding is available for the allowable expenditures of the program. The term expenditures, which we define as actual cash disbursements, has the same meaning and application as for child care expenditures made under parts 255 and 256. States receive funds for expenditures only. Unliquidated obligations must not be reported.

All 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and American Samoa may operate an At-Risk Child Care program. Because American Samoa does not have an AFDC program, families cannot be at risk of becoming AFDC dependent. Therefore, in the case of American Samoa, implementation of an AFDC program must occur prior to or simultaneous with implementation of the At-Risk Child Care program.

State's Limitation

For purposes of clarification, we will use the term "limitation" to mean a State's portion of funds based on the formula provided in sections 403(n)(2)(A) and (B) of the Act.

Section 403(n)(2)(A) of the Act provides that a State's limitation is equal to a percentage of the total available funds for a fiscal year that represents the ratio of children in the State to the national total number of children. We propose at § 257.60(b) to use the number of children under age 13 as the basis for calculating each State's limitation. We believe this is a reasonable approach since it is consistent with the age limits on eligibility established at § 257.30.

The Act provides that the data on the number of children for determining each year's limitation shall be based on data available for the second preceding fiscal year, i.e., FY 1989 data shall be used in determining funds available for FY 1991. For determining FY 91 limitations, the numbers of children under 13 for the 50 States and the District of Columbia were taken from the Bureau of the Census estimates for 1989.

Annual estimates for Puerto Rico, the Virgin Islands, Guam and American Samoa are not published by the Bureau of the Census. Thus, actual numbers of children under 13 from the previous decennial census report were used. In the future, we will use similar data, or better data, if available, for determining fiscal year limitations.

Maximum Grant

Section 403(n)(2)(C) of the Act provides that the amount not paid to a State in a fiscal year, i.e., the amount representing the difference between the limitation for that year and the total of grant awards made in that year, may be added to a State's limitation for the next fiscal year. For purposes of clarification, the amount available for a fiscal year that represents the State's limitation for that year plus the unpaid amount added from the prior year will be referred to as a State's "maximum grant." An unpaid amount added from a prior year may be added to the State's limitation for the next successive fiscal year only; it cannot be added to a fiscal year beyond the next successive fiscal year.

For example:

State A's limitation for year 1 is $100. It may request grant awards for the fiscal year which in total do not exceed $100. The State, however, requests a total of $80 for year 1. Prior to the beginning of year 2, State A is informed that its limitation for that year is $110. For year 2, the State's maximum grant is $130, i.e., $110 plus the $20 not paid from the previous year. If the total amount paid in year 2 is less than $110, the difference between the amount paid in year 2 and $110 (the year 2 limitation) will be added to the State's year 3 limitation to determine the maximum grant for the third year. If the total amount paid in year 2 is more than $110, no amount from year 2 can be added to the State's year 3 limitation.

Funding for the program is provided under title IV–A of the Social Security Act. Thus, for Puerto Rico, Guam, the Virgin Islands, and American Samoa, funding is subject to the limitations in section 1108 of the Social Security Act.

Grant Awards (§ 257.61 of the Proposed Regulations)

We considered several methods of awarding grants for At-Risk Child Care. For ease of operation, we propose to follow the grant process in effect for child care under Parts 255 and 256, with some modification to reflect statutory differences in funding.

Prior to the beginning of a fiscal year (year 1), a State will be informed of its limitation. We will request that each State supply an estimate of expenditures for each quarter, as funds will be issued through quarterly grant awards. States will report actual expenditures on the quarterly expenditure report. We will adjust subsequent quarters' grant awards to reflect over- or under-estimates in prior quarters' expenditures.

Prior to the beginning of the following fiscal year (year 2), the State will be informed of its limitation for year 2. The amount unpaid for year 1 and the limitation for year 2, will constitute the maximum grant for year 2 in accordance with § 257.60. Quarterly estimates and grant awards for year 2 may not exceed the maximum grant for year 2.

The regulations applicable to title IV–A regarding the availability of funds, e.g., the timely filing requirements at part 95, subpart A, and the method for submitting estimates and making adjustments at § 201.5, will apply to the At-Risk Child Care program.

Matching Requirements (§ 257.62 of the Proposed Regulations)

Section 403(n)(1)(A) of the Act provides that expenditures made under the program are available for matching at the Federal Medical Assistance Percentage (FMAP) rate. This provision pertains to both child care services payments and administrative expenditures made in providing these services. The regulations at § 257.62(b) propose that expenditures made in a fiscal year will be matched at the FMAP rate in effect for that fiscal year.

Use of Donated Funds as Match

Current Administration For Children and Families policy provides, that for the purposes of the AFDC and JOBS programs, donated funds may be used as the State share of expenditures. Regulations at § 235.66 and § 250.73 provide conditions under which donated funds may be used as the State share of expenditures for AFDC training activities and JOBS program activities, respectively. Section G–4000 of part V of the Handbook of Public Assistance provides that donated funds may be recognized as State funds subject to Federal financial participation in administrative expenditures under the State IV–A Plan.

We propose at § 257.62(c) to allow public and private funds to be used as a State's share of matching costs as follows. For public funds, the funds must be appropriated directly to the State or local agency, or transferred from another public agency (including Indian tribes) to the State or local agency and under its administrative control or certified by the contributing public agency as representing expenditures eligible for FFP. They must not be used to match other Federal funds, and may not be Federal funds, unless such funds are authorized by Federal law to be used to match other Federal funds.

For private funds, the funds must be transferred to the State or local agency and under its administrative control. They must be donated without any restriction which would require their use for assisting a particular individual or organization or at particular facilities or institutions, and not revert to the donor's facility or use either directly or indirectly.

We also propose to add § 257.62(c)(3) which provides that any funds received by the State which do not meet the conditions set forth in the regulation but which are used for allowable expenditures of the program must be deducted from the State's total expenditure claims subject to FFP.

In-kind Contributions

The Act does not address the use of third party in-kind contributions as the non-Federal share of expenditures made under the program. We believe that the policy applicable to child care programs under parts 255 and 256 should apply to this program. This has also been longstanding policy under title IV–A. Therefore, the proposed regulation at § 257.62(c)(3) prohibits the use of third party in-kind contributions for use as the State share of expenditures for this program.

Waiver for Insular Areas

The regulation at § 257.62(d) proposes that the waiver provision of 48 U.S.C. 1469a(d) apply to the matching requirement for the Territories of Guam, the Virgin Islands, and American Samoa. Under this provision, the first $200,000 in expenditures made each fiscal year need not be matched. We considered applying the $200,000 waiver in matching requirements to title IV–A expenditures in the aggregate, i.e., for all expenditures under § 403 rather than permitting the waiver to be applied separately to the At-Risk Child Care program. However, since the plan amendment for the At-Risk Child Care program is not included in the title IV–A plan, the program is viewed as distinct from AFDC. Given this distinction and the fact that Congress did not increase the ceilings for Territories as set forth in section 1108 of the Act, we propose to apply the waiver of the matching requirement for the first $200,000 to the At-Risk Child Care program separately.

Allowable Expenditures (§ 257.63 of the Proposed Regulations)

Federal financial participation (FFP) is available only for allowable expenditures of the program. Section 402(i)(3)(B) of the Act provides that the payment for child care shall be in "an amount that is the lesser of (i) the actual cost of such care; and (ii) the applicable local market rate (as determined by the State in accordance with regulations issued by the Secretary)."

Applicable Local Market Rates

We propose to make the regulations at § 256.4 (a)(2) and (a)(3) on local market rates applicable to the At-Risk Child Care program. Under these regulations, the following basic principles apply: Each State IV–A agency must establish local market rates based on a representative sample of providers, obtained in a survey by the State IV–A agency or under an outside survey. Local market rates must be set at the 75th percentile of the rate for the type of care. Finally, local market rates must be determined by type of care such as center care, group family day care, family day care, and in-home care. Rates should be differentiated by care for infants, toddlers, preschool, and school children and whether there are different rates for full-time and part-time care.

We believe that adopting the same provisions for At-Risk Child Care that apply to child care provided under section 402(g) of the Act is appropriate for several reasons. It reduces the administrative burden on the State since it has already established local market rates for AFDC and Transitional Child Care. Further, we believe that since the terminology used in section 402(g) and section (i) are exactly the same, it was Congress' intent that the rates be the same. This is also supported by the conference report which agrees to follow the Senate amendment which provides that rules relating to Federal matching rates, reimbursement, standards, and fee schedules would remain the same as in current law. H.R. Rep. No. 964, 101 Cong., 2nd Session 921, as reprinted in 1990 U.S. Code Cong. and Admin. News 2374, 2626. Finally, we

VOL 56 ISS 122 JE 25 1991 UMI

continue to believe that the 75th percentile represents a reasonable definition of market rate and a reasonable balance between concerns about fiscal accountability and access to child care.

We are aware that there are a number of misunderstandings regarding our policy that the local market rate is to be set at the 75th percentile. As we are using the same definition for local market rate for At-Risk Child Care, we want to reexplain the policy. When we first considered the requirement in connection with IV–A child care, it seemed obvious that if actual cost was to be paid only up to the local market rate, the actual charged costs for some child care would be more than the local market rate. It also seemed logical that in referring to a "market rate", Congress was intending to maintain fiscal responsibility and limit payments to amounts generally charged because of competition in the marketplace. This is the common understanding of a "market rate". Thus in defining the local market rate it was necessary to develop a method for distinguishing between the amounts generally charged for child care and amounts which exceeded what was generally charged. In other words, we wanted to develop a method which would allow States to pay the amount generally charged for child care, so that most caregivers would be included, without allowing or requiring them to pay for care which was much more expensive.

In developing this method, we first considered using the average cost of child care in an area. However, the average cost, by definition, would be in the "middle" of what is charged or around the 50th percentile. Because it is in the "middle", we realized that setting the local market rate at the average cost could have eliminated many child care providers, possibly even up to half of those in an area, including many who charged only slightly more than the average cost. We did not want to restrict the supply of providers in this fashion as we wished to allow States more flexibility in who they could pay and we wished to allow parents a real choice in providers. We decided to set the "local market rate" at the 75th percentile as it would include most providers in any given area but would prevent the inefficient use of public funds by restricting payment to those providers charging the more expensive or excessive amounts. A discussion of how the 75th percentile is calculated can be found in the preamble to the final JOBS and Supportive Services regulation at 54 FR 42228–29.
